ing a gross insult to the First King of Siam, and a personal assault of the most degrading character on his Majesty's cousin, the Chief Judge. Of provocation there appears to have been literally none. Taking up the quarrel of a French priest, who had come to him with a petty, or perhaps, altogether imaginary grievance, he forced upon the King an insolent demand for an apology, and for the dismissal of a native noble from his post, and followed this up by a most unjustifiable threat of violence. And, notwithstanding the pacific attitude and the great and praiseworthy moderation displayed by the King, in sending one of his own relatives to the Consul with the view of effecting an amicable arrangement, M. Aubaret, having worked himself up into a fit of ungovernable fury, refused to listen to reason, and completed the catalogue of outrages by a brutal assault on the King's Envoy. Considering we presume, that his own honour, the dignity of his religion and the glory of France were then sufficiently vindicated, the Gallic hero took his departure from the scene of these exploits, and started for Europe; doubtless, looking forward to receiving favours and congratulation from his Imperial master. In this, we trust, he will be disappointed. Whatever aspirations after further conquests in the Far East may lurk within the Imperial breast, we cannot believe that advantage will be taken of such a pretext as this to gratify them, or, indeed, that such a gross breach of decorum will be allowed to pass unpunished.

CHINA SILK IN FRANCE.

This is the period of the year at which the silk trade is expected to be brisk in France, and during the latter half of October there was a remarkable improvement in the Paris trade, and a great increase in the quantity of silk which passed through the hands of the officials who are entrusted with the delicate duty of testing the condition of the material at Lyons. It may here be mentioned that the system employed at present in France in order to get rid of superabundant moisture, and thus fix the true weight of the raw material, is very different from that employed in Italy and formerly in France; that method consisted in keeping the silk for forty-eight hours in a stone-room of a given temperature,—the plan now adopted in France being to submit the silk to a current of hot air, by which means the silk is dried to the normal point in thirty or forty minutes. The officers who thus test the condition of the silk at Lyons publish an official account of the quantities which pass through their hands, and the returns for the past month are deserving special attention. They are as follow:—

October.	Bales.		Kilogs. = 2 1-5th lb.
1st week	691	=	45,023
2nd „	695	=	46.843
3rd „	1,229	=	77,530
4th „	1,106	=	68,190

The increase during the month speaks for itself, and requires no comment; but the amounts of the two latter weeks, when compared with the like official figures for last year, also exhibit a marked increase. The figures are as follow:—

October.	1864. Kilogs.		1865. Kilogs.
3rd week	56,830	.. ..	77,530
4th. „	48,037	.. ..	68,190
	104,867		145,720

being an augmentation of nearly fifty per cent. We have not at hand the returns of 1864 for the former half of the month. This increase is entirely to the advantage of Chinese and Japanese silk, which are represented by the number 667, against 439 parcels from other parts. At Lyons, in the Drome and elsewhere, these silks are considered to be the only ones which at present offer a chance of profit, and the promised arrivals are therefore anticipated with considerable interest. There does not seem to be any fear entertained that the quantity *en route* will overbear the market; nevertheless, the caution which we threw out respecting consignments some weeks since may still not be out of place.

The appearance of cold weather was doubtless the immediate cause of the improvement which we have referred to above, by causing winter goods to move off briskly. The long persistence of fine weather had delayed the movement which was otherwise withheld by the scarcity of the raw material. At Aubinas, the other day, all the silk in the market was bought up, and more demanded; at Cavaillon the dealers paid almost any price asked; at Marseilles it was nearly the same; and at Lyons the prices of the raw material have been from 25 to 40 per cent. higher than they were two years ago. The accounts from Italy are somewhat contradictory. At Milan business is brisk with Germany, England, and Switzerland; from Bergamo and Brescia the accounts are favourable; while at Genoa they complain that there is no demand except for immediate wants; and at Udine that there is nothing doing at all, the prices being so high as to be a great obstacle to consumption.

Our correspondent "Kioto" says, truly enough, in reply to an article which we quoted from the *Economist*, that the dealers in silk are still possessed of very large money capital. This is undoubtedly true, though the ruin of the growers of mulberry trees and of the rearers of silkworms is well nigh complete. It is equally true also that while the crop of French silk was abundant the merchants were not likely to go to China for what they could get at home. It must be remembered, however, on the one hand, that recent events in China and elsewhere in the Far East, and the efforts of the *Messageries Impériales*, backed by the Government, have had something to do with the matter; and, on the other, that, although there is rather a fierce debate on the subject in France, M. Guerin Meneville, who has worked so long for the introduction of foreign worms in order to supply, in part, the deficiency arising from the failure of the European worms, declares it to be his firm conviction that the disease is approaching its termination. M. Guerin-Meneville is a distinguished entomologist, and his opinion is important. Moreover, he has an extensive knowledge of the silk cultivation in France, and his main argument is simple and rational—the old disease which used to attack the worms is re-appearing, therefore the normal condition is probably returning. The scourges which attack the materials of man's industry are unfortunately numerous, but after the disappearance of the potato and the grape diseases, he would not be a wise man who calculated on the silkworm disease, and consequently the scarcity of European silk, continuing much longer.

HIEN FUNG'S TOMB.

A Correspondent of a French journal gives the following account of the tomb raised to the memory of the late Emperor of China, which, he adds, is to be inaugurated on the 10th of November. We have not seen the description before, and we give it for what it may be worth. The monument consists of a magnificent block of black granite (is there such a thing as black granite?) more than thirty feet high, and forty-five feet long. (It is a pity that the thickness is not also given, because we could then calculate the weight pretty nearly, and might learn afterwards what system the Chinese had adopted for the transport of this monolith, which was not *growed*, as Topsy suggested to herself, on the spot.) A series of galleries or passages are excavated in the block and lead to the sepulchral chamber in which the Imperial ashes are deposited. From the door of the monument, throughout the whole extent of the interior of the mausoleum, the walls are covered with characters sunk in the stone and encrusted with gold; these characters give the history, in outline, of the present dynasty, which commenced to reign in 1644, and detailed biographies of the late Emperor and of his father Tao-Kouang. This portion of the work was directed by Fann Ouang, a celebrated servant who fills the office of Court Chronicler. Over the entrance to the monument the Imperial dragon with five claws is sculptured in the stone itself. The mausoleum will be closed by two doors, an outer one of brass, and an inner one of solid silver. The reigning Emperor will keep the key in his own possession. Those members of the Imperial family, to whom the Emperor shall give permission, may visit the mausoleum after its inauguration; but should any other mortal succeed in opening the brazen and silver doors, slip through the keyholes, or in any other manner introduce his unimperial person within the precincts of the sanctuary, he will be immediately put to death. This magnificent sepulchre is placed in a grand pagoda, constructed expressly for its reception, in the vast temple of Long-fou. The monolith was roughly worked in the quarry from which it was taken, situated at the distance of about seven miles from Peking. This was done in order to reduce the weight of the block; but even then it required, we are told, six hundred oxen to draw the car upon which it was placed.

The transport of the Luxor obelisk, which stands in the *Place de la Concorde*—where, by the way, it is out of harmony with everything that surrounds it, and cuts in half both the Tuileries, at one end of the Champs Elysées, and the beautiful *Arc de Triomphe* at the other end, in the most provoking manner—and the setting it up in its present position, was thought such a wonderful achievement, that the tackle and

Digitized by Google

other means employed are cut in gilt characters on the base on which it is reared, and models of the same are placed in the museum of the *Conservatoire des Arts et Metiers*. But the mausoleum of Hien-Fung must outweigh half-a-dozen such obelisks. We wish some of our correspondents would send us a scientific account of this marvellous monolith, its fabrication, ornamentation, and transformation. The Chinese bamboo scaffolding is certainly the most admirable in the world; the model shown at the Great Exhibition of 1862 attracted the attention of all engineers and constructors, and was afterwards very properly placed in the Woolwich Museum; who knows but that the mausoleum may not supply our scientific men with a few good practical hints.

THE TROOPS IN CHINA.

(Army and Navy Gazette.)

English troops in China seem to be in a bad way just now, and, considering they had barely got half way through the hot season by last accounts, there is every prospect of a gloomy sanitary report for the year 1865. The over-crowded state of the General Hospital in Kong Kong recalled to mind Scutari in the bad days of the Crimean campaign. Cholera, fever, and sunstroke were tolerably active, and reaping a good harvest. There is a mistaken notion here that China is no longer an unhealthy station, and that European troops are perfectly able to carry on the duties required of them there as elsewhere. By way of an experiment, and with a view of reducing the military expenditure, the authorities at the commencement of the year determined on withdrawing the Indian troops, who have hitherto proved themselves most useful on the station. Strong but unavailing remonstrances were made at the time by all the senior and experienced officers in the command, but the War-office turned a deaf ear to the voices. If more troops were positively wanted another European regiment should be ordered to Hong Kong; but the Indian troops must be got away *coute qui coute*. There was no help for it; the orders from England were so positive that shipping was immediately taken up, and off they went. This was about the end of April, and at the very commencement of the hot season. One regiment was left to perform all the duties and furnish the numerous guards, public offices, dockyards, commissariat, magazines, and the pestilential settlement across the water on the mainland, viz., Kowloon. The result was not slow in showing itself; the men fell ill, the hospitals filled fast, and those who managed to get through their tour of duty returned to their barrack rooms so exhausted that nothing else could be expected of them till their turn came round again. In England, and in a healthy climate, the average number of nights a soldier is supposed to get in bed before his turn comes on for the usual twenty-four hours' duty again runs from six to eight or nine days at least—at any rate rarely less than five; in Hong Kong, a notoriously unhealthy station for six months in the year, the average number has been three at the utmost throughout the hottest and sickly months. The arrival of the 2nd battalion 11th Regiment, from the Cape, about the end of May, was hailed with delight; but this pleasing prospect of a change for the better to the corps who had hitherto carried on the whole duty since the departure of the coloured troops was but of short duration. The authorities, in their eagerness to get away the latter, seemed quite to have overlooked the important question of barrack accommodation. Nothing was more natural to them than that, on the principle of one nail driving out another, the European would simply supplant the Indian regiments. They sat down, rubbed their hands with satisfaction at having at last attained their desired object—viz., riddance of the Indian scale and allowances for officers and men—and with one stroke of the pen cut away everything, commencing with the commanding officers of corps, no less than £3 a-day, or £1,100 a-year—surgeons, majors, and paymasters at the same average sweeping scale—and as to the captains, they were quickly disposed of by jumbling them up together with the lieutenants and ensigns, and were directed to make the best of their 10s. a-day. Leaving such a cruel injustice to speak for itself, which anybody at all acquainted with the exorbitant price of living in China will perceive at a glance, let us return to the newly-arrived corps at the station, and the question as to where it was to be put up. It would simply have been madness to put away white troops in huts at the hot season of the year, although they were found to be admirably adapted to the requirements of the sepoys; the only barracks which existed were even then so overcrowded that two companies of the 9th Regiment were forced to occupy the huts at Kowloon. There was an old hulk in the harbour, the *Hercules*, which had hitherto served as a floating convalescent depot for the troops, but on being overhauled her bottom was reported to be so rotten that she was condemned as unsafe. It was a case of Hobson's choice, and the fever-haunted huts over on the Kowloon side were fixed upon, whilst the local authorities exerted themselves in running about the town and hiring, at an unavoidably exorbitant rate, everything in the shape of a house they could lay hands upon. Fortunately, trade in China being slack this year, merchants were only too glad to let their godowns and warehouses at their own price, wisely concluding that though British soldiers were not quite so remunerative as cotton bales or silk, they were better than nothing at all, especially as they had nothing to do with their packing, insurance, &c., &c., and could make what in "business" language is called a good squeeze out of Government. The regiment eventually shook down here and there, many betaking themselves to the hospital; but how far beneficial it has been to the rest of the garrison was difficult to say, as the burden of guards seemed to fall as heavy as ever. There were no less than 245 in the last return of patients in hospital, and those who were not stalked about wan and worn like spectres. It has been stated that this year Hong Kong is unusually unhealthy; but there can be no doubt as to the main cause of all this disaster. The climate during the hot season is too severe for European troops. Assisted by an Indian regiment, they may get through tolerably well; but unaided they cannot, and never will. It is to be hoped, therefore, that the authorities will lose no time in remedying the mischief which has been so painfully brought before them in every report that has been sent home. Even in a pecuniary point of view thousands of pounds have been lost; the expense of maintaining an Indian regiment is far less; the sepoys require less comforts, keep better health, and consequently are able to get through more work than the finest British regiment that ever landed in the station. The saving to Government of the difference between Indian and English allowances makes but a small item in the balance when it is thrown against an increased number of white troops, losses from death or invaliding, not to speak of the already mentioned barrack accommodation, which alone entails an extra expense of £20,000 per annum. The chief drawback to the sanitary improvements of our forces in China has been the want of some recruiting station on the same principle as "the Hills" in India. This has at last been procured in Japan. It now only remains to see whether the British Government will avail itself of such an excellent opportunity. Hong Kong is within easy access of this bracing climate, a matter of something under the week in an average steamer. A regiment consequently could be easily moved up and down once a year at a, comparatively speaking, trifling expense, the more so as our relations with China and Japan necessitate the keeping up of a large and expensive fleet, which as a rule remains inactive for many months in the year—which could easily afford detaching a vessel or two for a month, at the outside, out of the twelve, on such an expedition.

A CHINESE STATE DINNER.

The last mail from San Francisco brought accounts of a grand dinner given by the Chinese merchants. Colfac's tourist party were entertained at dinner while at San Francisco by the six companies of Chinese and the merchants' committee. The chairs and side tables were hung with scarlet coverings, embroidered with gold, and the dinner-tables adorned with fresh flowers in regular Oriental style. The dinner proper consisted of 336 dishes, forming 130 courses, and, divided, comprised three distinct sittings. At the first sitting the courses consisted of soups and almost numberless "made dishes," into the composition of which entered fish, flesh, fowl, and vegetable substances in a thousand forms undreamt of to French cooks and Caucasian housewives generally. The famous "bird-nest soup," which was pronounced delicious by all who partook of it, and a vast number of sweatmeats and preserves of different fruits, were included in these courses. No knives, forks, or spoons of our patterns were upon the tables at the first two sittings, chop-sticks and the short thick China spoons or scoops being what each guest was expected to help himself with. The efforts of the uninitiated guests to master the chop-sticks and convey the food to their mouths with them created a vast amount of amusement to the company, and sometimes not a little mortification to the most awkward of the party. Some of the guests soon got "the hang of the things," while others, after repeated failures, gave up the attempt, and contented themselves with spearing the morsels of food with a single stick, as an Esquimaux would harpoon a walrus, or a schoolboy impale an unlucky blue-bottle on a pin. Champagne, claret, and the finer qualities of Chinese rose-coloured wines were served in profusion with every course. At the last sitting fruit only was served, all the varieties in the market being included in the list. At the end of each sitting the tables were entirely cleared, and the company adjourned to the reception room to smoke and pass away the time until the next was announced. At the end of the first sitting the six presidents paid their formal compliments to Colfax and party, thanking them for their attendance, in Oriental style, through their interpreter, and receiving the thanks of their guests in return, and then took their leave according to the "statutes in such cases made and provided," and everywhere recognised as rules of action by the Chinese. A Chinese band was now introduced, and the guests were much amused and interested by their peculiar performance, until the tables were ready for the second sitting. During the second sitting a deputation of the merchants approached Colfax and Governor Bross, and presented their compliments, welcoming them to the feast, and expressing their appreciation of the honour done them by their presence. The gentlemen replied in short speeches, which were translated by the interpreter, and the merchants then retired. At the end of this sitting the company were entertained in the reception room with a Chinese historical recitative song, accompanied by the music of a full band; and six visiting cards conveying the compliments of the six companies were presented to Colfax "for his high consideration." At the end of the third and last sitting a committee of the companies again approached Colfax and party, and repeating the thanks for the honour of their company, expressed their regret at not being able to furnish a more sumptuous repast. Colfax returned thanks for the honour done himself and friends, and said he was unable to conceive of a possibility of a more sumptuous repast being provided. A general shaking of hands and exchange of compliments followed, and the company separated at 12 o'clock—the dinner having occupied a few minutes less than six hours.

THE SILK TRADE—FRANCE v. ENGLAND.

(To the Editor of The London and China Telegraph.)

SIR,—In continuation of my letter dated the 20th October, which you had the goodness to insert, I will now discuss the remaining part of the *Economist's* paragraph, which attracted my attention, viz., "According to all appearances, then, the English will retain possession of the silk trade in Asia, provided they do not act in such a way as to render this monopoly absolutely intolerable, in which case they would have to fear that the Government would make up for the lack of means and energy of merchants by, as the phrase goes, doing something itself."

The time has, I think, passed away in which the English can retain possession of the silk trade of Asia. The knell of this supremacy was sounded by the Treaty of 1860, which gave up to France the possession of the English market for manufactured silk goods. The home silk manufacture has been almost annihilated by it, and the Manchester men who so eagerly demanded the application of free trade to this tender exotic have probably suffered more severely from it than any other branch of the trade.

There can be no doubt of the fact, that it was the English home trade, which up to the year 1845 had nurtured the growth of our silk trade with

Digitized by Google

China and India. Up to this time almost, the great Anglo-Asiatic commercial houses looked exclusively to the home trade for customers.

In those days, nobody heard of the French and Italians in the London market, except as *sellers* of continental grown silk, which was frequently so reasonable in price, and of such excellent quality and fineness of size, as to offer a very rude competition to importations from Asia.

All this is now changed, and the foreign manufacturers, say of France Germany, Switzerland, &c., who nearly up to 1845 had disdained the use of China and Bengal silks, have since then become clamorous for that Asiatic silk, the intrinsic worth of which had been gradually forcing itself upon their unwilling attention. In the meantime the Emperor of the French, with that prescience of the future which distinguishes so highly his motives of policy, had decreed that France should be enabled to offer all those commercial facilities which hitherto had almost exclusively belonged to England.

He found London the money market of the world, but he has already compelled her to cede some of this renown. London had her bonded warehouses and the dock warrants on which money could be borrowed. France, was without these vital aids to distant commerce. The Emperor determined that this should no longer be a reproach in his time, and forthwith imposing warehouses of the most solid construction, backed by every facility for the hypothecation of the contents, was the next lure by which the commerce of the Orient should be woed to the shores of France.

Though much had been done, it still remained for the key-stone to be put in the arch, and one day, the great subsidised steam mail lines of England learned that the French Emperor was determined to share with his ally the dominion of the ocean postal service. To guarantee to France the effectiveness of this costly advantage, a subvention, double that paid by England, was granted to the companies which boldly undertook to work out the Imperial views. The French mail packets now perform a through monthly service between Marseilles, India, China, and Japan, and the return cargoes can be landed and stored at Marseilles.

This produce can remain there free of expense for one clear month, during which the French manufacturers can take their pick (and do so), and the residue can then be forwarded free gratis to London. Such facilities were never offered by the great steam companies of England. Indeed, being without competitors in Eastern traffic, probably no occasion had arisen.

London being the only money market, and the British the only merchants of great repute in the Far East, the rich cargoes of India had to knock at the doors of the mail service, and ask the favour of being carried to Southampton.

The freight rates, though heavy, were seldom grumbled at, provided the Goliath Company kept faith, and did not leave the stuffs by the way, in order to make room for still better custom coming from elsewhere.

The Emperor of the French having thus consolidated, within his dominions the appliances required for the development of commerce with Asia, had not to wait long for satisfactory signs that the adventurous spirit lying dormant in the French people had at length been evoked. His joint expedition with the English to Peking was a master-stroke of policy, and the spoils of the Summer Palace awoke in France a determination to emancipate the commerce of the country for the dominating influence of any other nation.

During the last season of 1864-1865, the number of silk bales which passed through Shanghai to Europe was 51,612. Of this quantity above one-fifth was shipped by foreign houses, some of whom had only been recently established in China. In Japan, the proportion was still greater. Of the total shipments from there, at least one-fourth was effected by houses not English, and late advices point to the fact that the English commercial element could with difficulty encounter the fierce opposition of Continental buyers in the scramble for silk at the open ports.

To the writer it has been for some time a grave question how long the English can retain possession of the silk trade in Asia. Of one thing he has no doubt, viz., that his countrymen who have hitherto conducted the trade of the Far East have deserved well of Europe; but of their ability henceforth to maintain the position of pre-eminence hitherto enjoyed he must be permitted to doubt, now that the French, German, Italian, and Swiss elements have been so largely introduced into the East by means of the agencies called into action by the French Emperor.—I remain, Mr. Editor, your faithful servant,

KIOTO.

Macclesfield, Nov. 1, 1865.

FREIGHTS AND CHARTERS.

In outward freights we have nothing of importance to remark. Homeward, business still continues much restricted.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £2. For Shanghai: £5 and £2. 10s. For Manila: 32s. 6d. to 35s. For Batavia: £30 and 27s. For Singapore: £32 and 30s. For Galle: £28 and 27s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 214 tons naval stores from the River Thames to Hong Kong.

CASUALTIES.

The Dordrecht, Loos, from Rotterdam for Batavia, put into Portsmouth Oct. 30, leaky.

The Jeannette, Cornelia, from Rotterdam for Batavia, was assisted into Ramsgate Oct. 31, having slipped from an anchor and chain to avoid collision.

Advices from Helsingfors under date 24th Oct. state that the Bedford, Natrass, from Cronstadt to the Amoor, which capsized W.S.W. of Porkala on the 20th Oct., and afterwards drifted on Gasansudd, had struck on the Soderska rocks; part of her cargo has been saved, and endeavours are being made to get the ship off and tow her into harbour.

The Kew Kee, Fuller, from Liverpool for Shanghai, which sailed from Rio Janeiro 23rd Sept., after repairing, put back Oct. 6, the master declaring that the ship has "not the necessary nautical qualities for the voyage."

MISCELLANEOUS.

NOTICE TO MARINERS.

China:—West Coast of Formosa.—Reported Danger in Fermosa Channel.

Information has been received at the Admiralty that Capt. Richer, of the French ship Immaculate Conception, recently arrived at Havre, when navigating the Channel between the Pescadores Islands and the West Coast of Formosa, saw an extensive line of high breakers in about lat. 23.45.50 N., lon. 120.2.20 East of Greenwich.

Vessels navigating this channel should do so with caution, for there is still a large extent of ground not sounded over, and a doubtful danger is marked on the Admiralty chart at 11 miles west of the position of the above breakers.

This notice affects the following Admiralty Charts:—Formosa Island, No. 1,968; China, general, No. 1,262, and China, East coast, sheet 4, No. 1,760.

Loading at Chinchas: Sept. 18, for China, Hortense Dusautoy and Antonia.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 280 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

ASIATIC BANKING CORPORATION.—

Incorporated by Royal Charter. Authorised Capital, £2,000,000. Paid-up Capital, £500,000.

Head Office—No. 4, Lombard-street.

Agencies and Branches are established at Bombay, Calcutta, Singapore, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant drafts and negotiate bills of exchange payable at the above places, issue letters of credit, and conduct every description of banking business connected with the East. They effect the purchase and sale of Indian securities, the receipt of dividends, &c., and undertake the safe custody of securities. They also receive deposits, bearing interest, for fixed periods. Rates of interest and exchange may be ascertained at the Head Office.

Merchants' orders executed with despatch.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

THE CAPE, INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

CAPE COLONIES, INDIA, CHINA, AND JAPAN.

TERMS:—One-half the estimated cost to be remitted with the order, and the balance on receipt of Bill of Lading and Invoice.

Commission, 2½ per cent. on Orders over £50, and 5 per cent. on amounts under £50

Orders and remittances should be addressed to the MANAGER.

Office, 12, George-yard, Lombard-street, London, E.C.

SECRETARY (pro tem.).

G. S. Ullathorne, Esq.

TEMPORARY OFFICES.

9, Mincing-lane, London.

PROSPECTUS.

This Company is established for the manufacture and sale of articles chiefly of domestic use, and mostly protected by Patents, and will comprise within its operations —Improvements in the construction of dwellings, and in their lighting, ventilation, and drainage; the preparation of all descriptions of food; the manufacture and economical use of fuel; and the most recent improvements in kitchen and other household furniture.

The Company will also assist inventors, by procuring patents for them—by purchasing the right of selling their inventions—or by selling the inventions and paying the patentees a royalty—and in other ways generally promote their interests, and develope ingenuity, which in many instances is hidden from the want of means to make it known.

The Directors have already secured the nucleus of a business which promises to be very profitable, having provisionally purchased the exclusive right to a new system of preparing American and Australian beef and mutton, so that it becomes as easily cooked and as palatable as fresh meat; also to a newly-invented Portable Roasting Oven, which will economise half the fuel now used; to an Improved Portable Romford Boiler, adapted for the army, navy, and private use; and to a newly-invented Stone Stewpan, and a Cooking Range.

Besides the above there are several valuable patents offered to the Company, and as soon as it is formed, the merits of these will be duly considered, and if found desirable will be acquired by the Company. In the meantime those already acquired will produce immediate returns.

To show the value of the first of these patents, the Directors need hardly allude to the disease in cattle, and consequent dearness of meat, which is likely to cause much distress among the poor this winter, and for some time to come; the Company will shortly be enabled to sell at a low rate, still leaving a very large profit to the Company, 28 lb. boxes of beef and mutton prepared as a wholesome and palatable food without bone; and as each piece of meat will be carefully and separately examined, there will be no risk of bad meat being sold. It is a preparation invented by Mr. Warriner, who, as instructor of Cookery to the Army, has had full means of testing its value, which is 15% per cent. more than ordinary English Beef.

The Directors deem it most advisable for the present not to manufacture all the various articles, but to contract with manufacturers to supply those which they deem inexpedient to make themselves.

The Memorandum and Articles of Association, which comprise all the intended operations of the Company, can be seen at the Solicitors' and the Offices of the Company.

FORM OF APPLICATION FOR ORDINARY SHARES.

To the Directors of the Household Patents Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of 5s. per Share on Shares in the above Company, I hereby request you to allot me that number, and I hereby agree to accept such Shares, or any less number you may allot to me, and to pay a further sum of 5s. per Share on every Share which may be allotted to me within fourteen days from the date of allotment, together with all future calls thereon; and I authorise you to place my name on the Register of Members for the number of Shares so allotted to me; and I agree to sign the Articles of Association of the Company when required. I further authorise you to forward by post to my address as below the certificate for any Shares which may be allotted to me.

OFFICES—17 and 18 CORNHILL, E.C.

PROSPECTUS.

The marked success which has attended the operations of the Credit Foncier and Mobilier of England (Limited) is almost unexampled in the history of any commercial undertaking.

The results of its operations have been so satisfactory that, as will be seen by the half-yearly report just issued, a dividend and bonus, up to the 30th September, at the rate of 40 per cent. per annum, has been declared, being the same dividend and bonus as was paid for the previous half-year.

Besides these unprecedented results, the Company is in the possession, up to 30th September, of a general reserve fund of £200,000, of a dividend reserve fund of £100,000, and has profits in hand up to the same period, after paying the above-mentioned dividend and bonus, of £50,805. 4s. 9d., the paid-up capital being £500,000, making in all £850,805. 4s. 9d., or above £8. 10s. per share.

The following is the business transacted by this Company:—

This Company negotiates Loans for Colonial and Foreign Governments.
Co-operates in the financial arrangements of British and other Railways.
Makes advances to Corporations, Town Councils, and other public bodies.
Negotiates Loans for Public Works.
Assists in the introduction of Industrial and Commercial Undertakings.
Makes advances upon approved Stocks, Shares, Bonds, &c,
Makes temporary loans upon eligible freehold and leasehold securities, and generally transacts such other financial business as is suitable to the capitalist, whether as principal or agent.

The greatly increased and still increasing amount of business offered to this Company, both by eminent private firms, companies, and corporations, has decided the Court of Directors to make their second issue of shares, by allotting the remaining capital of the Company, consisting of 100,000 new shares, on which £5 per share only is intended to be called up.

These 100,000 new shares the Directors propose to issue as follows, viz.:

50,000 shares will be issued to the shareholders in this Company who stand registered on the books of the Company, to be allotted to them at a premium of £2. 10s. per share, in the proportion of one new share for every two shares now held; and

50,000 shares will be issued to the general public (including such shareholders as may wish to apply for shares in addition to those they are entitled to as shareholders), to be allotted at a premium of £3. 10s. per share.

The premiums to be received upon this issue will amount to £300,000, which will be added to the £200,000 already standing at the credit of the general reserve fund, and will thus increase that fund to £500,000. The dividend reserve fund being £100,000, the paid-up capital will then be £1,000,000.

The new Shares will be paid up as follows:—

On those issued at £2. 10s. per Share premium to the Shareholders:—

£1 0 0	per share on application; being on capital account.
1 10 0	per share on allotment; £1 being on capital account, 10s. on premium account.
2 10 0	per share on 1st January, 1866; £1. 10s. being on capital account, £1 on premium account.
2 10 0	per share on 1st March, 1866; £1. 10s. being on capital account, £1 on premium account.
£7 10 0	being £5 capital, £2. 10s. premium.

On those shares issued at £3. 10s. per share premium to the general public, the following will be the mode of payment:—

£1 0 0	per share on application; being on capital account.
2 10 0	per share on allotment; £1 being on capital account, £1. 10s. on premium account.
2 10 0	per share on 1st January, 1866; £1. 10s. being on capital account, £1 on premium account.
2 10 0	per share on 1st March, 1866; £1. 10s. being on capital account, £1 on premium account.
£8 10 0	being £5 capital, £3. 10s. premium.

These 100,000 new shares will participate in the next distribution of profits, pro rata with the existing shares, according to the amount of capital paid up thereon; the valuable option will be, however, reserved to the holders of these shares of paying upon any of them the whole of the above instalments at any time previous to the date of the last instalment, viz., 1st March, 1866, on paying the Company back interest from the date of such payment to 30th September last, at the rate of 20 per cent. per annum on the £5 on capital account; the shares so paid up to be then entitled to the same amount of profits next half-year as is declared on the existing shares.

Interest at the rate of 20 per cent. per annum will be charged on all instalments not punctually paid; and any instalment not duly paid will render the previous payments liable to forfeiture.

The Directors are aware that in thus admitting the public to subscribe for shares at a price so much below their real value they are departing from the practice generally adopted in an issue of new shares, of offering the whole of them to the shareholders; but the Directors are so impressed with the importance of increasing the area of influence of this Company—influence second only in importance to capital to a Company like the Credit Foncierd and Mobilier of England—and have had such proofs in the result of the issue of shares a year ago of the sound policy of admitting the public to a participation in such issue, that they feel confident of obtaining the approval of the shareholders in the course they have adopted.

The following calculation will guide investors in estimating the intrinsic value of the shares, after the dividend and bonus now declared are paid, and when the issue is completed:—

The capital paid up will amount to	£1,000,000	0	0
The General Reserve Fund ...	500,000	0	0
The Dividend Reserve Fund...	100,000	0	0
In hand, profits not divided ...	50,805	4	9
	£1,650,805	4	9

Equal to above £8. 5s. per share on the whole 200,000 shares.

So that the public, on subscribing at £8. 10s. per share (being £5 capital and £3. 10s. premium), are being admitted partners in this Company by only paying 5s. per share premium, as premium; £8. 5s. per share being actually represented in value in the assets of the Company. Over and above these advantages, there is the probable enhanced value which will attach to these shares, in the same way that the shares issued to the public at £2. 15s. 4d. premium in September, 1864, after having received £1 per share in April last as dividend and bonus, are now worth £5. 5s. per share premium, making together £6. 5s. for what they paid £2. 15s. 4d. for, being in one year more than 140 per cent. increase in value on the amount paid for premium.

The Directors feel that with a paid-up capital of £1,000,000, a general reserve fund of £500,000, a dividend reserve fund of £100,000, making a total of £1,600,000, they will be in a position to meet the exigencies of any business that may be brought before them; it is, however, the intention of the Directors to increase, out of future profits, the dividend reserve fund to £200,000, being in accordance with the plan announced in the last report, to have always in hand one year's minimum dividend at 20 per cent. per annum, calculated on the amount of the capital paid-up for the time being.

The Directors further wish to place on record their deliberate opinion and conviction that this Company is destined in a very short period to take a foremost place among the leading monetary institutions of the country.

Applications for shares may be made in the form annexed, and must be accompanied by the payment of £1 per share. Should a less number be allotted than is applied for, the sum paid on account of such application will, so far as it will extend, be applied in payment of the sum due on allotment.

Prospectuses, forms of application for shares, and copies of the half-yearly report, just published, may be had on application to the Bankers, Solicitors, Stock Brokers, or of the Secretary at the Offices of the Company, 17 and 18, Cornhill, E.C.

The lists of application for shares will be closed on Thursday, the 2nd November, at 4 o'clock, for London, and on Friday, the 3rd November, at 12 o'clock, for country applications, before the expiration of which time all applications must be made.

London, October 20, 1865.

Form C.—General Public.

17 and 18, Cornhill, London, Oct. 24, 1865.

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

At a MEETING of the Shareholders of this Company, held THIS DAY (Tuesday), the 24th October, 1865, at 11 o'clock A.M.,

The Right Honourable JAMES STUART WORTLEY, Governor, in the Chair,

It was proposed, seconded, and carried unanimously:—

That the Balance-sheet and Report be, and are hereby approved, confirmed, and adopted.

It was also proposed, seconded, and carried unanimously:—

That the best thanks of this Meeting are due, and are hereby given, to the Governor, Deputy-Governors, and Directors, for the great care and attention they have given to the interests of the shareholders, and for the extremely satisfactory results which have arisen therefrom.

It was also proposed, seconded, and carried unanimously:

That the cordial thanks of this meeting are eminently due, and are hereby offered, to Albert Grant, Esq., M.P., the managing director, for the talent displayed by him in the administration of the affairs of the Company.

It was futher proposed, seconded, and carried unanimously:

That the thanks of this meeting be given to Alfred Lowe, Esq., Secretary, for his unvarying attention; and to him and the other officers of the Company for their industry and zeal during the past half-year.—By order of the Court of Directors,

J. STUART WORTLEY, Governor.
ALFRED LOWE, Secretary.

17 and 18, Cornhill, London, Oct. 24, 1865.

THE CREDIT FONCIER AND MOBILIER OF ENGLAND (LIMITED).

The PROSPECTUS and FORMS of APPLICATION for the SHARES of the NEW ISSUE of CAPITAL of this Company are NOW READY, and, as well as copies of the Half-Yearly Report and Balance-sheet, can be obtained at the Company's Offices.

17 and 18, Cornhill, London, Oct. 24, 1865.

ALFRED LOWE, Secretary.

W. H. BURKE and CO., Proprietors.
SOLE AGENTS FOR THE INVERNETTIE GRANITE COMPANY.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay; Framjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao J. D. Freath.

R. L. SOUTHERN AND Co.
MERCHANTS AND AGENTS,
6, MINCING-LANE, LONDON, E.C.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

COWASJEE DINSHAW,
Close to the Landing Place. Depot of
EUROPEAN, CHINA, AND INDIAN WORK.

WINE, BEER, CHAMPAGNE, and SPIRITS of the best quality. Bombay-made Soda Water and Lemonade. Perfumery, Confectionery, Oilman's Stores, and Stationery of every description. Sola Topees and Canvas Shoes, &c., &c., &c.

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.

THE "LONDON AND CHINA EXPRESS" ON SALE

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS and OINTMENT.—BILIOUS DYSPEPSIA.—There is no organ in the human body so liable to derangement as the liver. Food, fatigue, climate, and anxiety all disorder its action and render its secretion—be bile—more or less depraved, superabundant, or scanty. The first symptoms should receive attention. A pain in the side or the top of the shoulder, a harsh cough and difficulty of breathing, are signs of liver disease, which are removed without delay by friction with Holloway's inestimable Ointment. The Pills should also be taken early. For all diseases of this vital organ the action of these conjoined remedies is a specific by checking the over supply of bile, regulating its secretion and giving nervous tone.

Boulger and La Tondie, Mr. and Mrs. Bethune, three children, and two female servants, Mr. J. C. Brown, and four second-class passengers.

From Marseilles, 12th Nov.—To Singapore: Mr. W. Alten, Mr. W. Paterson. To Penang: One second-class passenger. To Hong Kong: Dr. Juan Fernandez, Mr. Orme. To Shanghai: Mr. W. G. Howell, Mr. A. Campbell. To Calcutta: Miss Bland, Mrs. Lowis, two infants, and European servant, Mrs. J. H. Williams, Mrs. R. Lyall, Rev. A. and Miss Garstin, Mrs. and Miss Moffatt, Messrs. F. A. Cohen, J. W. Mirfield, and Cowie, Mrs. and Miss Murray, Lieut. R. C. Hennessey, Mrs. Monteath and infant, Miss Monteath and European servant, Mrs. C. J. Wilkinson, Major Brownlow, Mr. and Mrs. Agabeg, two infants, and native servant, Captain W. S. Young, Mr. and Mrs. J. E. Howard, Major Gordon, Mrs. Lillie, Miss Watson, Mr. C. J. Wallis, two Misses Tweedie, Mr. S. Blackburn, Miss Dickins, Messrs. G. G. Morris, and J. C. Charles, Dr. Smith, Mr. A. Tolgood, Lieut. Gillespie, Captain and Mrs. Chapman, Miss Burney, Mr. W. M. Muirhead, Messrs. Tayleur, S. Gladstone, and Saunders, Captain F. Lloyd, Miss Bell, Mrs. Swaine, and four second-class passengers. To Madras: Mr. and Mrs. Chamle, three children, governess, and native servant, Lieut. Beauchamp, Dr. J. B. Fleming, Captain G. E. Callander, Captain and Mrs. FitzGerald. To Alexandria: Mr. Dugdale, Mr. and Mrs. Sacre, Mr. Lucovich and man servant, and five second-class passengers.

From Suez.—To Calcutta: Mr. Wolff, Major E. Thompson.

Per P. and O. steamer, from Southampton, Nov. 12.—To Shanghai via Bombay: Mr. A. J. Parker, Mrs. Bennett and child. From Marseilles, Nov. 20.—To Hong Kong: Mr. Weiler. To Ceylon: Mr. and Mrs. Newman and child. From Suez.—To Penang via Bombay: Mr. and Mrs. Hasche.

Per P. and O. steamer, from Southampton, Nov 20.—To Hong Kong: Messrs. G. F. Dodd and T. B. Mitchell. To Penang: Mrs. and Miss Mackay. To Ceylon: Captain K. Cove, Miss Staples. From Marseilles.—To Hong Kong: Miss F. Cubit. To Shanghai: Mr. John Robertson.

Per P. and O. steamer Mongolia, from Southampton, Nov. 27.—To Hong Kong via Bombay: Mr. R. Harvey. From Marseilles, Dec. 5.—To Singapore via Bombay: Mr. Watson.

Per P. and O. steamer from Suez, Jan. 19, 1866.—To Hong Kong: Sir Richard and Lady MacDonnell.

By French mail steamer Said, from Marseilles Nov. 19.—To Yokohama: Mr. A. Bovonschen. To Shanghai: Messrs. James M. Young and L. Mackintosh. To Hong Kong: Mr. F. Bovet. To Galle: Mr. and Mrs. R. S. Sillery.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are down to the 13th Sept., at which date everything was quiet.

The Japanese Government has paid into the hands of the representatives of the four Powers the sum of $500,000, forming one-sixth of the indemnity stipulated to be paid under the Simonoseki Convention. A second payment of the same amount will become due, under the terms of the convention, after a period of three months.

The *Japan Times*, noticed in our last, has been issued under the editorship, we believe, of Mr. Rickerby, late of Bombay, and for some time manager of the Central Bank of India at Yokohama, but we have not received a copy. The following is from the *Japan Herald*:—The absence of the Tycoon from Yedo seems completely to banish any possibility of incidents arising in the capital or in our neighbourhood the recital of which would have any interest for readers at a distance. Yet the past fortnight has not been absolutely barren. First, we have undoubted intelligence of the discovery of a plot to assassinate the young Tycoon. Reports leads to the belief that there is but little chance of the Tycoon's returning to Yedo for several months, and the consequences of his absence, are very severely felt by the citizens. The Tycoon is, at this time, going through an ordeal which will put all his energies and wisdom, and the wisdom and energies of his councillors and the friends of his Government to the test. His enemies are very many and powerful, and it is quite likely that the Daimio Hondha Shizen-no-sho is not the only unscrupulous one amongst them. It is said that Choshiu is actually about making his submission; but this may or may not be, as the Tycoon is said to have expressed his surprise at the number of friends who had rallied round the recusant Daimio, and declared that had he expected such a gathering against him, he would not have left Yedo. Such are the "*on dits*" floating about, but if there be any certain intelligence of importance, it is treasured up in the deepest recesses of official impenetrability.

Meanwhile, our representatives are not idle. The American Charge d'Affaires still continues to reside in Yedo. The

Digitized by Google

British Minister repeatedly goes up, and remains a few days each time; and the Minister of France, having recently returned from Atamo, whither he had been for the benefit of the baths, paid the Gorogio a visit at the capital the day after he returned to Yokohama. The result of the various interviews with the Gorogio is only partially known; but what is made public is most important. The trade in silkworms' eggs, now a very large and increasing one, had been entirely prohibited up to a few months back. The prohibition was then removed, but it was only possible to purchase the precious seed through two of the native merchants licensed by the Government. These fellows were supported by the native authorities in all sorts of rascalities in their dealing with foreigners, and were even forbidden to sell to them, unless they produced a Consular permission to buy. All this is now at an end. One of the favoured merchants has "bolted"—but the trade is fairly thrown open, and any European may buy of any Japanese quite freely. The Gorogio declared that the restrictions were quite unknown to them, that they had been imposed by the Custom-house authorities at Kanagawa-Yokohama, and to mark their displeasure, the Governor of Kanagawa is dismissed and disgraced.

The men-of-war in the harbour are—English: Princess Royal, Argus, Leopard, Bouncer, and Kestrel. French: Dupleix and Kien Chan. Dutch: Zoutman.

The case of Alt and Co., charterers of the *Norfolk*, for Nagasaki, had been settled by arbitration, and the charterers absolved from liability, owing to the detention of the vessel; but no damages were allowed, to which we think they were justly entitled.

NAGASAKI.

Dates are down to the 13th Sept. The correspondent of the *North China Herald* writes that H.M.S. Rattler arrived on the 12th Sept., to relieve the Barossa, which latter vessel was to have left with the Osprey, for Shanghai, on or about the 16th. On the Barossa's arrival she will relieve the Perseus, and will wait here until the arrival of Sir R. Alcock, whom she will conduct to the Peiho, the Osprey remaining in Shanghai. On the return of the Barossa, the Osprey will sail for Nagasaki. The Perseus returns to Yokohama, but will call at Nagasaki to pick up the gunboat Bustard, and carry her to Yokohama, The Havoc, daily expected from Hong Kong, will remain at Nagasaki. The Leopard proceeds to Singapore, and the Scylla relieves the Pelorus at Amoy, the Pelorus rejoining the squadron at Japan, having left Amoy on the 20th September. The Argus has gone to Hakodadi.

CHINA.

SHANGHAI.

The dates are down to the 20th Sept., or two days later than per French mail.

It appears that some of the native merchants still hesitate to employ foreign tonnage, and the trade in wood from Foo-Chow is likely to be stopped.

On the steamer *Fukien*, Captain Johnson (an American), we extract the following from the *North China Herald*:—

"The '*Fukien* case' no doubt still remains fresh in the memory of our readers as one of the recent *causes celebres* in Shanghai. The imputation cast on the Hong Kong Government by the concluding paragraph of the finding, has called for an energetic protest on the part of the colonial authorities. The officials on whom the blame fell, not only vindicate themselves from the charge of carelessness, but prove with the utmost clearness that Captain Johnson's right to sail the steamer was, in fact, conferred on him by the Shanghai Consulate after the Hong Kong Government had refused to enter his name on the register. Yet the Consular officer who sat on the Court, and united in condemning the Hong Kong Government for allowing the *Fukien* to clear, is entrusted with the supervision of the shipping department, and regularly cleared her himself on each of her outward trips. It is further pointed out that the Hong Kong Government, in refusing in the first instance to inscribe Captain Johnson's name on the new register, and the Shanghai Consulate, in clearing the *Fukien* although her Captain was not in possession of an English certificate, acted in accordance with the regulations respectively governing the procedure of each. But the finding of the Naval Court proves that this correct action on the part of the Consulate was in this particular case the result of accident, in other words, the the result of neglecting an air-drawn ordinance which, had it existed elsewhere than in the imagination of the Consular officer referred to, would have rendered his conduct in constantly clearing the *Fukien* open to official censure. We are not surprised, therefore, to find that the Hong Kong Government accuses the members of the Naval Court of ignorance of the very Act which made their proceedings legal. The points commented on in the notification are identical with those brought forward by the directors of the Shanghai Steam Navigation Company at the time of the investigation, and that company is therefore, on the high authority of the Hong Kong Government, held blameless. The clauses in the finding which relate to Captain Johnson's seamanship have already been discussed by himself and others, but the important question of his right to navigate the steamer has been definitively set at rest. We, therefore, congratulate the directors on the removal of the imputation of want of judgment cast on them by the now celebrated finding of the Naval Court."

The same journal gives us a continuation of the outrage at Chinkiang, detailed in our last. The examination which was undertaken by the Chinese and foreign authorities subsequently elicited the following facts which tend to throw light on the sad occurrence:—

On Friday, the 1st Sept., a Chinaman who was passing the mat house where the attack took place, was assaulted and bitten by a dog belonging to Lewis, one of the wounded men. The man, in self-defence, threw a brick at the dog. On seeing this Lewis pursued and beat him. Smarting under the sense of insulted dignity, and perhaps sore bones, the Chinaman, who had been an officer of braves, went at once to an opium-shop in the city, where he found some soldiers of the city garrison. The latter sympathised with him, and agreed to make a night attack on the offending foreigner and obtain their revenge. Excited by opium and samshoo, and under the leadership of the man who had been flogged, they broke into the mat house early on Saturday morning, expecting to find Lewis alone, but Pickernell and Filleul being unfortunately asleep in the house, they also fell victims. The leader was arrested a few days after the attack, having been traced by a sword that was dropped during the scuffle, and was executed on the 9th inst., but not before he fully confessed his share in the outrage, and the motive that led to it. Two days afterwards one of his accomplices also was executed on the spot where the murder took place. Three hundred of Kuo Sung-ling's disciplined troops, headed by a blue-button mandarin, were in attendance and gave three cheers when the culprit's head was struck off. This man also made a full confession before he died. The others, who are known to have been concerned, have made their escape to the north bank of the river, but the native authorities having offered rewards for their apprehension, it is to be hoped that they will eventually be captured and punished. None of the soldiers under Generals Yang and Kuo have been proved to have had anything to do with the attack.

It is satisfactory to be able to state, that from the time of the murder the native civil and military authorities did their best to get to the bottom of the affair. As a matter of course, the foreign community was deeply moved by the occurrence of so glaring an outrage, and various schemes for defence were canvassed. A meeting was held on the 4th inst. in order to express sympathy with the wounded men, and the hope that the offenders would be brought to justice and condign punishment.

Although, as we have said, the native authorities exerted all their energies to discover the perpetrators of this crime, it cannot be denied that to their carelessness the sad event which has consigned one foreigner to the grave and mutilated another for life, must be attributed. So large a body of undisciplined troops should not have been permitted to encamp in the vicinity of a small foreign community, much less to pitch tents in such a manner as to surround and overlook the foreign settlement. So keen is the feeling of insecurity caused by the proximity of native soldiers that when, some two months ago, the Governor-General issued a notification calling on all compradores of foreign hongs and Chinese merchants in general to desert the left bank of the river, and settle on the city side, so as to leave the left bank free for the Government salt trade, the only objection made by the natives was the danger of living in the vicinity of ten thousand troops. From this it abundantly appears that not only are the lives and property of foreigners and natives endangered, but a rapidly rising trade is seriously interfered with. It was not strange that the framers of the treaty of Tientsin overlooked the necessity for guarding against such an eventuality, else there would surely have been a veto

Digitized by Google

placed on the conversion of an open port into a Chinese garrison. As the matter stands, sufficient proof has been given that the presence of troops is extremely dangerous, and the recent murder affords ground for a strong remonstrance on the part of the foreign Ministers at Peking. No doubt the English Consul at Chinkiang will represent this to the Minister, and thus produce the extinction of one fertile source of ill-feeling between natives and foreigners.

Lewis and Filleul were both brought to Shanghai for medical treatment. The former has since died of dysentery, and the latter lies in a most precarious state.

Although the period of the first attack on Taitsang by Holland is now somewhat remote, many of our readers will recollect the circumstances which attended that ill-omened expedition. In brief, they were as follows:—On the 10th February, 1863, Holland, at the head of 2,500 men and 22 guns, left Sung Kong for Taitsang, where he arrived on the 13th. Having neglected to reconnoitre the ground, he found himself, as soon as the assault commenced, surrounded by difficulties so desperate that he was compelled to retreat with the loss of several hundred men, five officers, and two guns. The excuse given at the time was that the Mandarins had asserted that the city was bought over and would be surrendered on the first appearance of the Imperial troops. Holland, believing this statement, neglected the usual precautions, and laid himself open to very severe criticism on his strategic skill, and even, in some quarters, on his personal courage. The impression which prevailed at the time was that the city had in reality been bought over, and that the subsequent conduct of the garrison was an instance of gross treachery on the part of the rebels. All united in condemning the knavery of the Chang Maos and the ingenious viridity of the English commander. A new light has, however, been of late thrown upon the Taitsang affair. It will be remembered that the Chung Wang in his autographic deposition stated that the city was given up to him by one Li Wen-ping, a Canton Mandarin. The reason for Li's defection from the Imperial cause was that his troops had not been paid for three months, and both they and he were anxious for a new state of things. Li himself became a rebel, and was subsequently placed by the Chung Wang in command at Taitsang. Here he determined to change sides again, and accordingly visited Li-san-ta-jen's camp and arranged about giving over the city. Meanwhile the Chung Wang got wind of his proceedings, and hastening to Taitsang anticipated his treachery by cutting off his head. "The devils," says the Chung Wang, "reached Taitsang and so did I." From the time of his arrival the Chung Wang himself took command, and thus the welcome which the Futai's brother and Holland, with the disciplined Chinese, received, was not a piece of treachery, as has up to the present been imagined, but the result of the Chung Wang's discovery of Li's infidelity. Although this explanation affords no excuse for the neglect shown by the English and Chinese commanders of the disciplined troops, it is valuable inasmuch as it rebuts what we believe was the only apparently well-founded imputation of deliberate treachery on the part of the rebel leaders.

The Hsiao Tai, or Literary Commissioner,sent down to conduct the examination of candidates for civil and military degrees, was to have commenced the exercise of his functions at Soochow on the 15th Sept. It was found, however, that although several candidates for civil hsiutsai-ships presented themselves, there was no one ambitious of the corresponding military grade. The commissioner therefore altered his route, and will now visit the other cities wherein examinations are to be held, closing his circuit at Soochow in order to allow of the preparation of a sufficient number of military aspirants. Such an occurrence has, we believe, never before taken place in time of peace.

The fate of Burgevine still creates some interest, but the officers sent to inquire into the circumstances of his death have as yet discovered nothing of importance. The following facts relating to his last visit to China have lately been published. It is well known that constitutionally Burgevine was particularly sensitive to the action of alcoholic liquors, the smallest quantity of spirits appearing to put him completely beside himself. Of late, unfortunately, he had indulged more freely than was at all prudent, and consequently for a considerable time before he left Japan he was in a state of excitement bordering on madness. To him, tired of the quiet of existence at Yokohama, and anxious to behold other scenes, the offer of a passage from Kanagawa to Simonoseki was most welcome. The *Fei-pang*, a steamer held for speculation by her owners, was going down to Simonoseki to pick up any engagement likely to prove profitable, or to be sold. Report states that on her arrival there Choshiu, who had heard of the extremely ill-grounded terror wherewith Burgevine's name was greeted in China, offered him an important post in the army he was then engaged in levying against the Tycoon. This proposition was not finally accepted, as Burgevine wished to return to Yokohama before deciding on so important a step. But the owners of the *Fei-pang* had meanwhile altered their plans, and resolved to bring the steamer to Shanghai, and thence start for Hong Kong, returning direct to Simonoseki. As there were no means available for returning to Yokohama, Burgevine at length made up his mind to accept the offer of his fellow-passengers, and enjoy the round trip by Shanghai and Hong Hong. So far this visit to China was purely accidental, and we have, moreover, reason to believe that on the passage, when spoken to on the subject of joining the rebels, he expressed his conviction that the game had been played out, and that neither honour nor profit was to be derived from that quarter. Arrived in Shanghai, he met, we presume, some ardent sympathisers in the rebel cause. At any rate he resolved to leave the *Fei-pang* and take a passage in the *General Sherman*, which at the time was loading a miscellaneous cargo for Amoy. His design in visiting Amoy seems to have been to find out the chances in his favour were he again to join the rebels, but from his conversation it was evident that he had adopted no resolution on the subject. On arriving at Amoy, by the ill-judged indulgence, to use no harsher epithet, displayed by Mr. Irving, and the exertions of some few Anglo, Taiping residents, Burgevine, while in a state of intoxication was induced to pledge himself to visit Changchow, and if need be give all the assistance in his power to the rebel cause. Then the negro, Stanley Bennet, together with his *fidus Achates*, Mr. Commissioner Hughes, came on the scene, and by cunning in the one case and the basest treachery in the other, contrived to entrap the broken-down and utterly useless prize for which they were so anxious. It had been arranged that on her return from Hong Kong the *Fei-pang* would call at Amoy to pick Burgevine up, and to carry him back to Yokohoma. When, however, she did arrive, the news of his capture and imprisonment were in everybody's mouth. Thus, by a succession of accidents, none of which could have been foreseen, was the train of circumstances brought about which subsequently resulted in the violent death of three Europeans. Burgevine's career was a chequered one. The son of a southern gentleman, he was compelled to fly from his father's house on account of his political opinions. Taking refuge in New York, he became connected with the press, but was, after a few years, made the victim of a popular demonstration which left him houseless and penniless. He then obtained manual labour of some kind, sufficient to provide the necessaries of life, and at length, in 1859, obtained a berth as third mate on board the American barque *Edwin Forrest*. Having made the acquaintance of Ward, he was mixed up in one or two of the dashing exploits of that adventurer, and when the latter came across to China, Burgevine contrived to get a situation on board the same ship. Then commenced the career with which we are all familiar, and which, through a combination of culpable neglect, treachery, and a greed for applause, has now been closed by the hand of death.

On the 12th of September a parade of the Mounted Rangers took place at the Mainguard. The troops, who mustered about thirty strong, were reviewed by Sir E. Hornby, the new Commandant, who congratulated Captain Markham upon the efficient manner in which several manœuvres were performed, and made a short address, in which he expressed his interest in the corps and the volunteer movement in Shanghai. The training for the Autumn Races has commenced.

The *Recorder* gives the following items :—

The hafl-yearly meeting of the North China Insurance Company took place on the 18th Sept. The accounts show a surplus of tls. 624.340.63 in addition to paid-up capital of tls. 125,000.

The present company will terminate at the end of this year, and in addition to the directors now acting, namely, Messrs. A. G. Dunlop, E. H. Lavers, Sol. D. Sassoon, H. Howe Wiggins, and David Reid, Messrs. Duncanson and Bryans have been appointed to reorganise a company for a further term.

A meeting of the shareholders of the Shanghai Club took place on the 15th. The minutes have not yet been published, but we understand that little business of importance was transacted.

The China Traders' Insurance Society of Hong Kong (Limited), capital $1,000,000, in 200 shares of $5,000 each, $1,000 per share paid up, has been brought under notice here, Messrs. Augustine Heard and Co., acting as agents in Shanghai. The scheme is well regarded.

The steamer *South Western* has been sold for 12,000 tls.

Mr William Church has been declared a bankrupt. John Frazer, Esq., Law Secretary, official assignee. First meeting of creditors to be held on Friday, 29th inst.

A large number of the native bankers and compradores have failed at Hankow. A meeting was held at the Consulate with a view to taking steps to abolish the system of giving credit to native buyers.

A most important decision has been given by Sir Edmund Hornby, in the case of the P. and O. Company, *versus* Hall and Holtz and Mr. Valentine, a clerk in the same firm. This case was brought forward on account of Messrs. Hall and Holtz having shipped a box as stationery which also contained some copper caps, per steamer *Cadiz*. As the evidence showed that as soon as Mr. Grey (of Hall and Holtz) found out that the stationery box contained percussion caps, he disclosed the fact on the face of the bill of lading, Sir Edmund Hornby only recorded the conviction and ordered Mr. Grey to pay the cost of the suit, but he wished it to be distinctly understood that, for the future, the 239th section of the Merchant Shipping Act, which awards a penalty, not exceeding £100, for shipping dangerous goods without giving notice to the master or owner, in writing, at or before the time of carrying or sending the same to be shipped, would be strictly enforced. As he justly remarked, "It is the business of shippers to find out before shipment the nature of the goods they are shipping. A ship, cargo, and the lives of all on board are not to be imperilled simply because it is 'not usual' to do this, or because it occasions trouble."

The following, on mildewed shirtings, is also from the *Recorder*:—

The damage by mildew and bad packing of grey shirtings, which has caused so much trouble to the merchants of this place, has recently been brought prominently under the notice of the public by the case of Preston, Worrell, and Co., *versus* Bain, Tate, and Co. It appears that the plaintiffs bought of defendants 40 bales of grey shirtings, to arrive per *Ellen Rodger*, warranted in good order, that, on the arrival of the ship, the goods were received and paid for, but that forty days afterwards 37 bales were discovered to be damaged by bad packing and mildew. The plaintiffs then laid a claim against the defendants for the loss. The Court decided that the delivery of, and subsequent payment for, the goods; the time which elapsed between their being received into the godown before being inspected, and the want of due notice being given to the defendants, in time to enable them to return the price, made the claim invalid.

Although this decision may press rather hardly upon the plaintiffs in this case, it is evidently the only just one that could be arrived at with respect to the matter. The receipt of goods and the payment for them without protest or reservation is, for obvious reasons, always accepted as the final closing of any transaction. Upon this basis other matters are settled and remittances made. Any invasion of this principle would result in a total upsetting of all business arrangements.

The repeated arrival of cotton piece goods damaged by mildew is, however, a matter which calls for serious attention on the part of the mercantile community. We, therefore, consider it will be well carefully to review the whole of the circumstances connected with it. In discussing this matter it will be necessary, first, to consider from what cause and at what time the damage takes place; secondly, the nature of the custom with regard to reception and inspection of goods of this class; and, finally, what grounds there are for laying claim for damage and the probable result of such claims being instituted.

With regard to this first point, namely the cause of the damage, we find that the evidence in the case above alluded to, given by Messrs Lavers and Duncanson concurs as to the extreme improbability of the damage having been done in the godown, though Mr. Chambers is of opinion that mildew to shirtings would increase if they were stowed in a damp godown for two months. The fact is incontestible that a large number of shirtings have recently arrived in a mildewed condition. Messrs. Lavers and Duncanson attribute the damage by tar to the packing, and the mildew, to bad size. We think there can be little doubt as to the correctness of this view, not only on account of its being the one generally current among mercantile men here, but also because it the most probable, seeing that it is only recently that this species of damage has occurred. The kind of mildew now found in shirtings is quite distinct from anything previously known. It appears to result from a vicious principle inherent in the goods themselves, so that, though in perfect order when leaving the manufacturer's hands, in the course of the voyage they seem to do what is known by heating, in fact, to undergo some chemical change, which results in a rotting of the material. That this is not brought about by external causes is proved by the fact that several parcels, in good order as to packing, have been found on arrival damaged in this manner. Speaking generally, we may, therefore, conclude that the mildew in question is the result of bad size or other fault in the manufacture of the goods, and that it takes place commonly in the course of the voyage.

Upon the second point, namely, the custom with regard to reception and rejection of goods of this class, the evidence given by Messrs. Duncanson, Chambers and King agrees. Neither of these gentlemen would receive such goods except after inspection. Mr. Lavers, however, states he would inspect some chops, and added that he would do so to the one in question. As far as the individual case under consideration is concerned, the opinions of the above-named gentlemen were identical. They would all have inspected the goods before payment.

Native reports state that the Imperialists have obtained a dearly purchased advantage over the Mahomedan rebels in Shangtung and Honan. The troops under Tsengkwo-fan, after capturing successively several cities, drove the rebels towards the Yellow River, where they succeeded in surrounding them, when a sudden rise in the river swept away a large portion of the Imperialist army, together with the rebels, of whom it is said not one escaped. A large amount of booty is said to have been captured.

Takee, the well known Chinese banker and merchant, is dead. He was one of the first to trade with foreigners at this place, and had dealings with them in the early days, when Shanghai was only looked upon as an insignificant out-port. He is said to have been worth Tls. 1,000,000; but this statement must be received with a due recollection of the Italian proverb, which says there is commonly less wealth and less learning than is reported.

KIUKIANG.

The following is from the Report of Mr. F. C. White, Commissioner of Customs, on the trade of Kiukiang for 1864:—

Although the total export of China ware for the year shows an increase, yet for some time past the export has been falling off. Owing perhaps to the recapture of Nanking, and the consequent tranquillity of the river, the necessity no longer exists for sending China ware in such large quantities as formerly to this port for shipment..

Imports.—The import trade of the year 1864 shows some improvement on that of the year 1863, although there is a decrease in the import of a few of the chief articles of import, viz., medicine, pepper, shellfish, nankeens, shirtings, &c.

Exports.—The export trade for the last year, as compared with that of the year 1863, presents an unfavourable contrast. The export of tea has declined considerably, showing a falling off of 5,728,922 piculs as compared with the previous year. Apprehensions are entertained that the native dealers will in future forward large quantities of tea, which used formerly to find an outlet here, to Ningpo, via Hangchow, that being an easier route, and Ningpo probably affording a better market than this has hitherto proved.

Tonnage.—There is a decrease in the total amount of vessels of all classes, entered during the year, of 25,472 tons, and of vessels cleared during the year of 26,202 tons. There is an increase, however, in the tonnage of British vessels entered

Digitized by Google

of 3,492 tons—cleared, of 3,148 tons; and a decrease in the tonnage of American vessels of all classes entered of 28,834 tons; cleared, of 29,250 tons. No French vessels entered or cleared during the year.

Freights.—During the first seven months freights were so low as to be unremunerative. A combination among the agents of steamers, in July, led to the rate being fixed at three taels per ton of forty cubic feet, which arrangement lasted for two months, when a decline to two taels per ton took place. In November the owners and agents of steamers in Shanghai came to a resolution, fixing the minimum rate of freight at three taels per ton, and during the winter months at four taels per ton, which rate still continues.

HANKOW.

Minutes of a Public Meeting held at Hankow, 4th September, 1865.

Present:—Messrs. R. Watmore, W. G. Gordon, T. B. Higson, W. G. Price, C. Beadel, S. H. Cheshire, W. S. Maclean, M. P. Evans, R. C. D. Moffat, J. Cunningham, G. Holbertson, A. W. Soutar, A. Thurburn, J. Booth, T. Mills, J. Monro, H. W. Hardy R. Maxwell, F. Carnie, J. Macreath, T. Menzies, W. H. Medhurst, M. Schallasse, J. Aitken, H. W. Carey, K. R. Mackenzie J. F. Ballance, L. Luddeke, A. Hutchinson, J. A. Crawford, J. A. Handy, and others.

Mr. MACKENZIE proposed, seconded by Mr. WATMORE, that Mr. Medhurst, H.B.M.'s Consul, be requested to take the chair.

Mr. MEDHURST then took the chair, and opened the meeting by reading the notice convening it, as follows:—

A public meeting of the foreign merchants at this port will be held at the Club, on Monday next, at 5 P.M., to consider the advisability of establishing a system of cash payments for goods sold. A full attendance is requested.—(Signed) W. G. Gordon, Acting Chairman, Municipal Council.

The CHAIRMAN called on Mr. Mackenzie to explain more fully the object of the meeting.

(To be continued.)

HONG KONG.

The dates are now down to the 27th Sept., or four days later than per French mail received and given in our issue of the 4th inst.

H.M.S. *Conqueror* had not left for England on 27th Sept. with the Marines from Japan. It is also noticed that she will clear off about 180 unemployed sailors.

The new post-office is now occupied by the postmaster and staff.

A meeting of the Legislative Council was held on the 12th September, and we subjoin a report from the *Daily Press*:—

Present: His Excellency the Acting Governor, the Acting Colonial Secretary, the Acting Attorney General, the Colonial Treasurer, the Hon J. C. Whyte, Chief Magistrate; the Hon F. Chomley, and the Hon. Thos. Sutherland, non-official.

His Excellency was understood to say that the principal object in convening the Council was to lay before it a draft of the estimates for the financial year, 1865-66. The draft itself was in the hands of the printer, and would be ready by the end of the week, and would then be delivered to members of the Council. There was one very important item in the estimates which he thought it proper to refer to, namely, the provision which would require to be made for the Mint establishment, which was, exclusive of the salaries on the civil list, $41,000.

The COLONIAL TREASURER: Does that include the wear and tear of the building and the machinery, and all the salaries of the persons engaged in the Mint, such as the assayers?

His EXCELLENCY: No. It only includes the salaries of the foreman about the place and the coolies. A very large item was that for coal, which Captain Kinder estimated at $12,000 per annum. That gentleman had also fixed the number of coolies that he should require at about one hundred.

The COLONIAL TREASURER was understood to say that the estimate was very high, and that it was more than the colony could afford.

His EXCELLENCY: Captain Kinder calculates that the profit arising from the Mint will amount to £50,000 per annum if kept regularly occupied. He had also stated that he expected to be able to commence operations shortly. It would perhaps be within the memory of members of the Council, that Sir Hercules Robinson had, in a despatch to the Home Government, requested that the Legislature of Hong Kong be absolved from the necessity of voting the yearly sum of £20,000 towards the support of the garrison of this place; in reply to which communication, Mr. Cardwell had written to the effect that the matter would be taken into consideration by Her Majesty's Government and their decision forwarded hither. This answer has not as yet been received, therefore the sum of £20,000 for that purpose would be found in the estimates for the ensuing year. The Colonial Government had also received from the Imperial Government two circulars, copies which should be furnished to members of Council. The first one had reference to the Naval Reserve, and stated that legislative bodies in all the colonies had been invited to take measures to establish a system of Naval Reserve within their respective jurisdictions. Whilst the action of the Home Government in this matter was referred to as being a guide, nevertheless every legislature was invited to consider the mode most applicable to the local considerations and to submit its plans to the Home Government for approval; the object in all cases being the same, viz. to train men in time of peace so as to be available in time of war. His Excellency added he could not exactly see at present what the Council could do in the matter. He had already expressed his opinion that the £20,000 which the colony paid to the army would be more appropriately given to the navy, as the colony certainly derived more benefit from the latter than the former. However, members would have time to consider the steps to be taken in the matter. The second despatch referred to certain tolls to be levied for the support of a lighthouse upon the Basses Rocks off the island of Ceylon. The Home Government wrote that the Legislature of Ceylon had already passed a Bill for the levying of such passing tolls, and that they had invited the Legislature of Mauritius, Natal, &c., to do the same, and the Colonial Government of this place are asked to take measures to carry out the object proposed. The parties principally interested in such an imposition would be the Messageries Imperiales and the Peninsular and Oriental Company, whose boats touched at Point de Galle, and the shipping employed between here and Bombay. It had been calculated that the dues arising out of the Hong Kong traffic within the *rayon* described in the circular, would not exceed £500, which was a sum too small to call for any legislation. He (the Acting Governor), moreover, could not see the justice of this claim, and he would advise the Council not to allow the thin end of the wedge to be inserted in reference to levying tolls or impositions of any sort upon the shipping of Hong Kong. He himself should be very sorry to see a single penny so levied.

We published in our last the estimates for 1866. In the *Daily Press* we find the following notice:—

The estimated expenditure for 1866 is		$740.155.80
Add Civil List		157,000.00
„ Pensions		10,000.00
Total		$907,150.00
Deduct the Imperial portion of the postage revenue		125,000.00
		$782,150.00
The estimated revenue for 1865 was	$700,000.00	
The cash balance on Dec. 31, 1865	150,000.00	
Sale of old Police Station, say ..	40,000.00	890,000.00
So that at the end of 1866 there should be surplus of, say		$100,000.00

This does not include one cent. for the out-turn of the Mint, which must yield something, as its gross expenses are included in the expenditure. At the end of 1866, the whole of the public works will be paid for, so that the expenditure of 1867 should be far less than the income. Besides, the sale of land near the Mint should come to something.

Another meeting was held on the 23d Sept.

His Excellency the Acting-Governor said that the principal object for which the council had been convened was for the second reading of "a draft of an ordinance to apply a sum not exceeding $745,000 to the public service of the year 1866."

The Assistant Surveyor-General had received an additional $340, and the clerk of the works had also received a slight increase of salary, and in order to give him a better position in the eyes of the public, his title had been altered from "overseer" to that of "clerk." An increase of £50 per annum salary had also been made to the superintendent of Government gardens and plantations. The salaries of the general staff employed at the Mint had been estimated at $18,689. The cost of coals would amount to about $12,000 per annum, but as the place would not be in operation until March, there would only be $9,000 required for this year.

In the Harbour Master's department there was a saving of $70 in the salary of the boarding officer and an increase of $288 for boatmen. This latter increase was necessitated by the assistant-surveyor continually requiring the services of a boat. Under the head of Works and Buildings there was an outlay of $12,000 for a tramway one mile in length. This had been adopted upon the recommendation of Mr. Wilson, as an economical arrangement in the construction of roads, and being portable, when not required here could be removed to Kowloon. That gentleman was also of opinion that it would be something novel and useful for the native Chinese to study.

A sum of $10,000 would be also expended upon the drainage of Wongneichoong valley. In the earlier times of the colony this valley had made itself remarkable as being very unhealthy, and had in consequence been acquired by the government of that day, and a considerable sum expended upon it for drainage. Still there was much to be desired in respect to its healthiness, and as building in that vicinity was on the increase, it was resolved to drain it more effectually. The improved drainage would also make it more attractive for those who went there for their recreation. Altogether he (the Governor) thought it would be money well expended.

There would be $3,000 required for a Government bungalow at Kowloon. At present there was only a mat shed, and as a police-magistrate would have to be appointed for that place, a suitable building would be required.—Mr. Sutherland asked if the reclaimed land at the foot of the parade ground would be made available for anything, and expressed a hope that it would be left open to the public, as that part of the Praya was now the only good access to the harbour since Pedder's wharf had been closed by the clock tower.—The Acting Governor replied that the ground would be left open as they were under obligations to the military authorities in regard to that land. There would also be no probability of extending the Praya along the front of the Naval Yard. Admiral Hope had reported favourably to that improvement, intending to have a basin inside the yard for the accommodation of boats, but Admiral Kuper had entertained a contrary opinion.

The Hon. Mr. Sutherland moved, as an amendment: "That the sum of $92,000 military contribution be omitted from the estimates until such times as the revenue derived from the Mint attains that sum." The hon. member said: In bringing this amendment before the Council, it is unnecessary for me to enter into any very elaborate arguments on the subject, as the question has been already sufficiently discussed in Council.

Digitized by Google

Indeed it has been the subject of very strongly expressed opinions throughout the colony. It appears to me, however, that the necessity of urging the financial considerations connected with this question, on the notice of the Council, and obtaining the opinion of members thereon, is even greater now than it was last year, for by the statement of revenue and expenditure before us, it appears that the colony is fast verging on—if it has not already arrived at—a position from which it has fortunately been free for some years past, of not being able to meet its current expenses. By the statement before the Council it appears that the revenue for 1866 is estimated at $784.845.00, whilst the expenditure is set down as $913,639.00. the difference indicating an anticipated deficit of $128,794.00. I cannot conclude my remarks without reference to the Mint, the support of which, either with or without employment, will probably entail a yearly expenditure of about £20.000. I should have been glad to have received some definite assurance of what the views of the Government are in regard to the new currency. but there seems to have been nothing further decided upon than the building of the Mint itself. I had hoped to hear at the least that the Imperial Government, whose support we have always been led to count on in this undertaking, would at once have given the Mint employment by ordering the coinage of three or four millions of dollars for the payment of the army and navy in these waters. But it appears there is no likel hood of this being the case. On the contrary we are told that a comparatively small amount of Sycee receivable from the Chinese as indemnity, is all the commissariat is prepared to hand over for mintage, and it appears at present that they will expect to have that coined for them free of any charge.—The Colonial Treasurer seconded the amendment. The hon. member was understood to say that he could not perceive where the profits from the Mint were to come from, for as the average price of bar silver in London was 5s. 1½d., the freight and insurance 3 per cent., the Mint charge 2 per cent., it followed that if the Hong Kong dollar was of the same weight and touch as the current Mexican dollar, the laying down price at the Mint would be 4s. 8d. This fact any one could verify by calculation. He was also of opinion that there would not be any surplus revenue at the end of the financial year. He (the hon. member) had examined the subject and found that the expenditure was increasing. Within the last six months the expenditure had exceeded the receipts by $24,000.—The Acting Attorney-General said that he should support the original motion, as voting against it seemed to him like voting against the law.—The Hon. Mr. Whyie said he could not see it in that light, as the military contribution was voted yearly. He should support the amendment.

The amendment being put to the vote there were:—For the amendment—Hon. Thos. Sutherland, the Colonial Treasurer, Hon. J. C. Whyte. Against the amendment—the Acting Colonial Secretary, the Acting Chief Justice, the Acting Attorney-General, and the Colonial Auditor. The amendment was consequently lost by four votes to three.

The Acting Governor continued, that as regarded the light on the Basses Rocks he had seen somewhere a statement to the effect that such a lighthouse did not exist, but from the papers he had received from the home Government he (the Governor) could only infer that there really was a light upon those rocks. (It is not so, however.) The purposed tax was settled by a commutation of £500.

THE PHILIPPINES.

MANILA.

Dates are down to the 19th Sept. *via* Hong Kong. The English mail of July 26 (owing to its breakdown at Penang) had not arrived. The arrivals have to be reported, on the 9th and 18th Sept. respectively, of the *Olano* and *Iberica*, both from Liverpool, with fair supplies of manufactured goods, the greater portion of which have met with a ready sale. The value of coloured staples has been well maintained, but plain goods cannot be placed at recent quotations.

It is now nearly nine years since the Government of Her Majesty opened the ports of Sual, Iliolo, Zamboanga, and Cebu to trade. At that time the Press of the city, and especially our illustrious contemporary *El Diario de Manila*, giving expression to the public feeling, thanked the far-seeing Ministry that had adopted the measure in question, and the honourable authorities of these islands, who had contributed to its passing. The name of the Supreme Civil Governor, Don Manuel Crespo, is even yet mentioned with enthusiastic gratitude by the mercantile body. In an official document of recent date addressed to a foreign Government by its representative in these islands, we read these words—"To General Crespo, and to all those persons who directly or indirectly contributed to the adoption of this important measure, a debt of gratitude, increasing day by day as the prosperity and material wealth of the country increases, is due by the entire commercial interest."

That such a debt is justly due by the mercantile body and by the entire nation to our illustrious Government is proved by the results displayed in the figures which we insert below:—

PORT OF ILOILO.

Exportation of Sugar in 1855	12,000 piculs.
Do. do. in 1863	250,832 „
Difference in favour of 1863	238,832 piculs.

PORT OF SUAL.

Rice exported in 1857	3,220 tons.
Do. do. in 1863	16,041 „
Difference in favour of latter year ..	12,821 tons.

Nothing can be more eloquent than these figures. Nothing can more effectively demonstrate the rapid development of trade and agriculture in the above-mentioned localities during the short space of eight years. And it could not have been otherwise. Before the opening of the ports the native farmer, with whose position and resources we are all well acquainted, could only dispose of the produce of his fields to a few traders scattered through the province, and among whom, if anyone had attained a competency, it was on so small a scale, that the prices obtained by the farmer were always insufficient to meet his most pressing needs. From this want of a market, and partly from the peculiar character of our institutions, the farmer saw himself under the necessity of selling a part or the whole of the future crop of his farm, a sale always effected at a price ridiculously underrated.

Now the opening of the ports has attracted capitalists to the province in great numbers, and with them wealth has flowed in. Now the productions of those localities which have benefited by the measure, are sent direct to markets at which more profitable prices are obtained, without the necessity of incurring the expenses consequent on the transmission of the goods to this city. Now, looking only at Iloilo, the average price of sugar throughout the year is 75 cents a picul, whereas in 1855 it barely reached half that.

MALACCA STRAITS.

SINGAPORE.

The London mail of August 26 arrived out on the 30th Sept. Dates are now down to October 6.

Various reports have reached this during the past fortnight concerning the progress of the Dutch expedition to Assahan, some asserting that it had met a serious repulse, and that the commandant had been killed. Such reports, however, which find their way through native channels, as these have, are very little to be relied upon, and it is probable that very little resistance, if any, was at all offered to the Dutch landing. At all events we received intelligence (says the *Straits Times*) from Rhio, brought by one of the steamers returned from the expedition, that Assahan had been taken, and the Dutch had ascended the river of that name in small boats for a great distance, planting the Dutch flag at all the considerable villages they passed.

The fourth criminal session of the court opens on the 9th, but there are no particularly important cases to be got through. The Governor is expected to return from Penang to-morrow. The 34th Regiment of Madras Native Infantry, which has been stationed here for upwards of two years, is to be removed to India, and the 7th Regiment sent in its place. The weather has been exceedingly hot during the fortnight, and a great deal of sickness has prevailed.

A murderous attack was made on Mr. Turnbull, at the Borneo Company's wharf, by a Chinaman, but he escaped with little hurt.

The steamer *T. A. Gibb* arrived from Calcutta, *en route* to Hong Kong, with 4,650 bales cotton and 285 chests opium.

The *Maribelle*, Captain Martin, has been lost at the entrance to the Carimata Passage. Two steamers had gone to the wreck.

The P. and O. steamer *Ottawa* has been fitted with a new shaft, and left for Galle and Bombay. She will take her place again on the China station.

A committee has been appointed to inquire into the objects and utility of the Singapore Screw Pile Company, lately noticed by us.

It has been resolved to send a memorial to the Home Government, on the encroachments of the Dutch in Sumatra.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BLAIN—On the 31st Sept., at Lawrie Park, South Norwood, Mrs. John Blain, of a son.

DALZIEL—On the 3rd Nov., at 1, St. George's-square, Regent's-park, the wife of Mr. Davison Dalziel, of a son.

GORDON—On the 16th Sept., at Hankow, the wife of W. G. Gordon, of a son.

HALL—On the 31st Oct., at 11, St. George's-square, Sunderland, the wife of Commander Basil Hall, R.N., of H.M.S. Active, of a son.

HARVEY—On the 3rd Nov., at Pembroke, the wife of Commander F. Harvey, R.N., of a son.

MOULE—On the 14th Sept., at Ningpo, the wife of the Rev. C. E. Moule, Missionary, C.M.S., of a daughter.

TOWSE—On the 4th Nov., at Thornwood Lodge, South Norwood, the wife of W. Wrench Towse, Esq., of a daughter.

MARRIAGES.

GLYNN—CRAWFORD.—On the 2nd Nov., at St. Peter's, Pimlico, by the Rev. G. W. Knightley, rector of Dunsby, assisted by the Rev. A. H. Williams, William Anthony Glynn, late of the 26th (Cameronian) Regt., elder son of William Anthony Glynn Esq., of Fairy Hill, Isle of Wight, and Boyton, Cornwall, to Margaret Anderson only daughter of Robert Wigram Crawford, Esq., M.P.

Digitized by Google

HOSKINS—ROBINSON.—On the 27th Oct., at Cranford, Captain A. H. Hoskins, R.N., to Dorothea, only daughter of the Rev. Sir G. S. Robinson, Bart., of Cranford, Northamptonshire.

HUTH—DOBREE.—On the 2nd Nov., at St. Mary Abbott's, Kensington, by the Rev. John Gale Dobree, rector of Honton, Suffolk, assisted by the Ven. Archdeacon Sinclair, Ferdinand Marshall, second son of Charles Frederick Huth, Esq., to Caroline Locke, eldest daughter of Bonamy Dobree, Esq.

DEATHS.

IRVIN—On the 10th Sept., at Amoy, after two days' illness, Dr. William Irvin, United States Consul.

LEIGHTON—On the 31st Sept., at Yokohama, Stanley Robert Leighton, aged six days.

LEWIS—On the 10th Sept., at Shanghai, —. Lewis (American), one of the party attacked by Chinese at Chinkiang.

MAXWELL—On the 18th Sept., at Shanghai, William Maxwell, Commissioner of Customs at Taiwan, Formosa, aged 29 years.

MILBANK—On the 7th inst., at Norfolk-road Villas, Bayswater, the wife of John James Milbank, of the steamship Ottawa, of a son.

TALLENTIRE—On the 15th Sept., at the Shanghai General Hospital, of dysentery, John Tallenture, late Master of the British ship Invincible.

Telegrams from Shanghai 9th Oct. report Exchange at 6s. 3d., and Hong Kong 15th Oct. 4s. 5½d.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEAS.—Buyers appear to have become alarmed at the exeessive export, and disappointed at the effect of the reduction of duty in England. A manifest disinclination to operate for the London market has been displayed during the fortnight, and the rates for black tea at all the ports have fallen. There are very few buyers of green teas; but that description being in small supply maintains itself. Canton: After the departure of the last English mail, this market remained extremely quiet for a week, when considerable activity was shown in scented teas, whilst other kinds were comparatively neglected. The following are the sales of the fortnight:—Country Congous, 1 chop at 23 taels. Scented Or. Pekoe, 10,000 boxes at 22 to 35 taels. Scented Caper, 13,000 boxes at 12½ to 33 taels. Country Greens, 2,620 hf.-ch. at 35 to 53 taels for Gunpowder, 32 to 43 for Imperial, 19 to 42 for Young Hyson, 25 to 66 for Hyson, and 15 to 20 for skin.

AMOY.—Transactions have been on a limited scale during the past fortnight, and prices are without alteration. Congous: Settlements amount to 1,850 half chests, at $16¾ to 18.50 per picul, for fair to good flavory descriptions; stock, 1,300 half chests. Oolongs: Only 5 parcels, 680 half chests of good to fine cargo at $26.50 to 32, and 220 boxes common quality at $22 50, have been taken, prices remaining unchanged. The teamen continue firm in their demands for former rates, to which buyers generally refuse to accede. Stock, 16,120 half chests, and 1,028 boxes.

FOOCHOW.—The market has been quiet, and a general indisposition manifested to operate for export to London, except at a reduction of rates which to some extent has been established. Oolongs continue to be taken for New York at previous rates. The following are the settlements:—Congous: 6,300 chests and 10 800 half-chests, at 6 to 10 taels dust to dusty, 11 to 13 for broken-leaf, 14 to 16 for fair to good common, 17 to 22 middling flavor to Souchong flavor, and 23 to 27 for medium to good Kaisows. The demand has been dull, but settlements display no depreciation. Oolongs: 13,800 half-chests at 14 to 16 taels for common cargo, 17 to 20 for fair to good do., 21 to 24 for superior do., and 25 to 30 for fine. Supplies limited—rates fully maintained. Flowery Pekoe: 150 chests at 19¼ taels for common, and 32 for fine. Scented Teas: 2,200 boxes at 7¼ to 13 for dust and broken-leaf, 24 for medium, and 34½ for fine.

SHANGHAI.—Black: The market is being fed by constant additions from Hankow, and the stock still stands at 57 chops. Quotations:—Second and third crop Oopacks, Tls. 24.0 to 29.0; second crop Ningchows, 27.5 to 33.5; first and third crop Oonahms, 17.5 to 27.5; second and third crop Howows, 17.5 to 19.5. Settlements on this market are 13,700 ch.; reshipments on owners' account, 8,500 ch. Total settlements and reshipments to date, 127,415 ch.; against season, 1864-65, 248,577 ch. Stocks of Congou are estimated at 24,600 ch. Greens:—Supplies of country Tea are limited, but as the bulk of the Fychow and Teenkai crops will be conveyed *via* Ningpo (and not by Kiukiang), it is known that a considerable quantity may shortly be expected. Four chops from these districts have been settled at Tls. 36.5 to 41.0 proportion, which again shows an advance on the opening purchases advised last mail. Of Pingsueys there is now a moderate quantity on the market, but buyers neglect them, and only 1 chop has been settled at Tls. 35, which establishes a decline. Two chops of Shanghai-packed Teas have been settled at Tls. 27.5 to 29.5.

HANKOW.—Limited business, principally for the Shanghai market, at 1.0 to 1.5 decline, buyers giving the preference to all teas with quality, and neglecting the commoner grades. Third crop Oopacks and Oonahms were quoted 14 to 26.5 tls. short price. Settlements for the fortnight, 16,550 chests and 3,700 half chests. Making total settlements to date this season, 230,610 chests and 50,200 half chests; against to same time season 1864-65, 248,190 chests and 46,620 half chests. The stock is estimated at 15,000 chests against 30,800 chests at the same time last season. Black Teas: About 3,000 packages had been settled at 22 to 26 tls., and 11,000 shipped forward to Shanghai on native account, teamen being desirous to defer the acceptance of a decline which buyers on the spot were determined to establish. Only 2,000 chests were left in stock. The Emperor had been put on the berth for London at £2 15s. per ton. Quotations: Ningchows, common to fair, 18 to 26 tls.; Hohows, common to fair, 17 to 21 tls.

YOKOHAMA.—Supplies have come forward freely and regularly, and purchases have about kept pace with them. Quotations are unchanged, but are firm, the finer sorts being scarce. The demand is principally for shipment to New York. The settlements of the fortnight amount to about 2,700 piculs, and the stock on the market is estimated at 3,000 piculs. The quotations are—Ordinary, none; common $19.50 per picul; good common, $20 to 23; medium to good medium, $23.25 to 27.25; fine to finest, $28 to 32. The export for the present season to date is 976,696 lbs. against 1,303,760 lbs. same period last season, and 1,241,155 lbs. season before.

RAW SILK.—The French mail steamer took 1,389 bales for Marseilles and Southampton. The present conveyance takes 1,269 bales and cases for those ports Shanghai: Settlements for the fortnight are estimated at 1,700 to 2,000 bales, taken mostly from medium to inferior classes of Tsatlees and Taysaams. Prices generally have not varied much from last quotations, but the extreme scarcity of good and desirable parcels of silk has made dealers very firm in their demands for such descriptions, and the prices paid in most instances show an advance of about 5 taels per picul. The receipts from the interior have been on a very small scale, and they are likely to remain so for some time, as the prices ruling there are said to be above the equivalent of Shanghai rates. The unsold stock has consequently been considerably reduced, and is now estimated at 1,500 to 2,000 bales, consisting chiefly of common grades of silk, and some damp and mildewed parcels. From Japan, the receipts by the French and English mail steamers have amounted to 290 bales. Tsatlees, No. 1, 560 taels per picul; No. 2, 540; No. 3, 520 to 525. Taysaams, No. 1, 470 to 490; No. 2, 450. Yuenfas, No. 1, 480.

CANTON.—Owing to a somewhat sudden inquiry from Bombay, prices have advanced about twenty dollars per picul for Kow-kongs, whilst for Europe the finer sorts have ruled from five to ten dollars higher.

YOKOHAMA.—A large business was done in silk seeds in the early part of the fortnight. The first buyers made a great mistake with regard to this article. They purchased largely about one month ago and since at 2½ to 3 itzeboos per card, some paying as high as 3½ itzeboos for yellow. All these purchases are still in Yokohama, and will not be shipped for three weeks hence. At the present time contracts can be made with the Japanese for the yellow at 2 itzeboos for cash. Large quantities are offered for sale, all restrictions being entirely removed. Later than the end of this month it would not be advisable to ship. The inquiry for raw silk during the fortnight has fallen off materially, the total settlements not having exceeded 200 bales. The holders have displayed a desire to realise by reducing their rates (say $20 to 25), but not to a sufficient extent to induce operations. There is a large unsold stock, nearly 5,000 Japanese bales, a great portion of which has been pledged to foreign firms for cash advances at high rates of interest. This state of affairs cannot be of long duration, and a fall in rates may be shortly anticipated. Mybash and Sinshiu, $700 to 790; Oshiu, $620 to 770; Koshiu, $590 to 660.

DRUGS, &C.—CANTON.—Cassia Lignea: Notwithstanding the very limited demand, during the whole of the present month, the stock augmented to 4,500 pls., which makes it apparent that holders expected the same purchases to continue. There being no settlements for the fortnight, the quotation is still the same as last reported, viz., $17 to 17.30 per picul; buyers being disinclined to pay this rate at present. China Galls: A sale of 100 pls. is reported for export at $12.25. Vermilion: $37.50 per box of 50 catties—very little doing. Galangal: 100 pls. reported settled for the Indian market at $1.90. Rhubarb: No supplies, no stock. Musk: A new arrival of about 30 catties inferior quality is firmly held at $105 per catty. Ginger: The report about the extensive failure of the new crop is fully corroborated, and prices are further advancing. Essential Oils: No settlements, no supplies.

CAMPHOR.—HONG KONG.—The small parcel of Japan has been reshipped by importers, and as there has not been any fresh arrivals, oru market is now bare of stocks; the nominal quotations are 19.50 to 20, packed.

CHINA IMPORTS.

COTTON YARN.—Sales amount to about 140 bales: prices are much the same as last reported. Grey Shirtings: About 18,000 pieces have been sold at slightly advanced rates; the higher numbers are much inquired tor, but there are none in stock. White Shirtings: 1,100 pieces have found buyers at previous rates, and 300 pieces 56 reed in Foochow at $3.65. T-Cloths: These continue in good demand at steadily advancing prices; settlements amount to about 10,000 pieces, which include 900 sold at auction being damaged goods, and also 6,000 pieces Long Cloths. American Drills: The market continues bare of these goods. White Spotted Shirtings, Dyed do., Brocades: The only transactions to note is the sale of 1,000 pieces of Brocades; prices are slightly higher. Damasks and Chintzes: Sales comprise 500 pieces of the former, and 1,300 of the latter; an advance of about 50 cents in Damasks may be noted. Handkerchiefs: About 5,100 dozen have been settled at previous prices.

WOOLLENS.—Spanish Stripes and Habit Cloths: A steady but moderate demand continues for these goods. Settlements very nearly correspond with those of last fortnight, they are 708 pieces of the former and 214 of the latter. In Foochow 284 pieces Spanish Stripes have

Digitized by Google

been sold. Long Ells: A brisk inquiry still exists for Long Ells, but the stock remains as scanty as before, 200 pieces have found buyers, and rates are firm at last quotations. Camlets: 1,090 pieces have been sold; prices unchanged. Lastings: 400 pieces have been cleared at previous rates.

METALS.—Iron: There is no change to note in price. Sales have been effected of Nail Rod Iron to the extent of 1,680 piculs, and of Flat 372 piculs. Lead: Settlements amount to about 2,098 piculs, against 1,300 last fortnight, and about 100 the previous one. Prices are much as last quoted, but the tendency is upwards. In Canton 850 piculs have been sold, and 3,500 piculs in Foochow. Tin: 1,300 slabs have found buyers. Tin Plates, and Steel: No sales to report.

COALS.—HONG KONG.—The market is firm, with an upward tendency, owing to an entire cessation of arrivals. The quotations are—Welsh, 10½ to $11 (scarce); English, 10 to $10½; North Wales, 9.50 to $10; Australian, 7 to $7½ (scarce). Shanghai: Without any arrivals for several weeks of English coals on the market, prices for the remaining stocks for sale from godowns have become firmer. As the demand is, however, restricted to purchases of small lots, it is difficult for holders to establish higher rates. Sales: English steam coals, from godown, lots to suit, 9 to 9.5 taels per ton. Cardiff, to arrive, 9.2.5 taels per ton. American, slow of sale at 9.5 to 9.7.5 taels per ton from godown, and 10 taels from ship. Stock of American in port afloat, 1,000 tons. Sydney coals have been selling in small lots from ship at 7.2.5 to 7.5 taels per ton. No stocks. Japan coals, no market for inferior qualities.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Aug. 27, Gleam.

At SHANGHAI.—From Liverpool: 7, Chinaman. From Sunderland: 17, Robin Hood. From New York (*via* Hong Kong): 15, Amaranth.

At HONG KONG.—From London: Sept. 25, Cambalu. From Hamburg: 26, Freya.

At MANILA.—From Cardiff: Sept. 3, Moulin; 4, Adriana Petr.; 7, Langdale; 2, Gesurigeen; 16, J. Lodkwyk, Uriend Schap.

At SINGAPORE.—From London: Oct. 1, Cosmos; 4, St. Paul. From Glasgow: Sept. 27, Lochleven Castle. From Hamburg: Oct. 1, Elise.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—For New York: Sept. 2, Surprise.

From SHANGHAI.—For London: Sept. 4, Art Union; 11, Statesman; 19, Garrawalt (lost off Formosa). For New York: Sept. 15, J. W. Seaver.

From FOOCHOW.—For London: Aug. 16, Agra. For New York: 8, Azelia.

From HONG KONG and CANTON.—For Liverpool, via Macao: Sept. 10, Veronica. For New York: 16, Panama.

From MANILA.—For Liverpool: Sept. 19, Peerless.

From SINGAPORE.—For London: Sept. 23, Lorton; 29, Eliza Thornton.

From PENANG.—For New York: Oct. 5, Casilda.

LOADING.

At YOKOHAMA.—For London: Raphael, Simon Hobley, Seringapatam.

At HANKOW—For London: Iron Crown, St. Andrew's Castle.

At KIUKIANG.—For London: Emperor.

At SHANGHAI.—For London: City of Quebec, Dartmouth, Ensign, Glencoe, Glengairn, Helen Nicholson, Horsa, Polmaise, Wild Deer. For Liverpool: Patna. For New York: Finzel, Podesta.

At FOOCHOW.—For London: Aurora Australis (full), Manfred, Banian, Merse, Lord Macaulay, Alexandrina, Caractacus, Canaan. For New York: Douglas Castle, Glenaros, Archer.

At AMOY.—For London: Florence Nightingale.

At HONG KONG and CANTON.—For London: Annie Archbell, Yaratilda, Arab Steed, Tamerlane. For New York: Sea Serpent, Powhattan, Tanjore, Tyndale.

At MANILA.—For London: Monsoon, Nelson. For Liverpool: Tigris. For New York: Melita, Cutwater.

At SINGAPORE.—For London: Caldbeck, Zoe, Wye, Zanthippe. For Liverpool: Lochleven Castle, Mary Spencer, Simoon. For Channel: Forerunner, G. H. Wappans. For Bordeaux: Maria.

At PENANG.—For London: Balnaguith, Adelaide, Nyassa.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Tea and cotton, £1. 10s. to £2. 10s.; Silk, £3 to £3. 10s. per ton.

At HANKOW.—To London: £2. 10s. to £3 per ton.

At KIUKIANG.—The Emperor is loading for London at £2. 15s. per ton.

At SHANGHAI.—Rates continue extremely low. A large amount of tonnage is leaving the port—seeking which may prove advantageous to those remaining, for coasting, there exists but little chance of improvement. To London the rates are £1. 10s. to £2. 10s. nominal.

At FOOCHOW.—To London: £1. 10s. to £2 per ton of 50 ft. To New York: $9 per ton of 40 ft.

At HONG KONG.—The following settlements are from the Circular of G. Holmes:—Gresham (965), to Portsmouth with Invalids, at £22 per man. Madagascar (1,337), Manila to New York, or London or Liverpool with hemp, £2. 5s. per ton; Sea Mew (510).—From one or two ports in Java and Padang to New York or Boston, or to the Channel for orders, £2. 7s. 6d per ton. Catherine (414), Manila to Sydney, £1. 17s. 6d.; Peiho (408), to Melbourne, £1. 7s., if on to Sydney, £1. 10s.; Libelle (280), to San Francisco and back, $7 per ton of 40 feet. In coasting charters we notice the Abeona (261), to Chefoo and back, 22½c. per picul; Canton (309), to Newchwang and back, 27c.; Princess (212), Whampoa to Newchwang and back, 29c. The British barque Pride of the Ganges (631) is taken up for coolies to Demerara, at £14 per head; and we observe two French, one Swedish, and one Norwegian vessel are taken up to convey coolies to Havana at £12 per man. The estimated number and tonnage of disengaged vessels in Hong Kong is—British, 62, 29 070 tons; foreign (exclusive of Siamese), 54,23,662 tons; total, 116,52.716 tons.

MANILA.—The English ship Monsoon has engaged for London about 600 tons, Unclayed Sugar at £1. 10s. per ton. The Nelson on the berth for the same port has secured about 200 tons Hemp at £1. 10s. per ton.

PENANG.—Very little freight is offering, while the available tonnage is much in excess of the requirements. The Italian barque Adelaide, 456 tons, has forced down rates, and is loading for London at 15s. tin sugar £1 to £1. 2s. 6d.

CASUALTIES.

SHANGHAI.

The Garawalt, from Shanghai to London, Sept. 19, with 863,183 lbs. of tea, is reported by telegram to be lost off Taiwan (Formosa).

The Salamander reports on her passage from Taiwan to Takao, saw a large brig high and dry on the sands and laying on her beam end; rounded too, and hoisted up No. 675, "Do you require any assistance?" the brig hoisted up No 38, "No!" she hoisted Hanoverian colours and her name is the Amphitrite.

SINGAPORE.

The War Eagle, Singapore to London, Sept. 19, also reported lost near Anjer.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Sept. 9, Honigby, Cardiff to Singapore; 14, Kinderdyk, Newcastle to Batavia; 15, Felix, Liverpool to Manila; Thos. Dickson, Sunderland to Hong Kong; Cornelis Anthony, Rotterdam to Batavia; Mountain Ash, London to Hong Kong; 16, G. van Hogendorp, Rotterdam to Batavia; 18, Lochleven Castle, Greenock to Singapore; 19, Allegonda Jacoba, Newcastle to Batavia; K.N. Yachtclub, Newcastle to Batavia; 25, Elizabeth, Newcastle to Batavia; 28, Johanna Maria, Newport to Singapore; Elizabeth, Shields (orders); Cosmos, London to Singapore; Quintet, Amsterdam to Sourabaya.

From UNITED STATES to CHINA, &c.—24, Benefactress, New York to Hong Kong; American, Boston to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—13, Boy Bendisen, Macao to Hamburg; 14, Hastings, Singapore to London; 24, Star of China, Shanghai to London.

From CHINA, &c., to UNITED STATES.—13, Shirley, Manila to New York.

COMMERCIAL POSTSCRIPT.

The interest due on the Ceylon debentures under Ordinances 10 of 1860, and 19 of 1862, will be paid on the 15th by the Crown Agents for Colonies.

TOBACCO.—Japan was quoted, in the circulars of the 1st inst., at 4½d. to 7½d. per lb., which is an advance on previous rates, but the market for this description is firm and rising, and we have heard of a parcel realising the high figure of 10d. per lb. Java is quoted at 5½d. to 13d. per lb.; Manila at 6d. to 3s.; and Manila Cheroots at 7s. to 8s. per lb.

The Circular of Mr. Page states:—Mexican Dollars: Market continues inactive and business limited. Owing to the large supply expected by the Seine having been left behind at Tampica, about £12,000 realised 60d. for the Southampton steamer of 4th inst., and about £15,000 has since been sold at 59¼d. for refining. Bar Silver: The demand for India continues very active, and the business during the fortnight has again been on a large scale; the settlements (including contracts in advance) considerably exceed half a million sterling. The price has advanced from 61 3-16ths to 61⅞. The shipments recorded since 26th ultimo amount to £2,201,970, of which nearly two-thirds was for Bombary, about £350,000 is engaged for the Bombay steamer from Southampton on 12th inst. The rates of exchange are, on Calcutta, 60 days' sight, 1s. 11⅞d. to 2s.; on Bombay, do., 2s. to 2s. 0⅛d.; Singapore, do., 4s. 5½d. nominal; Hong Kong, do., 4s. 5d½d. do.; Shanghai, do., 6s. 4d. do.; Yokohama, do., 4s. 7d. do.

CASUALTIES.—The Princess of Wales (barq) of Harwich, bound for Shanghai, whilst being towed out of Harwich harbour on the morning of the 9th of November, ran into the Martlet (s.s.), and sustained loss of bowsprit and jibboom. She consequently was obliged to put back.

The Belle, of Sunderland, Wayman, from Cronstadt to the river Amoor, which put into Falmouth on the 31st October, having grounded on the Ruggen Flat, off Copenhagen, has been surveyed and commenced discharging her cargo.

The Prinses Amelie, Groeneveld, from Batavia to Amsterdam, which put into Mauritius, 5th October, very leaky, had commenced discharging. Sundry bales of coffee were damaged, and it was feared that the sugar would also be found in the same state.

SPOKEN.—Ary Scheffer, Rotterdam to Batavia, Oct. 5, 7 N., 26 W.

LAID ON.—At Liverpool: For Batavia and Pekalongan, Edith Haviland. At London: For Hong Kong and Canton, Punjaub.

DEPARTURES.—Nov. —, From Amsterdam for Batavia, Zaanstroom; 8, from Plymouth for Batavia, Sunda (s.s.); 9, from London for Newport and Singapore, Bencleuch; 10, from London for Newport and Galle, Codan.

THE MATELLA COFFEE ESTATES.

This company has been formed for the purpose of taking over three coffee estates in the Matella district, which, by last advices from Ceylon, will be brought very near to the line of railway, and thus avoid the delays hitherto so objectionable in Ceylon. The vendor guarantees a dividend of 12 per cent. per annum, and, considering the enormous increase in the demand for Ceylon coffee, we think there is little doubt of that and much larger profits being realised. Ceylon coffee now stands at the head of improvable produce in Mincing-lane. The directors are gentlemen of local experience, and in these affairs that is the main point to success. In fact the representations in the prospectus would not be put forward by them unless entirely reliable. There are only 2,000 shares to allot, the particulars of which can be seen on our last page.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 8.

Political news is very scarce; the members of Parliament are still busy in the sections examining the Budget. On the 9th the debate will be opened. Rumours about a Ministerial crisis still circulate, but I do not think there is any truth in them. It is said that our Premier will make a declaration in this sense in one of the first sittings. Our Cabinet, however, is still threatened by the Lemburg question, created by the Bill of our Minister of the Financial Department, who desired that this province should pay equal excise imposts with the other provinces. *L'Ami des Inhérits Lembourgois* says that the inhabitants will beg Napoleon to interfere with our Government, because their rights are attacked. This question perhaps will become a European affair, when M. Bismarck meddles with it; for Lemburg also belongs to the German Confederation.

The Royal family are at "Het Loo." They will remain there for some weeks. Nothing more is heard about the Prince of Orange and his financial embarrassments.

The *rinderpest* still prevails in many parts of the province of South-Holland. Since the plague broke out 6,093 head of cattle have been attacked, of which number 2,121 have died, and 1,752 were cured. The medical treatment is now very successful, so that about 50 per cent. of the cattle attacked are saved. Acceding to the wishes of the Opposition, the Government has drawn a *cordon sanitaire* for a considerable distance round the infected places. Soldiers and men-of-war are appointed to watch all the roads and rivers to prevent any passing, so that it is now impossible to export either from Rotterdam or Dordrecht to the London market. I need scarcely say that this measure causes a great deal of remonstrance from the trade. On the other hand, the success of the *cordon* has been established by the fact that outside it only three cases of *rinderpest* have occurred. Till now no animals except horned cattle; and those inoculated have taken the disease. The veterinary surgeons apply either the allopathic or the homœopathic system of medicine; but in general the farmers have a dislike for medical treatment, and they prefer to slaughter their cattle and to sell the infected meat for 1d. to 2d. per lb. No higher price can be had, in consequence of it being generally forbidden to import fresh meat into the towns.

The Minister of the Marine Department, the managers of the Trading Company, the Japan officers, and several more authorities, were present at the launch of the screw steam frigate *Kai-Yoo*, on the 2nd, from the yard of Messrs. C. Gips and Zonen, at Dordrecht. This war steamer, of the most elegant construction, was built for the Japan Government. She measures 2,600 feet, and will carry 28 hundred-pounders. She will be propelled by a pair of engines of 400-horse power, which are to be manufactured at the iron works of Fyenoord. The cost of this frigate is estimated to amount to 1,600,000f. The Trading Company entertained at dinner all the authorities who were present. The Manager proposed, as the first toast, "the health of the Emperor of Japan," which was replied to by the Japanese Commander, who proposed "the health of the King of the Netherlands."

The guns taken at Simonoseki have been placed in the Hospital of Invalids at Brombeck. Jhr. F. de Casembroot has written a history of this battle, of which a second edition has already appeared.

The Culture Bill meets with the general approval of the Liberal party. It is beyond doubt that the Bill will be passed with a very great majority.

Anyone who visited our Opera last Wednesday week might have easily imagined himself, on leaving the house, to be in Prussia, and under the immediate control and sceptre of Von Bismarck; for at all the doors, and even in the entrance hall, one saw Prussian policemen, in full uniform. Evidently they were looking out for some one; they stared all passers-by full and most impudently in the face. Some, perhaps, thought that they were "wanted"—wanted by that Prussian Minister, who, perhaps, might have a mind to treat the Netherlands somewhat like Schleswig-Holstein; but all the opera visitors were allowed to pass, till, at last, a young, pale-looking German, of about twenty years of age, came down from the stairs—from the upper part of the house. He grew still paler, when he saw below what seemed to him familiar faces. One of the Prussia policemen laid hold of him; the poor culprit, who, fancying that he was still in Prussia, thought no escape possible, made no resistance, was "nabbed," and taken to the police-station. The bystanders looked on, but evidently did understand the meaning of what was going forward. However, when the next morning the *Nieuw Rotterdamsche Courante* put the story in its true light, every one was bursting with indignation; nothing but this affair was thought or spoken of. *Foreign* policemen had dared to arrest a man; but still more than this, our own police authorities had assisted them in doing so; notwithstanding the one as well as the other proceeding is penally forbidden by our laws and treaties. The poor fellow had been taken by the Prussians to the police-station, and had been put in prison, because the police said he admitted to have stolen from his master, a lawyer at Gladbach, about 400 thalers, which he spent on a *danseuse*.

In the town-council the next day one of the members demanded an explanation from the burgomaster (mayor and head of the local police). He could not give any information, but said, at the next meeting, that he had received a report from the director of the police, in which the statement in the newspaper was declared to be false, because the German was taken into custody by Dutch policemen. The accused himself and the bystanders declared, however, the contrary, and this proved to be the truth; for the next day the Government interfered, and the liberation of the German was at once ordered, and, also, that his money and goods should be given back to him. The poor culprit, Wiedemeyer is his name, started at once, *via* Ostend, to London.

I, however, do not think the matter has come to an end yet. People are so indignant about this gross abuse of power by the police authorities that they ask for their punishment. Whether this will be the case I cannot tell yet; but it is certain that seldom has a more disgraceful thing happened than that a man, guilty or not, should be made a prisoner by foreign police, and that he should be aided therein by our own officers.

COMMERCIAL.

COFFEE.—Our market remains in a favourable condition, There are, however, but a few transactions in the Company's sorts to mention, because there is no stock, all what is offered is taken at auction prices. There is a lively demand for yellow sorts. During last week the following parcels were sold:—2,300 b. Padang, ex Maarten van Rossem, at 46c., 725 b., Java, ex Fop Smit, at 44c.; 408 b. do., ex Nederland, at 44½c.; 587 b. do., ex Nicot, at 46c.; and 820 b. do., ex Japara, at 45 to 46½c. The stock consists of 332,846 b. of the Trading Company's, and 35,100 b. private. To-day, 1,700 b. Java Coffee, ex Gebroeders, were sold at 45c. The Trading Company has announced its last auction for this year, consisting of 122,100 b., which will be held on the 22nd inst. Rattans: The 33,300 bundles Macao, offered by inscription, were sold at a price which did not transpire.

SUGAR.—The Trading Company advertised its auction on the 23rd o this month, at which will be offered 25,500 kr. In the last week 2,500 kr. Java were sold at 1⅛f. to 1⅜f. above the September prices. The market is in a firm condition. The stock amounts to 45,475,884 kilo.

RICE.—Dull.

SPICES.—Nutmegs are paid with 84 to 85c. for No. 1; 73 to 74c. for No. 2; Mace with 90c. for D, and 86c. for E. The few lots, which are offered, are taken at this quotation. The stock now consists of:—

	Nutmegs.	Mace.	Cloves.	Cinnamon.
On Warrants ..	5,723c. ..	1,025c. ..	3,509c. ..	514fard.
Unsold	311 ..	196 ..	— ..	666 do.

TEA.—On the 25th of Oct. the Trading Company offered at auction 7,062 ¼ and 523 ½-chests Java, which were sold. Since the auction there has been lively demand, so that it is supposed firm prices will be paid for the quantities of China and Java tea that will be offered on the 8th, 17th, and 24th inst. A cargo of 7,500 chests will arrive in the current month, per Yeavering Belle, direct from Foo-chow-Foo.

TOBACCO.—Java Leaves: The whole crop has now arrived on our market, and in general the quality is esteemed to be inferior. The favourable opinion which was maintained about the Reinbang tobacco has miscarried, and in such a manner that the whole crop is considered to be a bad growth; the colours are bad and the leaves are weak. The reports about the next crop of Java are also unfavourable, so that without any doubt it will become much dearer for fine qualities. Ordinary can be bought at a declined quotation, because there is a very large stock of common qualities. Manila: With some transactions for home consumption and export. For 1a and 2a the prices became somewhat better; those for 3a rather declined, because there is no demand here; 4a with much inquiry. On the 15th and 16th November another 6,000 bales are to be offered at auction. The stock amounted to 37,090 b. Java, and 4,402 b. Manila.

INDIGO.—With a good demand, some private lots were sold at full prices. The market has still a firm appearance for most descriptions, and importers have been disinclined to progress with sales, unless at outside quotations, and some classes advanced rates.

COTTON.—The Trading Company held its auction on the 28th Oct. 2,275 bales were offered, of which 322 bales Tinnevelly fair, sold at 101 to 103c.; 322 bales Japan good fair, sold at 102 to 104½c.; 84 bales ditto fair, sold at 103c.; 23 bales ditto middling fair, sold at 94½c.; all per half kilo. Subsequently, an advance of 4 to 5c. was willingly paid; but in the last days the market was rather heavier.

COCOA-NUT OIL.—Firm; prime Cochin was paid with 33f.

'CHANGE.—London, 2 mo., f.11.81½; short, f.11.96¼; Paris, 2mo., f.56 5-16ths; short, f.56⅝; St. Petersburg, 3 mo. f.151; Hamburg, 2 mo., f.35 3-16ths; short, f.35⅝.

SHIPPING—ARRIVALS.—Oct. 26, at Texel, from Java, Cinghi; 28, at Flushing, from Java, Charlotte; 29, at Brouwershaven, from Java, Noord Brabant,; Nov. 1, Kensington, from Mauritius, with the cargo of the Johanna Maria.

DEPARTURES.—Nov. 4, from Brouwershaven for Batavia, Ankringa; 6, from Zierikzee, for Batavia, Speculant; 5, from Texel, for Sourabaya, Bonjer; for Batavia, Java Packet; for Samarang, Zaantstroom, Vertrouwen.

PASSENGERS OUTWARD.

For JAVA.—Per Java Paeket: Major Heyligers and family, Major Bacherus, Captain Offermans and family, Captain Weiland, Lieutenant Leeping and family, Mr. J. Schoon and family, Messrs. Croes, V. D. Linden, Reynicke, Heyligers, Kannemans, Katz, Schukink Cool, Bonte, Mrs. Buyn, Klein, Breunier, Ryke, and Walter; per Argo, Messrs. J. van Schmid, J. Thihaff, Noels, H. Bosch, A. Catoine, Harloff and family, van Waardenburg and family, Klad, van den Bergh, Bodegom; per Vertrouwen, Mr. J. Kind; per Zaanstroom. Messrs. A. B. Keuper and family, Lelyveld, Miss M. Filet, and O. van Riesz.

PASSENGERS INWARD.

From JAVA.—Per Noord Brabant: Messrs. Nolthenius and family, Teeuwsen and family, van Opdorp, van der Loef, Meyer, H. Smit, Mrs. Tivez; per Anglia, Mr. P. L. Schweiler.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

NOVEMBER 7.

In my last letter I sent you a digest of the Government proposals for the reorganisation of the Russian American Company, since which a special general meeting of the shareholders was held at St. Petersburg, to take these proposals into consideration. I am now enabled to communicate the counter-proposals made by the company in the form of "requests." In consequence of the heavy expenses to which they have been subjected in the organisation of the colony, and the serious losses they have had lately by their tea trade, and which have fully exhausted their reserve capital, they beg permission to issue obligations to the amount of two millions of roubles, and to receive an annual subvention of 200,000 Rs., founding their claim to a subvention on the alleged fact that the Government would have had to pay a sum four or five times larger if they had had to support the churches, the clergy and troops in the colony. The company next pray to be left in possession of their two principal privileges of the exclusive right to carry on the fur trade, and the general commerce of the colony. As the company are to remain bound to provision the colony, if the ports are thrown open to free trade, they would only have a very unprofitable business in articles of consumption, whilst the trade in other commodities, which now tend to restore the equilibrium by leaving a moderate profit, would be open to general competition. Besides this, they contend that the sources of wealth derived from the fur trade would soon be exhausted, whilst it, would be impossible to prevent the importation of gunpowder arms, and spirits, which would be smuggled in large quantities. A division of the territory into that belonging to the company and that thrown open to free trade is, they maintain, practically impossible, because the company would be unable to protect their own division from smugglers. They also decline to admit the free exchange of their tokens against real coined money, because they would then require a double capital, and not be able to protect the colony from the importation of spurious coins. In agreeing to the admission of free immigrants in the colony they decline binding themselves to feed them or protect them from hostile attacks from the wild native tribes. Should the Government be induced to agree to these proposals they request an extension of their privileges for a term of twenty years, and as the company will be placed in a very difficult and trying position if the question remains much longer unsettled, they wish to have a definitive answer in the course of a month. If the Government decline to accept these proposed alterations, the company ask the Government to appoint and pay the salaries of the administrative officers hitherto in the service of the company. And finally, if the question cannot be settled in the course of a month, the company request the advance of a loan of money secured by a mortgage of their colonial landed and other property.

In the proceedings of the Russian Geographical Society, the appearance of the new weekly journal *Eastern Coast*, published at Nicolayefsk (from which I gave you some extracts in a former letter) is thus noticed :—"Besides meteorological observations and the movements of Russian vessels in the Japan seas, this journal gives some interesting accounts of the situation of affairs in those distant regions. From an article headed 'Unfortunate Consequences of the Thawing of our Rivers,' we learn that the navigation of the Amoor since the town of Nicolayefsk was first founded has always reopened between the 6th and 13th of May (old style). In another article called 'Present State of Nicolayefsk and the Amoor,' stress is laid on the disadvantages under which the inhabitants labour from the rawness of the climate. The last overland summer post leaves Nicolayefsk on September 15, and then no communication can be kept up till the middle of December when the winter road is established over the snow. In the spring the last winter mail is despatched on the 5th of March, and then follows another hiatus, which lasts till the opening of the navigation, about the middle of May. Very interesting too are the accounts given of the tigers in the Southern districts of the country. Almost every year accidents happen from the rapaciousness of these dangerous animals. They abound in such numbers that their skins are now a common article of trade, selling in the shops at Nicolayefsk at from 30 to 60 roubles each, though in the southern parts they are much cheaper and may be bought for 10 to 30 roubles according to quality."

From Vienna we learn that a deputation of the Provisional Committee of the First Austrian Export Company had the honour of an audience last week to thank the Emperor for granting their concession and deliver into his hands a pamphlet, explanatory of the patriotic objects they propose to accomplish, which his Majesty was graciously pleased to accept, and assured the gentlemen of the lively interest he took in the success of their spirited undertaking, promising them his hearty protection and the support of the Government.

Capt. Arminjou, of the Italian navy, has arrived in Paris for the purpose of conferring with the Japanese Daimios, now in the French capital, with regard to the general principles of a treaty between Italy and Japan. Capt. Arminjou goes out in the first instance to Buenos Ayres, from whence he will proceed at the head of a small squadron to Japan. The chief advantage proposed to be gained by this treaty is connected with the firm belief that exists in Italy that none but the Japanese silkworms are able to replace the Italian breed now annihilated by the disease that has proved so fatal to them, and there is no possibility of obtaining them genuine either by ships of war or private trading vessels, without the right of entering the ports of Japan consequent on the conclusion of a commercial treaty.

Paulino Natorio, a native of Manila, 27 years of age, and mate of the Spanish brig *Eloreano*, has just been arrested for the murder of a young lady of this city, with whom he was in love, but as she would have nothing to say to him and rejected his offers of marriage, he killed her by a blow with his stiletto in the neck, escaping for the moment, but was soon hunted down by the police and is fully committed for trial.

COMMERCIAL.

COFFEE.—There has been a continuous lively demand for most descriptions, some of which are 1s. 8d. Sch. Bco. higher, whilst the opinion is generally favourable. Sales of the fortnight 35,000 bags.

SUGAR.—Raw is again 4 Sch. Bco. dearer, but the amount of sales has been limited on account of the small stocks in warehouse. Refined in good demand at full prices. Sales since last mail 25,000 loaves.

RICE.—More animation prevails for cleaned grain, as several extensive orders have been effected for immediate shipment before the frost sets in. Of rough the only sale recorded was 1,000 bags of Rangoon ex *Melbourne* at full prices. Holders requiring higher rates has prevented more business being done in this article.

SPICES.—Large transactions in Cassia Lignea at rising prices, nothing now to be had under 11½d. to 11¾d. Sch. Bco. There is a good demand for Mace and Nutmegs, in consequence of which their market value has risen considerably. More attention is turned to Pepper.

TEA.—A fair amount of business has been done in most descriptions, chiefly at former rates. There is still a good demand for common to good ord. Congou, though mid. is neglected. Fine and superfine Kaisow, Moning and Pakling Congou have been largely taken for exportation. A parcel of superfine Souchong (new crop) was sold for arrival. Pecco is a shade lower, with a large business at the reduced prices. Of green Moyune there is but a very small stock on hand, and as this sort is in great request at high rates for North America, the next arrivals cannot fail to leave a good profit. No alteration in Canton made.

SPELTER.—At first a favourable reaction set in, 5,000 centners having been taken at 13.14, after which 14 marks were paid for 1,000 centners, and even 14.6 for special marks. But during the last week a complete stagnation ensued, and prices are now rather in favour of buyers. Arrived in October 38,000 centners. Do. from January 1 to end of October 270,000 centners against 471,770 last year at same time and 185,300 in 1863. Present stock 25,000 centners against 35,000 last year and 28,500 in 1863.

SHIPPING.—SAILED.—From Cuxhaven Oct. 31 Fidelio for Hong Kong.

LOADING AT HAMBURG.—Catharina, for Shanghai (ready to sail); Mauritius and Jan Tecker, for Singapore; Patria, for Singapore and Hong Kong; Garland, for Hong Kong; Margaretha, for Hong Kong and Tientsin.

LONDON, SATURDAY, NOV 11, 1865.

ANALYSIS OF CHINESE COMMERCE.

UNDER the above title a carefully compiled analysis and comparison of the trade during the years 1863 and 1864 has been published by Mr. NOETZLI, of the Chinese Maritime Customs. With the view of placing on record, in a condensed form, some of the most useful statistics contained in it, we extract a few of the tables, and Mr. NOETZLI's explanatory remarks.

The first table shows the "comparative value of the total import and export trade at the different Treaty Ports in 1863 and 1864:"—

Ports.	1863. Taels.	1864. Taels.
Shanghai	79,139,446	66,027,683
Canton	17,628,616	14,692,165
Swatow	7,463,268	10,026,375
Amoy	9,924,343	9,313,919
Foochow	20,283,104	20,061,485
Ningpo	16,000,861	14,690,818
Hankow	22,471,005	23,944,532
Kiukiang	10,367,759	7,286,708
Chinkiang	5,258,633	5,830,611
Chefoa	3,821,084	5,574,768
Tientsin	7,188,442	9,476,208
Newchwang	—	2,388,908
Formosa	[illegible]	927,980
Total	199,546,561	190,242,160

The total estimated value of trade of each port includes the amount of the whole import and export trade, less the amount of the re-exports with the exception of Formosa, where the re-exports, consisting chiefly of opium re-exported to Tai-wan-Foo (Formosa), are not deducted.

From this it will be seen that the trade in 1864 shows a falling off as compared with 1863 of, at Shanghai, 13,111,763 tls.; at Canton, of 2,936,451 tls.; at Ningpo, of 1,310,043 tls.; and at Kiukiang of 3,081,051 tls. On the other hand, Swatow shows an increase of 2,563,107 tls.; Hankow, of 1,473,517 tls.; Chefoo, of 1,753,684 tls.; and Tientsin, of 2,287,766 tls., while Amoy, Foochow, and Chinkiang remain stationary, or nearly so; and the total for all ports in 1864 shows a decrease, as compared with 1863, of 9,304,401, notwithstanding the list for last year is swelled by the two new ports of Newchwang and Formosa with 3,316,888 tls. (together), which made no return whatever in 1863.

The two next tables give, firstly, the imports into, and, secondly, the exports from each port separately, for the year 1864, which we here condense into one table:—

Ports.	Total Imports. Taels.	Total Exports. Taels.
Shanghai	64,832,271	39,847,768
Canton	7,264,445	10,244,590
Swatow	6,399,786	3,700,112
Amoy	7,064,739	2,830,482
Foochow	7,134,133	13,124,056
Formosa	579,638	463,493
Ningpo	10,264,616	6,250,306
Hankow	10,862,216	13,453,425
Kiukiang	3,132,652	4,070,948
Chinkiang	4,673,353	1,208,939
Chefoo	3,024,974	2,758,547
Tientsin	7,779,197	1,730,780
Newchwang	709,738	1,710,398
Total	133,721,758	101,393,844

Showing an excess of imports over exports of 32,327,914 taels. To assimilate the aggregate shown by the above tables of imports and exports with the first table, the value of re-exports has to be deducted, amounting to 44,333,719 taels. An analysis of these tables shows the total amount of *British* trade in China to be 100,783,771 taels, or about ten-elevenths of the whole foreign trade of China.

The carrying trade of the thirteen ports during 1864 has occupied, entering inwards and outwards, 17,976 vessels (exclusive of native craft), giving a tonnage of 6,635,505. This shows a considerable increase in the number of vessels as compared with 1863, but a not quite proportionate increase in the aggregate tonnage. British shipping stands first, with 2,862,234 tons; American next, with 2,609,390; and Hamburg follows with 380,135. The rest is contributed in small proportions, by upwards of twenty different nationalities.

The duties received in 1863 at the eleven open ports amounted 8,691,817 tls., and, in 1864, to 8,138,102 tls., showing a falling off of 553,715 tls., notwithstanding two new ports being included in last year's returns. On the whole, the foreign trade of China is evidently a lucrative source of profit to the Imperial Government, producing, as it does, a gross revenue of somewhere about £3,000,000 sterling per annum.

THE JAPANESE COMMISSIONERS IN FRANCE.

IT was said the other day that the Japanese who had been in Paris for some time had acquired all the information and collected all the men and material necessary for the establishment of the proposed arsenal at Yokohama, and that they were about to return home immediately. This is not, however, the case. The Commissioners are about to quit Paris, if they have not already quitted it, for a time, but not for Japan. They are about to proceed, first, to the western ports of France—Brest, Lorient, Saint Nazaire, and La Rochelle; they will afterwards visit the great paper mills and other manufactories in Angoulême, and then return to Paris by way of Poitiers, Tours, and Orleans, taking the opportunity of examining various large works on that route, and be back in Paris about the end of November. They will then visit London, and probably make a short tour of the manufacturing districts of England, and will embark from one of our ports for Japan. The Commissioners will be accompanied throughout their tour in France by M. LEONCE VERNY, a marine engineer, placed at their service by the Minister of Marine. *The Times'* correspondent says:—"The Japanese Government have applied to Herr ULHORN, the coining machine inventor at Cologne, to ascertain the price of forty machines of his construction. If his terms are acceded to, a perfect monetary revolution will ensue in the realm of the Eastern isles. The ULHORN machine was repeatedly exhibited in England, and certainly looks a marvel of ingenuity to the unprofessional eye."

THE PUBLIC MEETING AT HANKOW.

SOME very pertinent remarks on the dangers of the compradore system, as it exists in Hankow, are embodied in an article in the *North China Herald*, of the 16th September. The relative positions of foreign merchants and their Chinese compradores always seemed to us anomalous and unnatural, but the convenience of the system appeared, for a long time, to counterbalance its disadvantages. From the time, however, when the native banks began to play such an important part in all mercantile transactions, and, first at one port and then at another, the custom of taking bank "chops" arose, the already formidable powers of the compradores increased to alarming proportions. The merchant then became entirely dependent on his compradore in almost every transaction; being compelled to take in lieu of each cash payment a slip of paper, inscribed with a few characters in an unknown language, for whatever value the said compradore chose to assign it; while the well-known fact that all the compradores were connected with the native banks, shows at once how deeply interested they were in making these "chops" pass current. We have never regarded this question otherwise than with a feeling of anxiety and insecurity, not a little strengthened, from time to time, by occasional failures among the compradores of large European firms. But however unsatisfactory the system may be at other ports, it would seem to be worst at Hankow. There the native banks (says the *North China Herald*) bear a very indifferent character, and the relations between them and the compradores seem to be closer, and of a more suspicious nature, than elsewhere; while the compradores themselves are gene-

Digitized by Google

rally *de facto* merchants, trading on their own responsibility, but with the credit of the houses to which they are attached. Some alarming failures that have recently occurred among them have inspired the foreign merchants to make an effort to throw off the yoke, and the meeting of the 4th September is a first step in the right direction. We hope, however, to find that, at the succeeding one, appointed for the 18th September, a greater amount of decision has been shown, and two important points, namely, the mode of enforcing the provisions of the newly-adopted system, and the expediency of having the resolutions printed in Chinese, and conveyed through the Consuls to the Chinese authorities, will be definitively settled; these questions having been discussed in an irresolute sort of way by the first meeting, and finally shirked, or postponed for consideration at the ensuing one.

THE NETHERLANDS INDIA STEAMERS.

Mr. H. O. Robinson, the managing director of this company, and the original concessionaire, proceeds by the present mail to Java to organise the various lines agreed on. The fleet of steamers, which have been noted in our journal when despatched, consists of the following:—Koning Willem III., Koningin Sophia, Baron Bentinck, Admiraal, Baron Sloet van de Beele, Minister van Staat Rochussen, W. Cores de Vries, and Sunda—say eight in all. It is intended to despatch one more to complete the number required for the various stations.

It is contemplated by the P. and O. Company to make t e Bombay line, next year, four times a month, instead of twice as at present.

Mr. R. F. Gould, late Secretary of the Municipal Council, and formerly Lieutenant of the 31st Regiment, is now studying for the Bar, or going through the process of "eating the dinners."

Lieut.-Col. Neale, C.B., late Charge d'Affaires in Japan, and since Secretary of Legation at Athens, left town on the 1st inst. for his post as British Minister to the South American Republic of Equador.

THE ROAD AND THE RAIL IN CEYLON.

We heartily congratulate Ceylon on the opening of 34½ miles of railway. The celebration of the event on the 2nd ult. may be regarded as inaugurating a new era of industrial and commercial development. The completed section from Colombo to Amliepusse leaves but 40 miles of construction to Kandy. So far the gradient has been easy, Amliepusse being only 180 feet above the level of the sea; the remainder of the route presents far greater engineering difficulties, the Kadnganawa station at 30 miles distance being at an elevation of 1,698 feet, whence there is an easy descent to Kandy, placed at a height of 1,602 feet. We fully anticipate that the works will be completed within contract time; but the great substantiality required by Government in the works, the sickness of workmen, and difficulty in securing labour, the general rise in wages and, until lately, the absence of efficient laws to keep the labourer to his contract, render it doubtful whether the contractor will be a loser or a gainer. The contract price is under £1,000,000, including the purchase of the works and plant of the company which commenced the enterprise; and thus its subsequent assumption by the Ceylon Government has saved the colony from being saddled with double that amount. The advantages of this line would have been seriously counteracted but for the organisation of the Ceylon Carrying Company, as the native carriers would certainly have combined to have enhanced their charges for conveyance to or from the stations proportionately to the reductions effected by means of the railway route. The promise of support alluded to by the Governor in his opening speech to the Legislative Council, and the names of planters identified with this company, constitute a guarantee that its purposes will be efficiently carried out. This railway must go far to break up other obstructive combinations, besides providing new ramifications for individual enterprise. Connecting the commercial emporium of the island with the great inland producing districts, it must result in inciting that free competition essential to the harmonious working of all interests. With prices less arbitrarily controlled, the profits of merchants on a given quantity of importations will be lessened; but, on the other hand, demand will be increased, and the public will experience the advantages of enlarged supplies. The artificial adjustment of prices, by complicating exchange operations, prevents merchants abroad from calculating, with far less certainty than would otherwise be the case, the result of their ventures, and so restricts consignments. We see changes impending both in banking and agency operations, always inevitable, but hastened by the more facile distribution of the articles of exchange. With an open market at Colombo, and the secrets of trade more fully unlocked, planters will have less temptation to become their own exporters. New companies of a mercantile character will, doubtless, from time to time appear in the field, followed by that appropriate organisation which the closer connection of Ceylon and her enlarging trade with other countries may demand.

A state of things will thus, we may hope, be brought about in which a large body of planters will be relieved from high rates of interest and commission on advances, and, generally, from such complete financial dependence. The construction of additional railways, penetrating the chief producing districts, cannot, in our judgment, be long delayed. The considerations that must weigh with Government in sanctioning further loans for this purpose are the enhanced value thus given to cultivable lands, the necessity of this aid to supplement private enterprise, on its present extended scale, with the rich resources of all kinds to be developed; the certain increase in returns to the Treasury chest, Ceylon possessing already a surplus revenue, ample for the payment of the public debt—which is comparatively small; together with the provision of a sinking fund. What may be the relative scale of tramways and railways to be constructed cannot as yet be determined; but we would advocate by all means a railway to Badulla. It is encouraging to note that the local Government is so bent on improving communications, thus recognising Ceylon's great want. The sanction of the home Government should not be withheld from any judicious railway scheme originating in her Council; for the rendering the chief districts easily accessible is, to this most improving colony, the key to almost limitless wealth. The stage coach, a recent institution with ourselves, is already driven off the route between Amliepusse and Colombo, and, before February of 1867, stage passengers must book their last fares between Amliepusse and Kandy. The charges of travel by rail must be considered moderate. As soon as the through route is opened it is evident that Kandy will be greatly resorted to for the sake both of health and pleasure.

THE NEW GOVERNOR FOR HONG KONG.

Sir Richard Graves MacDonnell, with Lady MacDonnell, leaves England shortly for the Continent, and will join the P. and O. steamer at Suez, corresponding to the mail from this of 10th January. Sir Richard intends stopping a fortnight in Ceylon, and will no doubt gain from his predecessor, Sir Hercules Robinson, much useful information.

Literature.

We believe we may announce, on safe authority, that Mr. Murray, of Albemarle-street, has in the press an Account of the late Expedition to Bhootan, from the pen of Staff Surgeon Rennie, M.D., whose *Peking and the Pekingese* will, we trust, be published this day (the 10th). The annual sale-dinner of this eminent publisher furnishes an excellent key to the public taste, by showing, from the actual purchases of "the trade," what books are most in demand, not only from among new publications, but also of educational and other works, the reputation of some of which dates back to the time of our grandsires. At the dinner at the Albion, in Aldersgate-street, on the 3rd inst., among the sales effected were the following:—

4,800 "Dr. Livingstone's Expedition to the Zambesi;" 600 "Fergusson's History of Architecture;" 3,700 Dean Stanley's new volume of "Lectures on the Jews;" 700 Bertram's "Harvest of the Sea;" 8,000 Dr. Smith's "Condensed Bible Dictionary;" 400 Rennie's "Peking and Pekingese;" 500 "Dean Milman's Translations from the Greek;" 1,800 "Smiles' Lives of Boulton and Watt;" 600 "Rawlinson's Babylonia and Media;" 500 "The Student's Blackstone;" 300 "Memorials of Major Macpherson;" 1,500 "The Student's Manual of Old Testament History." Of the old-established school books and other works the demand was equally large, as the following numbers will show:—1,200 James's "Æsop's Fables;" 9,000 "Mrs. Markham's Histories;" 1,000 "Byron's Works;" 10,200 "Murray's Student's Manuals;" 200 "Grote's History of Greece," 8 vols.; 3,000 "Smiles' Popular Lives;" 500 "Blunt's Scriptural Coincidences;" 6,500 "Smith's Latin and Classical Dictionaries;" 7,200 "Smith's Greek and Latin Course;" 5 300 "Smith's Smaller Histories;" 1,000 "Mrs. Barbauld's Hymns;" 1,200 "Hallam's Histories;" 8,000 "Little Arthur's History of England;" and 2,300 "King Edward's Latin Grammar."

CHINA GRASS.

(To the Editor of the *London and China Telegraph.*)

SIR,—I hope you will allow me to correct the impression that my letter of 12th Oct. seems to have caused. I can assure you that "jealousy" in the honest competition of trade has no abiding place in my character, but I do confess to sharing with many of my nation an irritation at seeing things claimed as new and wonderful by foreigners which to us are old and unexciting.

I should be little of an economist were I to cavil at the substance or the manufacturer even of so small an article as my handkerchief, so long as I was satisfied that it was the most presentable, durable, and inexpensive that could be obtained; but if I heard any assert that it was French manufacture when I knew for a fact that it had been produced by the enterprise and skill of my own countrymen, why, I guess, I should have little title to my nationality did I not claim honour for whom such distinction was due. From the following paragraph which appeared in the *Pall Mall Gazette* of 30th ult., you will see that others also question the Frenchman's figures anent China grass:—

"The *London and China Telegraph* affirms that the fibre so well known in India and China under the name of China grass can be used to mix with cotton with great economy. Experiments with it have been made in Rouen, and the Chamber of Commerce there has reported in its favour, as being cheap, strong, and easy to dye. One spinner professes his willingness to take a ton a day, and the only question is as to the quantity procurable. At present this is limited; and although it might be increased indefinitely, we question if the fibre will prove in the end cheaper than cotton, which grows in half the countries of the world, and is everywhere thoroughly understood."

My experience of the Gaul in business has taught me that he *is* an extremely "rosy" gentleman, and very apt to form very extravagant ideas about things new to *him*. My idea is that three years ago I was informed that China grass, before it could be made fit for the spinner, cost something like 1s. 10d. to 2s. per lb. (of course to sell at a profit), so great is the loss in weight and the waste. Remember, it is the fibrous bark of a twig seven or eight feet long. Again, the waste in spinning alone is very heavy, so that unless some great advances have been made, I should think the spinner could scarcely afford to sell his yarn much under 2s. 6d. to 3s. per lb.

The Chinese manufacture it largely themselves, but the cloth is always dearer than cotton. Besides, the fabric, in wear, feel, and warmth, is not a bit like cotton, but linen; and for this reason brown holland has been imported in small quantities into China for many years. Ladies in England will know what it resembles from the embroidered 'kerchiefs that their China friends send home. That this fibre will ever be produced cheap enough to compete with cotton is not at all likely, and if it were no one would use it instead of cotton; while, as regards linen, I do not think it equal to flax. I am of opinion that its great and proper use will be with the Bradford stuff and Macclesfield silk manufacturers; and I have no doubt that at this present moment it is used largely by some, "only, you know, if a man has a good thing, he likes to keep it to himself, you know."

Having written so much, and, I fear, wasted too much of your valuable space, I will not be a whit less bold than the valiant spinner of Rouen, but beg to inform him that I am ready to take ten tons of China grass yarn per diem at 20 per cent. less than the market price for cotton.—Your obedient servant,

AN ENGLISHMAN.

London, Nov. 4.

Naval and Military.

The Basilisk, 6 paddle sloop, Captain H. N. Hewitt, V.C., left Plymouth Sound on the 31st October, for the China station.

Mr. G. W. Mackay, assistant clerk, was sent out in the Basilisk to join the Princess Royal at Hong Kong.

Commander W. H. Cuming, who was promoted for service in the Barrosa, on the China station, has been appointed Inspecting Commander in the Coast Guard, and stationed at Carlisle.

Deputy-Assistant Commissary-General Mercer is under orders to proceed from China to the Cape of Good Hope.

The Daphne, 18, one of the old class of sailing vessels, attached to the reserve in Chatham harbour, having been surveyed and pronounced unfit for further service, has been towed round to the Thames, to be broken up at the ship-breaking yard of Messrs. Castle and Beech, Charlton.

Colonel Suther, who commanded the battalion of Royal Marine Light Infantry lately in Japan, and now *en route* for England in H.M.'s ship Conqueror, arrived home by last mail. The Conqueror sailed from Yokohama on the 22nd of August; she will touch at Hong Kong, Singapore and the Cape, and may be expected to arrive in January. The battalion left Plymouth on board the Conqueror on the 19th Dec., 1863, 538 strong, and arrived at Yokohama on the 28th May, 1864. On the 6th of June they disembarked and emcamped on the Bluffs above the foreign settlement, where, owing to the nature of the soil on which the camp was formed (no other site being obtainable) dysentery broke out, and in the months of July and August 22 men died of it, and some 30 or 40 were invalided. On the 26th of August the battalion embarked in H.M.'s ship Conqueror for the Inland Sea expedition, and was present at the bombardment of Simonoseki, on the 5th September, by the allied fleets of England, France and Holland. On the following day they were landed for the destruction of the forts and magazines, which service was successfully performed; the men contributed by other ships raising the total force employed to 900 marines and 300 blue-jackets.

On the 6th October the battalion again disembarked at Yokohama and went into huts built on the old camp ground by the Japanese; and continued to do garrison duty until the date of their departure for England. The general conduct of the men was excellent, and no desertions took place. The following is an extract from general orders dated Yokohama, 15th August, 1865:—"Major General Guy cannot allow this fine battalion to quit the Japan command without recording his sense of the admirable state of efficiency and discipline for which it has been conspicuous during the period of its service in this country."

20TH REGIMENT.—A correspondent in Hong Kong writes:—"About two years ago the second battalion of this regiment embarked at Portsmouth for India. On reaching Calcutta the regiment received orders to proceed to China, the women and children being sent to Dum Dum and there left. After some little time the regiment was ordered to Japan, leaving the women and children about seven miles from Hong Kong, at Stanley, where they have been left open to all temptations that could be possible for poor creatures in such a helpless condition. They have now been there sixteen months without the least effort being made to have them sent to join the regiment. Many of them have gone to a long home. Many orphans and husbands mourn their loss. The soldiers of the regiment have to see so many of their wives and children left to shift for themselves. In Japan there is plenty of room to build a few huts."

Although nothing has yet been settled upon the subject of reductions in the army next year, we think (say the *Army and Navy Gazette*) we may warn those concerned to prepare for the reduction of one more depot battalion. Our reason for doing so is based upon the fact that after next spring we shall have six less battalions serving abroad, and consequently six less regimental depots—about the strength of a depot battalion at home.

The military authorities at home have consented to the proposition of the Indian Government to reduce the strength of the army in Madras by one battalion. The relief of the 1st battalion 18th Royal Irish, by the the 2nd battalion 24th, from the Mauritius, is, however, being carried out, and the consequence of this step will be that the 80th Regiment will return to England in the spring, its place in Bengal being taken by one of the battalions now quartered in the Madras Presidency. The 80th will follow the 44th, 72nd, 54th, 56th, and 1st battalion 18th, already under orders for home.

Lieut.-General Sir Richard Airey, the new Governor of Gibraltar, has appointed as his aide-de-camp Captain Hood, of the 25th Regiment, who was aide-de-camp to Sir W. Codrington, and Lieutenant Bolton J. A. Monsell, 73rd Regiment. Lieutenant-Colonel Pearson, of the Grenadier Guards, will be his Assistant Military Secretary.

It has been announced at Chatham Dockyard that the appointment of Principal Storekeeper, vacant by the retirement on superannuation of Mr. R. Laws, has been conferred by the Admiralty upon Mr. Astley Paston Cooper, formerly storekeeper and accountant at the naval and victualling establishment, Trincomalee, Ceylon.

Lieut. Prince Alfred rejoined his ship, the screw corvette Racoon, 22, Capt. Count Gleichen, at Spithead, on the 2nd inst., on return from leave of absence.

Although a party of workmen have commenced taking to pieces the wooden screw frigate Belvidera, 51, 600-horse power, the only unarmoured vessel of that class now on the stocks at Chatham Dockyard, where she has been standing idle for about six years, no orders have yet been received as to the ultimate fate of the fine 91-gun screw two-decker Bulwark, about one-half completed, on the adjoining slip. Some time since a report respecting her was called for from the master shipwright's department, and it was then thought she would undergo conversion, be cut down, have one of her decks removed, her hull armour-plated, and be converted into a turret-ship. As she is almost the only two-decker now lying at any of the dockyards in a partial state of completion, and various circumstances preventing her being converted into an armour-plated frigate, it is suggested that she may be completed as a turret-ship of the Royal Sovereign class, for which her size and other circumstances well adapt her.

Arrangements are ordered to be carried out on an extensive system in Woolwich Arsenal for the purpose of fulfilling the design of the War Department, long contemplated, of superseding the use of timber for gun-carriages throughout the two services, and establishing that of iron in its stead.

The Royal Alfred, iron-cased wooden frigate, 4,056 tons, 800-horse power, will be completed in her armour plating and floated out of No. 3 dock of Portsmouth yard early in the ensuing month. This ship first appeared on the Admiralty Navy List as one of the latest improved 90-gun screw line-of-battle-ships, and was all but completed in that form at Portsmouth, when iron-clothed ships became popular. She was then ordered to be razeed to a frigate, divested of quarter and stern galleries, figurehead, &c., giving a conical shaped stern and a swan-breast stem, and clothed externally, from five feet below her load water-line upward, with 4½ inch rolled iron armour plates. In the meantime, however, 4½-inch iron-plating on the sides of a wooden ship possessing no inner iron skin had been demonstrated by experiments at Shoebury and elsewhere to be worse than useless. Accordingly the Royal Alfred has been again rearranged, and in her new and latest form will, without doubt, be the most formidable iron-cased converted wooden ship afloat. She will at the same time possess serious points of weakness, which are unavoidable in a converted wooden vessel. Purely as a specimen of workmanship, or rather, we should say, as a specimen of the skill of shipwrights in iron work, the Royal Alfred will surpass every other ship afloat. The edges of the armour-plating have been fitted with excessive nicety, and the plates subjected to a course of most elaborate and costly chipping, filing, and burnishing which seems unnecessary.

WAR-OFFICE, STAFF.—Lieut.-General Sir James Hope Grant, G.C.B., to be Quartermaster-General, vice Lieut.-General Sir Richard Airey, K.C.B., appointed Governor and Commander-in-Chief at Gibraltar.

A correspondent of the *Army and Navy Gazette* writes:—The P. and O. Company's ship Poonah arrived at Southampton on the 22nd ult. with the India and China mails, passengers, &c. We regret to learn that between Hong Kong and Malta five deaths occurred, the first of which, that of Mr. Christopher Albert, master, R.N., took place when within a day of Singapore. Lieutenant H. G. Hale, late in command of Her Majesty's gunboat Weazel, died when within a day of Penang; Major Atkinson, when within a day of Point de Galle; then Mr. Charles Kettyles, quartermaster of 25th Regiment, when within two days of Suez; and, lastly, a private soldier of the 11th Regiment, soon after leaving Alexandria. All these were invalids, and the fact tells very much against the absurb system of delaying sending men home till hardly a hope exists of their recovery, which is invariably the case, more especially in the navy. Whether it is the fear of responsibility on the

Digitized by Google

part of the medical officers, or that they are too much bound down by red-tapeism, it is hard to say; at all events, such cases should be worth the consideration of those in authority. Few things shocked the passengers more than the want of any means of providing for the invalided soldiers on disembarking at Suez. There was no sick quarters, no one to attend to the men, and had it not been for the kindness shown by some of the passengers, whose indignation was aroused by such neglect, one poor fellow would probably have died ere he reached the train. The men were unprovided with money to pay for meals or any trifling wants while crossing the Desert, and money had to be subscribed for them. Surely it would be an easy matter to establish sick quarters at Suez, with a medical man at hand to receive invalids of both services, and see that they were properly attended to while waiting at Suez, which they sometimes have to do for many hours. A distinguished officer, who arrived at Southampton in the Poonah, was an eye witness to the whole of this management, and we sincerely hope he will bring the matter before the proper authorities.

VOYAGE OF HER MAJESTY'S SHIP TAMAR.

The troop ship Tamar, Captain Frederick H. Stirling, went into Portsmouth harbour on the 6th inst., and anchored alongside the scull jetty in the dockyard. She arrived during the previous night from China, after a long and tedious voyage, the particulars of which will doubtless be read with interest.

She left England on the 15th of October, 1864, for the coast of Ireland. Arriving at Kingstown she embarked the 86th Regiment for Gibraltar. Soon after leaving Kingstown she encountered a "fearful gale," as described by those on board, during which two men were washed overboard. One was saved and the other drowned. During the gale the ship behaved remarkably well. She arrived safely at Gibraltar on the 26th of the same month, and disembarked the troops from Kingstown. On Nov. 3 she embarked the 2nd Battalion 9th Regiment for China, arriving at the Cape of Good Hope on the 7th of December, and Singapore on the 25th of January, reaching Hong Kong on the 7th of February, having made a remarkably fine passage. On the 1st of March she sailed from Hong Kong, having there embarked portions of the 67th and 99th Regiments, bound for the Cape of Good Hope. She called at Batavia *en voyage*, and arrived at Natal, South Africa, on the 10th of April, where she disembarked the head-quarters of the 99th Regiment. On the 15th of April she embarked a portion of the 11th Regiment for service in China. Proceeding to Buffalo Mouth, a wing of the 67th Regiment was disembarked, and the ship returned to China, calling at the Mauritius, where she arrived on the 28th of April, and left again on the 4th of May, calling at Singapore on the 19th, having made a very fine passage between the Mauritius and Singapore in 15 days. On the 28th of May she reached Hong Kong, at which port the 11th Regiment disembarked. The Tamar was detained at Hong Kong until the 26th of July, awaiting the arrival of troops from the north of China. Having embarked a number of naval and military invalids, also portions of the 67th and 99th Regiments, she sailed for Singapore, where she arrived on the 5th of August, making the Mauritius on the 27th. On the 11th of September she was at the Buffalo Mouth, where she disembarked portions of the 67th Regiment and the 99th. On the 13th she called at Algoa Bay, reaching Simon's Bay on the 16th, sailing again on the 24th, after having embarked more military invalids. On the 3rd of September St. Helena was made, Ascension on the 9th, and St. Vincent on the 19th. During the homeward passage of the Tamar, the rate of mortality on board has been large, no less than twenty-six deaths having occurred since she left China; the deaths, however, occurred chiefly among the invalids. Mr. Gruchy, the chief engineer, died, as did also the Rev. Mr. Hackett, and Lieut. Lyster, R.E. She has brought home Colonel Yonge, 67th Regiment; Lieut. Kenwick, 67th Regiment; Capt. Maunsell, 2nd Battalion 11th Regiment, wife, and two children; Capt. Barnard, 96th Regiment; Lieut. Nicholson, 2nd Battalion 9th Regiment; Lieut. Jeffars, 2nd Battalion 9th Regiment; Lieut. England, 1st West India Regiment; Staff Assistant Surgeon Beath, in charge of invalids; Staff Assistant Surgeon A. S. Tracey, from the Cape of Good Hope; Staff Assistant Surgeon Smith, from the Cape of Good Hope, in charge of invalids, wife, and two children; Purveyors' Clerk Mr. Hutchins, wife, and two children; Mr. Blackmore, wife, and four children; also Lieut. Cardew, 67th Regiment; Lieut. Cumming, late 2nd Battalion 9th Regiment, wife, and two children; Mr. Nightengale, harbour master of Simon's Bay, wife, and four children; also Surgeon Palmer, and Assistant Surgeon Inman, both the latter having completed their time of service in China; Sub-Lieutenant Stuart, invalided from the Princess Royal; Second Master Dobson, late of the Weasel; Sub-Lieutenant Luthy, of the Valorous (to pass for promotion); Assistant Paymaster Rawlinson, late of the Egmont. The last named officer is for disposal by the Admiralty. The troops brought home, including military officers, ladies, soldiers' wives, and children, include 13 officers, 237 men, 13 ladies, 24 children, 8 attendants, 36 soldiers' wives, and 55 soldiers' children. On board the Tamar were also Mrs. Caine, wife of the British Consul at Swatow, and family; also the widow of the Rev. Mr. Hackett, who died on the passage, and three children; 95 naval invalids from different ships on the station were also brought to England in the Tamar. The mortality caused by dysentery and fever is chiefly attributable to change of climate, many of those who died having been extremely ill on embarkation. One poor fellow was lying dead on the deck, with the union-jack placed over him, while the Tamar was moored off the jetty. She will undergo a thorough repair prior to further service.

THE ALLIANCE BANK V. THE CHARTERED MERCANTILE BANK OF INDIA AND CHINA.—This case came before the court upon a demurrer. The plaintiffs, as the nominees of Mr. Robinson, the holder of five shares in the defendant company, demanded a transfer of the shares to the plaintiffs, but the defendants, relying on an article in their constitution which declared that no person not being a lawful claimant of any shares should be entitled to become a transferee of the shares unless he were approved by the board of directors, refused a transfer. Mr. Selwyn, Mr. Baggallay, Mr. Hobhouse, Mr. Bowring, and Mr. Westlake were counsel in the case. His Honour said the question whether the defendants were justified in declining to transfer shares to a rival bank must be decided at the hearing of the cause and not upon demurrer. Therefore he proposed to overrule the demurrer, but he would reserve the question of costs till the hearing.

THE COMMUNICATION BETWEEN INDIA AND CHINA.—The *Friend of India* says:—"It is time that the Indian Government should seriously take up the question of constructing a line of telegraph between Calcutta and Hong Kong. For this there are two routes; the first and best through Cachar and Muninpore, recommended by Dr. Williams, late Political Agent at Mandalay, and the second through Rangoon and Bhamo, the frontier town of the Burmese territory. The latter is the route recommended for the construction of a railway to connect Burmah and China, by Captain Williams and the Messrs. Sprye. We have always ridiculed the idea of a 'railway,' but the same objections do not hold good in the case of a telegraph; it would only require a few Europeans at the various signal stations who would not be molested, as the Burmese and Chinese are easier people to manage than the tribes of Turkish Arabia."

APPOINTMENTS, &c.—The Queen has been graciously pleased to appoint George West, Esq., now British Vice-Consul at Suez, to be Her Majesty's Consul at that port. Thomas Backhouse Sandwith, Esq., now British Vice-Consul at Caiffa, to be Her Majesty's Vice-Consul at Cyprus. Sir Robert Alexander Osborne Dalyell, Bart., now Her Majesty's Consul at Jassy, to be Her Majesty's Consul at Roustchouk. Alexander Bower St. Clair, Esq., now Her Majsty's Consul at Varna, to be Her Majesty's Consul at Jassy. Percy Mitford and Edmund Constantine Henry Phipps, Esqrs., now Third Secretaries, to be Second Secretaries in Her Majesty's Diplomatic Service. John Ward, Esq., C.B., now Her Majesty's Chargé d'Affaires to the Free Hanseatic Cities of Lubeck, Bremen, and Hamburgh, to be Her Majesty's Minister Resident to those cities. Robert Bunch, Esq., now Her Majesty's Consul-General in the Island of Cuba, to be Her Majesty's Chargé d'Affaires and Consul-General to the Republics of Guatemala, Nicaragua, Costa Rica, Honduras, and Salvador, in Central America; and William Webb Follett Synge, Esq., now Her Majesty's Commissioner and Consul-General in the Sandwich Islands, to be Her Majesty's Consul-General in the Island of Cuba.

FIRE AT BEALE'S WHARF.—A destructive fire occurred on Monday the 30th ult. at Beale's wharf, Tooley-street near the scene of the Great Fire of 1861. A boy and a porter were on the premises belonging to the Messrs. Beale, about 5 o'clock, for the purpose of lighhting the engine fire, when they noticed a smell of something burning, and concluded a fire had broken out. The boy at once went for the engine and gave the alarm to the police. A constable who was on duty sent immediately to Watling-street, and to the stations on the Surrey side of the river. In a short time two land steam engines arrived on the spot. The flames had by this time reached the first floors of the warehouse, in which were stored tea, Spanish liquorice, cane, seed, and pepper, and from the nature of the goods and mode in which they are packed they spread rapidly. Other engines arrived in quick succession, and there were present in a short time no less than eight land steam engines, two manual power engines, and the floating steam engine all in full play. The flames spread to several floors, but at last, between eleven and twelve o'clock, they were brought under control, and soon after extinguished. There has been destroyed about 1,200,000lb. of tea, worth £100,000. Hay's Wharf adjoining has escaped without damage.

THE FRENCH GIANT.—Gaul will not be outdone by the Celestials, and Chang has now to encounter a rival who at least makes a boast of "higher" attractions. Mr. J. Brécc, or "Anak, the Anakim," as the bills prefer to designate him, who is holding his levées at the St. James's Hall, is apparently about twenty-three or twenty-four years of age, is eight feet high, and weighs thirty stone. The width of his body, round the chest, is four feet six inches; his feet are sixteen inches long; his powerful hands look as if they could grasp a young forest tree, and they could, we have no doubt, wield with ease the sword of any giant of mediæval romance. His features are large and massive, and yet their expression is unusually, and even singularly, delicate and gentle. His eyes have a soft, thoughtful gaze, and his whole bearing is modest and kindly. In this respect as well as in the darkness of his complexion, he resembles Chang, the Chinese giant, to whom, however, he bears no sort of comparison in general proportions. Indeed he is not a patch upon Chang, and it is only necessary for visitors to survey the two to come to this conclusion. He appears to be in no way demonstrative, and he has no part to perform beyond passing down the centre of the hall, and allowing all who wish to shake his honest, open hand, or rather to seize one or two of his huge fingers. He is introduced in flaming and showy costume, but he has in no other way the manner or appearance of an actor. His exhibitors probably consider that he is in himself a sufficient portent, and in these times of public welcome to all abnormal or exceptional developments of the human form he will no doubt have his day, and that day will not be an unprofitable one.

CHANG'S LEVEES AT THE EGYPTIAN HALL.—Among the distinguished visitors to his Celestial "Greatness" have been the Duke of Sutherland, Lord Broughton, Lady Constance Grosvenor, the Countess of Spencer, Lord Ranelagh, Sir Robert Peel, the Hon. Mrs. Randell, &c., their Graces the Duke and Duchess of Wellington, Lord and Lady Rivers, Lady Hastings and the Misses Hastings, the Hon. Charles Wilson and Lady, the Hon. Mrs. Norton, &c.

REINFORCEMENTS FOR COCHIN CHINA.—The steam transport *l'Ardeche* has left the port of Toulon for Saigon with about 800 marines, &c.; there are also on board seven workmen skilled in the different departments of typographic art, to be employed in the Imperial printing establishment, from which, for the past two years has issued the *Courrier de Saigon*, the official journal for French Cochin China.

THE last outward mail takes the unprecedentedly large number of 268 passengers, 178 of whom left Southampton by the *Poonah* on the 4th, and the remaining 90 go *via* Marseilles.

AN evening contemporary says that in all probability Lord Napier will become Governor of Madras on the expiration of Sir William Denison's term of office.

Monetary and Commercial.

—o—

The new manager of the Chartered Bank of India, Australia, and China at Shanghai is Mr. Edward Maccal, lately at the Rangoon branch, who will be succeeded by Mr. Watson, late agent of the Bank of Bengal.

Mr. Walter Evans Gledstanes, of the firm of Messrs. Gledstanes and Co., of Austinfriars, has joined the direction of the Commercial Bank Corporation of India and the East.

The directors of the Asiatic Banking Corporation have declared an interim dividend for the half-year ended the 30th June last at the rate of 5 per cent, per annum, free of income-tax, on the original shares, payable on the 13th inst.

The following announcement appears in the Glasgow papers :

The partners of the firm of Buchanan, Hamilton, and Co. were formally discharged on Saturday from the liabilities of the firm, as well as from those of Hamilton, Gray and Co., in Singapore, and of Jarvie, Thorburn, and Co. in Shanghai, China, and Yokohama, Japan.

We hope that creditors will obtain in bankruptcy an equivalent of the composition of 12s. 6d. offered by the partners at the meeting on the 3rd of July, although we incline to think this doubtful, owing to the many legal questions which have arisen, and which would have been avoided had the offer of 12s. 6d. been accepted. If the creditors suffer in this respect they will have to thank the instigators of throwing this estate into bankruptcy. We understand that the assets and liabilities of each firm will be dealt with separately, but it is not finally decided.

The biddings for 35,00,000 rupees (£350,000) in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, 19,16,000 rs.; to Madras, 5,84,000 rs.; and to Bombay, 10,00,000 rs. The minimum price was as before, viz., 1s. 11½d. on Calcutta and Madras, and 1s. 11⅝d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅝d. will receive about 52 per cent.; and on Bombay, at 2s. 0⅛d., about 17 per cent.—above these prices, in full.

The gradual absorption of private banks by joint-stock companies, which has been going on during the last few years, has considerably diminished the number of private banking establishments. The last case being that of Olding's, noticed below. Among the most noticeable of the old firms which have thus disappeared are the following :—Jones Loyd and Co., Masterman and Co., Hankeys and Co., Challis and Son, Lubbock and Co., Hanburys and Co., and Spooner, Attwoods, and Co. Notwithstanding the temptations offered by the Limited Liability Act, many of the old-established private banking firms stoutly resist the changed system introduced by it, among which the following are the chief :—Barclay and Co., Barnett and Co., (amalgamated with Hanburys and Co.) Biddulph and Co., Brooks and Co., Child and Co., Coutts and Co., Cunliffes and Co., Drummonds, Fullers, and Co., Glyn and Co., Goslings and Co., Herries, Farquahar, and Co., Hoare's, Martin and Co., Prescott and Co., Robarts, Lubbock, and Co., Smith, Payne, and Co., Williams, Deacon, and Co., Ransome, Bouverie, and Co., Price and Co., Stevenson and Co., Dimsdale and Co., Curries and Co., and Bosanquet and Co.

The following has been published in *The Times*' city article on the adulteration of piece goods, which it is to be hoped will be a caution to the unprincipled people in Manchester, who have thrown such discredit on their "cloth :"—

A year or two back the question of the adulteration of cotton by Indian shippers to the English market attracted great attention, and steps were taken at Bombay to check the evil. Some similar corrective seems now to be required on this side, the goods shipped from Manchester to India having of late been found to be mixed with a proportion of foreign substances far beyond anything previously experienced. The articles thus manufactured become mildewed and rotten, as they are especially liable to absorb moisture, and it is said that from all the up country dealers complaints are received by the merchants at Bombay and Calcutta, and that the repute of British goods is undergoing damage that may create a prejudice such as it would take years to eradicate. An analysis lately made of certain samples showed them to be composed of only about 66½ per cent. of cotton fibre, the remainder consisting of fermented flour 14 per cent., mineral matter about 13 per cent., and Hygroscopic water about 6½ per cent., although in good cloth the proportion of cotton fibre should not be less than 88 or 90 per cent. It is an important consideration that the annoyance and losses occasioned by these goods tend to damage in a nearly equal degree the sale of the better sorts, since a general distrust is excited, and buyers are afraid to operate in any descriptions. If similar practices should be found to prevail with regard to goods shipped to the United States, the ultimate consequences in checking the reputation and extent of our commerce may be still more serious. Some of the Manchester people argue that the matter is purely one of price, and that if a demand exists for goods at quotations that can only be met by the use of worthless materials it is our business to supply it. But, although this view is unanswerable, provided the goods are shipped with a true designation of their quality, it will not justify the practice of pretending that they are such as have hitherto had a place in ordinary trade. The Cotton Frauds Act in India to protect buyers of cotton from adulteration was passed at the urgent request of Lancashire manufacturers, and there is no difference between the two positions, except that the adulteration of goods being more difficult of detection than that of the raw material, any penalties or restrictions that may be adopted should be enforced with especial rigour in the former case.

The Paris correspondent of a contemporary writes on the silk trade :—

Trade has improved among the silk manufacturers of Lyons, and is progressing favourably. Articles suited to the Paris market have advanced considerably in price. This favourable change, together with news received from China and Japan, has induced many mill-owners to purchase raw silk. Mybash raw silk is bought freely at from 118f. to 120f., while there is no demand for European silk. There was likewise a demand for white Broussa spun silks at from 125f. to 127f., and at from 120f. to 122f. for yellow. The demand for raw silk is more brisk at Marseilles, without any change of prices. Eleven bales of spun Syrian silk were sold last week at from 100f. to 102f.

The following new companies are announced :—

The Leeds Woollen Extract and Spinning Company (Limited). The freehold of the Low Hall Mills, at Holbeck, near Leeds, is to be purchased by this new company, together with the premises, plant, machinery, patents, and goodwill. The business is now in active operation, and consists in spinning and in extracting fibres of wool from fabrics or materials composed of wool, combined with cotton, and other vegetable substances. Capital, £150,000, in 10,000 shares of £15 each.

The Real Estate Corporation (Limited). Capital, £500,000 (half to be first subscribed), in shares of £25, for the purchase of landed estates and their resale. Four properties have been provisionally bought—namely, one at Fulham of 40 acres, one at Banstead, Surrey, of 350 acres, one at Lowestoft, in Suffolk, and one at Cosham, near Portsmouth, of 34 acres.

The Pennsylvania Lubricating Oil Lands Company (Limited). This company proposes to purchase the freehold of 700 acres in the oil district of Pennsylvania, said to be rich in this lubricating oil, and provisional contracts for the purchase have already been concluded. Capital, £300,000, in £20 shares.

The Alhambra Company (Limited). Capital, £100,000, in shares o £10, to purchase the lease of the Alhambra in Leicester-square, for 20 years, for the sum of £55,000, half in cash and half in shares, and to carry it on under its present management.

The National Poultry Company (Limited). To apply a new system, organised by Mr. Geyelin, for the rearing of poultry on a site of five acres at Bromley in Kent. Capital, £25,000, in £10 shares.

The Anglo-Swedish Steel and Iron Company, capital £1,500,000, in shares of £25, to amalgamate the iron, steel, shipbuilding, and engineer-works and estates of the Hogbo Steel and Iron Works Company in Sweden with the Northfield Steel and Iron Company, near Rotherham, in England.

The Matella Coffee Estates Company of Ceylon; capital £60,000, in shares of £10, for the purchase of three coffee estates containing 1,010 acres, of which 552 are in full bearing.

The Ismit Forest Company, with a capital £160,000, in shares of £10. The object is to purchase the interest in a concession for working in perpetuity the whole of the forests of the province of Ismit, in Turkey, and also the existing works, consisting of steam sawing mills, &c.

It is announced that the business of Messrs. Olding, Osborne, and Co., private bankers, which was established in London more than 100 years ago—viz., in 1762—has been merged into the English Joint-Stock Bank (Limited)—an undertaking which, it will be remembered, has had for its special object to absorb country banks, as opportunity may arise. Hitherto the English Joint-Stock Bank have been merely country bankers, possessing thirty-one branches and four agencies, and the progress of the company has been checked by the fact that they have had to bear much of the expense of a London establishment without enjoying its full advantages. They will now become London bankers as well, the London business being specially committed to the management of Mr. Stephen Olding and Mr. Louis Courtauld, two of the partners in the firm of Olding, Osborne, and Co. The other businesses now combined with the English Joint-Stock Bank are the West Surrey Bank of Messrs. Mangles, established in 1836; the Ramsgate Bank, of Messrs. Burgess and Canham, established in 1808; the Bideford Bank, of Messrs. Harding and Co., established in 1844; and the Nottinghamshire Bank, of Messrs. Hart, Fellows, and Co., established in 1808.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton on the 4th inst., was :—In gold, to Alexandria, £2,000; to Madras, £3,314. In silver, to Madras, £26,250; to Calcutta, £48,870; to Hong Kong, £12,108; to Shanghai, £300. Total, in gold, £5,314; in silver, £87,528.

The Board of Trade Returns for the month of September tend in some degree to explain the extraordinary absorption of gold coin throughout the country. The amounts disbursed in wages must have experienced a sudden and heavy increase, since the total value of the shipments of manufactured goods during the period has exceeded by nearly one-fifth the large totals of the corresponding month of the last two years. Their actual amount was £17,316,681, showing an augmentation on September, 1864, of £2,628,739, or about 18 per cent. At the same time this large increase in value does not fully denote the increase that has taken place in the employment of hands, since, owing to the fall in the cost of the various principal staples, the quantities manufactured exhibit a much greater comparative advance. Thus the quan-

Digitized by Google

tity of woollen goods shipped shows an increase of 81 per cent., while the increase in value has been only 29 per cent. Of cotton goods the increase has been 11 per cent. in value, and 34 per cent. in quantity, and of cotton yarns 90 per cent. in value, and 150 per cent. in quantity. It appears also that the activity of commerce has been very evenly diffused through most branches of production. In linen manufactures there has been an increased value shipped of 34 per cent., in silk manufactures 35 per cent., in iron 23 per cent., and in hardwares 4 per cent. This rapid revival of business has brought the total of our first nine months' exports to nearly the same amount as those of the corresponding period of last year, the difference now being only three per cent., while contrasted with the first nine months of 1863 they show an increase of 15 per cent. The value of the exports for the first nine months of 1865 is £119,717,377, while the exports for the same period of 1864 amounted to £123,404,061, and in 1863 to £104,294,713. The trade with China and the Far East, so far as distinctively classified in these returns is represented by the following figures :—

EXPORTS TO CHINA AND HONG KONG.

	1863.	1864.	1865.
	For the Month ended 30th September.		
Cotton yarn	511,320 ..	295,400 ..	44.476 lbs.
Cotton manufactures ..	6,328,453 ..	4,926.052 ..	12,343,309 yds.
Worsted stuffs	842,546 ..	1,308,835 ..	1,261,084 „
Woollen and worsted cloths	99,246 ..	202,779 ..	181,315 „
Lead	663 ..	1,174 ..	353tons
	Value for the Nine Months ended 30th September.		
Cotton yarn	£144,815 ..	£213,753 ..	£87,466
Cotton manufactures ..	830,589 ..	1,557.435 ..	1,899,359
Worsted stuffs	461,925 ..	739,126 ..	924,780
Woollen and worsted cloths.	251,782 ..	233,034 ..	220,151
Lead	243,128 ..	136,933 ..	32,870

The Cotton Manufactures exported to other ports and countries of the Far East were, in quantity for the month, and in value for the nine months, as following :—

	1863.	1864.	1865.
	Quantity for the Month ended 30th September.		
Ceylon	2,202.635 ..	2,059,629 ..	2,428,519 yds.
Singapore	4,038,325 ..	819,497 ..	2,591.199 „
Java	1,318,502 ..	747,158 ..	2,258.982 „
Philippine Islands ..	957.829 ..	— ..	4,480,022 „
	Value for the Nine Months ended 30th September.		
Ceylon	£280,377 ..	£336,879 ..	£230,142
Singapore	476.092 ..	546,284 ..	707,486
Java	251.774 ..	457.086 ..	489,086
Philippine Islands ..	273.010 ..	457,517 ..	541.678

Of Cotton Yarn, the quantity forwarded to Singapore during the September of this year was 54,510 lbs., and during the nine months 1,027,300 lbs. ; the value for the nine months being £96,709, against £90,472 in 1864, and £158,193 in 1863. To Ceylon the export was 108,108 lbs. for the month, and 229,500 lbs. for the nine months; the value being £17.879 for the nine months, against £24,511 in 1864, and £43,269 in 1863.

IMPORTS.

Raw Cotton exhibits a marked change this month in reference to the import from China, while British India maintains its place as regards the import for the nine months, with even a considerable increase on the single month. This is the return : —

	1863.	1864.	1865.
	Quantity for the Month ended 30th September.		
British India.. ..	359.634 ..	466,870 ..	640,008 cwts.
China	21,490 ..	33.367 ..	16 „
All parts	496,326 ..	653.211 ..	899,030 „
	Quantity for the Nine Months ended 30th September		
British India.. ..	2,165,152 ..	2,680,140 ..	2,581,409 cwts.
China	208,866 ..	571,332 ..	301,525 „
All parts	3,670,608 ..	5,323,211 ..	5,460,070 „
	Value for the Eight Months ended 31st August.		
British India.. ..	£14,058.913 ..	£21,161,406 ..	£10,244.094
China	1.350,182 ..	4,688,283 ..	1,449.586
All parts	26,844,115 ..	50,504,190 ..	29,944,508

Of Unrefined Sugar, the quantity imported during September from Java and the Philippine Islands was 2,882 cwt., of 3rd quality (not equal to Brown Clayed), and 13.067 cwt. of the 4th quality. The total quantity for the nine months, and value for the eight months, is given in the following figures :—

	1863.	1864.	1865.
	Quantity for the Nine Months ended 30th September.		
Of all qualities (cwts.)	670,777 ..	183,267 ..	528,367
	Value for the Eight Months ended 31st August.		
Of all qualities	£579,481 ..	£192,211 ..	£504,916

Of Hemp the import from the Philippine Islands was 3.632 cwt. for the month of September last, while the total for the year is thus represented :—

	1863.	1864.	1865.
Quantity to 30th Sept. (cwts.) ..	239,613 ..	119,812 ..	165,757
Value to 31st Aug.	£280,478 ..	£202.466 ..	£243,101

Of Raw Coffee Ceylon delivered to us 14,542,284 lbs. in September of the present year, and the total deliveries in this and the two preceding years are thus stated :—

	1863.	1864.	1865.
Quantity to 30th Sept. (lbs.) ..	51,812.711 ..	55,872.844 ..	62,770.334
Value to 31st Aug.	£1,744,355 ..	£1,630,383 ..	£1,652,561

The Declared Value of the British and Irish Produce and Manufactures exported during the first eight months of the three years to the ports and countries of the Far East named below was as follows :—

To	Exports for the Eight Months ended 31st Aug. 1863.	1864.	1865.
China (exclusive of Hong Kong).	£1,608.550 ..	£2,068,531 ..	£2,326,569
Hong Kong	788.918 ..	1,167.736 ..	957,673
Singapore and Eastern Straits	860,834 ..	903.568 ..	1,018,609
Ceylon	550.532 ..	526,554 ..	369,897
Netherlands India (Java, &c.)	359.814 ..	594.043 ..	581,620
Philippine Islands	384,373 ..	607,759 ..	612,474
Siam	11,986 ..	11,513 ..	22,365
Japan	73,526 ..	340,403 ..	897,456

ARTICLES OF IMPORT.

TEA.—We have had a complete alteration in the tone of our market for old teas since the date of our last circular. The very wide difference in value between similar qualities of old and new season's teas attracted general attention, and an active demand sprung up for the former, both from the trade and speculators, and as the majority of holders have been inclined partially to meet the demand a large business has resulted, and an advance in prices of 1d. to 1½d. per lb. has been established, whilst in some cases even 2d. per lb. more has been realised. The small quantity of new teas which has arrived in the fortnight has not been enough to test the market, but prices are very firmly supported. Broken-leaf and dusty kinds of Congou have sold about ½d. per lb. dearer; fair to good common show an advance of 1d. per lb. The fair to good flavory kinds, of old import, have sold readily at an advance of fully 1½d. per lb. There have been no further arrivals of new Kaisows, but a few remaining parcels have realised fully former prices. Common to fair blackish-leaf kinds have been taken both on speculative and trade account at an advance of 1d. to 1½d. per lb. the medium kinds have also sold fully 1½d. per lb. higher. In new Monings a few chops of the fine to finest kinds have been resold for export at 1d. to 2d. per lb. above the opening rates; the few on offer of recent arrival have been very firmly held. In new-make Canton sales have been made at about previous prices. In Oolongs there has been a good business done at rather higher rates. In Souchong there has been no material alteration. Flowery Pekoes remain as before. In Scented Teas there has been rather more business done, but prices have again ruled in favour of the buyers, especially for medium Capers and Orange Pekoes over 2s. per lb. In Japans the few sales made have been at very extreme rates. Indian Teas show no change. Public sales are declared for the 15th inst. For Green Teas our market has become less excited, and the very extreme rates current a fortnight back cannot now be obtained, such rates being higher than exporters could afford to pay. We quote a general decline of 1d. to 2d. per lb. on nearly all descriptions; but at this there is a fair demand, especially for good to fine qualities, partly for home consumption. Canton-made teas show no alteration. The stock in the United Kingdom on the 31st ult. was estimated at 82 000,000 lbs., against 85.500,000 lbs., and the quantity afloat at 36,505,070 lbs., against 36,660,680 lbs. At Liverpool large orders are still in hand for the New York and Canada markets, but generally at impracticable limits; the latest advices from New York report a drop of 6 to 7 cents in country Greens owing to the arrival of supplies direct from China. The most recent purchases have been in Twankays from 9d. to 1s. 1d. per lb. for Canada, and fine Hysons 2s. 10d. to 3s. 6d. per lb. for the South American markets. The only noteworthy business in direct imports is the sale of the Chalgrove's cargo, one-half new Kaisow Congou, and one-half new Canton Scented Teas, the whole of which (with the exception of about 3,000 boxes Scented Caper) was placed within a very few days at most satisfactory

Digitized by Google

prices; say, medium to fine Congou at 2s. to 2s. 5d. per lb., fine ditto 2s. 6d. to 2s. 9d. per lb.; medium to fine Oolong 1s. 10d. to 2s. 3d. per lb.; Canton Scented Caper, good to medium, 1s. 4d. to 1s. 8d. per lb., fine to finest, 1s. 10d. to 2s 6d. per lb.; Scented Orange Pekoe, medium to fine, 1s. 11d. to 2s. 2d. per lb.; fine to finest, 2s. 3d. to 2s. 6d. per lb.; imitation Foochow leaf realising 1s. 11d. to 2s. 4d. per lb. Java tea has increased in favour, and the imports from Holland has been placed at higher rates.

SILK.—We have had a week of comparative quiet in Silk, but without relaxation of prices. In the meantime the deliveries are progressing fairly satisfactorily, and the telegrams received from China are of a character to give renewed tone to the market, so that the unloading now taking place will probably be taken off readily at full rates. Unfortunately, all the Silk arriving and that has arrived for some weeks past is in more or less bad condition—of course, for this allowances are made, but this is not satisfactory either to buyers or sellers; when the mischief arose we have no means of judging, whether in the packing or the reeling, but it is certain the Silk must have been exposed somewhere to great damp. The deliveries for the month are 3,593 bales of China, and 1,206 of Japan. The following is from Messrs. Kilburn, Kershaw, and Co's Circular: Silk has been in current demand throughout the past month, and there has again been a considerable business doing in Chinas and Japans, at gradually advancing rates; the suddenly increased value of money has not affected the market, the position of which is so strongly influenced by the China advice: best chop silks have now reached 30s. 6d. for No 3 Tsatlee, while good marketable parcels of 3½ and 4 are current at 28s. to 29s.; the best Taysaams are 26s. to 28s., and Japans, the finest Maibash which have been picked are over at 35s. 6d. to 36s., mixed parcels at 34s. to 35s.; at these high figures the market is at this moment extremely firm. China Silk Piece Goods.—The market was probably never so bare as it has been during the last few months; there is again but little to record for want of goods:—75 pieces of Plain White Pongee Handkerchiefs bought in at 30s., and 60 pieces Figured White 9¼ oz. sold at 28s. 6d. to 29s., comprised everything in the Sales. Of Crape Shawls there were none; the stock of these, once so heavy, is now a mere bagatelle, and comprises descriptions not at present wanted. Tussore Cloth:—A few small lots, in all only 290 pieces, but there were eager buyers for them, and although of only fair useful quality, realized 25s. 6d. to 33s.

COTTON.—The tone of the market was dull during the whole of the week ending the 4th, and prices declined ½d. to 1d. per lb. all round. On the 3rd, buyers were tempted by offers of Tinnivelly and Western afloat at low prices, and a considerable business was done at prices showing a decline of 2d. on Tinnivelly, and 1½d. per lb. on Western. During the week there were sales of 380 bales Tinnivelly at 16d. to 19d. fair to good fair; and 130 bales Japan, at 18½d. for good fair; with sales to arrive of 3,880 bales Tinnivelly at 15d. to 17d., October to August sailing, guaranteed good fair. The sales this week exhibit no change in prices. The stock of Cotton in London on the 2nd was 39,225 bales against 96,886 last year, of which 2,548 was China and Japan against 25,057 last year. The total stock at Liverpool on the 3rd was 323,000 bales against 496,000 last year. The total afloat to Europe on the 3rd was 142,311 bales (of which none is China or Japan), against 218,683 bales last year. At Liverpool on the 8th there was a fair demand at rather firmer prices. Sales on that day 10,000 bales, including 5,000 speculation and export, 4,000 American, 16d. to 20½d.; Bengal, Scinde, &c., 11¾d. to 12d.; China, 15d. to 16½d. With reference to the prospective supplies of cotton from America, the circular of Messrs. Neill Brothers, issued at New York on the 24th ult. states:—We think it probable that the imports of American cotton at Liverpool from the 1st October till the 31st December will amount to from 220,000 to 250,000 bales, the great bulk of which will be received in November and December, affording a liberal supply at a period when it cannot fail to be much wanted.

SUGAR.—Additional heaviness has been observable in the market since our report of the 26th ultimo, as, with a very general disinclination to purchase, the operations of the home trade have been curtailed to their most immediate wants, and the transactions effected are of extremely limited amount. On the 3rd the bulk of the parcels offered at public sale was withdrawn, the small proportion disposed of being at a decline of 1s. per cwt. on the rates of the 27th ult. The market remains in the same dull state during the present week.

COFFEE.—The public sales on the 3rd of 790 casks, 820 barrels and bags Plantation Ceylon, went off at full rates; 73 casks, 1,960 bags Native sold with spirit, and again rather dearer, the advance being from 1s. to 2s. per cwt. Sales of Plantation passed off steadily. 1,277 bags Malabar and Mysore brought fully former prices, also 27 4 bags Singapore-Siam at 67s. 6d. to 69s. 6d. Campar, 58s. 400 casks and 80 bags and barrels of Plantation Ceylon sold readily in public sale on the 8th at 6d. advance, triage and ordinary, 37s. 6d. to 73s.; low to fine middling, 79s. 6d. to 89s.; fine, 97s.; peaberry, 83s. to 91s.; 1,500 bags and 150 casks of Native also realised firmer prices, ordinary small to superior, 66s. to 72s.; 30 bales of Mocha bought in at 96s.

RICE.—During the past week 75,000 bags changed hands at fully previous prices to some advance. On the 8th 10,000 bags of soft grain sold; Bassein, old, 11s. 9d.; Necranzie, 11s. 3d. to 11s. 9d.

CARDAMOMS.—Steady; of 41 packages Malabar at auction, half sold at 4s. 9d. to 6s. 2d. per lb. for middling small to good; and 3s. 6d. to 3s. 7d. Seeds; 19 packages Madras sold at 4s. 3d. to 5s. 5d. for middling to fine Aleppy, and 4s. fair long.

CAMPHOR.—Market quiet, with limited business privately at 97s. 6d. per cwt. for Japan, and 92s. 6d. to 95s. China; 81 tubs Japan at auction retired.

CASSIA LIGNEA.—Steady; of 461 boxes at auction, one-third sold at 105s. per cwt. for third pile. Buds: Rather cheaper, and of 75 boxes at auction, one-third sold at £10. 10s. per cwt.

CINNAMON (CEYLON).—At the recent Quarterly Sales, demand was visibly and largely in excess of supply; prices from the very commencement advanced 4d. to 6d. per lb.; and the whole of the following 990 bales sold, viz.: 229 bales 1st sort at 2s. 2d. to 3s. with superior at 3s. 3d. to 3s. 7d.; 496 bales 2nd sort, 1s. 11d. to 2s. 10d.; 212 bales 3rd sort 1s. 10d. to 2s. 6d.; and 53 bales 4th and Jungle, 1s. 5d. to 1s. 10d.

COCOA-NUT OIL.—This market has been very firm, with excellent demand for Cochin especially, which has further risen 10s. per ton: 273 casks Cochin, 130 Ceylon, 304 Sydney, and 100 Madras at auction.

DRUGS.—Cubebs, Dragon's Blood, and Galangal Root: Nothing of any consequence doing in either. Rhubarb: Continues to sell well; 177 cases of recent importation sold at auction at 9s. 2d. to 9s. 5d. per lb. fair flat; 8s. 11d. to 9s. 4d. round; 8s. 2d. to 8s. 6d. middling; and 5s. to 7s. 1d. pickings: 49 cases, various small lots, retired.

GUMS.—Benjamin: Quiet; and of 58 cases Sumatra at auction a few only sold at £11 to £12 per cwt. for false packed second quality. Damer: Dearer; 24 cases sold at auction at 52s. per cwt. for fair. Gamboge: Steady; but of 12 cases at auction only two sold at £10. 7s. 6d. to £10. 10s. per cwt. for middling pipe.

GUTTA PERCHA.—Quiet, but firm. Nothing of any importance doing.

HEMP (MANILA).—This market has remained very firm, but quiet, there being but little offering; auctions unimportant. Quotation £42 to £45 per ton.

HIDES AND HORNS.—The sales of East India during the month of October were 186,400 hides. There has been a good demand for consumption, but not much inquiry for export, and though at the last sales the prices paid early in the month were barely supported, they still show a general advance of ¼d. to ½d. per lb. on all descriptions, excepting extra heavy weights, as compared with the rates current at the end of September. Batavia: 2,659 buffalo hides have been cleared at 5d. to 6¾d. per lb. Singapore, &c.: The quantity offering has been larger than for some time, but generally met a ready sale at full prices. The sales comprise 7,974 ox and cow, and 4,980 Buffalo Hides. Ox and cow light 7d. to 7¼d. per lb.; Heavy 5¾d. to 6d. per lb.; Thirds 5d. to 5½d. per lb.; Fourths 3½d. to 4d. per lb.; Buffalo Best 6½d. to 6¾d. per lb.; Seconds 6⅜d. per lb. Horns, &c.: Have met a ready sale at full prices. 66 tons Buffalo Horns have been cleared. Siam at 45s. per cwt.; Bombay 26s. to 31s. per cwt.; Madras 24s. 6d. to 28s. per cwt. 49 tons Deer Horns realised 56s. to 66s. per cwt. for Ceylon; 39s. to 43s. 6d. per cwt. for Singapore.

INDIA RUBBER.—Moderate business on former terms.

JAPAN WAX.—Considerably dearer; 161 boxes at auction sold at 80s. 6d. to 87s. 6d. per cwt. for good saucers, and there is much inquiry.

OILS.—Anniseed: Moderate business at 7s. 8d. to 7s. 9d. per lb. on the spot and for arrival; 10 cases at auction retired. Cassia: Sales to a limited extent effected both on the spot and for arrival at 7s. 9d. per lb. Mace and Nutmegs: One case Oil Nutmegs and 3 cases Paste at auction retired.

PEPPER.—Black: Firm, with inquiry, and 3,142 bags Singapore at auction mostly sold at 3¼d. to 3⅝d. per lb. 288 bags Tellicherry sold at 3⅜d., and 120 bags Trang sold at 3⅛d. to 3⅛d. White: Steady, and 571 bags Singapore at auction mostly sold at 5⅛d. to 5½d. per lb. for middling to fair.

SPICES.—Cloves: Steady, of 1,265 bags Zanzibar at auction, three-fourths sold at 3d. to 3⅛d. per lb. for ordinary to good. Mace: This market has been firm, and the very good supply brought forward has met with excellent demand. Nutmegs: Have sold irregularly, but generally at higher prices; 59 cases Penang and 2 cases Singagore at auction sold at 3s. 2d. per lb. for middling bold; and 1s. 1d. to 1s. 10d. ordinary small to fair medium.

SAGO.—Steady: Of 1,105 boxes at auction, one-third sold at 20s. 6d. to 21s. 6d. per cwt. for middling to good small. Flour: Nothing of any importance doing. Sales for this day.

TAPIOCA.—117 bags middling Penang sold at 3¼d.; 300 bags good white were withdrawn at 4d. A small quantity Tapioca Flour (in tins) found buyers at 2¾d. per lb.

TERRA JAPONICA.—Cutch, Pegue: Firm; 237 bags at auction sold at 24s. to 25s. per cwt. for fair; good business done privately up to 26s. 6d. Gambier: Quiet; of 1,843 bales at auction, a few only sold at 20s 6d. per cwt. for middling blocks.

TIN.—This market has again been very animated, and large transactions have taken place in Straits up to £97 per ton, three months prompt; £95. 10s. cash; and £97 for arrival.

MISCELLANEOUS.—Blacklead: Steady, but quiet; of 267 barrels' at auction, very few sold at 23s. per cwt. for superior lump, and 10s. 6d. good dust. Galls: Very little doing in the annexed descriptions; of China 154 boxes brought to auction, and mostly sold at 64s. 6d. to 68s. 6d. per cwt. for middling to good; 54 boxes Japan sold at 62s. 6d. to 64s. 6d. per cwt. for good, showing no change in China, but some little improvement in Japan. Musk: Firm: 40 caddies Tonquin at auction sold at 27s. to 30s. 6d. per oz. for fair to good; and 20s. to 23s. pickings. Rattans: Withou

Digitized by Google

material change; and of 4 600 bundles Singapore at auction, half sold at 5s. 8d. to 6s. 3d. per 103 canes, with superior 11s. 2d. to 18s. 6d. Sappan Wood: Rather quiet: 6 tons Siam, and 8 tons Manila at auction, all retired. Soy: Very little doing in China; 20 cases Japan sold at auction at 4½d. per bottle. Star Anniseeds: Very scarce; nothing doing. Sticklac (Siam): Dearer; 64 boxes at auction sold at 45s. to 46s. per cwt. for fair, but small and broken. Vermilion: Scarce and nothing doing.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £101 to £103 per ton; yellow metal, 8d. per lb.

TIN.—97s. to 100s. for block; 101s. for common bars. Tin plates, best charcoal, I.C. 32s. to 32s. 6d.

LEAD, &c.—English pig, W.B., £21. 10s.; shot, patent, £23. 10s.; sheet, £21.; spelter, £21. 10s. to £21. 15s.; zinc, English sheet, £27.; quicksilver, £7. 18s. 6d. to £8.

The following is from the Circular of Messrs. French and Smith:—The improvement in the demand for metals which we noticed as having commenced in September, has increased during the past month, and we now report considerable activity in all descriptions, with improved prices. Iron: Scotch pig has fluctuated from 2s. to 3s. per ton, and closes 58s. 6d. cash. Manufactured of all descriptions is quoted rather higher with good inquiry. Copper: A large business was done in the beginning of October in all descriptions, and for ores and regulus increased rates were paid, consequently on the 18th, the smelters announced an advance of £5 per ton on copper, and ½d. per lb. on yellow metal, the great demand still continuing, a further advance was declared on the 25th ult., of £5 per ton, and ¼d. lb. on yellow metal. The possibility of the difference between Spain and the Chilian Government leading to active measures, and a blockade of the Chilian ports brought about much speculation. The price is now very firm. Foreign is well held, Burra at £97; Capunda, £99; Chili, £88. 10s.; Spanish, £87 and £88. Tin: English has been in active demand, and the shipments have been very heavy, especially to the United States, the consumption also in this country has been very great, but notwithstanding the large deliveries, the total stock here and in Holland is larger than a month since. On the 26th ult., the price of English was advanced 3s. per cwt., and a further rise is momentarily expected, as the smelters refuse to sell at official quotations. No doubt there is a scarcity of ores in Cornwall, as it is understood the richer mines are holding back with the expectation of higher rates. The arrivals of Straits during the month amounted to 650 tons, of which we estimate 300 tons are not landed. The quantity of Straits Tin afloat for Europe is about 1,418 tons, against 1,110 tons in 1864, and 486 tons in 1863. Tin Plates continue much inquired for, and the manufacturers find difficulty in giving delivery within reasonable time, prices are very firm with a tendency upwards. The quantity shipped last month was 105,000 boxes, against 62,000 boxes October, 1864. Lead has advanced during the month 10s. to 15s. per ton, and is scarce; it is difficult to obtain early delivery. The prospects of this metal seem very promising. Spelter has improved in price during the past week or ten days. The stock in London is 6,684 tons, against 11,816 tons Oct. 31, 1864.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

No material change has taken place in outward freight since our last impression; all the berths for portt in China, except Shanghai, are amply supplied with tonnage, and rates are easy.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £2. For Shanghai: £5 and £2. 10s. For Manila: 32s. 6d. to 35s. For Batavia: £30 and 27s. For Singapore: £32 and 30s. For Galle: £28 and 27s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

CASUALTIES.

The Dordrecht, Loos, from Rotterdam for Batavia, put into Portsmouth Oct. 30, leaky.

The Jeannette, Cornelia, from Rotterdam for Batavia, was assisted into Ramsgate Oct. 31, having slipped from an anchor and chain to avoid collision.

Advices from Helsingfors under date 24th Oct. state that the Bedford, Natrass, from Cronstadt to the Amoor, which capsized W.S.W. of Porkala on the 20th Oct., and afterwards drifted on Gasansudd, had struck on the Soderska rocks; part of her cargo has been saved, and endeavours are being made to get the ship off and tow her into harbour.

The Kew Kee, Fuller, from Liverpool for Shanghai, which sailed from Rio Janeiro 23rd Sept., after repairing, put back Oct. 6, the master declaring that the ship has "not the necessary nautical qualities for the voyage."

The deck of the Bedford, Nahass, from Cronstadt to the River Amoor which vessel capsized W.S.W. of Porkala, Oct. 20, and subsequently drifted on Gasansudd, has burst up, it is supposed by the swelling of the cargo (flour). The greater part of the cargo has drifted away, and, as far as practicable, is being saved along the coast. Later advices report that the vessel drifted off the rocks at high tide and sunk in deep water, only the tops of her masts being visible.

The Prinses Amelie, Groeneveld, from Batavia for Amsterdam, put into Mauritius, Oct. 5, making fourteen inches water per hour, having experienced heavy gales Sept. 19 in about lat. 10 S., 96 E.

The Numa Vidal, Roura, from Sumatra for Marseilles, which put into Mauritius leaky, Aug. 7, has been condemned and sold there. Her cargo would be brought on by the Meteore and Sylvius.

MISCELLANEOUS.

Information has been received at the Admiralty that Capt. Richer, of the French ship Immaculate Conception, recently arrived at Havre, when navigating the Channel between the Pescadores Islands and the West Coast of Formosa, saw an extensive line of high breakers in about lat. 23 45.50 N., lon. 120.2.20 East of Greenwich.

At TABLE BAY.—Sept. 13, from Shanghai, Ocean Gem.

At ST. VINCENT, C. V.—Sept. 27, from Lisbon, Koning Willem III. (s.), Oort, and left 29 for Batavia.

At ST. HELENA.—Sept. 27, from Shanghai, Guinevere, McLean; 28, from Ceylon, Cresswell, Aitcheson, and both sailed 29 for London; 30, from Java, Constance, Mulder, and sailed Oct. 1 for Amsterdam,

A telegram has been received *via* New York, with news from Japan to the 15th September, announcing that a great hurricane had occurred in the China Sea, destroying three large steamers and several American and English ships. Another telegram, from Calcutta, dated 31st of October, reports the total loss of three ships. The message gives the following particulars:—The barque Alice Maud, 458 tons, Captain Sorensen, from Hong Kong for Singapore, lost on the 6th of October; crew saved. The ship Garrawalt, 621 tons, Captain Phillips, from Shanghai for London with tea, totally wrecked, supposed off the coast of Formosa; she was a first-class built ship, A 1 at Lloyd's for fourteen years. The ship War Eagle, 599 tons, Captain Maulet, which sailed from Singapore for London on the 19th of September, has been lost at the Thousand Islands, near Anjer; crew saved. The amount of insurances on the above ships is very large.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishmen s at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—THE BEST WAY.—To gain any end there are often many ways, but there is always the best way. This statement applies with wonderful force to Holloway's remedies, which overcome ill-health by driving noxious matters from the frame, by repairing broken or injured structures, and by establishing regularity of action. This is the only safe and feasible method of combating diseases and securing sound health. With pure blood, good digestion, strong nerves, and perfect functional order, most maladies may be vanquished and strength surely established. The balsamic and healing qualities of Holloway's Ointment render it invaluable in the nursery for healing cuts, scratches, or sores, for allaying inflammations, reducing swellings, or cleansing unhealthy skins.

Secretary (pro tem.).

G. S. Ullathorne, Esq.

Temporary Offices.

9, Mincing-lane, London.

PROSPECTUS.

This Company is established for the manufacture and sale of articles chiefly of domestic use, and mostly protected by Patents, and will comprise within its operations—Improvements in the construction of dwellings, and in their lighting, ventilation, and drainage; the preparation of all descriptions of food; the manufacture and economical use of fuel; and the most recent improvements in kitchen and other household furniture.

The Company will also assist inventors, by procuring patents for them—by purchasing the right of selling their inventions—or by selling the inventions and paying the patentees a royalty—and in other ways generally promote their interests, and develope ingenuity, which in many instances is hidden from the want of means to make it known.

The Directors have already secured the nucleus of a business which promises to be very profitable, having provisionally purchased the exclusive right to a new system of preparing American and Australian beef and mutton, so that it becomes as easily cooked and as palatable as fresh meat; also to a newly-invented Portable Roasting Oven, which will economise half the fuel now used; to an Improved Portable Romford Boiler, adapted for the army, navy, and private use; and to a newly-invented Stone Stewpan, and a Cooking Range.

Besides the above there are several valuable patents offered to the Company, and as soon as it is formed, the merits of these will be duly considered, and if found desirable will be acquired by the Company. In the meantime those already acquired will produce immediate returns.

To show the value of the first of these patents, the Directors need hardly allude to the disease in cattle, and consequent dearness of meat, which is likely to cause much distress among the poor this winter, and for some time to come; the Company will shortly be enabled to sell at a low rate, still leaving a very large profit to the Company, 28 lb. boxes of beef and mutton prepared as a wholesome and palatable food without bone; and as each piece of meat will be carefully and separately examined, there will be no risk of bad meat being sold. It is a preparation invented by Mr. Warriner, who, as instructor of Cookery to the Army, has had full means of testing its value, which is 150 per cent. more than ordinary English Beef.

The Directors deem it most advisable for the present not to manufacture all the various articles, but to contract with manufacturers to supply those which they deem inexpedient to make themselves.

The Memorandum and Articles of Association, which comprise all the intended operations of the Company, can be seen at the Solicitors' and the Offices of the Company.

FORM OF APPLICATION FOR ORDINARY SHARES.

To the Directors of the Household Patents Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of 5s. per Share on Shares in the above Company, I hereby request you to allot me that number, and I hereby agree to accept such Shares, or any less number you may allot to me, and to pay a further sum of 5s. per Share on every Share which may be allotted to me within fourteen days from the date of allotment, together with all future calls thereon; and I authorise you to place my name on the Register of Members for the number of Shares so allotted to me; and I agree to sign the Articles of Association of the Company when required. I further authorise you to forward by post to my address as below the certificate for any Shares which may be allotted to me.

HONG KONG and WHAMPOA DOCK COMPANY.

The Company's Docks, at ABERDEEN and WHAMPOA, are in full working order, and the attention of Shipowners is respectfully solicited to the advantages which this Establishment offers for the Docking and Repair of Vessels.

The following description of the Premises is submitted for the information of the public:—

ABERDEEN DOCKS.
Dock No. 1.

Built of Granite.

Length	330 feet.
Breadth	80 „
Depth of water at Spring Tides	18½ „
„ „ Neap Tides	16 „

New Dock, No. 2.

Built of Granite.

Length	400 feet.
Breadth	90 „
Depth of water at Spring Tides	24 „
„ „ Neap Tides	21½ „

This Dock is now under course of construction.

WHAMPOA DOCKS.
Dock A.

Built of Granite.

Length	550 feet.
Breadth	80 „
Depth of water at Spring Tides	16½ to 17 „
„ „ Neap Tides	13½ to 15 „

This can be used either as one or two docks.

Dock B.

Built of Granite.

Length	340 feet.
Breadth	60 „
Depth of water at Spring Tides	18 „
„ „ Neap Tides	15 „

This Dock is at present in course of alteration.

The above are the largest Docks in China, and they are fitted with every appliance in the way of Caissons, powerful Steam Pumps, &c., to ensure safety and despatch in work.

Dock C.

Built of Wood.

Length	260 feet.
Depth of water at Spring Tides	14 „
„ „ Neap Tides	11 „

Fitted with Caissons and Steam Pumps.

Dock D.

Length	164 feet.
Depth of water at Spring Tides	16.6 „
„ „ Neap Tides	9.6 „

Dock E.

Length	120 feet.
Depth of water at Spring Tides	11 „
„ „ Neap Tides	8 „

D and E are Mud Docks available for small vessels, at very low rates.

WORKSHOPS.

The Workshops on the Premises, both at Aberdeen and Whampoa, possess every appliance necessary for the Repairs of Ships or Steam Machinery. The Engineer's Shops are supplied with Lathes, Planing, Screwing, Cutting, Punching Machines, &c., &c., capable of executing work on the largest scale, and driven by steam. The Shipwright's and Blacksmith's Shops are equally well supplied with plant, and the work is entirely carried on under the supervision of experienced Europeans.

Powerful Lifting Shears stand on a Jetty, alongside which vessels can lie in 24 feet water, and take in or out boilers, masts, &c.

BOILERMAKER'S DEPARTMENT.

The Company, in addition to executing Repairs, are prepared to tender for supplying new Boilers to Steamships, for constructing which they have great facilities.

FOUNDRY.

Iron and Brass Castings, either for Ships or general purposes, are executed with the utmost despatch.

STORES.

The Company's Stores will (when required) supply at moderate rates all the necessaries for Shipwork, such as Paint, Copper, Canvas, &c.

STEAM TUG.

The Company's powerful steam tug Fame (110 horse-power nominal) is always in readiness to tow vessels from Hong Kong to the Dock free of charge, and will take them back or to Sea at reduced rates

For further particulars apply to G. N. Minto, Manager, at Whampoa, or in Hong Kong to

D LAPRAIK, Secretary.

N.B.—The Consignees or Master of any Vessel seeing reason to complain of the work done in the Docks, or in any way respecting the Dock arrangements, should address the Secretary on the subject, when their complaints will receive the immediate attention of the Directors of the Company.

Hong Kong, April 3, 1865.

JOYCE'S AMMUNITION 1862.—

Established 1820.

The following articles, of the best quality manufactured by

FREDERICK JOYCE,
OF LONDON,

may be had of most Gunmake and dealers in Gunpowder.

MILITARY RIFLE PERCUSSION CAPS.
PATENT PYROXYLINE SPORTING DITTO
ORIGINAL (1824) ANTI-CORROSIVE DITTO.
PERBLE WATERPROOF CENTRAL FIRE DITTO

JOSEPH SAWYER, Esq., Fenchurch Street, London, Accountant.

Secretary.

C. E. BANKS, Esq.

Offices—70, Cannon Street West, London.

The objects of this Company are the acquisition and working of Coffee Estates in Ceylon, and the selling of their produce.

The Directors have purchased three valuable coffee estates, situated in the Matella district; the contract may be seen at the Solicitors' office. These estates are known as the Beredewelle, Delagahoya, and Oodasgeria Estates, and contain about 1,010 acres—825 of which are freehold and 185 leasehold, at a nominal rent, held for the unexpired term of 46 years. The Directors are making arrangements for an extension of the term to 96 years. 614 acres are planted, 552 are in full bearing, and the remainder will be so next year; 55 acres are in guinea grass, for cattle. 200 acres of very fine forest land are to be planted this year, which will leave about 140 acres to be brought into cultivation at a later period.

The crop for 1864-5 (when the full bearing coffee was only 455 acres) amounted to about 4,000 cwts., which, after deducting the merchant's commission of about £420, being two-and-a-half per cent. on gross proceeds, will give a net profit of about £6,000. The Company will sell without the intervention of the merchant, and thus save the above commission.

The crop for the year 1865-6, and which is now partly picked, is estimated between 5,000 and 5,500 cwts., and as the vendor bears all expenses of up keep to the 30th June last, 5,000 cwt. should give a net profit available for dividend and reserve fund of more than £10,000.

When the whole acreage, exclusive of the 140 acres, is in full bearing, the estimated profit available for dividend would at present prices, amount to about £12,000, or at the rate of £20 per cent. per annum on the entire capital.

The Directors consider that the present prices will certainly be maintained, if not exceeded; seeing that the demand for coffee is greatly on the increase, whilst the Brazil and Java crops are annually decreasing, and that the reopening of the Southern ports of America cannot fail still further to stimulate the trade, and that there is little good land now procurable in Ceylon to be brought under coffee cultivation.

The before-mentioned estates have advantages which few properties in Ceylon can command; they are within a few miles of Matella Town, the great depot for labour and draft cattle; the Government road from the coast, by which most of the coolies travel, is the eastern boundary of the Beredewelle estate; this estate has a contract with Government for cleansing the town of Matella, by which much valuable manure is obtained at a trifling cost; and being situated on the high road from Colombo, the owners of these estates, instead of incurring a heavy loss (as many proprietors do) on the rice which they supply to coolies at fixed prices, have in most seasons actually derived a profit upon it; and whilst the cost of transit of coffee to the port of loading from many estates ranges between 5s. and 12s. 6d. per cwt., the cost from these estates averages about 3s. 6d. per cwt.

The railway from Colombo to Kandy is now partly open, and the contemplated extension to Matella will bring it within two miles of the Beredewelle estate. This will greatly reduce the expense of transit.

All the buildings are substantial and in good repair; there is an ample supply of water, cattle, carts, and machinery driven by water-wheels, and all necessary appliances for taking in and pulping the crops.

It is proposed to retain the present manager, who has had upwards of ten years' experience in the district.

The Directors and their friends take 4,000 shares, leaving 2,000 for the public.

During the period of the guarantee, the Directors will place to a reserve fund all profits beyond £12 per cent. per annum on the paid-up capital. At the expiration of that period this fund will be distributed pro rata amongst the then holders of shares to which the guarantee extends.

The Ceylon Coffee Estate Company's success shows what large profits are derivable from coffee cultivation. The Directors of that Company, which has a capital or £60,000, out of the profits on their first year's operations, paid a dividend of £10 per cent., and carried to the reserve fund £4,757. 5s., equal to about £8 per cent. more.

Prospectuses and Forms of Application for Shares may be obtained at the Offices of the Company, and of the Bankers, Brokers, and Solicitors, where the Contract for purchase may be seen.

Copies of the Memorandum and Articles of Association can be had at the Offices of the Solicitors, or at the Temporary Offices of the Company. Copies will be forwarded by post without charge, on application to the Secretary.

To Ceylon: Rev. J. and Miss Scott, Miss Bois, Mr. R. Robinson, Mr. D. D. Graham, Mr. Cameron, Mr. Kent. From Marseilles, Dec. 12.—To Hong Kong: Mr. Jerdein, Mr. and Mrs. R. C. Lambert, Mr. E. Behre, Mr. Reginald Smith, Mr. W. D. Paterson, Mr. Pye, Mr. and Mrs. S. E. Burrows, jun. To Shanghai: Mr. W. Pardun, Mr. Innes, Mr. A. Downie. To Ceylon: Mr. L. P. Thomas.

Per P. and O. steamer, from Southampton, Dec. 20.—To Shanghai: Mr. and Mrs. J. H. Evans and infant. To Hong Kong: Major Peebles. To Ceylon: Mr. Mucan, Lieut. B. S. and Mrs. du Jardin, and Miss Hugo. From Marseilles, Dec. 28.—To Hong Kong: Mrs. Hunter, two Misses Hunter, Miss Hutton.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have intelligence to the 30th September, at which date the London mail of 26th July, owing to its breakdown at Penang, had not arrived out, although that of the 10th August was due.

Various foreign Ministers had visited Yedo, but no polilti cal news of any kind had transpired. The chief item of interest was the arrival of H.M.S. *Adventure* from Hong Kong, with five officers, 172 rank and file, and 146 women and children belonging to the 11th and 20th Regiments, who disembarked on the 22nd September. The lamentable condition in which they landed is thus described in the *Japan Herald*:—We had been struck by the wasted condition of the men on the arrival of the ship, but we by no means realised their real condition, until we saw them ashore. Every man, woman and child of the detachments appeared in the most pitiable condition; several of the men were so completely prostrated from the effects of disease and the climate of Hong Kong, that on landing they lay down on the Hatoba, and several others who attempted to march up to the Bluff, fell out from sheer exhaustion. The women, if possible, presented a more haggard and worn-out appearance than the men, and we were surprised to see that no provision whatever had been made to carry to the barracks some who were scarcely able to walk. Several of them, indeed, employed coolies to carry their sick and helpless children. A kind-hearted and much respected lady of our settlement, seeing the condition of one poor creature with four young children, charitably placed at their disposal her chair, to convey them up the hill.

On the morning of the 28th September an execution took place of a Ronin, who having been taken in commission of other atrocious crimes, lately confessed himself to be the murderer, as long ago as November 1859, of a Chinese servant of Mr. José Loureiro, then Consular Agent for France. This confession led to his being brought to Yokohama for execution. The French authorities took care to have the man thoroughly questioned, and he declared his guilt in such a manner as to leave no doubt whatever on their minds as to his actual perpetration of the murder. He was brought from his cell in the Tobee prison, blindfold and bound, made to kneel down on the mat before the shallow hole that was to receive his head on its fall, and, without a word, bent to his fate. The head was severed from the body with a rapid and clear sweep, and death was instantaneous. The man was originally of respectable lineage, but becoming a Ronin, was engaged by Prince Mito, who, it would seem, protected him. The crimes for which he was originally sentenced have not yet been ascertained. He would have been executed elsewhere but for his confession of the Chinaman's murder, which induced the authorities to send him to Kanagawa, that foreigners might know that justice had her due.

On the 26th September a mysterious murder was committed. A Japanese, armed with a single short sword, was seen for some time hanging about the bridge just outside Yoshawarra. After waiting a considerable time, another Japanese, unarmed, came from that locality, and, as he was passing from the bridge, the first made a desperate rush at him, and cut him down. The dead man's body remained near the spot until the following morning, but although the utmost efforts had been made by the police to discover the murderer they were without success, although three men were in custody on suspicion.

A few days before the departure of the mail two dead bodies were discovered floating in the harbour. One was identified as that of a seaman of H.M.'s gun-boat *Bouncer*, who had jumped overboard with the intention of swimming ashore, a day or two previously, and was drowned in the attempt. The other body was that of a Japanese evidently barbarously murdered. The arms were tightly bound to his sides, and there was a stab on each side, just below the heart on the left and in a corresponding position on the right side. Not the slightest clue has been obtained as to whence the body came. It had been several days in the water.

On the 29th September a cricket match was played between the officers of the fleet and the officers of Her Majesty's 20th. The latter were the victors in one innings, by 54 runs.

Some of the native silk merchants had tried the experiment of selling their staple at public auction, but having made the ridiculous mistake of sending men to run up the prices, the affair had ended in failure and ridicule.

An experiment very deserving of support was being made by Messrs. Stephenson and Co., who had laid on the steamer *Shaftesbury* for Suez direct, believing that the advantage, both to passengers and cargo, of having no shifting from one steamer to another at Shanghai, Hong Kong and Galle, will be very great. They had already some cargo engaged and several passengers, at much lower rates than those hitherto existing. The day of departure was not named, but would probably be early in October.

On the 28th September, about noon, a smart shock of earthquake was experienced in Yokohama.

The following notification by the French Consul-General appears in the *Japan Herald*:—Agreeably with instructions received from H.I.M.'s Government, the cards of silkworms' eggs shipped from this port to Marseilles will be marked with a special stamp, the model of which has been sent to the French Custom-house Board of Administration. The French or foreign merchants who wish to obtain for their shipments this mark of origin, are to apply with the shortest delay at the French Consulate-General in Yokohama, with a notice of the number of cards to be stamped.

Many reports were afloat of impending troubles with the Japanese. One rumour asserted that a Yakonin had drawn his sword on Sir Harry Parkes; another that the Gorogio had ordered all foreigners to leave Yedo. It is hardly necessary to say that all these are entirely destitute of truth. Sir Harry Parkes had selected a suitable position in Yedo for the British Legation, contracts had been entered into, and various preliminaries arranged for building a permanent residence there for the British Minister and his suite.

The vexatious restrictions imposed on the now large and increasing trade in silkworms' eggs have been entirely removed. From the very commencement of our commercial intercourse with Japan, complaints have been rife at every port of official interference with trade, and hitherto the Government has remained persistently deaf to all remonstrance, either attempting to justify the restrictions complained of, or denying their existence *in toto*. In this last instance, however, we have not only the substantial gratification of finding the prohibition removed, but the additional satisfaction of seeing the Custom-house authorities at Yokohama publicly reprimanded, and the Governor, at whose instigation they adopted the objectionable measure, dismissed from his post. These facts encourage us to hope that the Gorogio have at last become impressed with the necessity of carrying out their treaty obligations with good faith; and, should the same wise course be persevered in after the Tycoon's return to his capital, we shall have good ground for considering our relations with Japan on a more secure footing than they have ever been before. The report of Chosiu's submission still wants confirmation, but we, nevertheless, adhere to the opinion that the object of the Tycoon's expedition will be gained without resort to actual force of arms.

NAGASAKI.

A Nagasaki correspondent, writing on the 24th of September, states that the natives report a vessel wrecked on the north end of Cape Gotto, and only one man saved. Several bodies had been washed ashore. H.B.M.'s gunboat *Bustard* left on the 22nd to ascertain particulars, but had not returned.

CHINA.

TIENTSIN.

Dates are to the 28th Sept. A correspondent writes:—

The national flag of China has replaced the union jack and tricolour upon the Taku Forts, which were evacuated by the British and French troops upon the 16th inst., and restored to the native authorities. The allied occupation had lasted for upwards of five years, and the intercourse between the foreign soldiers and the native Chinese during that long period was on the whole cordial and friendly, so that the departure of the former is sincerely regretted, I believe, by a large majority of the latter, whose faith in the prowess of Chinese troops and the military capacity of Chinese officers is not very strong. The contrast between the forts as they appeared in August, 1860, and their present aspect is striking, and to a patriotic Chinaman, if there be such a man, the comparison must be a painful one. When we captured the place in 1860, five enormous earthworks, of immense strength, and constructed at a vast expense, guarded the entrance of the Peiho; in September, 1861, two out of the five, more or less dilapidated, have been handed back to the Chinese, whilst the other three have been totally destroyed, and are now merely great shapeless mounds of earth. It will cost large sums of money to repair the two forts that have just been evacuated, and the reconstruction of the other three is not likely to be commenced for a long time at least.

Meanwhile, the Shantung rebels that menaced this province in the spring have retreated into the interior, or dispersed altogether for a season, but serious disturbances have lately taken place in the neighbourhood of Monkeleu, in Manchuria, the cradle of the present dynasty, where bands of mounted robbers have been setting the Government at defiance, plundering and burning villages, and creating no small terror throughout the country. Some of the regular troops have been defeated by these gangs, and the Emperor orders prompt measures to be taken for the suppression of the movement. A band of mounted robbers are at this moment within eighty miles of Tien-tsin, but they will probably be captured or dispersed within a fortnight, as Chunghow, the Chief Mandarin here, is a man of considerable energy, and has a well-appointed force of armed men under his command. Several officers have been denounced for permitting the post at the Great Wall to be forced. Besides these political troubles, there are others of a more private and domestic nature. Gangs of robbers prowl in the neighbourhood of the capital with the design of robbing the ancestral tombs of wealthy families. Several magnificent mausolea have been violated, the coffins broken open, the ashes of the dead scattered about, and the grave-clothes and rich ornaments and buried jewellery carried off. Amongst the tombs which have been thus desecrated is that of a princess, daughter of the Emperor Taokuang, and therefore aunt of the present sovereign. The richly embroidered satins which shrouded her remains, together with her tiara and a large quantity of jade ornaments and precious stones, were stolen, and every attempt hitherto made to discover the depredators has proved fruitless. The sanctity of the tomb having thus proved insufficient to screen the dead from outrage, bands of armed men now patrol the burial-places of the Imperial family and of the wealthy officials and merchants.

Trade at this port shows signs of improvement this year after three years of depression, but here, as all over China, business men are still complaining of the bad times. The Chinese have that advantage over the foreign merchants that combination has over competition, and, until the foreigners draw in their horns a little, commercial failures and disasters will most certainly form not unfrequent items of intelligence in the *London and China Telegraph*.

PENANG.

In consequence of the Dutch aggressions on Sumatra, the merchants, at a public meeting, passed the following resolutions:—

1. Proposed by M. F. Davidson, Esq., seconded by F. S. Brown, Esq.—"That the present proceedings of the Dutch in sending a hostile force to Assahan, being likely to lead to results detrimental to British interests in

Digitized by Google

the Straits Settlements, this meeting desires to draw the attention of the Home Government to the continued Acts of the Dutch Government in annexing the territories and ports of independent Rajahs in Sumatra with whom we have treaties of commerce, in contravention of the spirit of the treaty of 1824." Carried unanimously.

2. Proposed by J. J. Ventre, Esq., seconded by J. P. Stewart, Esq.—"That the treaty made by the Dutch Government with Gambi, and one or two other native States, which Lord Palmerston in 1841 declared to be incompatible with Act 3 of 1824, still exists, as far as we are aware—notwithstanding the remonstrances of that statesman." Carried unanimously.

3. Proposed by R. Bain, Esq., seconded by W. L. Hill, Esq.—"That the Ports of Baroos, Tapoos, Sinkel, on the west coast of Sumatra, formerly belonging to Acheen, with which kingdom we have had treaties of amity and commerce for over two hundred years, were annexed by the Dutch upwards of a quarter of a century ago, and that duties have since been imposed on imports and exports which were not levied previously, contrary to the treaty of 1824. And that the present proceedings of the Dutch on the east coast of Sumatra between Assahan, its dependencies and the port of Timian, also, belonging to the King of Acheen, lead this meeting to believe that similar results will follow on this side of the island, and prove most injurious to the trade of the Straits Settlements." Carried unanimously.

4. Proposed by W. T. Lewis, Esq., seconded by W. Allen, Esq.—That this meeting understands that the Dutch are annexing the native States between Siak and the Port of Timian, under the pretence of their being tributary to the Rajah of Siak, whereas the King of Acheen claims these States as his dependencies, and has represented his claim to the British Government, with the object of retaining in force the existing treaties between them." Carried unanimously.

5. Proposed by J. J. E. Brown, Esq., seconded by M. A. Anthony, Esq.—"That the following gentlemen be appointed to form a Committee to draw up a memorial to the Home Government embodying the above resolutions. L. Nairne, Esq., M. F. Davidson, Esq., W. L. Hill, Esq., Robert Bain, Esq., Dr. Anderson."

Amended by Robert Bain, Esq., seconded by M. F. Davidson, Esq., "That the proposer, J. J. E. Brown, Esq., be added to the Committee." Carried unanimously.

6. Proposed by F. S. Brown, Esq., seconded by F. Kusterman, Esq.—"That steps be taken to obtain through a member of the House of Commons copies of correspondence between the Straits Government, the Government of India and the Home Government, relating to the recent proceedings of the Dutch on the east coast of Sumatra, and all papers connected therewith." Carried unanimously.

7. Proposed by A. F. Anderson, Esq., and seconded by F. H. Friederichs, Esq.—"That the Chairman of this meeting is hereby empowered to forward a copy of the memorial to his Honour the Governor, with a request that his Honour will forward the same to the Government of India, and solicit their support thereto. Also that the Chairman is hereby empowered to forward copies of the same to John Crawford, Esq., The Right Honourable Edward Horsman, M.P., The East India and China Association, The Chambers of Commerce of Manchester, Liverpool, Glasgow, and Singapore, and solicit their support to its prayer."

The *Mohr* has returned from her trip to Larut. Mr. Percy Earl has succeeded in accomplishing some of the objects for which he was deputed there by the local Government. He has rescued from the hands of the ruffian Panghulu the Chinese woman whose husband was cruelly murdered there a short time ago, and has also brought back four Siamese belonging to this settlement, who were similarly kept there in hopeless slavery. No effort was made by the ruling chief there to arrest the murderers. Mr. Earl has failed in the object of getting the chief to adjust the claims for compensation due to Penang Chinese merchants, for losses sustained by the confiscation of their goods and destruction of their stores. It was not to be expected that the lawless petty chiefs of that country, long accustomed to live by plunder and rapine, would be inclined to listen to any friendly remonstrances. It is only by working on their fears that such men, hardened in crime and their hands yet reeking with the blood of their victims, are brought to their senses. It now remains for the Government to back its demands by an armed force. If the chief, who has been acting as the governing authority in Perak since the death of the Rajah, be supported by our Government in maintaining his control over the petty despots in Larut, he will, no doubt, be able to punish the delinquents and make a satisfactory adjustment of these matters.

SHANGHAI.

The mails of 26th July and 10th August arrived together on the 25th Sept. The French mail of 17th August arrived out on the 7th October. Dates are now down to the morning of 9th. The following summary of news is from the *Recorder*:—

From Peking we hear, through a private source, that the Russian Government sent out two telegraph officers to ascertain whether it were possible to obtain the permission of the Chinese Government to establish a telegraph from Kiachta to this place, but that the Chinese showed themselves altogether averse to the scheme, and the officers have returned.

Native reports from the interior announce that Kan-ch'ow-fu, the last stronghold of rebeldom in Kiangsi, has been deserted by the insurgent garrison, which has retreated to Fukien. The Mahomedan rebels also, at Tungkuan, in Shensi, are also reported to have been surrounded and slaughtered to a man.

The following extraordinary occurrence has recently attracted some attention. It appears that two foreigners, British subjects, were taken at Ming-Hong for firing at a gun-boat and were being brought under a Chinese guard to the English Consulate from the city. One of the men was handcuffed, and the other other, in addition to this, had a chain round his neck, by which he was being led. As they passed down the French Bund it seems that the man with the chain round his neck was pulled roughly by the Chinaman leading him, and a Frenchman passing, incensed at seeing foreigners in the hands of Chinese, attacked the guard, and would have succeeded in freeing the captives, but for the interference of the police, who took the whole party, including the Chinese, to the French Consulate. The Consul, on hearing that the men were British subjects, ordered them to be taken to the English Consulate, but deputed a guard to see that they were not maltreated on the French Concession. The guard left them at the Yang-King Pang, and the party had not gone much farther, when the man with the chain round his neck called out for help, and two passers-by attacked the guard, and succeeded in releasing the prisoners. The men who rescued the captives have not yet been discovered.

An extensive robbery was perpetrated by Cantonese, in concert with two or three foreigners, upon a large native bank at Chi-Pao, about nine miles westward from Shanghai past Sik-away. Some 5,000 taels were secured. The foreigners have not yet been captured. Two Cantonmen recently engaged a sampan to go alongside a ship. The boatman went to the one indicated but was told then to make for another. One of the Cantonmen asked him for a light and as he handed it, lugged him down by the arm, when both set upon him with knives, inflicting a large number of wounds. The unfortunate man jumped overboard. He was picked up—but there is little hope of his recovery. No motive can be assigned for the outrage. Another Cantonman went into a butcher's shop, and, having some dispute about price, took up the butcher's knife and stabbed him. He then inflicted a similar wound on his assistant, and attempted to stab a European watchman, and finally inflicted upon himself so severe a wound that he was not expected to live.

An announcement appears in the Shanghai papers from the manager of the steam saw mills (Capt. Blakiston) at Hakodadi, that they are now ready to deliver all descriptions of oak, ash, pine, beech, and cedar.

The entire property of the Shanghai Brick and Saw Mill Company, Pootung, all in one lot, including the land, buildings, machinery, and plant, will be sold by auction on the 21st October, by Messrs. Cowie and Co.

We have to record the death of Mr. Latimer, connected with the *North China Herald*. The following notice is from that paper:—"Our columns this day contain an announcement which will carry regret to a large circle of friends in England. The untimely death of Mr. Nichol Latimer has created a profound sensation in Shanghai, as no resident in the settlements was more universally or deservedly popular. Connected as he was with many public bodies, his loss will be deeply felt, but while the severest trial falls on the surviving members of his family, the deepest sympathy will be felt with their sorrow by the late associates of the deceased in Shanghai. Mr. Latimer was for several years connected with the proprietorship of this paper."

Advices from Ningpo inform us that an inquest has been held on the body of the Englishman, Green, who was in Burgevine's company at the time of the latter's arrest. The scalp had been torn from the head, and the body presented other marks of violence, which, however, in the advanced state of decomposition in which it was found, might be attributed to the effort to force the corpse into a coffin too small to receive it. Thus the legs were bent, and the head pressed downwards into the chest, but these injuries were probably received after death. The gentleman recently sent by the United States Consul-General to investigate the circumstances connected with Burgevine's death, has just returned, but without gaining any important information from the local mandarins. He obtained Burgevine's body, which now lies at Ningpo awaiting a steamer to convey it to Shanghai. Several foreigners have of late passed through the place, but whether voluntarily or as captives is not clearly known.

The following items are from the *North China Herald*:—

"The weather has been changeable, and the temperature decreased perceptibly. We are happy to announce the first theatrical performance of the season, to take place this evening.

Digitized by Google

Our old friends, the Amateur Burlesque Company, have taken the initiative, and we may therefore anticipate a full house, and a pleasant entertainment. The pieces to be put on the stage are "The Area Belle," and "The Grin Bushes." An important case, that of H.B.M.'s Consul, on behalf of the Chinese Government, *versus* E. A. Reynolds, Esq., came before the Supreme Court on the 28th. Circumstances occurred, however, which caused an adjournment *sine die*. On the 27th Sept. the steamer *Fire Dart*, while going down the Wangpoo, sunk a junk lying in the 8th section. No lives were lost, but a large quantity of live stock went down with the wreck."

"We understand that the masonic bodies in Shanghai contemplate establishing a new library, to which a portion of the Freemasons' Hall about to be erected on the Bund will be devoted. The management will be in the hands of members of the fraternity, but the general public will be admitted as subscribers. This scheme, if placed in the hands of able men, is certain of success, and will doubtless be warmly supported by the literary portion of the community. Many men who appreciate access to well-selected books are not members of the club, and have therefore some delicacy in availing of the advantages of the present library since it has been removed to the club building. They will, we doubt not, make the most of the facilities afforded by the new project, and will by their support enable its promoters to make the proposed library a credit to the settlement."

"At length there seems to be a chance that the houses to which gaspipes have been laid down will soon be illuminated. A few days ago the mains were pumped dry, and gas passed through them. Soon, therefore, we may enjoy the blessings of light, if only the gas when it does arrive proves brilliant and inodorous. It will not be denied, in despite of the severe criticism to which the gentlemen connected with the gasworks scheme have been subjected, that the difficulties to be overcome by the company were very serious, and much of the delay unavoidable. The mistake made was the confident appointing of periods within which gas was without fail to be available. Of course no persons were more anxious for the completion of the works than those immediately connected with them, but the community justly felt aggrieved by the continual failure."

The following advertisement appears in the *Friend of China*:—

Regular Services of Carriages from Shanghai to Woosung and Back.—Departures: From Shanghai to Woosung every morning at half-past seven o'clock. From Woosung to Shanghai every evening at four o'clock. Fares: Two dollars per person for both ways. Letters or parcels for any of the above destinations will be taken at moderate prices. The consignees must take delivery of them at Woosung at the "Rendezvous des Chasseurs." In Shanghai, at Vinciene and Co.'s, Rue Montauban, where parties are requested to have themselves booked for the departures.

HANKOW.

The correspondent of the *Recorder* gives the following news:—

"We hear by the *Fusi-yama* from Hankow that affairs have almost assumed the nature of a crisis. The daily failing, defaulting, if not actual stealing, on the part of the compradores has brought business to a most critical pass. This is mainly attributable to the system of extended credit and the unwarranted confidence which has been imposed in native *employes*. Some of these worthies, we are glad to hear, are in prison, and we hope that all, together with their securities, will be firmly dealt with by the Consul at Hankow. We regret, however, to hear that one of the victims allowing his indignation to make him forgetful of his dignity, forced his way into the Taoutai's Yamun and administered chastisement to a defaulting compradore with a bludgeon, for which offence he had to appear before H.B.M. Consul, and was fined $15, and forced to make an apology to H.E. the Taoutai.

"Business under such circumstances was naturally dull. The banks, we hear have suffered in common with others. A warning such as this, we think, will tend more than any attempted combinations, to bring about more caution and prudence on the part of the merchants. It is clearly useless to incur risks such as these for almost any advance in price which could be obtained. Better to take lower rates with ordinary security."

"The water in the river was falling. It had done considerable damage among the houses on the banks. The *Iron Crown* was loading at £2. 15s., but hardly expected to fill before the steamer would be ready to tow her. Teas are rather lower, and no *bona fide* settlements were taking place. The shipments were chiefly on Chinese account."

The following is the report of the second meeting noticed in our issue of the 11th inst.:—

Minutes of the Adjourned Meeting held at the Club House on Sept. 21st.

PRESENT—K. R. Mackenzie, Esq., in the chair; Messrs. Monro, Hardy, Williams, Bridges, Booth, Carnie, Pomeroy, Thurburn, Luddeke, Soutar, Hogg, Higson, Francis, Hutchison, Cunningham, Macreath, Menzies, Mills, Hallam, Drysdale, Beadel, Watmore, Handy, Cheshire, Price, Holberton, Maxwell, Carey, Maclean, Cresswell, Gordon, Crawford, Dunn, Rowett, and others.

The Chairman expressed his regret that, owing to pressing official duties, the meeting would be deprived on the occasion of the presence of H.B.M.'s Consul, who had so efficiently presided at their last meeting. He believed that nearly all those present were perfectly aware of the object for which the meeting had been convened, and as a member of the committee appointed at the late meeting he had to state that, in accordance with the terms of Resolution No. 7, a letter had been addressed to Mr. H. D. Stewart soliciting his good offices in obtaining the sanction and co-operation of the principals of houses in Shanghai in carrying out the wishes of the mercantile community as embodied in the minutes of the proceedings and resolutions of the late meeting, published in the Shanghai papers. The Chairman then proceeded to read Mr. Stewart's reply to the communication of the committee. It stated that the principals of the houses with whom he had conferred were unanimous in their approval of a change in the credit system, adding that in his opinion the adoption of the Shanghai custom in regard to contracts and sales would be favourably received by most of the firms having branch establishments in Hankow, but that he thought that the signature of a bond would not be acceptable to many, whilst a "penalty would decidedly be objected to." The Chairman concluded by remarking that probably several persons present might have received instructions, or at all events been put in possession of the views of their principals in Shanghai on the subject before the meeting; and he doubted not a patient hearing would be accorded to any one desiring to address the meeting.

After a lengthened discussion, the following Resolution was proposed by Mr. Hutchison, seconded by Mr. Watmore and carried by a large majority:—

That after the 1st November no goods be delivered from foreign godowns unless five-day bankers' orders have been previously given for the same; that bargain money at the rate of 3 per cent. on opium and copper cash, and 5 per cent. on other imports, be paid when the sale is effected, and that the time for clearance be *ten days* for *opium* and *copper cash*, and *three weeks* for other articles of import.

Minutes of a Public Meeting held at Hankow, 4th September, 1865.

(Continued from last Number.)

Mr. MACKENZIE stated that the chief object of the meeting was in fact to endeavour to get rid of an acknowledged dangerous and pernicious system of delivering goods on receipt of native bankers' chops at three weeks to two months date; a system from which, as far as the speaker knew, no foreigner derived any benefit. These chops were written in a language understood by none of the merchants, who were necessarily dependent upon their shroffs or compradores to explain the amount, the date, and the signature at foot, and likewise the more important point of the stability of the bank signing the chop. In this bank, moreover, the very compradore consulted might probably be a shareholder, and would therefore have an interest in giving currency to the document. Changes of the nature proposed could not, however, the speaker thought, be made suddenly without risk, and he would suggest that a reasonable time be allowed before enforcing the new system. There was also another danger to be avoided. On a former occasion, when it was proposed to do away with the credit system, "unanimity" was unfortunately declared to be a *sine qua non*; and the consequence was that the strongly expressed opinions of a large majority were over-ridden by the dissent of a very slender minority. It was hoped that on the present occasion a different course would be pursued; and that as soon as the adhesion of as many of the principals of houses in Shanghai as possible could be obtained, the system should be adopted and worked upon its own merits.

Mr. MACKENZIE then begged to propose the following resolution:—"That, looking to the present objectionable system of sales for long credit, and the uncertain security offered by the acceptance of native bankers' orders on delivery of goods from godowns, this meeting is of opinion that cash payments on delivery should at an early date be adopted for all articles of import, and that this resolution shall also fully apply to all goods held by foreigners on native account."

Mr. WATMORE seconded the resolution, which was carried unanimously.

Mr. THURBURN proposed:—"That bargain money to the extent of twenty per cent. on the amount of sale should be enforced on opium, and ten per cent. on all other articles of import."

Mr. GORDON seconded the motion, which was carried unanimously.

Mr. BEADEL proposed:—"That one week be allowed for the clearance of copper cash, three weeks for dry and manufactured piece goods, and four weeks for all other articles of import, at the expiration of which period, should the goods not be taken delivery of, bargain money shall be forfeited."

Mr. CHESHIRE seconded the motion, which was carried unanimously.

Mr. GORDON proposed:—"That the foregoing resolutions shall come into operation on and after the first of October next, and that in order to establish the system contemplated on a firm and satisfactory basis, and to permit of reference being made to principals at Shanghai, a further meeting be held at the Club House on the 18th instant, when the necessary documents will be prepared for signature."

Mr. CAREY seconded the motion, which was carried unanimously.

Mr. PRICE proposed:—"That a copy of the proceedings and minutes of this meeting be forwarded to Shanghai for publication in the local papers for the information of those concerned."

Mr. CUNNINGHAM seconded the motion, which was carried unanimously.

Mr. HIGSON then rose to propose the following resolution:—"That a fine of Tls. 1,000 be imposed on any person who shall hereafter break through the system now agreed to, by giving credit. In moving this

Digitized by Google

resolution he begged leave to observe that this was not by any means the first time that the cash payment system, or modifications thereof, had been attempted to be introduced at this port, and the attempt had always fallen through whenever a cause for pressing sales had presented itself. He quoted several instances tending to prove that any such regulation must necessarily be enforced by a penalty to make it effectual.

The CHAIRMAN asked how Mr. Higson proposed to enforce the penalty.

Mr. HIGSON replied that a bond should be entered into between all parties consenting to the regulation.

Mr. MACKENZIE thought the regulation premature. It would be quite time enough to legislate on that point when they came to mature their plans at the future meeting to be called.

Mr. HIGSON begged leave to withdraw his motion.

Mr. WATMORE thought it would tend greatly to the furtherance of the objects of the meeting if some one at Shanghai was charged with the duty of communicating with the principals of houses there in respect to the measure now under proposal. He would therefore move:—"That the following gentlemen be appointed to act as a committee, and to arrange with some gentleman in Shanghai to co-operate with them on the subject:—Mr. K. R. Mackenzie, Mr. A. Hutchison, and Mr. W. G. Gordon."

Mr. BEADEL seconded the motion, which was carried unanimously.

A suggestion was made by the CHAIRMAN to the effect that, as considerable opposition to the new regulations might be expected from the native merchants, it would be advisable to publish a summary of the resolutions in Chinese, and have them formally presented to the Chinese authorities through the Consuls. It was, however, decided to take this point into consideration at the subsequent meeting.

The proceedings terminated with a vote of thanks to the Chairman.

AMOY.

A daring case of piracy has just occurred in this neighbourhood. On the 23rd Sept. the American brigantine *Garland* left Amoy with a crew of seven Europeans, two Chinese, and four passengers, viz., Mr. and Mrs. Stronach, Mr. Carter (the owner of the vessel) and J. Campbell, constable at the Takow Consulate. Shortly afterwads they were hailed by a suspicious looking junk and asked if they required a pilot. This they declined, and soon lost sight of the junk, which was going in the same direction as the *Garland*. About noon the junks came alongside, each mustering apparently about sixty scoundrels by way of crew. The steward of the *Garland* was now told to hail the junks and tell them that if they would spare the lives of her crew and passengers they might take anything they liked. One stinkpot was thrown on board from the nearest junk, and the pirates then prepared to board them. Up to this time the *Garland's* people had intended to show fight, being armed with seven muskets, six cutlasses, and four pistols; but the obvious superiority of numbers frightened them. The crew and passengers then got into the boat, the captain alone refusing to leave his ship; just as Mr. Stronach had returned for his amah, whom they left behind, the crew refused to wait any longer, and shoved off, leaving the captain, Mr. Stronach and the China-woman alone on board. The junks lowered two sampans in chase of the boat, who pulled vigorously for a European vessel in the distance; after a five-mile chase the pirate sampans desisted, and returned to the junks, the boat reaching the foreign vessel about an hour afterwards. She proved to be the *Philip I.*, a Hamburg vessel bound to Hong Kong.

The *Philip I.* now bore down to the *Garland*, which was drifting about in a helpless state, and the crew and passengers rejoined their unlucky ship. After getting a small supply of provisions and clothing from the captain of the *Philip I.*, they shaped course for Amoy.

The crew of the *Sir William Wallace*, from Chefoo, reported as having been wrecked and all hands murdered in Chin Chew Bay some six weeks ago, have been brought to Amoy by a brig which was sent to look after her.

HONG KONG.

The mails of August 26 arrived out on October 7. Our dates are now down to the morning of Sunday the 15th of October.

(FROM OUR OWN CORRESPONDENT.)

OCTOBER 13, 1865.

The outgoing mail will take home a somewhat less appalling obituary list than has been usual during the last four or five mails, inasmuch as the return of cool weather has checked the diseases which have proved so sadly fatal throughout the past summer. Notwithstanding, however, the almost unprecedented heat and drought of the last few months, the mortality which has been so alarmingly great has, except in a few melancholy instances among the colonial residents, been almost entirely confined to the troops and seamen stationed here. The 11th Regiment especially, which was hurried here from the Cape without proper preparation, and with absolutely no accommodation provided on shore previously to its arrival, has suffered frightfully. The soldiers, crowded on arrival into half-finished warehouses, just as the hot season was beginning, and already, from long frontier service at the Cape, in a bad state of organisation, have died off in crowds; and the mere money loss to Government has been probably greater from this cause than the expense of providing proper barrack room on the healthy headlands of Kowloong would have amounted to. The specious parsimony of the existing Government appears, however, to allow no consideration of policy or humanity to interfere with the grand and absorbing object of showing a diminished expenditure sheet to a deluded public.

In business matters, a topic which has been much discussed here of late is the increasing tendency of the foreign trade with China to fall into the hands of natives, to the manifest detriment of the European mercantile communities. From every port the same accounts are received, of Chinese who no longer act as brokers for the staple exports, but ship on their own account through the shoals of petty commission agents who have started up, and who threaten to supplant almost entirely the solid and gigantic houses who once monopolised the Chinese markets. In the northern ports opened by the treaty of 1858 scarcely any other form of business than that of commission-agent exists, and at Hankow the Chinese are said to be largely entering upon the system of exporting on their own account. Should this manner of doing business become much extended, as it undoubtedly will, the China trade cannot fail to become thoroughly revolutionised, and the great houses of other days will gradually disappear before a crowd of small continental commission brokers and competing banking agencies.

Guano is beginning to figure as an article of import at this place and Canton, and, strange to say, the Chinese farmers have been found ready to accept so striking a novelty. During the last two or three years the agents for the Peruvian exporters have managed to dispose of about 1,000 tons of this manure, at prices varying from one to three dollars per picul (133lbs). The trade has not yet, I believe, begun to show any lucrative return, and, indeed, the object of the importers is rather that of finding some freight for the coolie-ships returning from the Chincha Islands in search of fresh human cargoes, than of entering upon any very large transactions in the manure. Vessel after vessel continues to be loaded at Macao with unhappy Chinese, regularly purchased from the crimps who swarm in all the coast districts of the Province of Kwangtung, and who use every description of art and violence to secure the victims of this infamous traffic. Several of these crimps were recently arrested and brought to justice in the City of Canton, where, however, an "Emigration House" for Peru and Havana has been opened by Macaese agents, under the auspices of the French Consul, and, if all reports are true, a very flimsy disguise is even there only thrown around the kidnapping system, by which the slave auctions of Callao and Cuba are fed.

The news from the interior of Kwangtung is highly encouraging for the Chinese Government. In my last letter I spoke of the band of rebels who had seized one or two district cities on the northern border of this province, and who constituted the last remainder of the Taiping host. The great majority of these have now surrendered, and the remaining band is surrounded in a mountain fastness, where their chiefs are already negotiating for surrender. They have been offered pardon and their lives on condition of their giving up the leader, known as the K'angwang, who is the only survivor of the coolie Kings of Nanking. Two of his fellows, the Lai Wang, said to be a nephew of Hung Siu-tsuan (the Taiping Wang), and another chief of note, were executed at Canton last Monday, having been captured a few weeks ago. These successes will complete the pacification of Southern China, and will leave the Government in a better financial position for coping with the disorders in the provinces north of the Yangtse.

The arrival of Sir Rutherford Alcock is looked for during the ensuing week.

There is much public dissatisfaction expressed at the present moment amongst the foreign community of China, at the fearful mortality which has taken place this summer amongst the Hong Kong garrisons. H.M. transport *Tamar* brought on from Mauritius in the beginning of the summer the second battalion of the 11th Regiment. There being no quarters

Digitized by Google

ready for the men, they were most improperly housed, and, suffering from the heat and exposure, fever and dysentery grew so rife that the battalion became disheartened, and sustained such fearful mortality during the summer as to render them useless for service. The rumour is that the remains of the battalion are to be sent home! The season has been hot and unhealthy, but not sufficiently severe to justify such a scale of mortality. The officers appear to have escaped entirely, whilst the sufferings of the women and children have been sufficiently heartrending to excite public charity. The responsible officers spent the summer in Japan, and strictly prohibited any extra outlay. The waste of life thus occasioned has caused a deep sensation in this community. The press were silent on the subject, because its voice is powerless, and liable under such circumstances to breed discontent among the troops.

A number of the sufferers were sent on duty to Japan by H.M. transport *Adventure*. They landed there in such a miserable state as to excite public indignation. The editor of the *Japan Herald*, giving vent to his feelings, exposed the whole affair, and denounced the act of officers leaving their post under such circumstances. He was called on by some military officers who were spending the summer there to retract what he had stated, but he repeated it with additional aggravated facts he had gleaned. Two other papers (one in Japan and one in Shanghai) were then engaged to uphold the military authorities and to abuse the editor of the *Japan Herald*, which was done accordingly. The public knowing the facts are profoundly shocked.

The Nagasaki correspondent of the *North China Herald* informs us that great dissatisfaction has resulted from the action taken by H.B.M. Consul with regard to a case brought by a resident against Messrs. Alt and Co. The plaintiff, having secured the services of Mr. Lawrence, then residing temporarily at Nagasaki, requested that the case might be called before the departure of that gentleman for Shanghai. His frequent applications were, however, disregarded, although no sensible reason was assigned to justify the postponement. Mr. Lawrence was obliged to disappoint his client by returning to Shanghai, having entered a protest against the apparently unwarrantable action taken by the Consul. So the matter stood when our correspondent wrote. [We would remind our contemporary of the good old motto, *Audi alteram partem.*]

Her Majesty's gun-boats *Leven* and *Oppossum* left this on the 14th September for the purpose of looking after a batch of pirates who had attacked the British ship *Formby* off Hainan on that vessel's passage hence to Singapore, and had committed some other depredations. These two gun-boats have returned to port, after a long, and what is unusual with these craft, an unsuccessful cruize.

On reaching Tien-pak, the Mandarin at that station was communicated with. He stated he had captured a piratical junk about one month previous, the crew of which had confessed to having captured a British vessel off Tinhosa, and having murdered the whole of the crew, consisting of Europeans, Malays, and Chinese, they set fire to their prize. A quantity of articles were displayed which were taken from this vessel. but none of them appeared to be of British manufacture —a letter, a seal, and some of the contents of the medicine chest, are all that the gunboats brought away with them for the purpose of attempting to detect the name of the missing craft.

The Tienpak Mandarin could not proceed with the gunboats himself, but he sent an official and a pilot, when they proceeded to Hoi-how, calling at Now-chow. The Mandarins at Hoi-how stated that all piratical vessels quit the coast of Hainan, the latter end of the South West Monsoon, and that should any few remain they would probably be found lurking between Tienpak and Kulan. Proceeding in that direction, information was obtained that a piratical fleet was at Samoy on the South Coast, and intended to remain there during the whole of the North-East monsoon. Arrived at Samoy, the gun-boats found that the pirates had left three weeks previously, and as no trace could be found of them, the gun-boats returned to Hainan, whence they proceeded to Tienpak, where after riding out some of the late gales they returned to Hong Kong.

A light-house has been completed and lighted at Macao. It is 330 feet high, with a revolving light.

At Canton everything is quiet. The nomination of Mr. D. B. Robertson, H.B.M. Consul at that port, as Companion of the Bath, has been gladly noted by the communities of Canton and Hong Kong, as a proof, that the meritorious services of that gentleman have not been overlooked. Had the reward been of a higher class it would have been more cordially approved of.

The *Gresham* left on the 13th October with troops and invalids for England.

The Hamburg brig *J. H. Bocklemann* reports that at midnight on Sunday the 9th, about 20 miles E.S.E. of Capze Point, she was boaded by a large pirate lorcha, carrying upwards of 100 men and armed with 14 large guns and a large stock of smaller ammunition.

Mr. C. L. Davies has arrived and assumed the post o perintendent of the Bullion-office at the Mint.

A Macao paper says:—"Sent prisoner from Shanghai to reply to the charges brought against him by the house of Dent and Co., in which he had been employed for many years, Pedro Loureiro awaits the day of trial in the Monte Fort."

The *China Mail* has the following items:—

The storm has blown over, the cold weather has now fairly set in, and the comparative dryness of the summer would seem to be balanced by the apparent wetness of our autumn months. The thermometer has descended to 74 or 75, and the Chinese skull-cap, with European thick clothing, are looming in the distance.—Little of interest has occurred during the week. The mortality in the garrison does not present such a melancholy appearance as formerly which, it may be hoped, will continue so to be.

H.M.'s *Conqueror* left early on Sunday morning for the Cape and England. The reduced state of the men who left here per *Adventurer* some time ago for Japan, is the subject of severe comment by the Yokohama press, we observe, which deprecates the system adopted by members of the staff of living in Japan at ease while death and disease are busy at head-quarters.

Attention was drawn to the very great want, felt in Hong Kong at present, of clergymen of the Established Church. This has been painfully apparent during the past trying summer, when the entire duties have devolved on one or two young ministers, whose time is also partially occupied by other duties than strictly colonial work.

The same paper has the following on the loss of the *Garrawalt*, from Shanghai to London, already reported by us.—

There seems to be no end of the casualties that have occurred in the Chinese seas this year. Now we have to report the loss of a fine Aberdeen clipper, the *Garrawalt*, 11 days out on her passage from Shanghai towards London, with a cargo of tea and silk. On the 26th she fell in with very bad weather, which continued until the 1st instant, the wind blowing from north by north-east to east; the ship then struck on shoals off the north-east point of Hainan (which are, we have been given to believe, shifting sands), almost immediately becoming a complete wreck. The longboat capsized in the attempt to launch her, but fortunately the lifeboat was got afloat all right; not, however, until most of the hands were washed overboard, and Captain George Phillips, the master of the ship, and two seamen, Charles Chapman and James Cock, had met a watery grave. The remainder of the crew and also four passengers—Messrs. Lynch, Clementson, Painter, and Dowell—got on shore, and managed to walk to a place called Hoi-tow, from whence a junk took them to Sui-tong, where they found the British steamers *Prince Kung* and *Sir J. Jeejeebhoy*. The mate and seventeen of the crew, with the two latter-named passengers, arrived in Hong Kong in the *Sir J. Jeejeebhoy*, on the 13th of October.

CANTON.

The following anecdote, taken from the *China Mail*, will rather astonish old residents in Canton. To be designated FANQUI was a matter that a few years ago used to be endured with equanimity.

On the 2nd September, an Englishman strolling by the Western Fort (in the western suburb, back of Shameen), at about 5 o'clock in the afternoon, passed an opium and money-changing shop in the Cumhi Fow-street, in which was a man named Yu-a-He, taking his evening meal in company with his wife and child. On the Englishman passing the door, the shopman said to the child, "There goes a foreign devil" (fan kwei). The Englishman happening to overhear, enquired why a term so offensive to foreigners was used; and the shopman falsely replied that he made use of the words to frighten the child and to keep it from crying. The child's countenance showed, however, no trace of tears on close investigation, and the Englishman consequently concluded that the person was unwilling to recall his words, and was making excuses to screen his own misconduct; which was intentional, and not a merely careless utterance. If not checked, the child would most probably become accustomed to the use of such words, and thus a licence in the use of language would be allowed which it would afterwards be found difficult to rectify or repress. The Englishman therefore copied down the sign of the shop, and on the 4th instant laid a complaint at H.B.M.'s Consulate. The Consul said that the authorities had previously been requested to issue a prohibition of the use of such terms (as fan kwei). To this prohibition a large number of respectable people had rendered obedience; but there were some worthless characters who still made use of the objectionable words. The matter was referred to the local authorities

Digitized by Google

for investigation. At about 4 o'clock on the 8th of September the Englishman observed a person in the street undergoing the punishment of carrying a "cangue"; whom he recognised as the offender of the "Say Hing" shop. On enquiry, it was found that the Magistrate of Nan Hai had, on being informed of the affair by the English Consul, immediately apprehended the man Yu-a-He, and sentenced him to carry the "cangue" for a period of one month, as a warning to other offenders.

PHILIPPINES.

MANILA.

Dates are to the 7th Oct. The English mail of July 26 and Aug. 10 arrived on the 24th Sept. The chief news is of the gale, which is thus described:—

A most disastrous storm passed over on the 26th and 27th Sept., causing very much damage both to buildings and crops, and in the harbour considerable devastation to the shipping. The British ship *Tigris*, British barque *Sabrina*, Dutch barque *Commisaire der Kœnig von der Heim*, and *Louisa Kroomprincess van Sweiten*, are ashore, and it is feared that they will be unable to get off. The British barque *Margaret Wilkie* was obliged to cut away her masts. A long list of vessels sustained various amounts of damage through collision, &c., and about a dozen which drove on shore, it is supposed, will be able to get off without much damage.

JAVA.

Messrs. A. van Hoboken and Sons, Reynst and Vinju, and Anemaet and Co., have proposed to establish a regular steam communication between Australia and Java on receiving a subsidy from the Australian and Netherlands India Governments. It is not known what answer the latter has given, but the Governors of New South Wales and Queensland have expressed warm approbation of the project, and promised to give every assistance in their power in promoting it. It is proposed that, starting from Batavia, the steamers should call at Sourabaya, Koepang, Cape York and Brisbane, with Sydney for the terminus, and the time to be consumed between the two places is reckoned at twenty-two days.

A Dutch ship, the *Willem Hendrik*, which had recently arrived from Holland, was totally destroyed by fire in the roads of Batavia on the night of the 24th September. The whole of her cargo was still on board. The cause of the fire had not been ascertained.

STRAITS OF MALACCA.

SINGAPORE.

Dates are down to the 21st October. The mail of the 11th September arrived out on the 17th, and the French mail of the 17th September on the 21st October. The Dutch attack on Assahan, and the memorial sent home, form the leading items. A copy of the resolutions at Penang on the matter will be found below. The Rajah of Assahan has fled into the interior, where he intends to resist the Dutch advance.

The *Straits Times* says:—The past fortnight has had more political significance than many of its predecessors. The quarterly sessions of the Supreme Court, which began on the 9th October, have unexpectedly opened up discussion on one or two subjects of public interest. The grand jurors, who have latterly confined themselves to the finding or rejecting of criminal indictments, and whose judicial functions are understood to be doomed, on this occasion returned to their ancient practice, and submitted to the court a presentment having reference to several of the chief reforms required by the settlement.

By last mail we mentioned the loss of the ship *Maribelle* on her way hence to Batavia, and we have now to report the loss of the ship *Ocean Eagle* on a similar voyage. Hopes are entertained of recovering the former vessel, but the latter is sunk in 15 fathom water. Sir Rutherford Alcock passed by last mail to China.

The steamer *Teen Chang*, which returned from the wreck of the *Maribelle*, brings part of the crew and some of the stores of the wrecked vessel, which is said to be still intact and hopes are entertained of getting her off as soon as the divers have got the ballast out.

H.M.'s Straits steamer *Pluto*, from Penang and Malacca, having on board his Honour the Governor and establishment, has returned here.

H.M.'s surveying steamer *Rifleman*, Captain Ward, from Labuan with dates to the 4th Oct., having the Governor of Labuan on board, arrived in the harbour on the 9th.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

DAWES—On the 27th Aug. (in N. lat. 25 deg., W. long. 24 deg. 21'), on the voyage from Gibraltar to the Cape of Good Hope, the wife of Lieut. W. Dawes, 1st Battn. 9th Regt., of a son.

LAY—On the 28th Sept., at Chefoo, the wife of W. H. Lay, H.M. Vice-Consul, of a son.

MOSES—At Hong Kong, on the 27th Sept., the wife of C. Lee Moses, U.S. Consul General for Borneo, of a daughter.

MACKENZIE—On the 22nd Oct., at St. Helena, the wife of Augustine Charles Colin Mackenzie, Esq., Royal Engineers, of a son.

MARTEN—On the 20th Nov., at Blackheath, Mrs. Charles Henry Marten, of a daughter.

REME—On the 8th Nov., at Greenbank, Fallowfield, Manchester, the wife of G. A. Reme, Esq., of a daughter.

SWINHOE—On the 2nd Oct., at Takow, Formosa, the wife of Robert Swinhoe, H.M.'s Consul at Taiwan, of a son.

SOLOMON—At Hong Kong, on the 4th Oct., the wife of Reuben Solomon (in the firm of Moses and Co.), of a daughter.

THOMSON—On the 15th Nov., the wife of the Hon. Mr. Justice Thomson, Supreme Court, Ceylon, of a son.

WRIGHT—On the 17th Oct., at Shanghai, the wife of James Hanson Wright, of a son.

WILBART—On Oct. 16, at the Patent Slip and Dock Co.'s yard, the wife of Mr. C. Withart, of a son.

WILLANS—On Oct. 19, at Sunnyside, Singapore, Mrs. W. W. Willans, of a daughter.

MARRIAGES.

SHARP—ALT.—On the 14th Nov., at Christ Church, Forest-hill, by the Rev. J. M. Clarke, assisted by the Rev. A. Druce, George Sharp, Esq., of Maryport, to Isabelle Anne Alt, of Forest-hill. No cards.

ALLEN—STEWART.—On the 7th July, at Trinity Church, Shanghai, by the Rev. John Henry Gray, M.A., Consular Chaplain, Canton, assisted by the Rev. Charles Henry Butcher, M.A., Consular Chaplain at Shanghai, James Whinyates George Allen, Esq., Assistant-Surgeon 99th Regt., to Jessie Stewart, widow, and daughter of the late Samuel Cardy, Esq.

PEARCE—HARDING.—On the 14th Oct., at St. John's Cathedral, Hong Kong, by the Rev. J. Wilson, Acting Colonial Chaplain, assisted by the Rev. C. F. Warren, James W. Pearce, of Portsmouth, to Louisa, eldest daughter of Capt. Sam. Harding.

WINSOR—TANNER.—On the 23rd inst., at St. John's, North Brixton, by the Rev. George Mansfield, Philip Winsor, Esq., of S, Angell-park, to Helen Boyd, only daughter of the late Edward Tanner, Esq., of Penang.

DEATHS.

BOYD—On the 22nd Sept., at Shanghai, Robert Boyd, 2nd officer, a native of Ayrshire Scotland.

CATLEY—On the 7th Nov., at Southampton, having only landed from India on the 4th, Mr. Thomas Catley, aged 29, late chief officer of the P. and O. Company's steamer Nemesis, nephew of Mrs. Edmund Bowden, of Falmouth.

ELLERY—On the 28th Sept., on board the British ship Isca, at Hong Kong, John Ellerby, late Master, aged 54 years.

FILLEUL—On the 21st Sept., at the Shanghai General Hospital, of wounds received at Chinkiang, John Filleul, aged 22 years.

FORREST—On the 11th Nov., Sarah, the beloved wife of R. Forrest, Esq., of the Royal Arsenal, Woolwich, aged 41.

GREENER—On the 11th Nov., at Vienna, on her way from Bagdad to England, Elizabeth, the beloved wife of John Henry Greener, Esq., Telegraphic Engineer, London.

GIBB—On the 27th Sept., in the Shanghai General Hospital, James Bowman Gibb, of Liverpool.

KINDER—On the 1st Oct., at Morrison-hill, Hong Kong, after a few hours' illness of fever, Ada Paszkowicz, second daughter of Thomas William and Mary Elizabeth Kinder, aged 14 years and 6 months.

LATIMER—On the 28th Sept., at Shanghai, suddenly, Nichol Latimer, Esq., aged 35, third son of the late David Latimer, Esq., of Saugh Head, Cumberland. Friends will please to accept this intimation.

LUDWIGS—On Oct. 18, at his residence, Queen-street, Singapore, Captain Theodore Ludwigs.

MCDONNELL—On Oct. 14, at Singapore, Mr. John McDonnell, aged 55.

NEBENDAH—On the 2nd Oct., on board the Hamburgh barque Canton, T. C. T. Nebendah, Chief Officer.

NEILSON—On the 10th Oct., at sea, on board the P. & O. steamer Aden, from Shanghai to Hong Kong, Edward Noel Neilson, of New York, U.S.A., aged 25 years.

RAYMOND—On the 30th Sept., at Shanghai, Captain Samuel J. Raymond, of New York and latterly of San Francisco, aged 45 years.

RAY—On the 4th Sept., at Amoy, China, of water on the brain, James Edward Ray, late of H.M.S. Pelorus, youngest son of Walter Ray, Esq., late 76th Regt.

SHERBOURNE—On the 16th Sept., at Chefoo, Leonora Izabel Sherbourne, infant daughter of G. F. Preston, of Shanghai.

VALLESEN—On the 25th Sept., on board the Hamburgh ship Albertine, Captain H. Vallesen, aged 51 years.

WAGHORN—On the 13th Nov., at Plymouth, James Waghorn, Esq., formerly of the East India House, aged 60.

WILKINSON—On the 12th Nov., at Claremont-place, Forest-gate, Edward Harrison Wilkinson, of the Oriental Bank Corporation, aged 31.

Mexican dollars at Shanghai, taels 73 per 100, and Exchange on Hong Kong, 26 to 27 discount. Hong Kong and Shanghai Bank, 6 per cent. prem.; Gas Company, 30 per cent. prem.; Hong Kong and Whampoa Docks, 40 prem., and Union Docks nominal at 1 premium.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The remarks made in last report may be repeated. The supplies will probably fall short of last season's. Exporters appear convinced at last that the standard of rates has been for some time too high, and the Chinese dealers, equally satisfied of the fact, are more inclined to yield than to hold.

CANTON.—This market for the first fortnight remained very quiet, when some disposition was shown to renew purchases of scented teas, and this was closely followed by a sudden inquiry springing up for Congous, which resulted in the settlement of four chops at fully one tael decline in favour of buyers, when four more chops were settled at somewhat higher rates, and we quote prices for this mail firmer.

SHANGHAI.—Black.—Since the date of our last we have received the London mails of the 26th July and 10th August, both bringing very unsatisfactory accounts of the home market for black tea; this, together with the largeness of our stocks, induced holders to make some concession in their demands, and a large business has resulted at irregular rates; a decline can, however, be quoted of about two taels on medium kinds, whilst common classes are unchanged. The arrivals from Hankow have been small, but our stock is still considerable and nearly entirely composed of common and undesirable parcels. Settlements have been as under:—8 chops second and third crop Oopack, at taels 22.0.0 to 26.5.0; 6 chops second and third crop Ningchow, at taels 25.0.0 to 29.5.0; 18 chops second and third crop Oonahm, at taels 17.0.0 to 22.5.0; 3 chops second and third crop Hohow, at taels 16.0.0 to 18.5.0

AMOY.—Supplies continue to exhibit a marked falling off as compared with last season as will be evident by the statement given below. Congous are now to be bought on somewhat easier terms. During the month 5,938 packages have been settled at $16¾ to 18½ for common to fair flavory kinds, $20½ for superior. Oolongs: Current rates are somewhat irregular but show an average decline of $1 to 2 on those last quoted. Settlements for the past month comprise 15,797 packages, besides 332 common Ankoi which have been taken at $13. We now quote mixed Ankoi and common grade $17½ to $20. Fair cargo $22 to 25, and good to fair $26 to 34.

FOOCHOW, OCT. 9.—Since the departure of the last mail there has been a downward tendency in prices of most descriptions suitable for shipment to England, and settlements have been made more freely, both for that quarter and Australia. There has, however, been less doing during the last day or two, and the market closes quiet, with the probability of prices going still lower. For America settlements have been made in Oolongs at advanced rates.

HANKOW.—A very fair business had been done during the past fortnight, and 60 chops altogether were reported settled, most of which, however, were shipments for Shanghai for resale. Prices continued very irregular, but on the whole showed a decline of nearly one tael. 27 chops remained on offer. Quotations were—Oopacks, medium to good (third crop), tls. 21 to 23¼; Oonahms, common to fair, tls. 13 to 21. Total shipments to date, 562 chops, or 284,300 chests, or 27,391,800 lbs., against 595 chops or 310,700 chests or 29,481,400 lbs. to same date last year.

KIUKIANG.—Black Teas: About 3,700 packages had been settled and nearly 8,000 shipped on native account during the fortnight, and purchasers have forced a decline of about one tael, which would probably be increased when the last London advices had had time to be appreciated. The stock amounted to 5,400 packages mostly common and medium teas.

YOKOHAMA.—During the past fortnight there has been no change in our tea market worthy of remark: a fair amount of business has been transacted; nearly the whole of the settlements made being for the American market. Settlements for the above period amount to 2,000 piculs, chiefly good medium and fine kinds, for which full prices have been paid. Stock now on offer consists of about 2,300 piculs, comprising the following, viz.:—Good common, 550 piculs; medium, 800 piculs; good medium to fine, 900 piculs; finest, 100 piculs. Quotations are as follows:—Good common, $16,00 to 19,00; medium, $21,00 to 23.50; good medium to fine, $24.50 to 28.00; finest, $30.00 to 35.00.

NAGASAKI.—During the early part of this month fair supplies were received, and an active business resulted, at a slight advance on former rates. Holders are now very firm. The Northern Crown sailed on the 13th September, with a full cargo of teas for London.

RAW SILK.—This mail will convey to Southampton, 2,633 bales and 111 cases silk—to Marseilles, 445 bales silk and 194 cases silk worm eggs.

SHANGHAI.—The London mail of 10th August arrived on the 25th September, bringing a confirmation of the reported decline in the Silk market of about 3s. per lb. from the highest point. But these advices were unfortunately accompanied by a telegram announcing large business doing in the London market at 30s. 6d. To this news amongst other causes we attribute much of the present firmness of holders. Settlements since the 20th ult. are estimated at 2,500 bales, giving a total from the 1st June to date of 40,500 bales, viz.: 34,600 bales Chinas, and 5,900 bales Japan, against a total of 15,500 bales for the corresponding period of last season. Our unsold stock is now reduced to between 1,500 and 2,000 bales, consisting almost entirely of the lower grades of Tsatlee, Taysaam and Yuenfa. As to future supplies, we cannot expect them to come forward very freely—that is to say, in excess of settlements taking place in this market. The silkmen as a body have little faith in the maintenance of prices at the present range, and are consequently unwilling to do more than a hand-to-mouth business between the country and this market. Tsatlees, Nos. 1, taels 560 to 570 per picul; 2, taels 540 to 550 do.; 3, taels 515 to 530 do.

YOKOHAMA.—The market seems to have become a little weaker several parcels having been disposed of at $10 to 20 less; but it must be borne in mind that the value of the dollar has risen within the last few days 2 to 3 per cent. in the native market, whereby the apparent loss to the sellers has been compensated. A week since 133 bales Oshio silk belonging to the Japanese Government were put up at auction; one half of the catalogue was knocked down to two foreign buyers at prices ranging from $640 to 665, for rather coarse medium quality; the rest was bought by a Japanese, assisted by a Custom-house interpreter, in such a way as to leave no doubt whatever of the fictitiousness of the sale. The total settlements of the fortnight may be estimated at 300 bales, making a total to date this season of 4,000 bales against 830 same time last year. The unsold stock on the market is heavy, we should say certainly 2,300 piculs. Business in silk worm's eggs continues very active, the green ones remaining scarce and prices well supported; the white ones on the contrary have been sold at daily declining figures. Quotations: Ida, inferior, 570 to 610; Mybash and Sincha, best parcel offering, 770 to 785; do., medium, 740 to 760; do., inferior, 733 to 730.

CAMPHOR.—Hong Kong: We have no importations, and we have no stock, nominal quotation is $20 packed.

Digitized by Google

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—The market is very bare of stocks, which are moreover almost confined to Nos. 16 to 24. Medium numbers which are not in any supply are wanted for Japan, and show a material advance in price. Grey Shirtings: The recent receipts of these goods per Cambalu, Canadian and Mountain Ash have tended to check inquiry, and a decline in value of from 5 to 10 cents is noticeable. Sales amount to 12,500 pieces, in addition to which some 3,800 pieces of damaged goods have found buyers at auction. White Shirtings: Sales amount to 1,200 pieces. Stocks are very limited. T-Cloths: In the absence of any stock, the transactions in this description of cloth have been extremely trifling, and prices remain as under date of last report. Settlements 2,950 pieces. American Drills: There are not any of these goods on the market. White Spotted Shirtings, Dyed do., Brocades White and Coloured: The sales of the past fortnight are comprised in the settlement of 500 pieces of Dyed Spotted Shirtings, and 720 pieces of Coloured Brocades. Damasks and Chintzes: There are not any transactions to report in these goods. Handkerchiefs: 1,500 dozen have found buyers.

RAW COTTON has met with a moderate amount of inquiry during the past fortnight, but the value of the staple shows a material decline as compared with the last mail's quotations. The receipts during the fortnight of both Indian and native growth have been in excess of settlements, and it is anticipated that the former will come on still more freely ere long. Settlements of all descriptions amount to 8,750 bales. The sales in the Canton market amount to 2,000 bales of Chinese, and 1,000 bales of Bengal cottnn.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths: Remain at about the quotations previously advised, with sales of the first mentioned amounting to 380 pieces.

LONG ELLS.—These goods are in very small stock at present, and readily command the extreme quotations; the sales of the past fortnight amount to 1,800 pieces.

CAMLETS.—There is not any material alteration to notice in the value of these goods. Settlements are estimated at 715 pieces for the fortnight.

METALS.—Iron, Nail Rod, &c.: Iron remains at about the quotations previously current, with sales of 800 piculs of flat bar, and 420 piculs of hoop, Lead: Unchanged; the settlements being estimated at 500 piculs, while in Canton some 600 piculs of common quality have found buyers. Tin: 340 piculs have been sold during the fortnight. Tin Plates and Steel: There is not any business doing in these articles.

COALS.—Hong Kong: The only addition to the stocks of Coal since last report consists of a cargo of 700 tons of North Country, which realised $11¼ from alongside. This may be considered the value of English Coals while Welsh are worth a small advance on that price, Australian $7¼ to $7¾. At Shanghai there has been an advance in the rates for English Coals, with sales of cargoes from godown at taels 9.0.0 per ton, and a further advance may be expected, owing to the failure of the usual regular supplies from Great Britain. The prices from godown for English coals are now taels 9.0.0 to 10.0.0 per ton, according to quality. American coals are in some demand, at taels 10 per ton from ship, at which rate the stocks afloat have been cleared. Sydney Coals of all kinds are in good request at the quoted rates, and all the arrivals on the market have been sold. Quotations from ship here are:—For English Coals, taels 8.5.0 to 9.0.0 per ton, nominal; Cardiff, taels 9.5.0 to 10.0.0 per ton, nominal; American, taels 10.0.0 per ton, with sales; Sydney, taels 7.5.0 to 7.6.0 with sales; Japan, taels 6.0.0 to 6.5.0 per ton, nominal. Arrivals since the 19th ult. have been 2,057 tons from Sydney.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London: Sept. 25, Patrician.

At HONG KONG.—From London: Oct. 2, Canadian; 4, Mountain Ash. From Sunderland: 2, Hadassah.

At MANILA.—From Liverpool: Oct. 1, Felix. From Cardiff: Sept. 23, Cornelis Smit; Oct. 1, Magallanes.

At SINGAPORE.—From Liverpool: Oct. 17, Norah Greame.

At PENANG.—None.

At BATAVIA.—From Liverpool: Cornelia.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: Sept. 23, Dartmouth; 30, Iron Crown.

From FOO-CHOW.—For London: Sept. 26, Aurora Australis; Oct. 7, Manfred. For Cowes: Yeavering Belle. For Channel: Hydra. For United States: Douglas Castle, Glenaros.

From Amoy.—For London: Sept. 26, Florence Nightingale.

From HONG KONG.—For Portsmouth, Oct. 13, Gresham. For don: Sept. 29 (via Macao), Anne Archbell.

From MANILA.—For London: Oct. 6, Nelson. For Liverpool: Sept. 22, Tigris. For New York: Sept. 22, Melita.

From SINGAPORE.—For London: Oct. 11, Caldbeck. For Liverpool and Glasgow: Oct. 6, Sparkler. For Liverpool (via Cape), 13, Mary Spencer. For Boston (via Penang): Oct. 19, Magnet.

From PENANG.—For London: Oct. 10, Adelaide. For New York: Casilda.

VESSELS LOADING.

At YOKOHAMA.—For London: Raphael, Simon Hobley, Seringapatam. For Suez: Str. Shaftesbury, with silk, &c., for England, overland.

At HANKOW.—For London: St. Andrew's Castle.

At KIUKIANG.—For London: Emperor.

At SHANGHAI.—For London: Polmaise, Glencoe, Helen Nicholson, Wild Deer, City of Quebec, Ensign Horsa, Glengairn, Prince Albert, Queen of the Ocean, Lord Clyde, to Falmouth for orders. For Liverpool: Patna.

At FOOCHOW.—For London: Banian, Canaan, Caractacus, Alexandrina, Merse, Lord Macaulay, St. Dunstan. For United States: Jeannie.

At HONG KONG.—For London: Yaratilda, Tamerlane, Arab Steed, Spanker, Lanton.

At SINGAPORE.—For London: Wye, Sarawak.

At PENANG.—For London: Balnaguith, Nyassa.

At BATAVIA.—For Channel: Eerzkerzog, Zodiac, Star Queen, Viking, General Windham. For Amsterdam: Affghan, Sandringham, Verden, Friedriek, Anthony van Hoboken, Den Elshout, Christina, Nicholaas Witsen, Franklin, Princess of Wales, Souburg, Kon. Ned. Yacht Club. For Rotterdam: Madura, Petronella, Nereus, Louis Meyer, Cornelis Anthonie, Samarang, Marie.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—For London: Cotton and tea, £3; silk, £4. 10s. of 50ft. nominal.

At SHANGHAI.—Vessels continue to leave the port seeking; freights remain very low, with little employment offering. Only two charters have been made for Europe, one vessel on the berth for London, at 25s. per ton. The Charters are: Lord Clyde.—Br. bq. 531 tons to Glasgow or London £2 (20 lay days), calling at Cork for orders. Panama.—Br. bq. 295 tons, from Java to U. K. or Continent 3 ports £2. 5. (35 lay days), loading tea, calling at Cork for orders; if sent to Padang £2. 15s. calling at Falmouth for orders.

At FOOCHOW.—To London, 30s. to £2 per ton of 50 cubic feet. To New York, $9 (gold) of 40 feet.

At HONG KONG.—A better business has taken place in home charters direct—3 vessels have been chartered for Hamburg and others for London and New York, as also two charters from Java. The following settlements are from the Circular of George Holmes:—Shakespere, 656 tons, Foochow to London, at £1. 15s. per ton; Launceston, from three ports in Java to New York or Boston, at £2. 6s.; Favourite, 255, two ports in Java to Europe, at £2. 10s.; Bothwell Castle, 593, Canton to New York, at £1. 5s.; Carobel, Akyab to United Kingdom, at £2. 10s., or back to Hong Kong at 45c. per picul. No coasting charters offering. We observe, also, there is one French, one Russian, one Lukeck, and one Oldenburg vessel taking coolies to Havana, at £12 and £1 per head. Estimated number and tonnage of disengaged vessels in Hong Kong:—British 61, tons 30,908; foreign (exclusive of Siamese) 103, tons 35,016; total vessels 164, tons 65,924.

MANILA.—The transactions to report for the U.K., are as follows:—The Nordcap (Norwegian), for Falmouth and a port in the U. K., at £1. 10s. for 300 tons unclayed sugar shipped here, and £2 for the remainder of her cargo (about 400 tons sugar), from Iloilo. The Sirocco (English), for Liverpool, with 400 tons unclayed segar at £1. 15s. per ton, and 300 tons hemp at £2. The Lottie Warren lays on for London with 1,000 tons clayed sugar at £1. 14s.

At SINGAPORE.—The state of the market is in a very depressed state, and little demand for freight exists; two charters have, however, taken place, the Wye and Sarawak to London, at 35s. per ton all round.

At PENANG.—The Nyassa, 489 tons (British barque), has been laid on the berth, and has been enabled to recover rates to the old figures of £1. 2s. 6d. dead weight, £1. 10s. light freight, but has only a portion of her cargo engaged, and will probably find it difficult to complete her loading.

At BATAVIA.—Heavy engagements have been made; the tonnage in harbour, however, is too great to allow of any improvement in rates, which are, for Channel. £1. 10s. to £2 sugar; £1. 12s. 6d. rice.

By last advices from Calcutta we notice the Far East, Captain Jones, was loading for China.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Sept. 29, Independant, Toulon, for Saigon; Oct. 2, James Russel, London to Hong Kong; 4, Mary Frances, Newcastle to Hong Kong; 9, Jacob Cornelia, Holland to Singapore; Sir John Moore, Glasgow to Singapore; Nederlandsch Vlag, Rotterdam to Singapore; Duc, Bordeaux to Saigon; Clara Morse, Sunderland to Hong Kong.

From UNITED STATES to CHINA, &c.—None.

From CHINA to ENGLAND and CONTINENT, &c.—Oct. 1, Malabar, Batavia to Channel; 4, Eduard, Manila to Queenstown; 6, Panic, Singapore to Liverpool; 7, William Mitchell, Foochow to London.

From CHINA, &c., to UNITED STATES.—Sept. 29, Earl of Shaftesbury, Singapore to New York; Oct. 1, Western Continent, Hong Kong to New York; 6, Ocean Rover, Manila to New York.

COMMERCIAL POSTSCRIPT.

A motion was made in the Vice-Chancellors' Court, on the 25th inst., to dissolve an injunction made by Vice-Chancellor Wood to restrain the London Joint-Stock Bank from paying certain bills of Exchange drawn by the Chartered Mercantile Bank of India, London and China. It appeared that the last-named bank had drawn bills of exchange to a very large amount on the London Joint-Stock Bank, and that these bills had been purchased by Messrs. Hamilton, Gray, and Co., and Jarvie, Thorburn, and Co., in India, as the agents of Messrs. Buchanan, Hamilton, and Co., of Glasgow, in the ordinary way of business. The Glasgow firm became bankrupt, and a Mr. Anderson and other persons were appointed assignees. The bills having come to maturity were accepted by the London Joint-Stock Bank (previous to the sequestration), and they were ready to pay them, when this bill was filed, on the ground that the Chartered Mercantile Bank were large creditors of the Glasgow firm, and had a right of set off. Judgment was reserved.

ARRIVALS NOT INCLUDED IN THE TABLE.—Nov. 24, at Plymouth, from Bassein, Rapide; 13, at New York, from Hong Kong, Benefactor; 22, at Cuxhaven, from Batavia, Boreas; 26, at London, from Hong Kong, Salvia, from Penang, Hanover; 27, at Deal from Colombo, Cruiser; 26, at Falmouth from Batavia, Loopuyt; at Liverpool from Singapore, Early Dawn; 25, at Texel from Batavia, Nederland; 19, Cadiz from Manila, Nuestra Senora de la Concepcion; 27, London from Hong Kong, Johanna Marie.

Digitized by Google

DEPARTURE.—Nov. 25, from London, for Cardiff and Yokohama: Helena.

SPOKEN.—Bulgersteyn, Liverpool to Batavia, Sept. 27; Andromeda, Batavia to Rotterdam, Sept. 30, 34 S.; Apollo, Manila to New York, in the Sooloo sea; Early Dawn, Singapore to Liverpool, Oct. 20, 5 N., 26 W.; Hesperia, Shanghai to New York, Sept. 10, 35 S., 24 E.; Cambrian, Liverpool to Singapore, Oct. 26, 9 N., 24 W.; Ionia, Newport to Singapore, Oct. 20, 6 N., 22 W.; Loopuyt, Samarang to Schiedam, Oct. 15, 6 S., 18 W.; Jacoba, (Dutch barque), Batavia to Rotterdam, Oct. 1, 24 S., 6 E.

CASUALTIES.—The Loopuyt, V. der Hidde, from Batavia for Schiedam, arrived at Falmouth, Nov. 26, with damage.

The Eclipse, from Liverpool for Yokohama, put into Penarth Roads, Nov. —, with loss of steering gear, &c.

MISCELLANEOUS.—The *W. Cores de Vries* (s.s.), Tergast, from Rotterdam and Ramsgate, for Batavia, put into Portsmouth, November 25, her crew refusing duty.

Correspondence.

BURGEVINE.

(To the Editor of the *London and China Telegraph.*)

Sir,—In your issue of the 11th inst. it is stated that I had contrived to entrap the American Burgevine.

It is sufficient for me to remark that I left China on the 29th April, that Burgevine was arrested on the 14th May, and that I never heard of his arrest until I had been some weeks in England.—Your obedient servant,

GEORGE HUGHES,
Commissioner of Customs, Amoy, China.

Palace Chambers, 88, St. James's-street,
London, Nov. 16, 1865.

[In extracting this statement from a Shanghai paper we regret that we overlooked this allusion to Mr. Hughes.]

Continental Intelligence.

HOLLAND.

(FROM OUR CORRESPONDENT.)

ROTTERDAM, Nov. 24

For weeks and months the Opposition have made much *tapage* about the supposition that the ministers should have influence upon the elections in Limberg, by writing letters, in which they promised that the Bill about the increasing of the ground tax (*impôs foncier*) there should not be laid before the members of the States General in this sitting. Several members of the Opposition interpealed the Cabinet about these letters, so that Mr. Thorbecke was obliged to state that he, for himself, wished that when one or more letters written by him should exist, they might be printed, and when they should appear in an obscenous journal he would insert them in the official paper. Such a statement was made in the sitting of Saturday last. The whole Liberal party cried victory and thought that these compromising rumours were smothered. In the sitting of Monday last, however—when the discussions about the Budget were to be continued—our Premier rose at once, and stated that he had heard since the last sitting that Mr. Betz, the Minister of the Financial Department, had written indeed a confidential letter to his friend and ex-colleagne, Mr. Van der Maesen de Sombreff, in which was spoken about the elections; that a wrong use was made of this letter, so that the contents had become now of such a compromising character that Mr. Betz had been obliged to tender his resignation. It is still uncertain whether the King will accept it, but it is generally thought that it is impossible that the King will reject the demand for dismission. I do not think that Mr. Betz dishonoured himself by writing this letter, although the Opposition says he did; but it is quite certain that he acted so imprudently that it is necessary that he should be discharged as Minister. Messrs. Bachiene, van Heukelom, and van Bosse are named as his successors; but a rumour circulates that the Minister of Justice will defend, *ad interim*, the Financial Budget.

It is said that Mr. van der Maesen de Sombreff will tender his resignation as Member of the Second Chamber. So much is certain, that he has lost confidence.

Except this *intermezzo*, the discussions about the Budgets proceed very calmly. Those for the Roman Catholic and Protestant services were passed respectively by 49 to 19 and 47 to 18 votes. The Budget for justice was passed by 55 to 6, and that for foreign affairs by 35 to 11 votes.

A little incident which took place at the discussion of the last-named Budget will give you the conviction that our Tories do all that is possible to thwart the measures of the Cabinet. Mr. Cremers wished for an increase of the salaries of some Dutch Ambassadors, and especially for the Minister accredited at the Court of Washington. The high prices of all that is wanted in that place obliged that respectful gentleman to hire a set of rooms above a hairdresser's shop. Our Tories, however, disapproved of the proposal of Mr. Cremers; they made a stand for retrenchment and economy, and obliged our Minister at Washington to remain dollarless and servantless. Our Opposition, whose cry always was and still is "The glory of the Court above all," seems to be of opinion that it does not shock the glory of the Court when diplomatists are turned into such ridicule that diplomacy must cease to form a portion of our policy.

Notwithstanding our Budget, voting was always a fearfully long process; it seems that this year the Budget will be voted quickly. Perhaps to-morrow that of Home affairs will be approve, and as to that of the Colonial department, I think that no discussions of much importance will take place. All the members are waiting for the Culture Bill, and they spare their forces. In the meantime, we can read a *deluge de brochures* about this Bill, which is sharper attacked than defended by the press; but, nevertheless, the general opinion is that the Liberal majority will give it its votum.

Dr. Pierson, once one of our most beloved pastors of this town, but who resigned some time ago, has addressed to his late parishioners a last adieu, which created here a great sensation. He resigned while his opinions upon religious matters did not permit him any longer to baptise, to pray, to fulfil the other duties of the priestly office—which he named "the official lies of the Church"—without being guilty of the grossest hypocrisy. He now has raised the flag of "humanity," and states that the principles of his philosophy are widely spread in the National Church. He criticises severely the preachers in general, and paints the position of these men, who "receive, amongst other things," the confession of faith, while they themselves entertain doubts as to invisible things—that is, maintenance of artifice and formalism." Dr. Réville, his former colleague, answered to this last adieu, by his writ "Nous Maintiendrons," which is a very eloquent speech, to demonstrate that the Church is a necessity, and that the faith in God and Christ is the bond which binds our society together. The profession of Dr. Pierson, he says, is one which will be received with cheers by the plebeians and social republicans. Drs. Pierson and Réville have their partisans, and it is not impossible that these two "open letters" will have great consequences.

Mr. Jz. J. Lion, the editor of the opposition organ, *Net Dagblad van Zuid Holland and 'S Gravenhage*, advertised that he will publish within a few days his *Testament Politique* (*Myn Politieke Loopbaan.*) This journalist was a liberal clerical, and belongs now to the ultra-tories. This book, without doubt, will be a remarkable one.

P.S.—It is still uncertain whether the King will grant the asked dismission of Mr. Betz as Minister of the Financial Department. Several Cabinet Councils were held yesterday and to-day. A rumour circulates in the Hague that the whole Cabinet will resign; I do not believe, however, that it is well founded. Much sensation is caused here by a telegram from Brussels, announcing that King Leopold is so very ill that it is thought impossible that he will recover. The States General (2nd Chamber) have voted 19,000,000 f. for the construction of State Railways in 1866. Mr. J. van Lennep published some days ago a comic grammar of the Dutch language, which created a *furore*. I regret for his reputation, as *homme de lettres*, that it is only an imitation of the "Comic English Grammar" (London, R. Bentley, 1851). Not only was the text imitation, but also our famous Verveer made use of the *cliches* of your most regretted J. Leech. Poor plagiarists!

COMMERCIAL.

COFFEE—The Trading Company held its auction on the 22nd, and offered 116,900 b. Java, besides 5,200 b. Padang. The sales were very animated. The yellow qualities are paid ½ cent, the good ord. ¾ cent above the valuation. The last named quality cannot now be bought under 46c. The market is very firm.

TEA.—On the 17th a public sale was held at Amsterdam, in which were offered 2,130 ¼ and 100 ½ ch. Java, and 29 ¼ and 50 1-16 ch. China tea. The Java Boie was paid with 70c.; the Congou, 80 to 81c.; Souchong, 85 to 90c.; Pecco, 177 to 200c.; Thunkay, 69 to 90c.; Schin, 51 to 55c.; Hysant, 119 to 132c.; Uxim, 115 to 142c.; Joosjes, GB, 120 to 132c. The greater part was sold. For China fine Kaisou Congou was paid in auction 95c.; finest flowery Pecco, 95 to 100c.; extra Scented Orange Pecco, 175c.; fine Moning Congou, 109 to 110c.; Superfine Oopack Congou 123 to 125c. The greater part was sold. The market remains now in a firm condition.

RICE.—There are no transactions to report, for want of stock; cleaned sorts are paid dearer. Arracan 9¼ to ¾f.; Bassein and Rangoon 9¼ to ½f.; Voorloop, 11 to 13f.

SPICES.—Firm; but without an important demand. The nominal quotation is: Nutmegs No. 1, 84 to 85c.; No. 2, 74 to 75c.; No. 3, 54 to

Digitized by Google

56c. ; No. 4, 35 to 38c. Mace, D 90c. ; E, 85 to 88c. ; Cloves, No. 2, 26 to 27c. Pimento with much inquiry. Pepper.—386 b., ex Caroline Agnes, were sold at 20½c. ; 2,300 b., ex Jan Daniel and Catharina Maria, were brought into the market at 21c.

Tobacco.—(Java Leaves.)—The several parcels offered in auction were sold as follows:—1,476 b., 117 b. B T from 74 to 141c., 451 b. B. Kedon from 10½ to 56c., 337 b. Kadoe W C from 21½ to 100c., 200 b. E-B G from 16 to 136c., 184 b. Blarcum from 12½ to 51½c., 107 b. Djetis from 31½ to 92c., 42 b. B en W from 24 to 64c., en 38 b. D M at 82½c., in average 46c., 2,174 b., 1,206 b. N. I. H. from 12 to 58c., in average 36½c., 968 b. P. A. I. V. from 15 to 66½, in average circa 35c., 1,880 b., 771 b. A. and L.-Penawangan from 11½ to 48½c., 42 b. A. L.-I. at 38c., 221 b. A. L. from 16½ to 40½c., 258 b. Soesoean from 16½ to 67c., 203 b. V-Bto from 26 to 86c., 205 b. V-X from 16½ to 87c., en 180 b. C L from 12½ to 42½c., in average 32½ c.

1,887 b., 1,423 b. Cuba, in average 41c., 287 Kebon Aroem, in average 69c., 92 b. K. A. G., in average 58½c., 64 b. K. A., in average 15c., en 21 b., G. W. T., in average 29c.

1,125 b., 143 b. Birit, in average circa 35c., 223 b. A. in average 23c., 22 b. V., in average 48c. en 737 b. Nicot, from 23 to 106c.

1,066 b., 338. b. M. D., from 25½ to 145c. ; 181 b. M. S., from 26 to 123c., 237 b. Sienggé Sen Cov., from 19½ to 79½c., en 311 b. B. from 13½ to 56c., in average 80½c.

The 1,074 b. offered by the Trading Company were sold at 11½ to 97½c., in average 40c. The 2,601 b. ex Nicot (private auction), at 11 to 91c., in average 30c. The market remains in a firm condition.

Cotton.—There is nothing to report; the market is very calm.

Hides.—There was a good business doing. By inscription were sold at secret prices—2,500 Buffalo ex Nederland; 24 do. ex Lammina Elizabeth; 476 do. ex do.; 486 E.I. ex Nederland; 139 do. ex do.; 234 Buffalo ex do. The Trading Company sold likewise by inscription—2,224 p. Java Buffalo, ex Wellington; 119 p. Padang, ex Stad Assen; 826 p. Java Reindeer, ex Laura and Adele; 2,000 p. do., ex Anglia; 300 p. do., Lamina Elizabeth; and 250 p. Buffalo, ex Caroline Agnes.

Silk.—The 347 b. raw Silk, which will be offered at auction by the Trading Company on the 30th, are valued as follows:—134 b. Japan, Mybash, 38 to 46f. ; 29 do. Sinchin, 38 to 47f. ; 28 do. Sodai, 35 to 41f. ; 15 do. Oshul, 32 to 41f. ; 8 do. Koshue, 36 to 41f. ; 21 do. Mashtah, 30 to 37f. ; 30 do. Hatchojee, 21 to 27f. ; 57 China Tsatlee, 35 to 42f. ; 25 do. Taysaam, 35 to 38f.

Indigo.—With a good demand, 60 chests of the last imports were sold at 20c. above the last auction prices. The market is firm.

Japan Copper.—The Trading Company offered 20,000 lbs. in bars and plates, which quantity was sold at 54 to f.55.75. The 100,000 lbs. in cakes, offered privately at inscription, were sold at 57 to 60 f. per 50 cwt. Holders decline to sell at these prices, in consequence of the harbours of Chili being blockaded.

Drugs.—Cassia Vera; fine quality, with much demand, but without stock. Gum Damar, unaltered; firm at 30c. Gum Elasticum very firm; at higher prices some parcels were sold. Borneo Sago; 100 ch. were sold at former prices; nothing can be bought now under 12f. Mother o'Pearl shells; the 20,000 lb. which will be offered by the Trading Company on the 27th inst. consist of 17,000 kilo. large size, and 3,000 kilo. middling and small size; this quantity was imported ex Sindbad from Macassar. The valuation is from 80 to 82c.

Sugar.—The 25,555 kranj. Java offered in auction by the Trading Company were sold as follows:—

	Price paid Sept. 20.	Nov. 23.
No. 13	F. 33¼	F. 35¾
„ 14	33¾	37
„ 15	34¼	36¾
„ 16	34¾	37
„ 17	35¼	37¼
„ 18	35¾	37½
„ 19	35¾	37½

The 1,334 mats Mauritius sugar likewise offered in this auction were sold at 35 to 36¼f. The market closes very firm.

P.S.—Coffee: The market has become still firmer. 1,300 b. Padang were sold at 46½ to 50c.; and 2,000 b. do., ex Maarten van Rossem, at 46c.; 624 b. Macassar were taken at different prices. Sugar: Since the auction 2,500 kr. Java were sold at f.2 to f.2½ above September prices. Hides: 1,360 p. Cheribon Buffalo, ex Jacob, were sold at secret prices. Indigo: 410 chests arrived per Paul Johan; they will soon be brought into the market. Cutch: market very animated, much higher; want of stock. Banca Tin: 1,950 slabs sold at f.57½; 1,450 slabs at f.57¾; market firm. Rice: 5,700 b. Sourabaya, ex Wave, were sold at f.6¾ to f.8. Mother o'Pearl Shells: 20,000 kilo. Macassar were sold by inscription; the prices were firm, but did not transpire. Cochin Cocoanut Oil, f.32 to f.32½. Tea: The Java tea offered in auction yesterday was sold as follows:—

Congou	118 ¼-chests	—	at	90 to 100	c.
Kempoey	234 „	20 ½-chests	„	115 „ 152	c.
Souchong	658 „	30 „	„	95 „ 149	c.
Pecco	374 „	— „	„	120 „ 222	c.
Orange Pecco ..	— „	12 „	„	300 „ —	c.
Uxim	— „	13 „	„	170 „ —	c.
Joosjes (f. b.) ..	— „	45 „	„	177 „ 178	c.

Money Market.—The market was somewhat more animated, and on the whole rather better, the future of the rate of discount being regarded more hopefully. Some sales of importance of Dutch funds took place, which resulted in a rise; but the market is just now so sensitive that a few good purchases must have a very material effect in improving it. The foreign market was generally steady. Dutch Two-and-a-Half per Cents., 60¼; Three per Cents., 70 15-16; Four per Cents., 94 3-16; Trading Company, 146; Central Railway Company, 32½; Shares, 124¾; Netherlands India Trading Bank, 82½; Rotterdam Bank, 87½. Money: There has been a fair demand for discount both at the Bank and in the general market, where very little was done under 6 per cent. The rate of Bank discount remains still unaltered.

'Change.—London: 3 months, f. 11.68; 2 months, f. 11.75; short, f. 11.87½. Paris, 3 months, f. 46.60; 2 months, f. 46.80; short, f. 47.25. Hambro': 3 months, f. 35.10; 2 months, f. 35.25; short, f. 35.60. Bremen: 3 months, f. 189.40. St. Petersburg: 3 months, f. 148. Italy, f. 46.35.

Shipping—Arrivals.—Nov. 18, at Brouwershaven, from Batavia, Wilhelmina, Paul Johan; 20, from do., Ocean Pearl; 25, at Texel, from Batavia, Nederland, Captain van Steenderen.

Ready to Sail.—At Texel, Quartet for Batavia, China for Japan; at Rotterdam, St. Jan for Batavia; Johannes Anthonius, do.

PASSENGERS INWARD.

From Java, per Paul Johan, Mr. J. Bruns; per Wilhelmina, Mr. J. Dulken and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, November 23.

From the protocol of the last sitting of the Vienna Chamber of Commerce it appears that a resolution was passed to send a deputation to the new Minister for Trade, praying for the immediate establishment of an Austrian Consulate in Japan, for the protection of their commercial interests in that country. Although this shows that these gentlemen are alive to the importance of their petition, it shows a certain degree of ignorance on their part not to be aware that the relations of Austria with such a country as Japan are on a very different footing to those in Europe and other parts of the world, where, as a matter of courtesy, a consul would be received without any great difficulty, and allowed to protect the interests of his fellow-subjects. Austrian shipowners have sent in complaints to their Government that their vessels are not allowed to enter ports of Japan, but are turned back, and naturally enough seek for redress; but they appear to be quite unaware that this can only be done by the preliminary means of a treaty, in which such rights are specially stipulated. A dozen or two of Austrian vessels find employment in the China seas, and, no doubt, consider themselves very hardly treated at not being enabled to accept a charter to carry a cargo from a port of China to one in Japan, and thus compete with the Prussian and other treaty flags. It is true Austria has Consuls in China, without having concluded a treaty with the Celestial Empire; but, as they have no regular *exequatur*, they are themselves only there on sufferance, and recognised only by the local authorities out of courtesy. But, as I have indicated in a former letter, the new Minister, Baron Wüllerstorf, has already expressed his intention of taking the needful steps, and I have reason to believe that an expedition will be fitted out for that purpose, and sail in the spring for China and Japan.

The extensive silk merchant, Herr Siegfried, of Crefeld, in Rhenish Prussia, lately received 20,000 cartoons, each containing 45,000 silkworm eggs from Japan, whither he had sent some agents to make the needful purchases. His enterprise has been rewarded with the most perfect success, and sold so well in France and Italy as not only to pay all the expenses, but to leave a clear profit of 500,000 dollars. He has now again sent out six agents to Japan to make further purchases of silkworm eggs for him in that country.

In the last number of the Transactions of the Russian Imperial Geographical Society is a very interesting article containing a description of an excursion to Yehol, the summer residence of the Chinese Emperors. The writer states that he is the first ocular witness that has visited that locality since the embassy of Lord Macartney, in 1793. Another article in the same number gives an account of the vestiges of ancient glaciers in the western ramifications of the Tian-Chan.

COMMERCIAL.

Coffee.—Notwithstanding the high rate of discount and the scarcity of money, the opinion for this article continues favourable, and prices rule firm at the late advance, with an active export business. Sales of the week, 15,000 bgs.

Sugar.—Raw calm, with no alteration in value. Among the few sales are 300 kranjangs of Batavia and 1,000 bgs. E.I. Refined in no great demand, but prices well supported.

Rice.—Cleaned grain in great favour, and again higher. Of rough 5,000 bags of Rangoon and 4,000 of Java have been sold by importers at stiff prices.

Spices.—Ginger is in good demand. Pepper commands more attention. In Cassia no alteration.

Tea.—Higher prices are obtained for ordinary to middling Congou. Pecco is more inquired for. In Souchong no alteration. Of country Moyune green tea 446-8ths and 426-16ths of very superior quality have arrived from Shanghai per William Melhuish. There is no demand for Canton-made Imperial. A parcel of Canton-made Gunpowder has been taken for shipment to the North of Europe.

Spelter.—An improvement has taken place and the market is firm, with a rising tendency. The following sales have been made:—5,000 centners in loco and 4,000 for spring delivery at 14.6; 500 (crown mark) in loco at 14.10; 2,000 in loco at 14.12; 5,000 for spring delivery at 14.13; and 2,000 for do. at 14.14.

Shipping.—Sailed: Nov. 20 (from Cuxhaven), Garland, to Hong Kong; 23, Mauritius to Singapore. Arrived: Nov. 23, Boreas, from Singapore.

LONDON, TUESDAY, NOV 28, 1865.

HONG KONG FINANCES.

BY last mail we received minutes of two meetings of the Hong Kong Legislative Council, held respectively on the 12th and 23rd of September, for the purpose of discussing and passing the estimates for 1866. In comparing the proposed expenditure with the estimated revenue for the ensuing year, we regret to find an apparent deficit of something like $128,000, a state of affairs which contrasts very unfavourably with the financial prosperity lately enjoyed by the colony under the administration of Sir HERCULES ROBINSON. This retrograde movement may be attributed partly to the heavy contribution exacted by the Home Government towards the maintenance of a garrison on the island, and partly to the high estimate for the expenses of the new Mint, which are stated by the Colonial Treasurer to be far more than the colony can afford. These two items, with one of minor importance relative to the tolls proposed to be levied for the support of a lightship at the Basses Rocks, formed the salient points of interest discussed at the meetings above referred to.

With regard to the Mint, much dissatisfaction, as well as great diversity of opinion seemed to have prevailed. Notwithstanding the heavy expenses attending the establishment—amounting to $41,000 per annum, of which some $19,000 would be paid in salaries, and no less than $12,000 for coal—Captain KINDER calculates that if kept regularly occupied the Mint will yield a profit of £50,000 per annum. On the other hand, the Colonial Treasurer argues that, at the present price of bar silver, no profit can accrue, as the average price in London is 5s. 1½d. per oz.; freight and insurance cost three per cent., and adding to this the Mint charge of two per cent., it followed that a dollar of the same weight and touch as the current Mexican could not be produced under 4s. 8d. The expenditure of coal certainly seems to us enormous, and we think there must be a possibility of effecting some reduction in this item alone which will conduce to a more favourable result. It also appears to us that the anxiety of the Colonial Treasurer respecting the result of coining bar silver into dollars is quite misplaced. It was never intended that the Government should import bar silver into Hong Kong and there coin it as a speculation. The business of the Mint is merely to coin into dollars the silver sent in for that purpose by the merchants, making, we presume, the same charges as are customary at the Indian mints, namely, one per mille for melting and 2 per cent. seigniorage. If these terms give a profitable result in India—which is undoubtedly the case—we see no reason why they should not do the same in Hong Kong. Moreover, if it pays the merchant to buy the Mexican dollar at a premium which has of course paid seigniorage to the Mexican mint, besides an export duty, it must be equally remunerative to him to have his silver coined into Hong Kong dollars; the only difference being that the profit which formerly accrued to Mexico will then accrue to the Mint at Hong Kong. Until the present entirely exceptional state of exchange arose, the value of the Mexican dollar was never lower than the relative price of bar silver, but was on the contrary generally much higher, sometimes to the extent of 6d. per ounce; and there is every probability that the new Hong Kong dollar will now acquire a permanently higher value than that lately averaged by the Mexican. When once the Mint is in operation we are convinced that all doubts as to its remunerativeness will soon be dispelled. One thing is quite certain, that while the Mint is idle the consumption of coal and some other outlays will be in abeyance.

The growing prosperity of the colony during the past few years seems to have been too tempting a bait to be resisted by the Home Government, who snapped at the opportunity of imposing a tax of £20,000 per annum on its revenues for the support of the garrison. Sir HERCULES ROBINSON, shortly before his removal to Ceylon, wrote a despatch requesting that this heavy tax on the resources of the colony might be rescinded; and to this no reply had been received, and the amount, therefore, appears in the estimates as usual. There is, however, a possibility of a favourable answer, in which case a very large item will be removed—wholly or in part—from the debit side of the account.

With regard to the toll proposed to be levied on shipping, the Acting GOVERNOR very properly recommended the Council not to sanction the imposition of any direct tax, which would destroy the character of Hong Kong as a "free port." But inasmuch as it was impossible to ignore entirely the usefulness of the light on the Basses Rocks, the matter appears to have been compromised by voting a round sum of £500 towards its support. Mr. MERCER seems to have fallen into a most unaccountable error in laying this proposition before the Council; he first speaks of a lighthouse on the Basses, and afterwards says, "he has seen somewhere a statement that such "a lighthouse did not exist; but from the papers he has re-"ceived from the Home Government he can only infer that "there really *is* a light upon those rocks." Had His EXCELLENCY taken the trouble to refer carefully to the papers received from the Home Government — among which the QUEEN'S Order in Council must have been included—he would there have seen a distinct statement that a light-*ship*, not a lighthouse, had been established on the Basses. He would thus have avoided the amusing inconsistency of weighing the value of a vague "statement" which he had seen "somewhere" against that of an official document issued by the Home Government. The apparent discrepancy seems to have so puzzled His EXCELLENCY that, after an ineffectual attempt to reconcile the two conflicting ideas, he appears to have "given it up," like an obscure riddle.

DUTCH AGGRESSIONS IN SUMATRA.

FOR some time past the Dutch authorities in the Island of Sumatra, where they have possessions on the West coast, have been insidiously making encroachments on the independent native States on the East coast, evidently with the view of taking the whole island and its inhabitants under their control. At first they went to work in diplomatic fashion, and annexed in a suspiciously quiet, if not underhand manner, some six years ago, the important State of Siak, notwithstanding the Convention of 1824, between the British and Netherlands Governments, securing the independence of all the native States not ceded at that date. Up to the period of this annexation in 1859, an active trade was carried on between Siak and the Straits Settlements, in British manufactures and native produce, according to a liberal tariff arranged by treaty at the time Bencoolen was ceded to Holland by Great Britain, in exchange for Malacca. The consequence of the Dutch arbitrarily superseding the RAJAH in the government of Siak was that the merchandise sent by the traders of Singapore, and the products exported, were subjected to the odious system of double duties which prevails at Java, on all exports or imports other than Dutch. With a dereliction of duty which it is difficult to account for, the then Governor of Singapore, Penang, and the other Straits Settlements (Mr. BLUNDELL), took no notice of this infringement of the Convention; nor even alluded to a despatch of the late Lord PALMERSTON'S, remonstrating with the Dutch for establishing military stations at the ports on the East coast, which led to their withdrawal in 1843. This pusillanimous conduct on the part of the Straits authorities was further taken advantage of by the Dutch taking possession of Delhi, not more than two years ago.

Emboldened by these successes, they endeavoured to extend their encroachments into Assahan, a dependency of the ancient Kingdom of Acheen. However, the RAJAH of that State refused to enter into the arbitrary conditions offered to him, which would virtually deprive him of that independence provided by the Convention of 1824. Finding

Digitized by Google

that he would not succumb to threats or promises, the Dutch Government recently fitted out an armed expedition at Rhio, which arrived at the port of Assahan, where the Dutch flag flies over the town; and we learn by the last advices from Singapore that "the RAJAH has been compelled to "fly from his capital and take refuge in the recesses of the "forests of Sumatra, accompanied by a few of his principal "adherents." Now, if this RAJAH and his Government were barbarous and contumacious in their relations with the Dutch or other foreigners desiring to introduce commerce and civilization amongst the people, the case would resolve itself into one of those inevitable encroachments where the world at large would benefit by substituting European for native rule, and, consequently, a better regulated system of trade. Such, however, is not the case. Here was an enlightened native Prince, who ruled with mild sway, and, though not recognising the principles of free trade, yet levied a tariff of duties that was of a more liberal character than any which the Dutch have at their own ports. Under these circumstances an unjustifiable aggression has been made by their aggrandizing neighbours, and a grievous wrong perpetrated on an unoffending and friendly native prince. We all know how easily it is for the stronger to pick a quarrel with the weaker State for the purpose of self-aggrandizement, and in this instance we have a most barefaced example without a shadow of excuse.

But the matter does not rest here. Our interests, if not our honour, is involved in the issue. On the one hand, the British Government is bound to see that the clauses of the Convention, providing for the independence of the native States, are not infringed by the Dutch; and, on the other, that the commerce of the Straits Settlements is not injured by the protective duties of that nation, as established at their own ports, exclusively for their own benefit. The *Penang Gazette* very appropriately remarks on these points, "whether we are to allow the Dutch "to continue their efforts, and annihilate our Sumatra trade, "and placidly leave some of our Penang merchants, who, *rely-*"*ing on British protection*, and treaties with Assahan, have in-"vested large sums of money there, to be returned in native "produce, to have themselves despoiled, or whether we shall "assert our rights, and insist on the withdrawal of the Dutch "forces from the East coast of Sumatra." To these remonstrances the local Government is apparently silent; and no active measures have been taken to protect British interests at the port of Assahan. Under these circumstances a meeting was held on the 29th September, convened by the sheriff, and attended by the most influential merchants of Penang, to take the subject into consideration. A set of resolutions were then passed, with a view to bring the question before the Home Government, that some decisive measures be taken to settle the question finally, viz., what right the Dutch have to control the States on the eastern coast of Sumatra. These resolutions, which we publish in the *London and China Telegraph*, are framed in the best possible spirit, and we trust they will have the desired effect in the proper quarter. We learn also that a memorial to the same effect, signed by the most influential merchants of Singapore, has been forwarded to the Foreign Office. Unfortunately, Parliament is not in session, otherwise the question could be ventilated in the House of Commons, and some explanation obtained from the Secretary of State for Foreign Affairs. Meanwhile, a deputation of those gentlemen now in England connected or interested in the prosperity of the Straits Settlements will in all probability wait upon Lord CLARENDON, and request his interference with the Netherlands Government in the matter. Irrespective of this, surely there is an impartial member of the Dutch Legislature sufficiently independent and friendly to this country to ask his administration for an explanation. In matters of finance and business we have the highest opinion of the honour and integrity of the Dutch nation, and we hope they will not sully their fair fame in acting in this dishonourable manner towards a weak State in the Far East. The day may come when some strong enemy may try to crush them, and how can they expect leniency in Europe when they give none at Sumatra?

PROPOSED IMPROVEMENT OF THE PORT OF GALLE.

A PROJECT for constructing a breakwater at Point de Galle, enlarging its area, providing a graving dock, building wharves and storehouses, connecting the two extremities by tramway, and otherwise providing conveniences for shipping, has been submitted, together with detailed estimates of cost, to the Home Government, for the purpose of securing its assent to the plans so far as to recommend their adoption to the Colonial Government, and to guarantee a given interest on the outlay. That outlay is estimated at somewhat less than half-a-million pounds sterling; but whilst the execution of the entire project is desirable, it is pointed out that it admits of bring carried out progressively in detail, the most imperious requirement being the construction of the eastern breakwater, to protect the harbour from the south-west monsoon. This latter work would enlarge the anchorage ground from 56 to 240 acres, itself an important consideration. A minor feature in the scheme is the removal or levelling of the dangerous rocks that stud this port. Not only is the harbour unsafe and of insufficient area even for present requirements, but the arrangements necessitated for shipment, transhipment, and unloading involve the loss of time and money. So long as the port is in its present condition, the resort of vessels thither must be checked, and the development of Ceylon in various ways be checked. With all its want of safety and positive inconvenience, the tonnage of the harbour is yearly increasing. No less than four lines of steamers, including the Peninsular and Oriental and Messageries Imperiales put in here; steam transports, to and from Europe and the East unfailingly stop at Galle for supplies; and were that harbour provided with a graving dock, hundreds of vessels which now have to make their way to Bombay and Calcutta for repair, would annually enter for this purpose alone. The trade of China and Japan with Australia and the southern Indian Archipelago is increasing the demand for these facilities, which a judicious outlay of capital in improving the harbour accommodation would provide. It will be seen, from the particulars we shall proceed to give of this project, that it assumes a magnitude far beyond what individual enterprise could be expected to undertake, short of an Imperial guarantee, even with the concession of dock, wharfage, and water dues. Such a guarantee at once lays hold of the available capital in our market, and, as to its principle, reasons equally cogent with those that led the British Government to guarantee a percentage on the cost of constructing the great Indian railway lines, applies to this undertaking; which, in its completion, apart from its more general commercial advantages, would properly supplement those improvements in internal communications now being carried out in Ceylon. Although the construction of a tramway from Colombo to Galle is no part of the present project, it is evident that when vessels can be loaded and unloaded along the wharves, by a tramway on the level road between the two—a distance of 72 miles—produce could be brought down to Galle at far less expense than shipping at Colombo. We must premise that we are indebed for the project to Mr. J. J. GRINLINTON, of the civil service, and who, whilst in England, has associated with himself in the preparation of his plans and estimates two distinguished professional gentlemen. The scheme is entitled to the greater confidence from the fact that its author, by personal visits to the Portland breakwater, and consultation with the Government engineers, has availed himself of all the experience acquired in that work.

The proposed Ceylon breakwater consists of a centre at the Mata Mada Rocks, having a channel on each side, the western side of the breakwater running out towards these rocks from the south-eastern bastion of Galle Fort, 1,400 feet, with a wharf on its harbour face of 1,000 feet. The eastern wing would extend from Watering Point 2,400 feet towards the Mata Mada Rocks, with a wharf on its harbour face 1,500 feet in length. These wharves would be provided with a double tramway and sheds. The completed tramway, in circling the entire harbour, would cover a length of 3¼ miles. In examining the financial portion of the scheme we find the estimate for the eastern wing, exclusive of superintendence and supply of plant, with wharf on the harbour face, £194,000; for the western wing £75,000. The cost of the central portion, to include foundation for a lighthouse, will be but £18,500; to which, if we add the cost of a graving dock at Watering Point, £80,000, we reach a total of £337,500. The superintendence and supply of plant on the western side of the breakwater is placed at £23,000, and on the eastern side at £20,000; the blowing up of rocks, £20,000; storehouses on either side, £15,000, minor charges and cost of tramway bringing up the total to £466,950 The cost of material would be economised by the use of timber from Batticaloe for the harbour face and landing stage, and stone from the Crown lands on the eastern side of the harbour. Every accomodation for coaling is provided in the plans, whilst native water and cargo boats will be altogether dispensed with,

Digitized by Google

vessels being supplied with water from the usual source by means of hose. The shipment of coal on board vessels will involve but a third of the present cost, thus affording a wide margin of profit. The calculation of returns, according to data provided in the official report of the shipping business of the harbour for the twelve months ending September, 1864, offers a return of nine per cent. on the sum required to carry out the material features of this scheme.

The plan, subject to such official modifications as may be suggested, involves the purchase by the Government of such private land as will be needed for the tramway and necessary stations, and its transfer to the company on payment of cost, with an extension of authorisation to the company to collect harbour and wharfage dues and railway tolls, and to appropriate the same to the benefit of shareholders. We regard the scheme as one which the Home Government would be disposed to regard favourably, even if entailing on it the payment of the guarantee; but we are satisfied that, on the strength of the considerations we have urged, individual capitalists will embark their money on the faith that that percentage will be largely exceeded by the immediate returns, and that the revenue derivable will augment from year to year. Without entering on more statistics, we may state generally that the business of the port of Galle is rapidly increasing; but with this increase, with this greater resort to the port and this enlarging trade, the existing inconveniences are more severely felt. On some occasions vessels have actually to cruise outside waiting for a berth in harbour. With the plan for the improvement of the harbour fully matured, with the money waiting, as it were, to be advanced, it is not fair that individual interests concerned in the Eastern shipping trade should be longer jeopardised, and one of our most prosperous colonies continue unprovided with a sufficient and safe anchorage at her most important outlet. We trust to hear soon that the Ceylon Government have agreed to favour this scheme by all means in its power. We presume that Sir HERCULES ROBINSON was waiting for the advices of the Home Government, or he would have noticed the matter in his address to the Legislative Council.

THE AMERICAN MINISTERS FOR CHINA AND JAPAN.

WE understand that both Mr. Burlinghame and General Pruyn, United States Ministers at the Courts of Peking and Yedo, are likely to return to their respective posts earlier than they originally intended, and, in fact, before the expiration of their leave of absence. Mr. Burlinghame is still in the United States, and General Pruyn is travelling with his family in Italy. Since the foregoing was in type it is announced from Washington that Mr. Chauncey M. Depew has been appointed Minister for Japan.

IN reference to the tax of 1d. per ton levied on vessels passing the light-ship stationed on the Little Basses Rock, Ceylon, we have ascertained that it is not the intention of Government to erect a permanent lighthouse.

Literature.

Peking and the Pekingese; by D. F. RENNIE, M.D., Staff-Surgeon. John Murray, Albermarle-street.*

To all interested in either the history of our relations with China, or the study of Chinese character, the publication of Dr. Rennie's valuable work on *Peking and the Pekingese* is the great literary event of the month. Written in good plain English, and in a lively, unaffected style; founded entirely on the personal experience and observations of the writer; replete with valuable information, and interspersed with incidents and anecdotes of the most amusing character, it must, of necessity, become one of the most popular books in China. Dr. Rennie's narrative takes the form of a daily journal, commencing with the establishment of the English and French Legations in Peking in March, 1861, and concluding with his departure for Shanghai in April, 1862; his regiment (the 31st) being thenceforward employed in the operations requisite to clear a "thirty-mile radius" round Shanghai from the Taipings. The work is a wholesome exception to the numerous book-*making* efforts lately indulged in by travellers in China and Japan. With regard to the latter country especially, a short visit, including a few weeks' stay at one or two of the Treaty Ports, and a trip through the Suwonada, has been deemed sufficient excuse for a bulky volume made up entirely of historical accounts which might be found in any cyclopædia, copious extracts from Thunberg and Kæmpfer, and glowing descriptions of scenery. Dr. Rennie's work is a daily journal of events that occurred during a most interesting period, carefully and conscientiously recorded in an easy, natural style, which in itself is sufficient corroboration of the author's statement that when he came to re-write the narrative for publication he found so few amendments necessary that he was enabled to transcribe almost the whole of it verbatim. Dr. Rennie's position in Peking, bringing him as it did in contact with all classes of natives, afforded more than ordinary opportunities of forming a just estimate of their character, in which he of course received great assistance from the accomplished sinologues connected with the Legations. The estimate thus formed he avows to be much more favourable than that usually entertained by foreigners. He says:—

> I have left the country with the conviction that the Chinese nation, as a whole, is a much less vicious one than, as a consequence of opinions formed from a limited and unfair field of observation, it has become customary to represent it; further, that the lower orders of the people generally are better conducted, more sober and industrious, and, taken altogether, intellectually superior to the corresponding classes of our own countrymen.

We must, however, take exception to the clause which describes the lower classes of Chinese as "intellectually superior" to the corresponding classes of English, although they may be more sober, seeing that the opium pipe in China takes the place of the alcoholic stimulants in use among ourselves. Neither can we endorse the following, which has reference to a dispute between Messrs. Jardine, Matheson, and Co. and the Custom-house authorities at Canton:—

> There are strong grounds for believing that in almost every dispute which arises between ourselves and the Chinese, we are in the first instance in the wrong; but, unfortunately, the Chinese equally invariably adopt the wrong method of putting matters right, and by the time the case becomes one for consular legislation, the original wrong committed by us is entirely lost sight of, and the accumulated errors of the Chinese alone made the subject of consideration; consequently, as a general rule, they get the worst of such appeals, and hence the indignation which Mr. Pedder's promptitude of action has occasioned.

Subsequent revelations have shown that in their differences with the Imperial Customs our merchants were by no means invariably in the wrong. Of the various Celestial magnates who came under Dr. Rennie's observation, Prince Kung was the chief. He is described as being gentleman-like and courteous in demeanour, cordial and friendly in ordinary intercourse, but naturally somewhat reserved in his diplomatic capacity. On one of his visits to the Legation we are told that:—

> Before Wang-se-ang arrived, the Prince took up a European map which they keep in the office, with the names entered in Chinese characters, and pointing to Russia, said, "that is a large country, but it is not enough for them; they came last year and took that from us," placing his fingers on the territory annexed by Russia beyond the Amoor, and when so doing displayed more character and feeling than Mr. Hart has ever noticed before—evidently regarding it as a great wrong which had been done them.

Of Hang-Ki, who was "Hoppo" or Commissioner of Customs at Canton during the *regime* of the allied Commissioners, we have also some interesting particulars:—

> Hang-Ki, one way or another, has had a rather troubled time of it since 1857. Amongst other events, about six months after the capture of Canton, he, along with Pih-kwei, the Governor, installed by the English and French in Yeh's place, were made prisoners, and kept in durance for three months. It was Mr. Parkes who got the affair up, and it was an odd instance of retributive justice that he should afterwards be visited in prison by Hang-Ki, and be in some measure indebted to him for his release. The facts of the case are the following:—"The Allied Commissioners thought that the local authorities (Pih-kwei and Hang-Ki) intended to bolt from Canton, and it was thought desirable to prevent this; at the same time it was considered equally undesirable to make a public seizure of them, as it might lead to a disturbance. Another course, therefore, was adopted. Hang-Ki and Pih-kwei were invited to the yamun of the Allied Commissioners, to discuss certain matters of business, and in the course of conversation they were led on to express the great admiration they had for the English character, and the difficult and dangerous position they had placed themselves in with the populace, by consenting to administer the government in concert with the Allies, and that they were consequently looked upon as traitors, and occasionally hooted in the streets. Having got them thus far, the information was broken to them, that with the view of relieving them from the difficult and painful position in which they appeared to be placed, and further, to relieve them from the suspicion of being traitors, it had been determined by the Allied Commissioners to detain them as prisoners, which they were to consider themselves. As a matter of course, they were horribly disgusted, and really, under the circumstances of their seizure, it was not to be wondered at; as the trick was just such a one as they themselves would play, and consequently, the more acutely felt by them. They were confined in a

* To be obtained of Messrs. Bowra and Co., Hong Kong.

Digitized by Google

room in the yamun, and kept there for three months. Mr. Hart visited them the first morning of their imprisonment, and asked them how they had slept. Pih-kwei replied that he was not accustomed to sleep with men with iron-clad feet and clanking fire-arms walking about outside his door. They both professed to be so disgraced by the indignity to which they had been subjected, that they were clamorous to be led to immediate execution, preferring death to dishonour."

Further on, the author says:—

"Respecting Hang-ki, I got the following additional information:—"His salary, while he was Hoppo at Canton, was only two thousand four hundred taels, or eight hundred pounds sterling a-year, that being the salary attached to the office, while eight thousand taels monthly is not unfrequently expended in his yamun; it being customary that a Chinaman, when he gets a good berth, is followed by most of his relations, who live upon him during his tenure of office. Hang-Ki is believed to have made three hundred thousand taels during the time he was at Canton, and to have been squeezed out of one-third of the amount since his return to Peking. When Mr. Hart saw him at Canton, shortly before he left, he told him that he intended investing his money in pawnbroking associations, which are about the most profitable class of investments in China."

The following, which also has reference to Hang-Ki, is an apt illustration of the lamentably low standard of official morality which pervades their whole system:—

Mr. Hart says, that in the most unblushing manner both the Prince and Wan-se-ang declared, that from one of their red-buttoned mandarins down to a tinckchai, or orderly, there is hardly a person in the Government employment they can trust. They profess to be fully impressed with the good fortune which they now enjoy of having foreigners in their employment who speak the truth, and on whose reports they can with confidence act, from the assurance they feel of their being in accordance with facts. The Prince expressed an opinion that they should send a high official, like Wan-se-ang himself, to visit the ports where foreign trade is carried on; and on the latter saying, "Will Hang-Ki do? Shall we send him?' the Prince shook his head, and said, "No, no, he has been too long at Canton. His reports would be pretty sure to be drawn up in accordance with the principles which he took for his guidance when he was collector of customs there."

This, as well as the following extracts, show how completely this corruptness in the administration of the Government has subverted all order, and how philosophically even the most enlightened among the ruling classes resign themselves to the existing state of things:—

Mr. Wade had a visit from Tsun-how, who talked very rationally on public matters, and alluded to a passage in the classics, which says that, "When a system has been too long in operation, it becomes worn out, and requires modification to enable it to endure." "Now," he remarked, "our system is of that nature, and requires modification and change to enable it to continue,"—a very sensible and pertinent observation.

Many interesting details are given of the *coup d'etat*, by which the Council of Regency, appointed to govern during the present Emperor's minority, was overthrown, and Prince Kung installed as Prime Minister. The circumstances attending the execution of the Princes of I and Ching, or rather the act of suicide they were "permitted" to substitute for it, forcibly remind us of the custom of "Haru-kiri" prevailing in Japan. In each case by avoiding a public execution the property of the delinquent is saved from confiscation, and disgrace to his family averted, the difference being that in Japan the act is consummated by means of a short sword worn for the purpose; while in China a silken cord is sent, or supposed to be sent, to the victim by the Emperor.

The sending of the silken cord is a metaphorical expression. No cord is sent them, but immediately on receiving the order to commit suicide they descend to a chamber in the prison of the Imperial Clan Court, where arrangements are made for the purpose, and the machinery of death is kept in readiness. Having mounted on a stool, they request one of the attendants to adjust the noose, and, as soon as this is done, the stool is pulled from under them. In this way died the Princes of I and Ching. The advantage accruing from this mode of death is that it saves their property from confiscation, whereas public decapitation entails the loss of property.

Among much information of a solid and useful nature (though never heavy) these volumes contain numerous lively anecdotes illustrative of the more amusing side of Chinese character. Here is an example:—

Happening to mention to Mr. Hart that Madame de Bourboulon rode out yesterday on horseback, and that it was the first time a *Western female* had been seen on horseback in the streets of the Celestial capital, he mentioned to me an illustration of Chinese wit that lately occurred at Shanghai. A Chinaman from the country happened to come into the foreign settlement, and there, for the first time, saw a European female on horseback. He immediately asked a town friend what had become of her other leg, who, being a wag, replied that she was one of the female barbarian leaders, and that she had lost her leg at the taking of the Taku Forts.

In conclusion, we recommend the book not only to those specially interested in the country of which it treats, but also to the general reader. It is pleasingly illustrated by lithographs from original sketches made by Geo. Hugh Wyndham, Esq.

The Chinese and Japanese Repository for November rather exceeds the usual run of the periodical in the variety of its contents. The "Report of the Peking Hospital and Dispensary for 1864," and the continuation of the "Diary of a Member of the Japanese Embassy in 1862-63," are the papers that will probably be the first turned to by the general reader.

Mr. Stanford, of Charing-cross, has just published a map styled "Military Plan of the Ground around Shanghai, from Surveys made in 1862 to 1865, by Lieutenant-Colonel Gordon, Major Edwards, Lieutenants Sanford, Lyster and Maude, R.E., and Lieutenants Danyell and Bateman, 31st Regiment, Assistant Engineers." We understand that copies have been forwarded for sale to Shanghai.

THE CEYLON COFFEE CROP FOR 1864-5.

The reputation of Ceylon among investors will be increased by the fact that the last season has produced a maximum crop, accompanied by an enhancement, in her own special case, of the value of the berry as compared with last season's prices, and this with an actual decline in the consumption of coffee in England. The last crop amounts to no less than 876,097 cwt., the quantity shipped at last advices, comprising 607,734 cwt. of plantation and 268,363 cwt. of native.* In the distribution of this crop, Great Britain receives 821,086 cwt., France being the next largest customer to the amount of 25,135 cwt., followed by Australia and the United States; which latter country, owing mainly to the resumption of her China trade, takes a fourth less than in 1864, being credited for the year with but 9,939 cwt. The increase of the French demand, as shown by the direct exports, amounting to 25,135 cwt., an amount largely exceeding any shipment since the very exceptional one of 1861, and to which is to be added the supplies that cross the channel from this country, constitutes a most encouraging feature, as showing a compensatory influence at work for that decline in consumption which this country exhibits.

Although the deliveries of coffee from all quarters in the United States have largely increased the present year, the stock on hand in October was 5,000 tons below the average of the last five years, showing increased consumption. We may, therefore, look to America as well as the Continent for a reduction in the present European stock, amounting to 87,420 tons, being an excess of 19,726 over the amount on hand at the same date last year. Ceylon may be congratulated on having comparatively gained on the coffee product of Java the last year; that is to say, the excess which Java has to show is less than ever, having been for the past season but 395,000 cwt. The Java yield, it must be remembered, is likely to be shortly increased by the transfer to a Dutch company, for purposes of cultivation, of a large area of crown lands; and, indeed, the late increased yield is attributable not only to a favouring season, but the removal of certain restrictions. We find the coffee crop of Ceylon for the same periods 1864-5, one-third that of Brazil, a proportion of which Ceylon may be justly proud. Brazil has cultivated coffee on a large scale since 1821, and the Netherlands India from the middle of the last century; whilst Ceylon, which has made coffee a prime article for only 28 years, can already show a season's crop of 876,000 cwt. against 1,271,000 cwt. of Java, and 2,531,000 of Brazilian produce. The total annual supply of the three countries has thus been raised to 4,678,000 cwts. Allowing for the additional investments of capital, and the enlarged area of forest land brought under cultivation, we may place the yield of Ceylon next season at 950,000 cwt. The high prices commanded for choice samples of plantation Ceylon, and its increasing Continental estimation, together with the late advance from 6d. to 1s. on the finer and well-selected descriptions, afford an amount of encouragement that will certainly have its effect on investors, indicating, as it does, that any future tendency to a fall in prices from supply overtaking demand, will first be felt in the stocks of Java and Brazil, and that a portion even of the existing demand—owing to the displacement now going on—will be more and more largely filled up by Ceylon supplies. On the other hand, improved internal communications will cheapen the cost of delivery at Colombo, and those increased financial facilities which cannot be long delayed, added to improved skill in cultivation, will enable the producer to realise as profit a greater proportion of market value.

The coffee production of Ceylon must be immensely augmented with the opening up of the Lower Badulla Road, the extension of the railway to Gampolla, with a branch line to Nawalapettia, thence to Dickoya, with a tramway across Saffragram and Rackwane to the Gongalla and Mooroowa Korle districts. In this enlargement of enterprise, the coffee companies already formed and yet to be formed in London will no doubt take a prominent lead. For the present, and pending the carrying out those improvements to which we have referred, great attraction is offered to investors by the Matella Coffee Estates Company. Even without a railway to Matella, the advantages are very great. The estimated dividend, 12 per cent. of which is guaranteed, will be quite a prize in the money market when realised, whilst it is evident that when the projected railway is *un fait accompli* the value of the estates comprised in its operations must be much increased.

PIRACY IN CHINA.—The *Daily Telegraph* says:—We quite agree with the China houses, that an end must be put to these vermin of the sea. Their depredations are growing bolder and more cruel, for they never spare a prisoner. They gut a ship of all available cargo, scuttle or set fire to her, stave in the boats, and leave those of the crew whose throats they have overlooked to sink or be burned alive with the vessel. It seems to us that, instead of the desultory warfare which has been pursued against the wretches, a flying squadron of Her Majesty's vessels in the China waters ought to be detached to root them out. Of course it is difficult, but that is why the work should be done thoroughly; and the proper course would be simply to find the right man for an organised expedition along the coast. A really good officer, with small vessels, of his own selecting and arming, would know how to go about the business. He would soon have spies and

* Since the foregoing was written we have been advised of the further shipment from Colombo of 2,110 cwt. Plantation, and 5,884 cwt. Native in all, 7,994 cwt., bringing up the total of the shipments for 1864-65 to 884,091 cwt.

Digitized by Google

agents at the coast ports; he would play all sort of tricks to bring the villains out, disguising his ships, or dropping past their stations in a well armed merchantman. He would ask for handy, light steam launches—such as the French build so well—to run up the creeks after the water rats. He would use shot and shell, the torch and the rope, without being bothered about responsibility, except to satisfy his own conscience that he made no mistake between honest men and knaves. It would be better if the thing were carried out, in the same way, as far as the Straits and around Borneo. It is an immense hunting field, we know, and the game is as thick as jackals, and as hard to get at; but a year or two of real earnest labour among these human pests would be a permanent blessing to the traders of the East, and a lasting caution to those leather-coloured buccaneers, who should, once for all, be taught a lesson in the superior safety of rice-growing, under a new course of tuition, with gunboats for for agricultural mentors.

THE TELEGRAPH TO INDIA, CHINA, AND AUSTRALIA.—At a meeting of the Institution of Civil Engineers held on the 14th inst., a paper was read "The Telegraph to India, and its Extension to Australia and China," by Sir Charles Tilston Bright, M.P., M. Inst. C.E. After referring to the previous attempts to establish telegraphic communication with India by the Red Sea, and alluding to the causes of the failure of that enterprise, the author proceeded to describe the steps taken by the Government to carry out the line through Mesopotamia and by the Persian Gulf to Kurrachee, which is now in daily operation, connecting England with Calcutta, Bombay, Madras, and all the principal towns of India, and extending as far to the eastward as Rangoon. The opening of the entire line between Europe and India was delayed until the end of February in the present year, when a telegram was received in London from Kurrachee in eight hours and a-half. This was speedily followed by numerous commercial messages to and fro, and a large remunerative traffic is now daily passing. The author, however, complained of the delays and errors arising upon the Turkish portion of the line, between Constantinople and Belgrade; the service on the portion of the line worked by the Indian Government, between India and the head of the Gulf, being performed rapidly and efficiently. The difficulties encountered by Major Champain, R.E., in the construction of the Persian telegraph, between Teheran, Ispahan, Shiraz, and Bushire, were described, and the loss of the late Colonel Patrick Stewart, R.E., and his devoted services, were feelingly alluded to. In considering the extension of telegraphic communication from Rangoon to China and Australia, the author entered upon a narration of the advantages and otherwise of the several plans proposed; and considered, although part of the line in the Malay Peninsula and elsewhere might be taken by land, that the speediest and most reliable means of carrying the object into effect would be found in the submergence of submarine cables, if properly constructed and laid. It was thought that a line might be carried, in a comparatively short time, from Rangoon to Singapore, thence to Batavia, joining the Dutch land lines there, and passing from the south-eastern extremity of Java to Timor, onwards to the Australian coast, whither the Australian land lines were rapidly advancing, and would be erected to meet the cable. From Singapare a line could be carried to China, touching at Saigon, or the Peninsula might be crossed at Mergni, and the sea line be carried thence across the Gulf of Siam.

JUDGE CHISHOLM ANSTEY.—A certain portion of the press in Bombay are pouring out "vials of wrath" on the devoted head of Mr. Anstey (late Attorney-General at Hong Kong), who has been practising for some years in Bombay as a barrister but now raised to the Bench. The fact is Mr. Anstey is too severe for the easy, greasy style of financial concocters and others with which Bombay has abounded. We are not at all surprised, therefore, to find that he is unpopular. Thoroughly honest people, as a rule, are not popular in India. The following is an extract from one of the Bombay papers:—"The events of the Criminal Sessions, which commenced on Monday the 25th of September and were brought to a close last Tuesday evening, will long be remembered in Bombay. If Mr. Justice Anstey betrayed in the Insolvent Court qualities unbecoming the dignity of the Bench to which he was so lately raised, he has afforded unmistakable proof during the late Sessions of total want of fitness to perform the functions of a Criminal Judge. A follower of the practices of the notorious Judge Jeffries is quite out of place on the Bench of a British court of justice in the nineteenth century, nevertheless the public of Bombay have certainly been listening to judgments of late which none but a Jeffries or an Anstey would have thought of delivering. A total absence of that discrimination which is one of the noblest characteristics of a wise dispenser of the law's awards has almost invariably marked the sentences adjudged during the late Criminal Session, and the true interests of society have suffered in consequence. The Indian penal code is certainly a formidable weapon, and the powers it confers may be most egregiously abused by a judge whose stock of patience is too small to allow him to temper his decisions adequately. If a blacksmith had only one standard of hardness for all the steel he worked, the majority of the tools he turned out of his hands would be useless. And a parallel case can be drawn with respect to a judge. If he dips his pen invariably into gall, and records the extreme penalty of the law indiscriminately in every case, his judgments will do grievous harm to the cause of justice. And we must say that Judge Anstey has erred excessively on the side of severity in a very large proportion of the cases in which he decreed the punishments of the late High Court trials."

COMMERCIAL IMPROVEMENT IN BOMBAY.—The sudden advance in the price of cotton has restored a good degree of animation to business in Bombay. When a fortnight ago the high prices in the Liverpool market were quoted here there was great excitement. Very large quantities of cotton changed hands, and in a few cases enormous gains were realised. There has recently been greater quietness, mainly because all the cotton available has been purchased, and little reliance could be placed on the quality of that to hand. The supplies from Dharwar, and the remoter districts of Berar, are only now beginning to arrive; it is said that the cotton from the former district is even finer in quality than ever before. The shares in all the better joint-stock undertakings have advanced; but there is little speculation, and there seems every prospect of a return of sound prosperity to Western India. The Financial Association of India and China—the first of similar institutions established in Bombay—has just declared the results of a special investigation into its affairs. There is disclosed thereby a loss of nearly 14 lacs (£140,000) during the last six months; for meeting which the whole of the reserve fund (£100,000) and two-thirds of the profit and loss balance have to be set aside. As, however, the capital of the company is shown to be still intact, confidence in it is fully restored, and the shares are quoted at a premium. Of the total assets of the company (£1,020,000) upwards of £900,000 stand as "loans, bills discounted," &c., but those items have been examined by reliable auditors. A great number of the more recently formed and smaller monetary companies are being wound up after a laborious and fitful manner.

ETHNOLOGICAL OBSERVATIONS AMONG INDIAN MOUNDS, BY DR. MACGOWAN.—Acting Surgeon Macgowan has just returned from the Great Council lately held in the Indian Territory, whither he was sent by Secretary Harlan, having been detailed by the Secretary of War at the request of the American Geographical Statistical Society to make certain ethnological observations. On his way back he visited, at the request of the American Ethnological Society, the Indian mounds at Newark, Ohio, to make inquiries concerning the alleged disinterment of effigies bearing Hebrew inscriptions. Without committing himself fully on the subject he reports that the evidence is strong as to the genuineness or authenticity of the effigies which were discovered several years ago, and that one of them appears to be of Chinese workmanship, while there is slight room for doubt as to those which have just been disinterred. The question of their antiquity requires further investigation. The mounds at Coshocton, Ohio, which contain bones, and have been described as belonging to an extinct race of Indians, prove to be merely the burial grounds of Moravian missionaries, who resided there about a century ago. At Newark there have been recently discovered traces of an extensive system of drainage, evidently of the period of the Mound Indians, and indicating larger population and higher civilisation than antiquaries have hitherto supposed.

MADAME DE BOURBOULON.—Intelligence has reached us of the death of Madame de Bourboulon, wife of M. de Bourboulon, formerly French Minister at Peking. The sad event took place on the 11th instant at Chateau Clairvaux, Loiret (near Orleans), where she was staying, with her husband, on a visit to a friend. The cause of death was an attack of pleurisy, which manifested itself suddenly on the 4th instant, and terminated fatally in exactly one week. Our readers in China will recollect that Madame de Bourboulon went out to China with her husband when he was first accredited to that country in 1852, and spent some years in Macao. In 1861 after Mr. Bruce and M. de Bourboulon had proceeded to Peking and established their respective Legations, Madame de Bourboulon speedily joined her husband there, being the first European lady who ever resided within the precincts of the Imperial City. Here she remained until her return with M. de Bourboulon in 1862, since which time she has resided in France. Madame de Bourboulon was a Scotchwoman by birth, her father being a gentleman of considerable landed property, Mr. Macleod, of Harris. She was married to M. de Bourboulon in Washington, where he was Secretary of Legation.

APPOINTMENTS.—The Queen has been pleased to approve of M. Gustave Schunoff as Consul at Capetown for his Majesty the King of Prussia; and M. P. H. Paul Auschitzky, as Consul at Akyab for His Majesty the King of the Belgians. The Queen has been pleased to approve Mr. James Whittall as Consul-General at Hong Kong for the King of the Hawaiian Islands. The Queen has been pleased to appoint the Right Hon. Henry Austin Bruce to be Second Church Estates Commissioner, in the room of the Right Hon. Edward Pleydell Bouverie, resigned. The Queen has been pleased to confer the honour of Knighthood upon Robert Lush, Esq., Serjeant-at-Law, one of the Justices of the Court of Queen's Bench; upon Edward Hildi tch, Esq., M.D., Inspector-General of Hospitals and Fleets; and upon John Campbell Lees, Esq., late Chief Justice of the Bahamas.

THE JAPANESE IN FRANSE.—(FROM OUR PARIS CORRESPONDENT.)—The movements of the Japanese commissioners here are watched with so much interest that the old story of the three black crows seems to apply to them. They have been to Brest, and were recently at Nantes. At the former place they engaged about sixty engineers and masons to proceed to Japan with them; this fact was magnified into an engagement of from a thousand to twelve hundred *ouvriers* of all trades, and the three black crows thus created made the round of the French press before the exaggeration was corrected. The commissioners after their return to Paris are to visit Vichy and study the organisation of that Imperial pleasure village, with its hot and cold saline draughts, with a view to the creation of a similar establishment at Akama, where excellent thermal springs are said to exist.

THE SUEZ CANAL.—The financial arrangements connected with the Suez Canal scheme are threatened with further complications. It is rumoured that the Ottoman Government refuses to adhere to the judgment given by Napoleon III. "Nothing is more surprising," says one of our French contemporaries, "than that the Government of the Viceroy should have chosen the Emperor as arbitrator." It appears certain that France will not yield, for the French Minister of Foreign Affairs has declared that the Imperial judgment must serve as a base for all negotiations having reference to future engagements.

WRITERSHIPS IN CEYLON.—The Vice-Chancellor has informed the resident members of the University that Her Majesty's Secretary of State for the Colonies is about to nominate a limited number of candidates to compete for four writerships in Ceylon, and has invited the Vice-Chancellor to recommend to him any members of the University, not more than three, of deserving character, to be included in the list. A paper, explaining the nature of the appointments and the scheme of examination, will be sent to the head of each college, and also to the office of the Registrary of the University at the Pitt Press.

DEPARTURE OF TROOPS FOR CEYLON—CHATHAM, Nov. 16.—This morning a detachment of the 2nd battalion of the 25th (King's Own Borderers) Regiment, numbering 102 non-commissioned officers and men, together with drafts for the Ceylon Rifle regiment, and the Army Hospital corps, embarked at Gravesend on board the chartered troopship *Isabella*, for conveyance to Colombo, Ceylon, to reinforce the service companies of their respective corps. The following officers embarked with the detachments:—Lieutenant C. F. Barnardiston, and Lieutenant

Digitized by Google

C. D. Swete and wife, 25th Regiment; Lieutenant H. R. Fenwick, and Lieutenant J. B. Pilkington and wife, Ceylon Rifles; and Staff-Assistant-Surgeon O'Farrell in medical charge.

REINFORCEMENTS FOR COCHIN-CHINA.—We noticed in our last that the steam transport *l'Ardeche* had sailed from Toulon. The men conveyed by her are to be transferred at Suez to the transport *Orne*, and consist of 800 marines, several brothers of the Christian schools, twenty operative artillerymen, and a number of civil servants.

THE American bishopric in China, which recently became vacant by the death of Bishop Boone, has been conferred on the Rev. William Channing Moore Williams, who has been for many years a missionary in China and Japan. The English Bishopric of Victoria (Hong Kong) has not yet been filled up.

SOME of the Satsuma students, under the care of Professor Williamson, have visited the several factories and workshops of the Royal Arsenal, Woolwich, accompanied by the superintendents of the various departments.

Naval and Military.

Vice-Admiral Sir Horatio Austin's death will promote to the rank of Rear-Admiral on the active list Captain Thomas Fisher, and to the same rank on the retired list Captain Cospatrick Baillie Hamilton. The good service pension held by Captain Fisher will be at the disposal of the Duke of Somerset, who will very probably confer it on Captain William King Hall, C.B., an officer of distinguished merit, and to whom the country is still a heavy debtor for unrequited services in China and in the Baltic.

An exceedingly good portrait of Admiral Sir Michael Seymour has been published by Messrs. Griffin and Co., of Portsea.

Orontes, 2, Captain H. W. Hire, arrived at Ascension from England on the 20th of October, and left on the 21st for China.

An examination of the various iron plates submerged, upwards of twelve months since, in Chatham harbour, each coated with one of the numerous anti-fouling compositions, was instituted by the officials of the establishment, when, with a single exception of a pair of plates coated with Gisborne's anti-fouling mercurial mixture, the whole were more or less thickly coated with shellfish and seaweed, while on the plates treated with mercurial mixture scarcely a mussel was to be seen, excepting in place where the paint had been rubbed off. As many as eight different compositions were tested.

With reference to a list of vessels authorised to wear the blue ensign, it will be remembered that the Navy now uses the white ensign exclusively and that the change was made soon after the claims of the Naval Reserve officers to carry the blue were favourably listened to at the Admiralty.

New kettledrums have been presented to the 17th Lancers by Mr. G. Brudenell-Bruce and Lady Evelyn Bruce. The drums and standards or bannerets are of silver; the bannerets bear the motto of the regiment, composed of a "death's head and cross bones" in silver, encircled by a garter on which are inscribed the words "Death or glory."

Her Majesty's ship Vestal has been successfully launched at Pembroke Dockyard. The christening was performed by Mrs. Loring, wife of Capt. Loring, the superintendent of the yard. The Vestal is intended as a despatch vessel.

The Salamis, paddle despatch-vessel, 835 tons, 250-horse power, Commander Francis G. Suttie, now at Portsmouth, is ordered to be paid out of commission and recommissioned on the same day by her present commander for service in the China and Japanese seas. The Salamis is a vessel of great speed, and will prove a most efficient addition to the fleets of China and Japan.

The launch of Her Majesty's screw steam frigate Endymion took place on Saturday at Deptford, under the superintendence of Mr. Ladd, master shipwright of the establishment. Ample arrangements had previously been made in anticipation of a large number of visitors, of whom it was calculated there were 10,000 present.

At Deptford-green Dockyard—which has become a branch of the Millwall Ironworks—Mr. Charles Lungley launched the iron-cased, twin-screw gunboat Vixen, for Her Majesty's navy. She is an interesting experiment of the combination-of-wood-and-iron principle.

The Duke of Somerset has conferred the captain's good service pension rendered vacant by the promotion of Rear-Admiral Thomas Fisher, on Captain E. A. Inglefield. Vice-Admiral Sir Sydney C. Dacres has been ordered to Portsmouth, where the Edgar will be put out of commission, and the Admiral's flag will be struck immediately in consequence of his promotion. Rear-Admiral Frederick, whose flag is flying at Queenstown, will have temporary command of the Channel squadron, until a successor has been nominated to Vice-Admiral Sir. S. C. Dacres.

Mr. John S. Harper has been appointed Naval and Victualling Store-keeper and Accountant at Trincomalee, vice Astley Paston Cooper, to Chatham.

Major-General Sir C. Van Straubenzee, who has been acting Commander-in-Chief in Bombay, returns home on the arrival out of Sir Robert Napier. His divisional command will, in all probability, be filled by Brigadier-General Frank Adams, C.B., now commanding a brigade at Aldershot. Brigadier Adams had formerly commanded a brigade in the Bombay Presidency, which he gave up last spring, on the return of his regiment, the 28th, to England.

WAR-OFFICE, Nov. 10.—10th Foot: Ensign Nicholas Edward Carr to be Lieutenant, without purchase, vice Chaigneaux Colville Parkinson, deceased, September 16; Ensign Edward George Green to be Lieutenant, by purchase, vice J. J. Kennedy, whose promotion on October 20 has been cancelled; Ensign Thomas Orton to be Lieutenant, by purchase, vice Richard Stephen Burgess, who retires; Ensign William Cooke, from the 16th Foot, to be Ensign, vice Carr; Augustus George Bridge, Gent., to be Ensign, by purchase, vice Orton. 11th Foot: Lieutenant Christopher Garcia, from the 89th Foot, to be Lieutenant, vice E. H. Vaughton, who exchanges; Staff Assistant Surgeon Denis Joseph Canny to be Assistant Surgeon, vice R. T. Scott, appointed to the Staff. 25th Foot: Hamlet Wade Thompson, Gent., to be Ensign, by purchase, vice Edward Law Durand, transferred to the 96th Foot. 96th Foot: Ensign Edward Law Durand, from the 25th Foot, to be Ensign, vice Paul H. Caradoc Bettridge, who retires. 99th Foot: Major Charles Blamire to Lieutenant-Colonel, without purchase, vice Brevet Colonel G. M. Reeves, C.B., promoted Major-General; Captain and Brevet Major Patrick Johnston to be Maior without purchase, viee Blamire, Oct. 24; Sergeant Major Joseph Short to be Quartermaster, vice John Johnston, deceased. Medical Department: Assistant Surgeon Robert Thomas Scott, from the 11th Foot, to be Staff Assistant Surgeon, vice D. J. Canny, appointed to the 11th Foot.

BREVET.—The undermentioned promotions to take place in succession to Lieutenant-General Sir John Bennett Hearsey, K.C.B., Colonel, 21st Hussars, who died on October 23:—

Major-General William Frederick Forster, Military Secretary to the Field Marshal Commanding-in-Chief, and Colonel of the 81st Foot, to be Lieutenant-General, October 24.

Brevet Colonel Richard Chetwode, Captain, half pay, 3rd Dragoon Guards, to have the rank of Major-General, October 24.

Brevet Colonel John Parson Westropp, Captain, half-pay, Unattached, to have the rank of Major-General, October 24.

Brevet Colonel George Marmaduke Reeves, C.B., from Lieutenant-Colonel, 99th Foot, to be Major-General, October 24.

ADMIRALTY, Nov. 23.—The following flag promotions, dated the 17th instant, consequent on the death, on the 16th inst., of Vice-Admiral Sir Horatio Thomas Austin, K.C.B., have this day taken place:—Rear-Admiral Sir Sydney Colpoys Dacres, K.C.B., to be vice-admiral; Captain Cospatrick B. Hamilton to be rear-admiral on the Reserved List; Captain Thomas Fisher to be rear-admiral; Retired Captain William Louis Sheringham to be retired rear-admiral, under the provisions of the Orders in Council of August 1, 1860, and July 9, 1864.

CEYLON RIFLES.—Lieutenants Fenwick and Pilkington have sailed for Ceylon to join head-quarters.

25TH REGIMENT.—Ensign Alfred James, 2nd battalion, was accidentally drowned at Colombo, on the 14th ult., in endeavouring to save the life of a native. The deceased, who was in his 21st year, was third son of the late General J. P. James, H.M. Indian Army, and entered the service 8th July, 1862. Lieutenants Barnardiston and Swete, of the 2nd Battalion, have sailed for Ceylon to join head-quarters.

Monetary and Commercial.

By the last mail from Bombay the Bank of Hindustan shares are quoted at £5 premium. It appears that all sound banking and other shares are gradually rising from the late low quotations produced by the collapse of the cotton mania. It would now pay very well to purchase shares at the London quotation of £6 discount for sale in India, where the real working of the concern is more easily known than in London. The quotation of the Commercial Bank has steadily risen to £6 premium.

The directors of the P. and O. Steam Company have decided to recommend, at the annual meeting on the 5th of December, a dividend for the half-year of 3½ per cent., and a distribution from the underwriting account of 3 per cent., making, with the half-yearly dividend of 3½ per cent. paid in June, a total of 10 per cent. for the year.

The following account of the cause of delay in the transmission of messages by the Persian Gulf leaves nothing to be wondered at in regard to the irregularities so often complained of. We understand that our Government has made urgent representations to the Porte to rectify such avoidable delay:—

The section of the line from Constantinople to Bagdad consists of only two wires, one of which is almost always out of order. The Government itself occupies the other for fifteen hours out of the twenty-four, so that al that remains to Europe, official and commercial, is the use of one wire for nine hours a day. An effort was made recently to put up a third wire, but the operators forgot the insulators, and nailed the wire to the posts, making it, of course, quite useless. At the same time, the Turkish Government is most jealous of European interference with the wire, and will not in any case surrender its exclusive right of control. The only chance is to convince the Vizier that he is losing revenue by the mismanagement of the line, and even then he will have to contend with the passive resistance of subordinates who cannot understand why the people in round hats should be always in such a hurry.

The Messageries Imperiales Company has made an issue of 10,000 bonds, being half the number authorised in 1861. They are to be of 500f. each, and half of the amount is to be paid on subscribing. They are to bear 6 per cent., and to be reimbursed at par in 1880. Shareholders are to be admitted to subscribe in preference to the public, at the rate of one bond for ten shares. The Company also announces the payment of 20f. per share on account of dividend for 1865.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, £263,800; to Madras, £1,500; and to Bombay, £100,000. The *minimum* price was, as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 2s. will receive in full, and on Bombay at 2s. 0¼d. about 20 per cent. Above these prices in full. These terms show an increase in the demand for means of remittance to the East.

The share list of the Matella Coffee Estates Company (Limited), will be closed to-morrow the 29th inst.

The following notice has been published at Paris :—

"The Minister of Commerce informs French silkworm breeders and merchants, that, in order to prevent frauds in the trade in the grain of silkworms coming from Japan, it has been decided that the Minister of France in that country shall impose a special stamp, varying every year, and bearing the date of the year, on the cocoons of grain of silkworks destined for France, for which that guarantee may be demanded. By the imposition of this stamp the Government does not mean to guarantee the quality or source of the said grain, but only to certify that the boards on which it is deposited have been purchased in Japan."

Messrs. Walsh and Co., of Japan, announce through their agent in Paris that they will import, in December and January a quantity of silkworm seed.

The proposition alluded to in a late issue in reference to the regular transmission—by a special company—of telegrams via Kiachta to China, has been postponed indefinitely. Until the line from St. Petersburg to Kiachta is secured against the present delays it is practically useless. No result has transpired as to the negotiations between Russia and China for a line across Mongolia to Peking.

It is notified that Mr. J. Mackrill Smith, of the firm of Mackrill, Smith and Co., of Old Broad-street, has joined the board of the London and Provincial Marine Insurance Company.

We are informed that the accounts of the Blakely Ordnance Company have just been examined by Messrs. Chatteris and Nichols, the accountants, and that they show a profit of £56,982. 11s. 9d. for the year ending June 30 last.

The Bombay Chamber of Commerce had a special meeting on the rights of banks to hold shipping documents on the amount of the bill being tendered, as recently illustrated by the Asiatic and Central Banks in a case with Messrs. Dadabhai Naoriji and Co. After some discussion the following resolution was adopted unanimously :—

"Resolved, that in the opinion of the Chamber the course adopted by the Asiatic Banking Corporation and the Central Bank of Western India in refusing to receive payment of bills from any of the parties to the same, and to deliver up shipping documents hypothecated to those banks as collateral security therefore, is contrary to mercantile usage, and tends to obstruct business and interfere with mercantile confidence. That the Chamber leave the committee to take whatever steps they may consider necessary for the protection of its members and the public."

The Messageries Imperiales steamer, from Marseilles on the 19th, took 104 passengers, and £366,520 in specie, for India and China; and 68 passengers and £13,480 in specie for Alexandria.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 20th inst., was :—In gold, to Madras, £1,325. In silver, to Hong Kong, £3,000; to Shanghai, £1,454; to Hobson's Bay, £1,000. Total, in gold, £1,325; in silver, £5,454.

Advices from New York state that a vessel had arrived at San Francisco with 320 cases of Japanese eggs destined for the French market. The estimated value of this consignment is 400,000 francs, or £16,000.

ARTICLES OF IMPORT.

TEA.—A large amount of business has been done both in old and new season's Teas at fully previous prices for almost all descriptions, the trade being the chief buyers, although several chops of fine Moning have been taken for export to Russia. The first-class and some of the second-class Kaisows, per Lauderdale, leave a profit of 8d. to importers. Broken-leaf and dusty kinds of Congou have been in fair request; a few parcels recently to hand have sold at from 9d. to 11d. per lb. Fair to good common have been firmly maintained. The fair to good flavory kinds of old import have have been readily saleable at the full advance last quoted. Further supplies of medium to fine Kaisows have arrived; a large proportion have been sold at prices which show an advance of ½d. to 1d. per lb., those up to 2s. 4d. per lb. being the dearest. Common to fair blackish-leaf of old import remain as before, with a moderate demand; the medium kinds have been sold freely at very full prices, especially the better Chops. In new Monings and Wopaks a large business has been done, and prices have been fully maintained. New-make Canton have been in request, and prices have advanced about 1d. per lb. Oolongs have been wanted, at fully former rates. In Souchongs there has been a fair amount of business; some fine, recently arrived, have realised about 3s. per lb. Flowery Pekoes continue difficult of sale. Scented Capers have been rather more in demand at the reduced rates last quoted. In Orange Pekoes there has been a fair business done at previous prices. Uncoloured Japans maintain their position, the supply on offer being limited. Indian Teas have sold at Public Sale with great spirit at an advance of 2d. to 3d. Further sales are advertised for the 28th instant. In Green Teas there has been a fair amount of business done, there having been some heavy arrivals, amounting to about 900,000 lbs. Prices for some kinds have given way, but a fair amount of sales have been made at the reduction, which may be quoted 1d. to 2d. per lb. on Young Hysons, Imperials, and Gunpowders. Hysons have also sold about 1d. to 2d. per lb. lower, especially for the commoner kinds. There has been a large business done in Canton Gunpowders at an advance of 2d. to 3d. per lb., partly owing to speculative purchases. Young Hysons have also advanced 1d. to 2d. per lb.; fine are very scarce.

SILK.—We have had a fair amount of business in China silk since last mail, and prices have continued to improve; in one instance 31s. 6d. has been paid for classic No. 3 Tsatlee, but this can hardly be considered the current market value. Japan silk has been in good demand, and for Mibash of really superior quality, importers ask very high rates. Deliveries from 1st to 24th inclusive: China, 2,869 bales; Japan, 686 do.; total, 3,555 bales. Quotations: Tsatlee No. 1, 32s. 6d. to 33s.; No. 2, 31s. 6d. to 32s.; No. 3, 30s. 6d. to 31s. 6d. Mibash and Sinchew No. 1, 34s. 6d. to 36s.; No. 2, 33s. to 34s.; No. 3, 32s. to 33s.; 4 and inferior, 30s. to 31s. 6d.

COTTON.—There was an improved demand in the London market on the 18th, especially for cotton afloat, and ¼d. to ½d. per lb. advance was obtained; but the American news received on the 20th depressed the market, and prices have fallen 1d. per lb., so that although the reduction of the Bank rate to 6 per cent. caused a firmer feeling, the present quotations for cotton on the spot are about ½d. below those of the 17th. Of Tinnivelly 40 bales were sold during the week at 16d. for fair, and 150 bales Japan fair at 17d. The Percy Douglas has arrived in the Thames from Tuticorin with 3,102 bales. The stock in London on the 23rd was, of China and Japan, 2,330 bales, against 22,472 last year; and the total stock of all kinds 40,720 bales, against 113,079 in 1864. Of cotton afloat to Europe on the 24th there were 14,827 bales of Ceylon and Tuticorin, against 34,474 last year. The week's report of the Liverpool Market is as follows:—Total sales of the week, 51,080 bales, including 6,880 on speculation, and 10,850 declared for export, actual export, 11,689 bales. Trade, 33,350 bales. Import and received, 120,728 bales. Stock increased 75,680 bales. Total estimated stock, 369,819 bales; same date last year, 466,120 bales. Quotations: Middling Upland, 19½d., fair Egyptian, 21d.; fair Dhollerah, 16½d.; Mobile, 19¼d.; Orleans, 20d.; Bengal, 11½d.; China, 15½d.

SUGAR.—The flatness prevailing at the close of the week ending the 18th continued unabated in the early part of that just passed, and only trifling sales were effected at a reduction of about 6d. per cwt.; but there was a firmer tone at the close of the week, and business has been done at rather better prices than obtainable on the 18th. 456 bags Penang grainy yellow sold at 35s. to 36s. per cwt.

COFFEE.—The demand for colonial descriptions continues good. During the past week 1,400 casks. 1,270 barrels and bags Plantation Ceylon, at public sale, were all sold at fully former rates—fine ordinary to low middling, 77s. to 83s.; middling to good middling, colory, 84s. to 90s.; and 1,450 bags Native went rather dearer; good ordinary, 69s.; fine ordinary, 70s. to 72s. 6d. Several small quantities of East India have been offered by auction, which found free buyers, including 146 bags of good and fine ordinary Mysore at 71s. 6d. to 73s., and 112 bags of Singapore, fair Campar, 57s. 6d. Privately, 700 bags of Cochin were disposed of at 74s., and small lots of other good qualities at extreme rates.

RICE.—The return of dulness noticed in our last has been followed by a week of almost general stagnation, and only about 3,000 bags of soft grain are reported sold at prices fully 3d. per cwt. under the recent highest point.

CARDAMOMS.—Remain steady: 58 cases Malabar at auction sold at 5s. 3d. to 5s. 6d. per lb. for middling; and 4 bags Madras at 1s. 3d. very low lean.

CAMPHOR.—Market quiet, with moderate business privately in both Japan and China, within our quotations of £4. 10s. to £4. 17s. 6d.; no auctions.

CASSIA LIGNEA.—No auctions held; limited business accomplished privately upon former terms. Buds: Again rather cheaper; and 87 boxes

Digitized by Google

at auction sold at £10 to £10. 5s. per cwt. for good, and £9. 17s. 6d. mouldy.

CINNAMON (CEYLON).—We quote 1st sort 2s. 2d. to 3s. 0d. per lb.; 2nd sort 1s. 11d. to 2s. 10d.; 3rd sort 1s. 10d. to 2s. 6d.; and 4th and Jungle 1s. 5d. to 1s. 10d.; moderate business at about the par of the late quarterly sales.

COCOA-NUT OIL.—This market has been very firm, with good demand, and large transactions, including sales for arrival; and prices are 10s. to 20s. per ton higher for the fortnight; 545 casks Cochin, 167 Ceylon, 154 Sydney, and 92 Madras at auction.

DRUGS.—Cubebs: Nothing doing. Dragon's Blood: Firm; of 25 cases at auction, two-thirds sold at £9. 10s. to £9. 17s. 6d. per cwt. for good lump, and £3. 15s. to £3. 17s. 6d. low. Galangal Root: A recent arrival, 196 bags, sold readily at auction at 13s. 6d. to 14s. 6d. per cwt. for fair; 75 bags indirect retired. Rhubarb: Firmer; former extreme value barely maintained; and of 66 chests at auction, four-fifths sold at 2s. 9d. to 2s. 10d. per lb. for inferior.

GUMS.—Benjamin: Firm: of 16 cases Siam at auction three-fourths sold: seconds at £40 to £41 per cwt., thirds, £27 to £33. 15s., dark gum £27. 5s., and seed, &c., in block, £19. 5s. to £24. 10s.; of 204 case Sumatra one-third sold at £5 to £7. 2s. 6d. middling to fair third quality. Damar: Scarce, and again dearer; of 50 cases at auction half sold at 58s. per cwt. for good picked. Gamboge: Firm; and of 21 cases at auction half sold at £10. 12s. 6d. to £11. 10s. per cwt. for middling to good pipe.

GUTTA PERCHA.—Remains quiet, but firm, with some inquiry, bu nothing of importance doing yet.

HEMP (MANILA).—This market remains very firm, but quiet, with little business doing; 1,560 bales brought to auction, but all retired.

INDIA RUBBER.—Large business done since our last, at rapidly advancing prices, up to 1s. 10d. per lb. for fine Java, at which rate there are now no sellers. Auctions unimportant.

JAPAN WAX.—Fine saucers rather dearer; 788 boxes at auction sold at 83s. to 88s. 6d. per cwt. for fine saucers, and 61s. 6d. to 74s. ordinary.

OILS.—Annisced: Cheaper, and very quiet at the reduction, with most limited business. Cajaputa: At auction, 13 cases were all retired at 3d. per oz. Cassia: Very little business doing upon former terms. Cinnamon: Of 3 cases at auction, 2 sold at 2s. 7d. to 2s. 9d. per oz. for middlings. 5 cases Cinnamon Leaf sold at 5½d. to 9½d. Mace and Nutmegs: One case Oil Nutmegs at auction retired.

PEPPER.—Black: Is the turn dearer, and of 7,190 bgs. Singapore at auction, one-third sold at 3¼d. to 3⅝d. per lb.; of 4,770 bgs. Penang, half sold at 3⅛d. to 3¼d., with Trang at the same price; 370 bgs. Tellicherry retired. Good business privately upon fully corresponding terms. White: Also higher, with good private trade; of 881 bgs. Singapore, and 114 bgs. Penang at auction, one-fourth sold at 5½d. to 6d. per lb.

SPICES.—Cloves: Penang steady; Zanzibar firm; at auction 19 cases of the former sold at 11½d. to 1s. per lb. for fair, and 500 bags of the latter sold at 3¼d. to 3½d. for fair, and good business done privately at the same figures. Mace: Holders are firm; 53 cases Penang, 16 cases Singapore, and 9 cases Cochin offered at auction, and two-thirds sold at 2s. 1d. to 2s. 9d. per lb. for ordinary to middling pale; and 1s. 4d. to 2s. red and reddish. Nutmegs: Steady; 87 cases Penang and 29 cases Singapore at auction, nearly all sold at 2s. 11d. to 3s. 5d. per lb. for middling to good bold; and 1s. 1d. to 2s. ordinary small to fine medium.

SAGO.—Firm; large grain rather dearer; of 3,357 boxes and bags at auction, half sold at 19s. 6d. to 21s. per cwt. for middling to good small, 21s. 6d. to 23s. 6d. fair to very good large, and 28s. 6d. extra bold. Flour: Good business done privately upon former terms; 973 bags at auction retired.

TAPIOCA.—In public sale 175 barrels of good White Rio were realised at 5d., which is steady. Flour: 91 bags were sold at 1¾d. to 2d. per lb.

TERRA JAPONICA.—Cutch, Pegue: Good quality much dearer; 3,224 bags of recent arrival sold at auction at 26s. to 29s. per cwt. for very good Pegue; 807 bags old sold at 22s. to 24s., middling mixed. Good business done privately upon corresponding terms. Gambier: Demand active for arrival as well as on the spot; and large business done within our quotations; of 3,416 bales at auction, very few sold at 21s. per cwt. for excellent quality.

TIN.—This market has again been very animated, and further extremely large transactions have taken place in Straits up to £97. 10s. per ton, three months prompt; £96 cash; and £98 for arrival. Sales also made of Banca.

MISCELLANEOUS.—Blacklead: Firm; of 820 barrels at auction, half sold at 16s. to 21s. 6d. per cwt. for good to fine lump; 13s. 6d. bold siftings; and 10s. to 10s. 6d. dust. Galls: China and Japan had been flat, but appear to have become rather more active; of 365 boxes China at auction, half sold at 62s. 6d. to 67s. 6d. per cwt.; and 188 boxes Japan sold at 61s. to 65s. Ebony Wood: Held very firmly; of 91 tons Ceylon at auction, only one-fourth quitted at £6. 17s. 6d. to £10. 15s. per ton. Musk: Of 87 caddies Tonquin at auction, more than half sold at 39s. to 41s. per oz. for fine picked, being dearer; 24s. to 26s. 6d. middling rough; and 17s. to 17s. 6d. pickings: 10 tins Grain retired. Rattans: Cheaper; and 10,638 bundles Singapore, and 13,904 bundles Penang sold at auction at 2s. 4d. to 6s. 8d. per 100. Sapan Wood: Has become very flat: 19 tons Siam, and 73 tons Manila at auction, all retired. Mother o'Pearl Shells: Of 122 cases Manila at auction, a few only sold at £5. 12s. 6d. per cwt.; 97 cases Singapore retired. Soy: Rather cheaper: 40 casks sold at auction at 3s. 4d. to 3s. 6d. per gallon. Star Anniseeds: Very scarce: 12 boxes at auction retired at £10. 10s. per cwt. Sticklac (Siam): Quiet: 250 boxes ordinary at auction all retired, but fine would command high prices. Tortoise Shell: Auctions have comprised the following: viz., 5 cases Sydney sold at 14s. to 17s. 6d. per lb.; 1 case fine Manila at 22s. 6d.; 1 case Mauritius 15s.; and 2 cases Singapore retired. Vermilion: Scarce, and nothing doing.

CHARLOTTE ANN, London to Colombo, Oct. 10, 8 N., 26 W.

FREIGHTS AND CHARTERS.

All the berths for ports in China are now fairly supplied with shipping, and although a good many arrivals are shortly looked for, it is not expected that outward freights will be easier than they are at present. Some slight improvement is noticeable in homeward charters, a fair number of ships having been placed at Manilla for the United Kingdom at 60s. sugar, and 70s. hemp.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £30. For Hong Kong: £42. For Galle: £27. For Singapore, £32. For Shanghai: £50. From Newport, Cardiff or Swansea per ton. For Batavia: £1. 7s. For Hong Kong: £2. For Manila: £1. 12s. to £1. 15s. For Galle: £1. 6s. For Singapore: £1. 9s. For Shanghai, £2. 7s.

The Admiralty have invited tenders for the conveyance of 45 tons naval stores and 36 small spars to Trincomale, and have accepted the Punjaub for 200 tons naval stores to Hong Kong, both from the River Thames.

CASUALTIES.

The Dordrecht, Loos, from Rotterdam for Batavia, which put into Portsmouth on the 30th Oct. leaky, has been lightened and taken into dry dock for repairs.

The Amber Witch, from Cardiff for Hong Kong, put back Nov. — with part of crew refractory.

The Atlas (American ship), from Batavia for New York, which was spoken with 24th Sept., in lat. 24 S., lon. 4 E., reported that her master (Conley), died 8 days after leaving Batavia.

The Westburn, Gillan, from Batavia, whilst anchoring at Falmouth, Nov. 20, got in collision with the Janet Ferguson, and sustained loss of mizen mast, with other damage.

A fire broke out on the evening of the 22nd of November on board the Palestine, Park, bound from London for Colombo, just as she was on the point of sailing. The fire was extinguished in about two hours; her cabins were burnt, but her cargo sustained no damage.

MISCELLANEOUS.

At ST. HELENA.—Oct. 4, from Galle, Lady Ebrington, Pill, and sailed for London; 5, from Manila, Bavaria, Higgings, and sailed for New York; 7, from Sourabaya, Brewster, Beebe, and sailed, 11, for New Bedford; from Samarang, Andromeda, Dannberg, and sailed, 9, for Rotterdam; 8, from Batavia, Maria Catharina, Bos, and sailed, 9, for Amsterdam; from Singapore, Unicorn, Horn, and sailed, 11, for London; 9, from Penang, Helene, Guerin, and sailed, 10, for Bordeaux; from Manila, Concepcion, Tuton, and sailed, 10, for Cadiz; from Macao, Jacob Levy, Molinsen, and sailed for Hamburg; 11, from China, Highflyer, Shotton, and sailed for London; 13, from Batavia, Australie, Lucus, and sailed for Amsterdam; 16, from Hong Kong, Johanne Marie, Petersen, and sailed for London; 19, from Canton, Thorkild, Andersen, and sailed for New York; 20, from Shanghai, Isles of the South, Davidson, and sailed, 21, for London; 21, Caprera, Henderson; 22, Weymouth, Norris; from Batavia: Haamstede, Marsch.

At ASCENSION.—Oct. 2, from England, Siam, Bragg, and sailed 10, for Siam, having been supplied with a new mainmast.

At TABLE BAY.—Oct. 4, from Foo-Chow-Foo, Japanese, Boyd, and sailed 5 for London; 14, from Manila, Zealandia, Foster.

At MAURITIUS.—Oct. 12, from Singapore, Bristow, Justice; 8, Borneo, Basset, sailed for Batavia; 16, Jeanne Meyer, Loessewitz, sailed for Singapore.

SHIP LAUNCHES.

There was launched on the 18th, from the building-yard of Messrs. A. Hall and Co., Aberdeen, a fine clipper-ship of 680 tons N.M., named Ada, classed A 1 13 years. The vessel is intended for the China trade, and is commanded by Captain Jones, late of the Ziba. She will be despatched to Hong Kong by Messrs. Robertson and Co., and will convey the steam ferry, built for Hong Kong.

At Havre, on Monday, a steamer in the form of a cigar, built by Messrs. Nillus and Sons, was launched. It is constructed on the plans of Mr. Winans, of Philadelphia, is 22 metres long, and 2 metres 75 centremetres in diameter in the middle (the metre is about 3 feet 3¼ inches). It has eight screws, of which six are entirely under water, and two partially so, and is of about 25-horse power. The interior is divided into compartments. The vessel has been constructed by way of experiment. A similar vessel has been built in London.

On Tuesday Messrs. William Denny and Brothers launched, from their south building yard, Dumbarton, an iron screw steamship, named A. Lopez, of 2 000 tons register, and 400-horse power (nominal). The ship is for the Cadiz and Havana mail service.

Messrs. D. Hutcheson and Co. have contracted with Messrs. Thomson, of Glasgow, for the construction of three saloon steamers (similar to the Iona, but of smaller dimensions), to be added to their already large fleet on the Clyde, Caledonian Canal, and west coast trades. By this addition a daily communication will be kept up between Inverness and Glasgow during the summer and autumn months by passenger steamers, and twice a week by goods boats. The sailings from Oban to Skye, as well as to Staffa, Iona, and Glencoe, will also be considerably increased. The Llama, paddle, has made a satisfactory trial trip, although it was made in a stiff gale of wind, with a heavy sea. Messrs. Burns at once took the steamer over from her builders, Messrs. Caird and Co. The Llama, which will be commanded by Captain M'Pherson, will be shortly put on the Glasgow and Belfast station, in connection with the Buffalo and Wolf.

The Kinsale, screw, lately launched by Messrs. Henderson, Coulborn, and Co., attained on her trial trip, between the Clock and Cumbrae Lights, an average speed of 12½ miles per hour. The Kinsale is owned by the Clyde Shipping Company, and was built for the Cork and Waterford trade.

The Turkish screw steam ram Abdul Aziz, 4,200 tons burden, and 900-horse power, recently built and engined by Messrs. Napier and Son, Glasgow, for the Turkish Government, has sailed from the Tail of the Bank for Constantinople.

The Russians are rapidly covering their seas and large rivers with steam vessels, mostly built in this country. Messrs. C. Mitchell and Co., of Low Walker, on the Tyne, have just received an order to build two screw steamers of 500 tons each, for the navigation of the Caspian Sea, to which sea these vessels will sail direct from this country. The same firm are also about to build two more powerful steamships for the Russian Steam Navigation Company, and intended for their fleet on the Black Sea trading with the Crimea. They will be fitted up to carry a large number of passengers, and they will be supplied with engines by Messrs. Penn and Son, of London, with all the modern improvements for the economy of fuel.

The Pampero will no doubt be familiar to our readers, in consequence of the proceedings which the Government deemed it necessary to take in connection with the ship while she was being fitted out at Glasgow during the late American war. The ship's name has now been changed. On Tuesday she passed over to the Gareloch for the first time, for the purpose of having her compasses adjusted, under the name of Tornado. The appearance of this handsome craft excited general admiration as she proceeded past our harbours—her symmetry and smart appearance calling forth general praise. She was built on the composite principle by Messrs. J. and G. Thomsom, Glasgow. Her future destination is at present unknown.—Another screw steamer, named the Cyclone (late Wisconsin), built by Messrs. William Denny and Son, Dumbarton, and engined by the Greenock Foundry Company a few weeks ago, will likewise accompany the Tornado. It is rumoured that they will run the blockade at Chili.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

Messrs. Johnstone, Cooper, Wintle, & Evans, 3, Coleman-street-buildings.

SECRETARY (pro tem.).

G. S. Ullathorne, Esq.

TEMPORARY OFFICES.

9, Mincing-lane, London.

PROSPECTUS.

This Company is established for the manufacture and sale of articles chiefly of domestic use, and mostly protected by Patents, and will comprise within its operations —Improvements in the construction of dwellings, and in their lighting, ventilation, and drainage; the preparation of all descriptions of food; the manufacture and economical use of fuel; and the most recent improvements in kitchen and other household furniture.

The Company will also assist inventors, by procuring patents for them—by purchasing the right of selling their inventions—or by selling the inventions and paying the patentees a royalty—and in other ways generally promote their interests, and develope ingenuity, which in many instances is hidden from the want of means to make it known.

The Directors have already secured the nucleus of a business which promises to be very profitable, having provisionally purchased the exclusive right to a new system of preparing American and Australian beef and mutton, so that it becomes as easily cooked and as palatable as fresh meat; also to a newly-invented Portable Roasting Oven, which will economise half the fuel now used; to an Improved Portable Romford Boiler, adapted for the army, navy, and private use; and to a newly-invented Stone Stewpan, and a Cooking Range.

Besides the above there are several valuable patents offered to the Company, and as soon as it is formed, the merits of these will be duly considered, and if found desirable will be acquired by the Company. In the meantime those already acquired will produce immediate returns.

To show the value of the first of these patents, the Directors need hardly allude to the disease in cattle, and consequent dearness of meat, which is likely to cause much distress among the poor this winter, and for some time to come; the Company will shortly be enabled to sell at a low rate, still leaving a very large profit to the Company, 28 lb. boxes of beef and mutton prepared as a wholesome and palatable food without bone; and as each piece of meat will be carefully and separately examined, there will be no risk of bad meat being sold. It is a preparation invented by Mr. Warriner, who, as instructor of Cookery to the Army, has had full means of testing its value, which is 15C per cent. more than ordinary English Beef.

The Directors deem it most advisable for the present not to manufacture all the various articles, but to contract with manufacturers to supply those which they deem inexpedient to make themselves.

The Memorandum and Articles of Association, which comprise all the intended operations of the Company, can be seen at the Solicitors' and the Offices of the Company.

FORM OF APPLICATION FOR ORDINARY SHARES.

To the Directors of the Household Patents Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of 5s. per Share on Shares in the above Company, I hereby request you to allot me that number, and I hereby agree to accept such Shares, or any less number you may allot to me, and to pay a further sum of 5s. per Share on every Share which may be allotted to me within fourteen days from the date of allotment, together with all future calls thereon; and I authorise you to place my name on the Register of Members for the number of Shares so allotted to me; and I agree to sign the Articles of Association of the Company when required. HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—RHEUMATIC PAINS.—Many thousands of martyrs from rheumatism have found human life but one long disease, and, after consulting all the most eminent medical men in vain, and trying all sorts of supposed remedies without relief, have grown weary of existence, and have ceased to hope for comfort on this side of the grave, until some lucky accident has called their attention to Holloway's Pills and Ointment. These are genuine remedies indeed. Persons bedridden for months with rheumatic pains and swellings, after the Ointment has been well rubbed into the affected parts, and the blood purified by the course of these Pills, have found themselves restored in an incredibly short time to perfect health.

C. E. BANKS, Esq.

Offices—70, Cannon Street West, London.

The objects of this Company are the acquisition and working of Coffee Estates in Ceylon, and the selling of their produce.

The Directors have purchased three valuable coffee estates, situated in the Matella district; the contract may be seen at the Solicitors' office. These estates are known as the Beredewelle, Delagahoya, and Oodasgeria Estates, and contain about 1,010 acres—825 of which are freehold and 185 leasehold, at a nominal rent, held for the unexpired term of forty-six years. The Directors are making arrangements for an extension of the term to ninety-six years. 614 acres are planted, 552 are in full bearing, and the remainder will be so next year; fifty-five acres are in guinea grass, for cattle. 200 acres of very fine forest land are to be planted this year, which will leave about 140 acres to be brought into cultivation at a later period.

The crop for 1864-5 (when the full-bearing coffee was only 455 acres) amounted to about 4,000 cwts., which, after deducting the merchant's commission of about £420, being 2½ per cent. on gross proceeds, will give a net profit of about £6,000. The Company will sell without the intervention of the merchant, and thus save the above commission.

The crop for the year 1865-6, and which is now partly picked, is estimated at between 5,000 and 5,500 cwts., and as the vendor bears all expenses of up keep to the 30th June last, 5,000 cwt. should give a net profit available for dividend and reserve fund of more than £10,000.

When the whole acreage, exclusive of the 140 acres, is in full bearing, the estimated profit available for dividend would at present prices amount to about £12,000, or at the rate of £20 per cent. per annum on the entire capital.

The Directors consider that the present price will certainly be maintained, if not exceeded; seeing that the demand for coffee is greatly on the increase, whilst the Brazil and Java crops are annually decreasing, and that the reopening of the Southern ports of America cannot fail still further to stimulate the trade, and that there is little good land now procurable in Ceylon to be brought under coffee cultivation.

The before-mentioned estates have advantages which few properties in Ceylon can command; they are within a few miles of Matella Town, the great depot for labour and draft cattle; the Government road from the coast, by which most of the coolies travel, is the eastern boundary of the Beredewelle estate; this estate has a contract with Government for cleansing the town of Matella, by which much valuable manure is obtained at a trifling cost; and being situated on the high road from Colombo, the owners of these estates, instead of incurring a heavy loss (as many proprietors do) on the rice which they supply to coolies at fixed prices, have in most seasons actually derived a profit upon it; and whilst the cost of transit of coffee to the port of loading from many estates ranges between 5s. and 12s 6d. per cwt., the cost from these estates averages about 3s. 6d. per cwt.

The railway from Colombo to Kandy is now partly open, and the contemplated extension to Matella will bring it within two miles of the Beredewelle estate. This will greatly reduce the expense of transit.

All the buildings are substantial and in good repair; there is an ample supply of water, cattle, carts, and machinery driven by water-wheels, and all necessary appliances for taking in and pulping the crops.

It is proposed to retain the present manager, who has had upwards of ten years' experience in the district.

The Directors and their friends take 4,000 shares, leaving 2,000 for the public.

During the period of the guarantee, the Directors will place to a reserve fund all profits beyond £12 per cent. per annum on the paid-up capital. At the expiration of that period this fund will be distributed pro rata amongst the then holders of shares to which the guarantee extends.

The Ceylon Coffee Estates Company's success shows what large profits are derivable from coffee cultivation. The Directors of that Company, which has a capital of £60,000, out of the profits on their first year's operations paid a dividend of £10 per cent., and carried to the reserve fund £4,757. 5s., equal to about £8 per cent. more.

Prospectuses and forms of application for shares may be obtained at the Offices of the Company, and of the Bankers, Brokers, and Solicitors, where the Contract for purchase may be seen.

Copies of the Memorandum and Articles of Association can be had at the Offices of the Solicitors, or at the Temporary Offices of the Company. Copies will be forwarded by post without charge, on application to the Secretary.

APPLICATION FOR SHARES TO BE MADE IN THE ACCOMPANYING FORM.

FORM OF APPLICATION FOR SHARES.

TO BE RETAINED BY THE BANKERS.

To the Directors of the MATELLA COFFEE ESTATES COMPANY OF CEYLON (Limited).

GENTLEMEN,—Having paid to your Bankers the sum of £ , being a deposit of £1 per Share on Shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such Shares or any less number you may allot to me, and to become a Member of the Company in respect thereof, and I authorise you to insert my name on the Register of Members for the Shares allotted to me.

Telegrams of the P. and O. mail due on 13th with dates from Hong Kong to Nov. 1, have been received from Suez, dated the 4th inst., and they may be expected in London on the 14th.

The value of the French mail is illustrated on this occasion, as owing to the neaping of the P. and O. Company's steamer at Calcutta the next mail by that line, due on the 13th inst., will probably not arrive until the 18th or 20th.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, Dec. 4.—To Shanghai: Mr. H. Richardson, Miss M. A. Russell. To Singapore: Mr. S. Shortridge. To Hong Kong: Mr. W. Dalrymple, Mrs. Cairns, Capt. Gordon, Assist.-Surg. Purefoy, Mr. J. Lloyd. To Ceylon: Rev. J. and Miss Scott, Miss Bois, Mr. R. Robinson, Mr. D. D. Graham, Mr. Cameron, Mr. Kent, Staff Surgeon and Mrs. Meadows. From Marseilles, Dec. 12.—To Hong Kong: Mr. Jerdein, Mr. and Mrs. R. C. Lambert, Mr. E. Behre, Mr. Reginald Smith, Mr. W. D. Paterson, Mr. and Mrs. S. E. Burrows, jun., Mr. Menzies, Mr. A. A. Hayes, jun. To Shanghai: Mr. W. Pardun, Mr. Innes, Mr. A. Downie. To Ceylon: Mr. L. P. Thomas.

Per P. and O. steamer Nyanza, from Southampton, Dec. 20.—To Shanghai: Mr. and Mrs. J. H. Evans and infant. To Hong Kong: Major Peebles. To Ceylon: Mr. Macan, Lieut. B. S. and Mrs. du Jardin, and Miss Hugo, Mr. Harper. From Marseilles, Dec. 28.—To Hong Kong: Mrs. Hunter, two Misses Hunter, Miss Hutton.

From Suez, Jan. 19.—To Hong Kong: Sir Richard and Lady MacDonnell.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

(FROM A CORRESPONDENT.)

Our political news is of a very meagre nature, but although there is at present a lack of stirring intelligence, the horizon is not altogether cloudless. Many and frequent are the enquiries made regarding the Tycoon, whose movements and doings are veiled in mystery; according to Japanese accounts (which, by the way, are not always reliable) he is still at Kioto, the guest of the Mikado. The expedition against Chosiu appears to have miscarried entirely, a rather formidable host of supporters having appeared at the back of the refractory Daimio, who were quite ready to come to the front if the integrity of that Prince's territory were endangered. The Mikado is said to have acted the part of mediator between the Tycoon and Chosiu, and should this be true, the quarrel, after a few preliminary *harukiris*, or official rippings-up, will probably be amicably adjusted. This will doubtless be a great disappointment to those who have always accepted the Tycoon, and who would see no wrong in him, nor any extenuation for the conduct of the Daimio; but to an impartial observer, who looks ever so little below the surface of things, there has been nothing in the course lately pursued by the Tycoon calculated either to claim respect or excite sympathy. Whether Prince Nagato was or was not acting in accordance with instructions from the Mikado or the Tycoon is a point which perhaps will ever remain doubtful—a case in fact of hard swearing between Tycoon and Prince; but it is difficult to believe that the latter would have taken the initiative without some substantial promise or prospect of support. But let us glance at the course pursued by the Tycoon's Government subsequent to Chosiu's aggressive acts. Were any active measures taken against the Prince to prevent a repetition of them? Was he declared a rebel? Nothing of the sort. Protestations and promises of redress came from Yedo, but nothing more. Then followed the combined and successful attack on Simonoseki, which taught such a startling lesson to the whole of Japan. The Government, although in some measure prepared for an adverse result, were terrified at the severity of the blow struck, and fearing the charge of being implicated with Nagato, took immediate measures to set themselves right with foreigners at his expense. The Prince's residences at Yedo and Nagasaki were razed to the ground, his territory declared confiscated, and a large army commanded by the Tycoon in person marched from Yedo, for the ostensible purpose of reducing the rebel Daimio to submission.

It would appear from native reports that the Tycoon has already essayed to return to Yedo, but that while staying at the residence of a Prince he again so narrowly escaped a trap laid for his assassination, that he deemed it expedient to return for a time to Miako. Possibly, however, there may be better reasons for prolonging his visit at the Spiritual Court; Yedo is henceforth to be not only nominally but actually the residence of foreign ministers, and Sir Harry Parkes has given an earnest of his intentions by demanding a concession for the British Legation, and has very wisely selected a spot which possesses the double advantage of having a water frontage and affording no umbrageous hiding-places for Ronins. Sir Harry is, moreover, evidently determined not to let the matter rest for an instant until his intentions are fully carried out; the ground has already been measured and the preliminaries of the contract arranged.

The British community have certainly cause for congratulation on the choice of a minister made by our Government, and Sir Harry's qualifications, both diplomatic and social, are likely

Digitized by Google

to meet with full appreciation. His Excellency is not likely to confine his movements to the immediate limits of the Treaty ports, but will probably take full advantage of that clause in our treaty which very properly gives the British. representative a right to travel through any part of the Empire, Sir Harry is not only anxious to see Japan for himself, but is willing to forward the wishes of his fellow countrymen in this respect also. Until his arrival it was a most difficult matter for any member of the British Community to get permission to visit Yedo. As the guest of a foreign representative he might be fortunate enough to obtain leave from the Minister, but otherwise his application was nearly always refused although members of other nationalities were not under the same ban, and could go as frequently as they chose to apply, provided they were decent and respectable people. Since Sir Harry Parkes' arrival numerous British residents in Yokohama who, not happening to have official friends at Yedo, have been debarred from the privilege of visiting that city, have at length had their wishes gratified. Hitherto we have done our best to assist the Japanese in maintaining the exclusiveness they seek after, but the opposite course will, I think, be found more politic in the end. The American Minister has continued to reside at Yedo ever since his arrival, and without being inconvenienced by any unpleasant demonstration, although no guard has protected his residence. The Consul-general of Holland also is a frequent visitor there, and is endeavouring to overcome the prejudices of the natives by the introduction of a carriage and pair on the Tokaido. By this road Yedo is within a convenient distance for driving; and its straight course, uniform width, and level character, bring it into not unfavourable comparison with the high roads leading to our own metropolis. I am by no means sure that the Japanese Government find reason to congratulate themselves on the change of Ministers. Much as the Gorogio may have disapproved of Sir Rutherford Alcock, they would probably, if they had their choice now, prefer a continuation of his *regime*. Sir Harry's reputation has preceded him here as one who can "read off" a diplomatic Mandarin like a book, and could even fathom the recesses of the Imperial mind itself—a faculty quite sufficient to be alarming to Japanese diplomatists. Without for one moment drawing unfavourable comparisons, there is no denying that Sir Harry Parkes is eminently qualified for his present post.

The Japanese are loth to give up their traditions; they still cling with fondness to the Japan of old, and will not persuade themselves that the foreigner is a permanent institution. And the Government is evidently disinclined to believe in the necessity of Yokohama being permanently garrisoned by British troops, for they made a proposition the other day to the effect that "As the two countries (England and Japan) had now a perfectly good understanding with one another, there was surely no longer any need for detaining such fine troops as the 20th in that distant corner of the earth." I am not aware that any official reply has been vouchsafed to this gentle hint, but if so I fear it was not quite satisfactory to the recipients. Yokohama has proved such an excellent sanitarium for the troops that it is not very surprising if some reluctance is felt in withdrawing from the station.

The *Adventure* has brought from Hong Kong a portion of the 11th Regiment with some fifty women (wives of men in the 20th) and seventy children. Why these poor women should have been kept away from their husbands for a year, when within a few days' sail of them, exposed to the risks attending the enervating climate of Hong Kong and all the evils which beset women under such circumstances, is one of those curious problems that can only be solved by official intelligence.

It was quite a melancholy sight to see the 150 men of the 11th landing at the jetty. They were supposed to represent the effective portion of the battalion; it must have been a grim joke to call them so, for in sober truth there were not six sound men amongst them. If these men were the only ones fit for duty, what could be the state of the remainder? It must be bad indeed, for 300 had been ordered home immediately. This, then, represented the strength of the 2nd battalion—the 150 worn pallid creatures, who could scarcely totter up the steps from the landing place. Though the band of the 20th came down to welcome their comrades to Japan, their cheery strains produced but little visible effect on the fever-stricken forms before them. Few of the men could ascend the steps without assistance, and many had to be carried on shore and put in the ranks like log figures.

NAGASAKI.

From a letter we learn that the vessel reported to have been wrecked off the north end of Cape Gotto was the Dutch barque *W. Kemptner*. Out of the entire crew only one was saved. The crew consisted almost exclusively of married men, whose wives and families are thus deprived of their natural protectors. The Dutch consul, Mr. Bauduin, has, with the most praiseworthy energy, set on foot a subscription in behalf of those left destitute by this sad calamity, and already a very considerable amount has been subscribed.

On the evening of the 16th Oct., in the foreign settlement, three officers from H.M.S. *Rattler* were fiercely menaced by a Japanese, supposed to be a retainer of the Prince of Satzuma, armed with a rifle, which he subsequently fired at one of the party. The officers, being unarmed, were to a certain extent in his power, and made no attempt at resistance. Fortunately, however, Mr. French, an American resident, arrived on the scene of action, and fired at the native twice with his revolver. Both shots took effect, and there is little chance of the man's recovery. An official inquiry into the matter was to have been instituted at both the English and American Consulates at the date of our advices.

HAKODADI.

On the 30th of Sept. the brig *William Cundall*, Captain Semple, arrived from Nagasaki, with fourteen persons belonging to the Russian barque *Hamilla Mitchell*, Captain Barfred, who were picked up in an open boat at the northern extremity of the Corea Strait. The *Hamilla Mitchell*—originally a British vessel of 520 tons register—was *en route* from Nicolaievsk, Amoor River, to Chefoo, and about the 8th Sept. ran ashore on the Corean coast in foggy and rainy weather, where she became a total wreck. All hands got ashore and remained there for some days, until they were ordered off by the people, a sampan, some rice, water, &c., being provided for them. They took also the ship's long-boat, with baggage and provisions. Heavy weather coming on most of them were obliged to get into the long-boat, leaving three men in the sampan, which has not since been heard of. The captain's wife was delivered of a child in the open boat. They were discovered at sea and picked up by the brig on the 18th. The sampan, with their baggage, having gone astray, they were in a destitute condition.

SHIPPING.—ARRIVALS.—6th Oct., H.M.'s ship Princess Royal, and Jacobus Martenus.

DEPARTURES.—Tae-chang for Tientsin, La Vierge for Shanghai, Elizabeth for Yokohama, Caton and Kaffir Chief for Shanghai.

IN PORT.—Fusiyama, William Cundal, Jeanne et Joseph, Omer et Juliet, Jacobus Martenus, and Gilyak.

There is no freight offering, and trade is generally dull. Some silkworm contracts are likely to fail. A good many cards of eggs have, however, already been shipped.

CHINA.

TIENTSIN.

We have received the following communication regarding the trade of Tientsin, from Messrs. Platt and Co., of that port:—

Tientsin is situated on the Peiho, about 30 miles by land and 70 miles by water from the Taku Forts (which are placed at the entrance of the river), and 100 miles from Peking, the capital of China. The Grand Canal, which joins the Peiho at Tientsin, goes west about 50 miles, then south, joining the Hoang-Ho, or Yellow River, after which it continues its course until it reaches the Yang-tze, opposite Chinkiang, thus opening an inland water communication with Shanghai of upwards of 1,000 miles in extent, together with the navigation of the Yellow River, which extends an immense distance into the interior to the west. The trade of this port is large, as will be seen from the perusal of the list of imports, and is conducted by foreign as well as native merchants, and has hitherto derived its supply from the surplus stock of Shanghai and Hong Kong. Native merchants from the province of Shansee do the major part of the business of the west and north-west of China. Goods from this port find their way in many instances into Upper Thibet, on the borders of India, from which place and Mongolia they get camel's hair and wool in return. Large fairs, such as those of Leipsic and Novgorod, are held at stated periods, and draw their supplies from this port.

Exports consist principally of medicines for Chinese use, together with wool, camel's hair, and cotton. All merchandise sold here is paid for either in sycee or gold bars, the premium upon the former being about 5 per cent. over Shanghai in favour of Tientsin.

Steamers run from Shanghai in about four days direct to the foreign settlement (in the suburbs of the city) during the season, which is from the early part of March until about the 10th of December, after which the navigation is frozen up, and all business closed, except small parcels for local consumption.

SHANGHAI.

Dates are to the 21st October. The mails of 26th August arrived out on the 14th October. The following items are from the *North China Herald*.

During the past week the weather has continued dry but cool and bracing, and sickness has almost disappeared from the settlements. Our European dates extend to the 13th ult., the English mail of August 26 having arrived this morning, per P. and O. Co.'s steamer *Singapore*. The French mail steamer *Labourdonnais* arrived on the 9th inst., with telegrams to September 2nd, but her news had been anticipated some forty-four hours by the *Suwonada*. On the 12th the *Oriflamme* arrived with dates to the 9th ult.

Within Shanghai public attention has been concentrated on the issue of a misunderstanding between the French Consul-General and the Municipal Council of the "French Concession." We abstain from all comment on the subject as the facts will be found fully detailed in the documents reprinted in another column. Our readers will, of course, form their own conclusions, but, whichever side is believed to be in the right, all must deplore the present quarrel. Yet of this evil good will, we doubt not, spring, inasmuch as the status of the Council and the French settlement must now be, once for all, definitely settled. Full details with regard to Burgevine will be found in the *Daily News* of the 9th Oct. His coffin has been brought to Shanghai and opened, and the evidence goes to prove the genuineness of the corpse. There is little or no reason to believe that his fate and that of his companions was other than the result of unforeseen accident. Rumours have prevailed for the last few days to the effect that the Siamese ship *Shooting Star*, which left this port on the 9th inst., and the British steamer *Waratah*, which left on the 27th ultimo, had been taken or attacked by pirates. Anxiety as to the fate of the latter vessel has happily been set at rest, but the evidence which has been laid before us appears to afford a strong corroboration of the worst fears with regard to the *Shooting Star*. On the 9th inst. the North-China Branch of the Royal Asiatic Society held its regular monthly meeting, when an interesting paper bearing on the information with regard to Western nations gleaned by the Japanese from foreign authorities, and a valuable sketch of the Fauna of Formosa, were read and discussed. The monthly meeting of the Municipal Council was held on the 10th inst., the reports submitted to which have been published. From the South we learn that the embargo on rice has been removed by the Siamese Government, the removal to take effect from August 22nd.

From Hankow we hear that a destructive fire occurred there during the night of the 7th. No foreign property was injured. Two men, named Stevens and Gerard, have been arrested on suspicion of having murdered one Macdonald, keeper of a low tavern. Their trial was proceeding at the date of our latest advices.

From Chefoo we have received an account of the damage caused by the recent torrents of rain. At the city of Tungchow several portions of the wall were washed away, and at one spot 165 yards of solid masonry slipped from its position, and fell on a row of houses, of course burying them.

Our Hakodadi correspondent reports severe gales on that coast, which have resulted in the loss of an enormous number of junks.

A correspondent writes:—"The whole of the Che-kiang Province is in ruins. Soochow and Hangchow are a mass of rubbish; it is only at the gates that the Chinese have commenced to build. Splendid granite bridges have everywhere been demolished. Colonel Sykes ought to be transported to this neighbourhood for a few months, prior to commencing his new Parliamentary career; he could then understand the real state of the case."

The coffin containing Takee's body was carried in state through the foreign settlements. The procession was headed by the police band, assisted by a number of native musicians on horseback, who brayed in the most discordant manner. The coffin was subsequently conveyed on board the *Kiangse*, by which vessel it will be sent to Ningpo. Our readers are doubtless aware that Takee was the head of the Ningpo guild in Shanghai.

A meeting of the Municipal Council was held on the 10th Oct., at which it was decided, amongst other matters, to instruct Mr. Myburgh to take immediate action in the Supreme Court against the trustees of the estate of the late Charles Wills, the said estate being indebted to the municipality at this date in the sum of 2,851.27 tls., while probably no property in Shanghai has more largely benefited by municipal control.

One thousand taels standing in the Municipal books since April, 1862, as due by J. P. Tate, Esq., and alluded to by your committee in their report of the 7th July last, as unaccounted for by Mr. Pickwood, and again by a letter of Mr. Chaloner Alabaster, published with the Council minutes of the 7th of August last, your committee determined, if possible, to discover this sum, and have traced it up through every available record. The result has been that your committee find no just reason why the late Council placed this sum as due by Mr. Tate, it appearing that the Municipal Council compradore received the amount from the Chinese Defence Committee in two bankers' orders of 500 taels each; that he cashed the same, and placed the money to his own account, and that the money was, therefore, never in the hands of Mr. Tate, the treasurer of the Council, or of Mr. Pickwoad, the secretary. The compradore is dead, and so is his security, and your committee would suggest, therefore, that this disputed sum of 1,000 taels be written off the books of the Council. Your committee would remark that such a loss could not have arisen had the books of the Municipality in 1862 been kept in an intelligible manner, or on such a system as now.

The *North China Herald* of 21st Octber gives a detailed account of the case Regina v. E. A. Reynolds and A. Holtz, tried before Sir E. Hornby at the Supreme Court, Shanghai. Counsel for the prosecution Mr. Myburgh, and Mr. Robinson for the defence. The charges against the defendants were, that

Digitized by Google

they were causing the diversion of the accustomed channel of the river Wangpoo, and otherwise interfering with it, to the impediment and damage of the free navigation of the river and against the rights and interests of the Emperor of China. In correspondence between themselves and H.B.M. Consul, they admitted having imbedded casks in the mud on the river bank and had bunded in the frontage of the river, and that the jetty in course of construction was their work. But they claimed to have a right to place and erect these obstructions.

The case of the defendants appeared to be, that as the owners of twenty mow of land which by title-deed was stated to be bounded on one side by the river, they have become entitled to the land formed between their property and the river by natural deposit and otherwise, and amounting to about 75 mow. The defendants denied that the law of China gave rights to the Crown co-extensive with that given by English law. The question of right involved the consideration of the *lex loci rei citæ*, which would give a landholder no more than the quantity of land in the title-deed, and, in the case of land situated on the water-side, to give to the Emperor of China all alluvial deposit, however formed, and all land between high and low water marks. The Taotai, in a letter on the subject to H.B.M. Consul, states, having received a despatch from H.B.M. Consul, saying that Messrs. Dent and Co. had inquired whether or not foreign merchants who had rented ground on the Putung side, if afterwards other ground rises up, can take in such land and use it as part of their ground rented; and if such can be done, what are the limits of measurement. They request the Consul to inquire into this. The Consul, in reply, has stated that he has examined into the case, and finds that no despatch has been received from the Taotai, and he has, therefore, no grounds to decide upon. The Consul then requests an examination of the case and a reply. On receipt of this the Taotai wrote, "I have not received any despatch from the Consul about this application from Messrs. Dent and Co. But formerly in reference to encroachments injurious to the river made by Reynolds, of the Fuh-lee hong, I have received orders from the Tsung-li yamen to the effect that they have communicated with the British Minister, and that he has issued orders to the former Consul, Markham, strictly prohibiting the above. Now, if the land mentioned by Messrs. Dent and Co. is the same as that referred to by the Tsung-li board, it should be treated in accordance with the prohibition. If it is another piece of land, we should wait till the officers deputed have examined and decided as to whether it has had any bad effect upon the course of the river, and we shall act accordingly. At the same time, I deputed the Shanghai magistrate and the Wei-yuan Chen to examine and report, and I inform you that I have done so. Now, according to the report of the Shanghai magistrate Wang and the Wei-yuan Chen, they went, on the 3rd day of the 7th moon, with Mr. Interpreter Carroll, and a person who was requested to come from Messrs. Dent and Co.'s to examine the ground. The person from Messrs. Dent and Co. having arrived on the spot, stated that Messrs. Dent and Co. had no land at Putung, and had not requested a commission to extend their limits. They then asked these two Chinese how it was that this did not agree with the Consul's first statement, to the effect that Messrs. Dent and Co.'s application was produced by damage to the river caused by the land jutting out at Mr. Reynolds' property.

With reference to this, Wang, magistrate of Shanghai, said: I am acquainted with the laws of China. According to those laws, land bought or rented is specified as to extent in the title-deeds, and cannot be added to. If any increase be made it belongs to the Crown. It is punishable to deposit anything in a river between high and low water marks.

Mr. Hockley, R.N., Harbour-Master, in being examined stated:—The point is not now in the same state as when I assumed office. It has been increased by the placing of barrels in the vicinity of the point. Those barrels were placed by Mr. Reynolds. When first placed on an average they were 50 feet from low water mark, and 80 feet from high water mark, ordinary tides. They were at first put on the top of the mud, and stones put in them to keep them in position. The placing of these tubs tended to increase the deposit, by the tidal stream being checked, and the water being thus prevented from going over the smooth surface of the bank where it would have left a natural deposit on the top. The tubs caused a deposit to fall outside. The continuance of these tubs increased the point 154 feet in one year. Other witnesses were called and gave lengthened statements.

Sir E. Hornby, in giving judgment at great length, stated it was clear the defendants have failed in their attempt to justify their acts. It is clear that the land on which the mole is built is not their land. It is equally clear that the mole itself is what the law considers an obstruction, in other words, a nuisance. He was not, however, disposed to do more in the present case than order a verdict to be entered against them, and to restrain them from continuing their works, leaving them to apply for permission to the civil authorities, through the Consul, to rear such a jetty as the authorities may think will not be productive of inconvenience, either present or future, to the navigation of the river. The local authorities will, doubtless, be satisfied with this, and will be inclined to meet the defendants half way, to allow them to continue from a point to be fixed on the present mole, the erection of an open-work jetty—the defendants paying an increased rent to the Government for every mow they claim to retain beyond the quantity originally purchased by them. The verdict of the court will therefore be against the defendants—the question of the removal of the mole to remain in suspense, to see if any arrangement can be made with the local authorities, the works to be stopped until the permission of the Taotai be obtained to continue them; and the costs of this summons to be paid by the defendants.

CHIN-KIANG.

On the 23rd August a meeting of the supporters of the Chinese Hospital at Chin-kiang was held, and numerously attended. The report, which has been circulated amongst the foreign community here, shows a very satisfactory state of things, and proves that Dr. Gentle has spared no pains to extend his sphere of usefulness amongst the Chinese. The dispensary was opened in April 1864, when the only place available was the junk in which Dr. Gentle at the time resided. Within a few months, however, the sum of $221 was subscribed, and a more suitable consulting room opened on shore. Besides the contributions of the foreign residents, a fee of fifty cash is taken from patients able to pay it, and from this apparently trifling source $259.70 was collected during the year. The funds, therefore, now show a balance in favour of the dispensary of $111.70, the expenditure for the year, exclusive of the first cost of building, amounting to no more than $157. Yet with this slight outlay 4,264 patients were treated, of whom 790 were too poor to pay anything. We have hitherto learned, from Chinese hospital reports, that the majority of cases submitted to treatment are surgical. Chin-kiang, however, offers an exception to this rule, as the surgical cases bear but a small ratio to the entire number brought under treatment. Patients suffering from skin diseases have frequently sought aid, and no less than between thirty and forty cases of leprosy were treated. Sixty-seven operations, all of considerable importance, were performed, and the relief thus obtained, together with the satisfactory results of minor operations on the eye, have tended to gain the implicit confidence of the natives. Opium-smokers have also claimed assistance, at least ten of whom, out of a gross number of about 140, were cured of the habit. Lastly, the patients frequenting the hospital and dispensary have been brought as far as possible under religious instruction; but the short time which each sufferer remains under treatment would appear to have prevented the manifestation of any good results. The London Mission are about to appoint a catechist at Chin-kiang, whose services will be made available for the dispensary, and through him the truths of religion will be brought prominently before the patients during their stay.

FOOCHOW.

Messrs. Fussell and Co.'s Circular of October 24 reports the following vessels cleared with tea for London:—Merse, 877,700 lbs.; Canaan, 1,085,100 lbs.; St. Dunstan, 547,000 lbs. For Falmouth, for orders: Asia, 381,890 lbs.; Florentine, 352,130 lbs.; Bertha, 127,700 lbs. For United States: Jeannie, 525,600 lbs. Loading: Banian (full), Carractacus, Alexandrina, Lord Macaulay (full), Esperanza (full).

On the tea market they state:—Our last report was dated 9th October, since when a large amount of business has been transacted.

Congous.—In the early part of the interval which has elapsed there were but few buyers, and with increased stocks rates for medium kinds further declined one tael, but immediately on the arrival of the mail of 26th of August, with improved accounts of the English and Australian markets, several eager buyers entered the market, and a large business has resulted, settlements amounting for the fortnight to about 44,800 chests; owing, however, to continued large receipts from the country, rates have not advanced, the market closing firmly at our last quotations.

Souchong.—We have no change to notice in these kinds, the stock of which is much reduced.

Digitized by Google

OOLONG.—Paucity of supplies has prevented an extended business, and the few settlements made have been at full rates.

SCENTED TEAS have been in more demand, and latest settlements show an advance of 1 to 2 taels per picul.

FLOWERY PEKOES have been in request for India at about previous quotations.

AMOY.

Advices from Amoy are to the 12th Oct. They speak of a slight visitation of cholera and dysentery, several fatal cases having occurred of both diseases. The death of Mr. Freeman had caused considerable regret, from the general esteem with which that gentleman was regarded by the residents. Flags were half-mast, and other signs served to show the sorrow felt at the loss sustained by the removal of a respected resident. The *China Mail* says: —

The subject, however, which engrossed, and will doubtless continue to engross, the largest share of attention at Amoy—and there need be little wonder if it does—is the growing hardihood and daring exploits of the pirates in the neighbouring waters. So effectually are those sea-robbers establishing a reign of terror over the legitimate commerce of the coast, that the residents at that port are becoming really alarmed. Unfortunately, this anxiety does not appear to have a corresponding effect upon our Consular authorities there. In the absence of such official interest, a meeting had been held of the principal merchants in the settlement, to take into serious consideration what steps should be taken under the present threatening aspects of affairs; and a deputation, we understand, waited on H.B.M.'s Consul to request him to take some action in the matter. What particular line that action may take is not easy to guess at. It is, however, plain enough that no steps have been as yet taken by the senior naval officer, the official whose action would probably be the most effective.

As we have already hinted, it is difficult to arrive at conclusions regarding the action, if any, likely to be taken at the present juncture. It is as plain as noonday, to all who wish to see, that piracy is outgrowing us, outwitting us, undermining the security of our trade, and, if unchecked, may seriously embarrass our commercial as well as our political relations with this Empire. It is sufficiently clear also that it is incumbent upon every nation, worthy the status of a nation with treaty relations, to clear its coasts, creeks, and harbours, and keep them clear, of its own robbers. This admitted, it may be seen at a glance that a government which is unable or unwilling to do this for itself must either pay for such duty being done by others, or forfeit the rights secured by treaty with the other governments concerned. A line of action embracing these principles is said to have been whispered in official circles; and we simply await the issue of said whisperings, in the hope that it may be fraught with better hopes and livelier results than have hitherto been forthcoming.

HONG KONG.

Dates are up to the morning of the 28th Oct., owing to the non-arrival of the steamer from Shanghai. We take the following items from the *Evening Mail*:—

His Excellency the Governor of Macao has at length wakened up to a sense of the iniquity of the coolie trade, which has so long been carried on without hindrance or restraint in the Holy City itself and on the neighbouring islands. He has instituted an inquiry into the whole of the circumstances attendant on this infamous traffic, and has expressed a resolution to put an end to it for ever. We have been informed that this action on his part is mainly attributable to some very excellent articles that have appeared in the columns of our contemporary, the *Echo do Povo*. We cannot but think, however, that our repeated denunciations have not been without their effect.

The following report of the *Suwondna's* passage from Shanghai will serve to show that the predictions regarding her swiftness were tolerably correct. The American steamer *Suwonada*, Captain Jayne, left her mooring off the Shanghae dock at 5 A.M., on the morning of the 12th, passed Woosung at 6 A.M., Light Ship at 8.20 A.M., discharged pilot at 8.50 A.M., passed the Tai-chow Islands at 10 P.M., and arrived in this harbour at 11.45 P.M., on Sunday, the 14th, having made the passage in 66¾ hours.

The returns for September of the several banks are thus stated in the *Gazette*:—

Chartered Mercantile Bank	$667.361
Shanghai Banking Company	648,538
Oriental Bank Corporation	605,718
Chartered Bank of India	446,546
Agra and Masterman's Bank	329,140¼

We are glad to say that, in the article of bread, we are now fairly out of Chinese hands. The Wanchi Bakery is one of the most convenient establishments we can point to in the colony; and, as we presume that every European here availed himself of its advantages, we need not point them out. It deserves every success, and appears to be generally supported.

The British steamer *Shaftesbury*, from Yokohama bound to Suez, arrived on 24th Oct., having left on the 14th. She is the first vessel despatched to try the expediency of a direct line of communication between Japan and Suez, and has only called at this port to coal.

We have been kindly furnished with the following minutes of the meeting of the subscribers and donors to the City Hall, held to inspect the designs sent in for the new building:—

A numerously attended meeting of subscribers and donors to the City Hall Fund was held at the club, for the purpose of inspecting the designs for the new building, and appointing a committee to award the premium. Amongst those present were observed—Messrs. Baldwin, Bapoorjee, Bosman, Davidson, R. Deacon, H. B. Gibb, Hazeland, A. Heard, Kaiser, Kaye, Kresser, Kingsmill, Lapraik, W. Lemann, Maclean, McDouall, A. M. Moore, Nissen, Palanjee Framjee, Pollard, Rowett, Rennie, Ryrie, Rodger, G. Sharp, F. T. Smith, Storey, Studd, Turing, Vaucher, and others.

The Honourable W. H. Rennie having been requested to take the chair, stated the objects for which the meeting had been called, and said that, preparatory to proceeding to the election of the Committee of Selection, he thought it well to inform the meeting that the funds were in as satisfactory a state as could be expected; for, after deducting all liability to the Government for the cost of removal of harbour-master's department and construction of the new building, the committee, taking into account, not only the actual cash in their hands, but also the funds considered available from other sources, estimated there would be about $91,000 to apply to the construction of the City Hall, being about the amount stated in the advertisement for plans.

Mr. Pollard then proposed that the committee of selection should consist of the present committee, viz.:—Messrs. McDouall, Pollard, Rennie, Ryrie, Turing, and Wilson, with the addition of Colonel Lovell, Messrs. Whittall, Heard, Palanjee Framjee, Gibb, and Nissen.

Mr. Ryrie seconded the proposition, and it was carried unanimously.

It was then proposed by Mr. Hazeland, and seconded by Mr. Bosman, that Messrs. McDouall and Ryrie be appointed trustees of City Hall funds, in room of the late Mr. Owen and the late Mr. Noble—carried unanimously.

The Chairman then stated that the objects of the meeting had been accomplished, but before separating he would wish to state that the new harbour-master's office was progressing rapidly, and would be ready for occupation about January or February. The site would then be clear for laying the foundations of the City Hall, and the building would be at once commenced. However, another meeting would be called after the premium had been awarded, and the design intended to be carried out decided on.

In reply to Mr. G. Sharp, the Chairman said that the possibility of the extension of the praya in front of the City Hall site had been duly considered by the committee, but it appeared that if the commencement of the City Hall were to be delayed until that question was finally settled, the project might be considered as indefinitely postponed.

A vote of thanks to the chairman having been carried, the meeting separated. (Signed) W. H. RENNIE, Chairman.

A correspondent of the *Mail* calls attention to the frauds practised by importers of goods at an auction:—There were sold, two pianofortes, blazoned forth, in advertisement and catalogue, as Collard and Collard's, made expressly for this climate. They had Collard and Collard over the key boards, and would easily have imposed upon the uninitiated; but any person the least conversant with pianofortes would at once have discovered the imposition. The owner of the two instruments knew they had never been in England, much less in Collard and Collard's factory, he knew well enough that they came from Hamburg.

The Hong Kong, Canton, and Macao Steamboat Company (Limited) have issued the following notice:—

"The company has been registered, with limited liability, under 'The Companies' Ordinance, 1865.' Six hundred and seventy thousand dollars of the capital of the company have been allotted by the directors in the first issue of shares. The second issue will consist of the remainimg eight hundred shares of the capital, and further applications will be received for them until the 31st of October, on which day the share list will be closed. The articles of association can be seen at the office of the undersigned.

"AUGUSTINE HEARD and Co., General Agents."

The following circular has been issued by Mr. Lechler, agent of the Evangelical Missionary Society of Basel, in Switzerland:—

"The Evangelical Missionary Society of Basel in Switzerland sent its first agents to China in the year 1847. Their instruction was to the effect that they should not settle down in any of the open ports, but try to get a footing in the country, and endeavour to gather a congregation, which being effected, permanent stations should then be established. There are now three stations in connection with the Basel Mission. Hong Kong, Lilong, about fifty miles north of this, and Chonglok, more than 200 miles distant, in the north-east of this province. The number of communicants at the different stations is—fifty in Hong Kong, sixty in Lilong, and eighty in Chonglok. The number of missionaries having been in-

Digitized by Google

creased in course of time, there have been six at the three stations at the beginning of this year, and though the number has been reduced for a short time, there will be six again at the close of the year.

"The branches of instruction given in the school are, reading and writing the Chinese character as well as the Roman alphabet (but no English), religion, singing, geography, and arithmetic. Female work in all its branches forms the occupation of the afternoon hours, and the general endeavour is to give the pupils of this school such an education as will fit them, in their usual sphere of life, to conduct themselves as Christians and to exemplify the Christian religion in family life. Twenty-four of the girls are boarders in the house. The expense is partly borne by the parents or relations of the girls. The missionaries have never failed to impress their converts with the duty of taking their own share of the expenses incurred for their benefit. Thus there is a chapel in Saukiwan, an outstation of Hong Kong, which has been built chiefly by the Chinese themselves, the mission having contributed only one hundred dollars towards its erection. At Lilong the Christians volunteered their labour, without receiving payment, to the building of a chapel and school some twelve years ago, so that the moderate sum of three hundred and fifty dollars from the mission fund was sufficient to defray the expenses of that edifice. At Chonglok the Christians bought a large three storied house, which was formerly owned by a wealthy family; that family having by some misfortune been reduced to poverty. The fortune-tellers contended that the unlucky situation of the house was the reason of the misfortune, and consequently no one would buy it. The Christians subscribed among themselves forty dollars, and purchased the house, which now serves as a residence for the missionaries, and is, besides, spacious enough to accommodate the congregation when assembling for worship.

"Here in Hong Kong the mission is a great deal more limited in space, and it has been with great difficulty and inconvenience that all the girls could be accommodated in the precincts of the Basel Mission House. An enlargement of the premises is most urgently required. Thanks to the liberality of the Local Government, the piece of ground on which the Mission-house stands is a free grant. The adjoining land is being built upon with Chinese houses. The too close neighbourhood of such would be a serious nuisance, and a great obstacle to the school. The portion of ground adjoining is obtainable, measuring forty feet by one hundred and fifty, for which the price of 1,800 dollars is asked, requiring about 200 dollars for levelling. The intention of the missionaries is to purchase this piece, and to build a school on it, which would cost an additional 2,000 dollars. The board at home not being in a position to supply the necessary funds, the missionaries venture to apply to this community to assist them in raising the 4,000 dollars required, and trust that they will not meet with a refusal. Our missionaries in India receive the fifth part of their expenditure from friends on the spot. Should we doubt that there are not as warm and sympathising friends of the mission here in China? We are confident that such is the case, and that this our appeal will meet with a cordial response."

The following article on steam versus sailing vessels is from the *Daily Press*:—

It appears to us that the days of sailing vessels on the coasts of China and Japan are almost numbered. Steam has made such rapid progress in this part of the world, that its results have rather tended to take the natives by storm than to effect any alteration in the organisation of society. Steam has, however, become a fixed, a settled institution, which has obtained a permanent footing, and which is being more and more appreciated daily. It may appear strange that with the increased facilities and communication which steam has afforded, that the Mandarins should have allowed matters to fall into their present sad state; but the progress of steam in China must not be judged of by this result. The real question at issue is, in what state would the Empire have been but for the introduction of steam?

It is not twenty years yet since steam was first introduced into commerce in China. Steamers ran for some years on the Canton river before the Chinese would avail of them. In fact, it was not until 1854, when the rebels pressed hard on Canton, that the Chinese really commenced to travel in steamers. This they did from compulsion, not from choice; for if the refugees from Canton had attempted to travel in native boats, the rebels would have captured them. This circumstance may appear incredible, but it is nevertheless true; and the fact affords scope for reflection as displaying the Chinese character in a remarkable light. For years, we say, they preferred their own slow, uncomfortable, unsafe craft to the rapidity and superior accommodation of steamers. But having resorted to steamers from compulsion, they so far appreciate the advantages to be derived from travelling in them, that they adopt them permanently, after the necessity for employing them has ceased.

Thus it came to pass that steam drove lorchas, schooners, and fast boats entirely off the Canton river, and simultaneously with this achievement square rigged vessels pressed the native junks out of employment on the coast trade. But steam could not rest satisfied with this advantage, and appeared to allow sailing vessels on the coast to be its pioneers in breaking through the Chinese prejudice against innovation. In a short time the whole coast was crowded with foreign vessels, and the occupation of the lumbering native junk was gone.

The next step in advance on the part of steam was to embrace the Southern ports of Swatow, Amoy, and Foochow. The advantage of steam over canvas was made so manifest in this attempt that the further struggle was merely a question of time; a sailing vessel would usually take from a week to ten days in reaching Swatow in the north-east monsoon, and about half the time in the south-west. A steamer can make the passage in from eighteen to twenty hours. To fetch Amoy or Foochow, a sailing vessel in the north-east monsoon has to go round Formosa, whilst a steamer makes a direct course and makes the passage in one fourth of the time. Six steamers now run regularly between Hong Kong and these ports, and as these take all the freight going, sailing vessels are completely run off the road.

As for the ports north of Foochow—say Shanghai and Ningpo—we make it out that the steamers running regularly between them and Hong Kong have the capacity to carry 12,000 tons dead weight. In brisk times these steamers can easily make three voyages in two months, so that the capacity available per month is 18,000 tons, or 300,000 piculs. As these figures represent fully the entire trade, it follows that sailing ships are driven out of it, because the formation of the China coast and the direction of the monsoons, with the calms prevailing, combine to give such an advantage to steamers that sailing ships cannot compete with them. If a steamer can be filled quickly a lower rate will pay her than will maintain a sailing vessel on this coast.

The carrying trade between Shanghai and Tientsin is nearly all in the hands of steamers, whilst the steamers running between Shanghai and Japan are more than sufficient to do all the work on that line.

Therefore we have laid it down that steam first drove canvas off the Canton river, and then off the coast as far as Foochow, then to Shanghai, whence it carried the day to Tientsin and Japan. There remain only then, for sailing vessels, as far as the coast of China is concerned, the Formosa and the Newchwang trades. The coast of Formosa is singularly defective in harbours, the anchorages being all shallow and dangerous. The port of Newchwang has a bar at its mouth, and has, besides, dangers in its river, which we fancy must make it anything but a good risk for underwriters. Consequently, both Formosa and Newchwang are peculiarly adapted for steam, to which these dangers apply in a far less degree; and we shall find in a short time that steam will carry them.

What is to become of the shipping interest in China we do not know. The Indian trade is claimed by steam, and except when large shipments of rice shall be made from Calcutta, will be carried by it. The carrying trades to the Atlantic and to Australia are available for canvas, and will continue to be so until steam shall make its next grand stride. The rice and coal trades remain—these, especially the former, are unsteady. A vessel cannot wait all the year for the chance of a rice charter, as upwards of two hundred appear to be waiting in these waters at present. Sailing vessels will gradually diminish in number from China, and when rice vessels are wanted the supply must be obtained from some channel not yet laid down. Probably, all the shipping from Australia to India may call here *en route* during the north-east monsoon; or the tea ships may make a rice voyage, as little tea is shipped in the rice season.

SIAM.

BANGKOK.

The ceremonies of the cremation of their Majesty's Royal half-sister, whose decease took place in August last, were celebrated at Wat Sakes on the 28th, 29th, and 30th of September. The usual Royal bounty was distributed.

His Majesty the second King is slowly recovering. His Majesty's eldest son, Prince Krom Mu'n Bowara Wichi Chan, who has been very ill, is improving.

The 61st birthday of his Majesty the Supreme King of Siam occurred on the 18th of October. The usual dinner to the Consuls of the Treaty Powers was given at the Royal Palace on that evening. His Majesty holds his age remarkably well. The congratulations of his Majesty's subjects and European and American friends on the return of another birthday was most cordial and sincere.

We have received files of the *Siam Times* up to the 28th September, from which we gather the following items:—

The semi-annual ceremony of drinking the water of allegiance occurred at the Royal Palace on the 18th September. According to former custom, the payment of the annual salaries commences immediately after. The amount paid to each Government officer is very small, but the number receiving it is so great that the amount paid out of the Royal Treasury is very large. The greatest sum paid to the highest officers of State is thirty catties, say £300, or about $1,440. It is their office with its perquisites, and not their salary, which enables them to maintain the honour and dignity of their position. The income of some officers is very large, and, if rightly appropriated, would enable them to live in great splendour. Others are obliged to eke out a miserable existence on the pittance received, without perquisites or anything else to support themselves or maintain their position. As the country improves it is hoped these inequalities and its evils will be remedied.

Gratifying reports continue to come in from the country of the encouraging prospects of the growing rice crops. The water in some places is already from a foot to a foot and a half higher than last year.

James M. Hood, Esq., U.S. Consul, had an audience with his Majesty the First King, on the 22nd September, to be presented with his Exequatur. The arrangements were very complete, and it was gratifying to see that everything was done on the part of his Majesty and the Court to make the interview pleasant.

Great difficulty is experienced in obtaining servants in Bankkok, owing to the almost raving propensity of the people to gamble. The hope of winning a large sum, or enough to procure their rice and curry without labour, keeps the numerous gambling-houses full, the people in idleness, the prisons crowded with criminals, and Europeans and others in want of servants at fair rates. Some definite understanding among foreigners on this subject would probably remedy a part of the evils connected with servants and their rate of wages.

STRAITS OF MALACCA.

SINGAPORE.

We have no files of papers or correspondence by this mail.

We have seen a copy of a memorandum, printed in Singapore for private circulation, containing an account of the conduct of M. Aubaret, late French Consul at Bangkok. Having already recorded the facts of the case, and commented on them in our issue of the 4th ult., it is unnecessary to recapitulate the circumstances here. We doubt, moreover, whether the King of Siam's well-wishers in Singapore have acted wisely in giving publicity to this memorandum. M. Aubaret, having left the country, and being very unlikely to be reinstated in his former position, it would have been better to let the matter sink into oblivion as speedily as possible. Much as we may deplore and condemn the misconduct of M. Aubaret, we think it unwise to take any steps likely to perpetuate the irritation naturally felt by the Siamese, and which, though aroused by insults on the part of this one person only, may militate against the maintenance of cordial and friendly intercourse with the representatives of foreign countries generally.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

CRAWFORD—On the 19th Oct., at 5, Pechili-terrace, Elgin-street, Hong Kong, Mrs. D. R. Crawford, of a son.

DA COSTA—On the 17th Oct., at Bangkok, Siam, the wife of J. M. F. Da Costa, Esq., of a son.

HARRIS—On the 18th Oct., at Hong Kong, the wife of Capt. A. D. Harris, steamer Armenian, of a daughter.

JENNES—On the 17th Oct., at Hong Kong, the wife of Colonel Jennes, 11th Regt., of a daughter, stillborn.

MOLLER—On the 30th Oct., at her father's house, Notting ham, the wife of Nils Moller, Esq., Shanghai, of a daughter.

THOMSETT—On the 15th Oct., at Hong Kong, the wife of Henry George Thomsett, R.N., of a daughter.

VOLKMANN—On the 23rd Oct., at Hong Kong, at her residence, 37 and 38, Praya, Mrs. L. Volkmann, of a daughter.

WRIGHT—On the 6th Oct., at Shanghai, China, the wife of James Hanson Wright, Esq., of a son.

DEATHS.

ANDREWS—On the 13th Oct., on board the transport ship Gresham, Thomas Andrews, Private 2nd Batt. 11th Regt, aged 25 years.

BALL—On the 12th Oct., at Macao, deeply regretted, Sophia Mary, the beloved wife of the Hon. Henry John Ball.

DE COUTO—On the 15th Oct., at Hong Kong, after a few hours' arrival, per Suwonada, Jose Maria de Couto, of Messrs. Olyphant and Co., Shanghai.

FEEEMAN—On the 11th Oct., at Amoy, J. R. Freeman, of H. D. Brown and Co., of chronic dysentery.

FURSDEN—On the 18th Oct., at Hong Kong, Lieut. Fursden, 2nd Batt., 9th Regt.

GRAY—On the 16th Oct., on board the barque Tae Wan, William C. Gray, second mate, aged 25 years.

JENCKES—On the 11th Oct., at Ningpo, Joseph S. Jenckes, of the Imperial Maritime Customs, Chinhae Station, a native of New Bedford, U.S.A.

NEILSON—On the 10th Oct., at sea, on board the P. and O. steamer Aden, from Shanghai to Hong Kong, Edward Noel Neilson, aged 25 years, of Messrs. Olyphant and Co.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 6d.	4s. 7d. to 4s. 8d.
At Shanghai (per Tael.)	6 ditto	6s. 3d.	6s. 3d. to 6s. 4d.
At Canton, At Hong Kong, At Macao	6 ditto		4s. 6d. to 4s. 7d.
At Singapore	6 ditto	4s. 6d.	
At Manila	6 ditto		

At Shanghai, Bills on India, Rs. 296 to 298 per 100 taels. At Hong Kong, Rs. 218 to 219 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 9⅛ per cent. prem. Mexican dollars at Shanghai, taels 73 per 100, and Exchange on Hong Kong, 26 to 27 discount. Hong Kong and Shanghai Bank, 6 per cent. prem.; Gas Company, £4 prem.; Hong Kong and Whampoa Docks, 40 per cent. prem., and Union Docks nominal at 1 premium.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London: Oct. 19, Juanpore. From Hamburg: Oct. 8, Elsabea.

At HONG KONG.—From New York: Oct. 17, Benefactress.

At SINGAPORE.—No report.

DEPARTURES.

From SHANGHAI.—For London: Oct. 21, Dartmouth.

From FOOCHOW.—For London: Merse, Canaan, St. Dunstan. For Falmouth: Asia, Bertha, Florentin (*via* Hong Kong). For United States: Jeannie.

From HONG KONG.—For London: Oct. 24, John Lidgett; 17th, Bengal. For Falmouth: 19th, Asia.

From SINGAPORE.—No report.

Freights at Foochow have advanced to £2.

COMMERCIAL and SHIPPING REPORTS are given more at length in our issues by the P. and O. Mail.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 6, at Deal, from China, Weymouth, Elizabeth Nicholson; 3, at Texel, from Batavia, Maria Catharina; 3, Gezusters, Australie; 7, at Deal, from China, Devana, Pegasus, Valdivia; from Ceylon Cresswell.

DEPARTURES.—Dec. 1, from Liverpool, for Manila, Alavesa; 5, for Anjer, Patrtot Queen.

Anjer, Patriot Queen.

SPOKEN.—Wm. Simpson, London to Batavia, Sept. 13, 36 S., 7 E.; Weymouth, Shanghai to London, Nov. 17, 25 N., 34 W.; Admiral Lyons, Liverpool to Hong Kong, 41 S., 47 E.; China, Hamburg to Hong Kong, Sept. 15, 39 S., 13 E.

MISCELLANEOUS.—At Mauritius: Oct. 23, from Singapore, Olympia, Gardyne; 24, from Batavia, India, Eckdahl; Nov. 4, from Singapore, Visir, Bregeon; 6, Ranger, Ovendon.

LONDON, THURSDAY, DEC 7, 1865.

THE CHINA TRADE IN 1864.

WE have now before us the official "Report on Trade at the Nine Treaty Ports during the Year 1864," published by order of the INSPECTOR-GENERAL of CUSTOMS. Having already given a *resume* of the most noticeable features contained in Mr. NOETZLI'S "Analysis of Chinese Commerce" during this and the preceding year, it is unnecessary to recapitulate any of the general statistics; we avail ourselves, however, of the opportunity to place on record some interesting facts not then touched upon. Almost the first thing that attracts attention is the unfavourable nature of the report from Canton. We have gradually become familiarised with the idea of an inevitable decrease in the amount of foreign trade at this port; and have come to admit, quite as a matter of course, that Canton will never be again what it was in the "old times." Yet, when the actual figures are placed before us in a tabular form, the extent of the falling off is quite startling. In Mr. GLOVER'S own words, "The value of foreign trade for last year was about two-"thirds of what it was in 1860, and the amount of duties "received is less than one-half of what it was five years ago." The two chief causes of this are stated to be, firstly, the opening of Hankow, to which port is now diverted a large proportion of the tea formerly shipped from Canton; and, secondly, the entire cessation of the cotton trade since the commencement of the American war. In former years the importation of raw cotton from India was carried on by Parsees and others to an enormous extent; and as the proceeds were returned to India in various descriptions of Chinese merchandise, two important branches of commerce have thus been entirely lost. Mr. MACPHERSON, Commissioner of Customs at Hankow, thus alludes to the direct influence exercised on trade at Canton by the opening of the former port:—"So long as Canton is de-"clining, the export trade of Hankow will doubtless advance; "but the advance is, I think, certain to cease, for a time at "least, when Canton has fallen as low as it will fall." We are inclined to believe that this stage has now almost been reached; that the tea shipments from Canton will not fall much below their present quantity; and that, inasmuch as the recent development of cotton cultivation in India will soon enable that country to resume the shipment of supplies to its old customers in the East, besides rendering the mother-country independent of the American market for this staple, the cotton trade at Canton may yet return to its normal condition, bringing with it other elements of renewed prosperity. It is worthy of remark that, notwithstanding the rapid growth of trade at Hankow, the return from that port for 1864 (its most prosperous year) is still considerably lower than that from Canton in 1860, the year before Hankow was opened.

THE RUSSO-AMERICAN TELEGRAPHIC LINE.

THE feasibility of establishing telegraphic communication between the opposite shores of the Pacific by the northern route—a scheme originally projected by the Russian Government as an extension of its Siberian line—has all along been regarded by those entitled to a judgment on the matter as merely a question of available capital and judiciously applied science. Political, no less than commercial and monetary considerations, conspire to promote the enterprise; and when the American Union Telegraph Company appeared in the field, with an exclusive concession from the Russian Government to connect with its Asiatic termini at the Amoor, and a right to 40 per cent. of nett receipts for all through messages either way by the joint lines, the required capital of $10,000,000 (£2,000,000), in $100 (£20) shares was promptly subscribed; and, with $10 per share paid up, these are at a premium of 30 per cent. The Russian Government finds its account in the increase of business and in the saving to be effected by obtaining uninterrupted communication, by the outlay of foreign capital, with its American possessions. In addition, there is the more speedy connection effected by this arrangement, for the Russo-American line will be completed far within the contract time of five years; whilst the Russian-Siberian line, from the commercial emporium on Lake Baikal to Irkutsk, and thence to the Amoor—a line that has hitherto progressed at the rate of 1,000 miles per annum—will be continued with increased speed. The work of construction from Kiachta is being vigorously pushed, and, at the date of our latest advices from the Amoor, no less than 800 miles had been completed inland from the mouth of that river. The American undertaking is certainly not wanting in grandeur of conception, and, we might add, in a romantic interest which its purely mechanical and utilitarian character cannot wholly destroy. In the five expeditionary corps now out, exploring ocean inlets, trending along river beds, penetrating mountain canons, or traversing desolate steppes, we see invoked again the pioneer spirit of an earlier day.

To satisfy general inquiry, we proceed to give a connected view of the progress of survey and construction on information of an authoritative character, derived from private and official sources, thus disposing of several conjectural and partially conflicting statements that have lately appeared in the public press. The route we trace is that which, with some unessential modifications, will be adhered to. On the American side, it involves the adoption of that great river system extending from the mouth of the Fraser river to the Arctic circle, where the Kvichpak, in divided streams, forming a delta not unlike that of the Nile, empties itself into Norton Sound. Its head waters have been traced to a higher latitude, where it has its volume swelled by a channel of the Youcan, the larger branch of which flows south-eastward connecting with the lakes reached by the Fraser valley. A surveying expedition under Major KENNETT has ascended the Kvichpak, in a small steamer, the *Lizzie Homer*, only 35 feet long. No communication has been had with him since he left Fort St. Michaels. As soon as stopped by ice, the Major and his party would take to sledges, following the line of the Youcan, on his way to meet Major POPE, who left Vacouver in the early spring. These explorers are followed more slowly by their working staffs, but the line has already been extended from New Westminster to Point St. James, by the construction party under Captain CONWAY, and, by the end of December, Cariboo will be *en rapport* with Victoria. The next extension will be from Fort George to Fort Conolly, and thence to St. Frances' Lake and Fort Pelly Banks, a lake connected by the Pelly with the Youcan. At Lake Babine, *bateaux*, constructed under the superintendence of Captain CARLIN, are available for crossing supplies. The exploring and engineering parties have a military organisation, and are well armed, so as to be prepared to encounter any hostilities from roving tribes. From the mouth of the Kvichpak a cable will be extended to St. Lawrence Island, and thence to the Asiatic side, emerging in the vicinity of Cape Choukotskoi. The remaining route lies across the Peninsula of Tchuktches to the north of the Bay of Anadyr, where a cable will be submerged, a land line connecting it with Penshinsk, at the head of the gulf of the same name, thus altogether avoiding the detour by Kamsckatka. Crossing the River Penshina, and rounding the eastern side of the gulf, Fort Ghyiginsk will be the next point attained, from which the line will be carried to Yamsk, and thence northward of the Sea of Okhotsk, through Ova, Tomsk, and the Valley of the Kova to Okhotsk; whence, striking off in a south-westerly direction, to the east of the Stannovoi Mountains, the land route by the Sea of Okhotsk will be continued until Nicolajevsk, the new Russian settlement at the mouth of the Amoor, and the termini of the Russo-American line, is gained. Whilst we have indicated but a few points, we may state that the Asiatic route is dotted with towns and villages, constituting so many *points d'appui*. The route has been traced by two exploring parties, one descending southward from the Bay of Anadyr, the other ascending from the Amoor. From both points the work of construction is being proceeded with. Of the

Digitized by Google

former expedition Colonel BULKELEY is chief, and Mr. ABASA of the latter. A striking feature of this scheme is the almost complete abandonment it involves of what we may term the shore cable route, a route which the present condition of marine telegraphy does not favour. Another point is the foregoing direct connection both with Sitka, the capital of Russian America, and with Petropaulousk, in Kamschatka; but preparations are already undertaken to connect Sitka with the main line, and Petropaulousk must ultimately be brought in connection. The American company merely undertakes to reach the Amoor by the least expensive and most practicable route. The steamer despatched in July last by the Western Union Telegraph Company, from San Francisco, reached Sitka in the middle of August, subsequently sailing for the Kvichpak, where Major KENNETT and party disembarked, and then conveying Colonel BULKELEY to Behring Straits. The exploration of the Behring Straits was commenced in September. The soundings across the Straits proved highly favourable for telegraphic purposes; the bottom being of mud and the water shallow. The island of St. Lawrence, half-way across, will afford most material aid in the laying of the cable from Grandby harbour to St. Lawrence Bay. Signs of a severe winter had already set in. The land on the American side of Behring Straits is somewhat mountainous; on the opposite shores are visible only limitless *plateaux* destitute of vegetation.

The *materiel* and engineering appliances which left San Francisco in three sailing vessels some time since, have been distributed at the various points in the northern Pacific, where the work of construction is going on. Shipments are being unceasingly made both from this country and the United States. The Behring Straits cable, now being manufactured here, will, it is anticipated, be ready in the course of next summer. No less than 7,700 miles of wire have already been despatched for the Russo-American line by way of New York, and 5,000 miles are now being shipped in the London Docks for Sitka. Both the Behring Straits cable and the wire is being manufactured by Messrs. HENLEY of Co., of this city. Captain GERHARD, too, is at present in London, seeing to the manufacture of a large quantity of wire, for the Russo-Siberian line. The Russian Government has so far failed in obtaining permission to place the frontier town of Kiachta in telegraphic communication with Peking, the Chinese Government persistently avoiding any definitive reply to the applications and representations on the subject. That a concession will ultimately be secured there can be no little doubt, but other leading European Powers will certainly not consent to an exclusive monopoly of the right to connect China telegraphically with the exterior world. As to the financial position of the Russo-American undertaking, we may state that it is anticipated that the Russo-American line will cost less than the nominal capital. The value and efficiency of the line will be greatly augmented by the construction of a line already commenced by the United States Pacific Telegraph Company, extending from San Francisco to Fort Kearney, and thence diverging in two branches to St. Louis and Chicago—a total length of 3,270 miles, consisting of double wires on single poles. It is gratifying to know that the undertaking will not be wanting in artistic illustration, the Behring Straits party being accompanied by the well-known English artist, Mr. F. WHYMPER.

GROWTH OF TEA IN THE NEILGHERRIES.

To those interested in the introduction of the tea plant into the Neilgherries the quality of the first samples of tea received from the plantations there has afforded some cause for congratulation. They are described as bearing a general resemblance to Kaisows in the colour and shape of the leaf, and in flavour seem to partake of the qualities of both China and Assam teas, being somewhat stronger than the former but not so strong as the latter. The prices they would command in this market, estimated at from 1s. 10d. to 3s. 6d. per pound, would doubtless be remunerative; and yet we have very strong doubts as to the probability of these teas ever coming into favourable competition with either China or Assam kinds. The capability of the land in the Neilgherries for producing tea is to a certain extent proved, but whether it will ever do so in sufficient quantity to make the experiment one of any commercial importance is quite another question, the solution of which will entirely depend on the elevation of the hills where the tea plantations have been formed. From the little we know of the locality we are inclined to suspect that however promising the experimental growth may appear, operations on an extended scale, such as are carried on in Assam, will prove a failure; and this opinion is deduced from the results of experiments which have been tried on the Himalayas at Darjeeling. There, the results, superficially viewed, appeared at first so promising as to induce extensive speculation in the purchase of land and formation of numerous large plantations; but afterwards the fact became apparent, that although the plant grows readily enough, the elevation is too great to allow of that luxuriant growth of leaves which alone can render the product remunerative. Money has, no doubt, been made in connection with tea speculation in that part of the Himilayas, but it has been made chiefly, almost entirely we may say, by land jobbing. Experience has shown that notwithstanding the possibility of growing the tea plant at great elevations—for it will grow readily enough at a height of even 5,000 feet—yet, to secure growth of commercially remunerative character, the formation of plantations must not be attempted at a greater height than from one to two thousand feet. And the success of the Neilgherry experiment must necessarily depend upon the possibility of adhering to this rule.

THE RAILWAY FROM RANGOON TO WESTERN CHINA.

We are glad to find from advices by last mail that there is some probability of a survey being ordered by the Government of India at the request of the authorities here. For some months we have left this important question unnoticed, but we find that Captain Sprye has not been idle in the meantime. Our readers may remember that when we last noticed the subject Sir Charles Wood had finally decided against entertaining the subject. It appears that, owing to subsequent pressure, he has been induced to send out instructions to the Indian Government. The publication of a report by Captain Williams, inspector of public works in the Rangoon district, has added very materially to our information on this subject. Captain Williams says in one part of his report:—

The direct land route from Rangoon to Kiang-Hung is the one which must, owing to its directness, be the best; and there is no doubt, from the same cause, it would be the cheapest to construct. The cost of transport of plant and stock to the long river journey, pertaining to the other routes, would also be saved; for as the line would be constructed on the telescopic principle, the plant and railway material would be forwarded along the line as laid down, and each stage as completed be brought into immediate use. Another and most important consideration would be that a full half of the entire railway would be within British territory, and the rest through the Shan States, which have always shown a very friendly disposition towards our Government, and a strong desire for such a commercial highroad to the British sea-board as is now under notice. They offer to pass our merchandise duty free, and would guarantee the safety of the works and rolling-stock on their soil; no mean advantage this, in the possible event of a rupture with the Burman Court, to which, though tributary to it, they cherish hostile feelings.

It appears that one of the chief causes of obstruction has been the report made by Sir Frederick Bruce from Peking. Now, at the time that Sir Frederick was asked to obtain the views of the Chinese Government, they were in dire trouble with the rebellion and the Osborn-Lay fleet, and not likely to be in a mood to give a favourable reply. Since then matters have settled down, and our friendship begins to assume, even in Chinese eyes, a form that is appreciated. We may, therefore, expect that Sir Rutherford Alcock will have broached the matter, and that in due course we shall have more favourable accounts. We find the following in the *Bengal Hurkaru*:—

"It may be of interest to those who look forward to the time when the South-Western Provinces of China shall be in ready and easy communin cation with the Bay of Bengal by the valleys of the Salween and Irrawaddy to know that of late large numbers of the traders of Yunan are the independent hill tribes of the country east of British Burmah are beginning to regularly frequent the port of Moulmein. They formerly found their way to Ava on the one side and Bangkok on the other. Their advent at Moulmein has had the effect of giving a great impetus to trade of all kinds, with a corresponding benefit to the public revenue. It would be good policy to encourage these hardy adventurers by every means in the power of Government, and to establish marts at some point in British Burmah and Moulmein where they might carry on their mércantile operations with ease aed facility. An effort might also be made to induce some of the Yunan men to settle permanently in British territories."

DOMINION IN CHINA AND THE SUPPLY OF TEA.

(TRAVERS' CIRCULAR.)

Official returns about the year 1812 estimated the population of China at 362,000,000—a third part of the entire human race. Exaggerated as this statement may at first sight appear to us, we have no reason to dispute its accuracy, on comparing the condition of China with that of the two most populous countries of Europe—England and Belgium. Reckoning the Chinese empire as comprised within an area of 1,300,000 square miles, we get a ratio of 280 inhabitants to the square mile, a proportion below the average of England, which reckons 335, and considerably lower than Belgium, which has, for every square mile, 383 inhabitants. And yet, so far

Digitized by Google

as the battle of life and the progress of civilisation is concerned, the Chinese empire exercises as little influence on the destinies of nations as the imaginary realms of Brobdignag and Laputa. The French Revolution, in a comparatively brief period of eleven years, made its effects felt in the most distant parts of the world, convulsed the whole framework of society, and "with fear of change perplexed affrighted monarchs;" but the almost perpetual warfare prevailing in the Chinese dominions (for war there may be said to be chronic) is, so far as the rest of the human race is concerned, as powerless in its issues as it is obscure in its origin. And when we abandon the high grounds of politics, and descend to the humbler but not less important regions of commerce, we find that this result is equally evident. Whether rebels or imperialists, the Chinese, however they may differ in their views respecting their government, are unanimous on the subject of trade, and outvie each other in their readiness to supply the wants of the European merchant, but are wanting in that foresight and intelligence which would create any permanent increase of wealth through commerce. It is simple necessity which urges the Chinese to cultivate to the highest possible point their staple article of produce, and which is far more imperative with them, than is our desire to receive it from them. Supposing such a contingency as the entire failure of their tea crop were possible, the inconvenience that European nations would suffer would, undoubtedly, be considerable; but to the Chinese such an event would be attended with disastrous results, in proportion to the extent to which tea is used in this vast empire. For although the district is said to be limited in which tea is grown, it is universally used; thus, in supposing the failure of the crop, we should have to compete for the supply on hand at the time of loss with a nation, numerically so infinitely greater than not only our own, but other nations that use tea, that the greater individual consumption in Europe and America would possibly be outweighed by numbers. It is, however, not certain that, although luxury and riches are more common in the West, the consumption of tea per head is greater: and on this point, of course, no reliable information is to be obtained from China. The gist of our remarks amount simply to a reflection that a material reduction in the Chinese supply, without supposing an entire failure, must ultimately re-act upon European markets, when contending in their purchases for a limited supply with a nation so large as that of China. Chinese industry, however, in the tea districts would, of course, suffer by a diminution of the crops most severely; but, on the other hand, we might have to pay, in a year at any season, much higher prices than hitherto. Therefore, although great confidence may be felt in steadily-increasing cultivation and consumption, the risks of weather to the crops will always be a source of additional anxiety, as that cause will operate generally. The colossal dimensions of China, numerical and territorial, fail to impress us with any ideas of grandeur, serving rather to remind us of the homely figure of a card-built house, which, overthrown by a single touch, suggests the best illustration of an overgrown empire, ready to fall to pieces at the first rude touch of European civilisation. In the event of a dissolution of the Empire—and such an issue, though, perhaps, not immediate, is by no means improbable—there would seem to be three alternatives; either the rebels will take possession of the different provinces, and raise them into independent kingdoms; or the treaty ports will, by a gradual extension of their influence, absorb them; or the whole empire will become the easy prey of more civilised nations. It is not likely that England, with her costly experience of India, will desire to add to her dominions in the East; nor is it probable that France, notwithstanding the Emperor's views as to the future predominance of the Latin race, would wish to engage in the task; distant expeditions, such as would be required in such an event, have never been popular with the French nation at large. But it requires no great effort of political sagacity to see that such a plan of territorial aggrandisement would be in every way most congenial to the habits and inclinations of Russia; for years past the encroachments of the Russians, especially on the river Amoor, have assumed a most systematic form, and there seems every reason to expect that a course of territorial annexation, so craftily commenced, and so determinedly pursued, will be successfully accomplished, so long as ambitious designs are allowed to proceed unchecked, and the utilitarian theory of non-intervention is so carefully followed by other Governments, less grasping in practice, and more conscientious in principle. History, we know, repeats itself; and the lesson afforded by the example of the Romans, who at the time of the decline of their Empire, invited the aid of barbarians as a protection against other barbarians, may possibly be adopted by the Chinese. They may summon to their assistance the strong arm of the European in their need. The partial employment of Europeans in some of the Chinese warehouses and customs offices has already been the means of augmenting the revenue derived from taxation, and also of showing the valuable qualities of the Western civilisation, as distinct from their own; the results of such an intercourse, slowly but gradually extending, would soon be shown in the assimilation of Chinese thoughts and ideas to our own, and in the abandonment of some of their most degrading and disgusting vices.

Literature.

—o—

Etudes sur la Circulation Monetaire la Banque et le Credit; by M. P. J. COULLET. Paris. 8vo.

This volume, by M. Coullet, the director of the Messageries Imperiales, whose *brochure* on the clearing system we noticed not long since, has for its object the exposition and discussion of the principles of circulation, the ramification of the causes which influence the rates of discount, and the explanation of the systems of the Banks of France and England. At the present time, when these questions are rife in the minds of all financiers, and when the subject is expected to occupy the attention of the House of Commons, such a comparative examination, by a man like M. Coullet—who is intimately acquainted with England and America as well as with France—cannot fail to be welcome.

In addition to the matters already alluded to, M. Coullet gives a large amount of tabulated and other information relative to the growth of the commerce of France and England from the commencement of the century to the present day, and statements relative to the exports of the precious metals and other matters from Europe to the East. Amongst other things, he successfully combats the absurd but oft-repeated notion that the rate of exchange must necessarily be in favour of the country which sends more goods than it receives from its neighbour, as in the case of France and England, for example. He shows clearly that so much of the dealings between these countries is indirect, and by way of transit merely, that any such deduction must be grossly erroneous. An excellent example of the effect of indirect and collateral causes on commerce and exchange is given in the relation of what has occurred with respect to China and other parts of the East, in consequence of the late war in America. With respect to the much vexed question of the regulation of the Bank rates of discount, M. Coullet says:—"For our part we go further, and affirm, with the most eminent authorities of England and France in such matters, that the raising of the rate of discount, opportunely and sufficiently, is a benefit in itself, and prevents the gravest difficulties." Of the growth of the business of the Stock Exchange of London and the Bourse of Paris he gives a remarkable account. Sixty years since, he says, nothing was negotiated on the Bourse but Government stock and Bank shares, forming together a gross total of something like forty millions sterling; at the present day there are about a thousand different kinds of stock and shares negotiated at the Bourse, making up a total equal to twenty times the sum just named. As regards the Stock Exchange, M. Coullet estimates the various kinds of shares at more than fifteen hundred, and adds:—"When we reflect that these include a considerable proportion of the stock of the loans of the whole world and a large part of that of the railways, navigation, banking, industrial and commercial companies of the universe, we must suppose that the capital represented at the Stock Exchange is far more considerable than that which is dealt with on the Bourse of Paris. We will not attempt to estimate an amount upon insufficient data, but no one can question the enormity of the capital operated upon." By way of showing how the demands of commerce rule the rates of discount, M. Coullet reviews, amongst other things, the growth of the trade with China. England imported from the East in 1849 five million pounds of silk, twelve millions of pounds in 1857, and ten millions in 1863. In 1854 England sent to China merchandise to the extent of one million sterling, and imported nine times that amount; in 1863 she sent four millions and received fourteen. In 1854 the exports from England to India were of the value of nine and a-half millions, and the import equal to ten and a-half millions; but in 1863 the proportions were, respectively, seventeen and a-half and forty-eight and a-half millions sterling. As regards France, she imported from China a little over 2,000 tons of silk in 1849, 7,534 tons in 1863, and 6,208 tons in 1864. When we see such figures as these, we should not be surprised that the rate of discount cannot be constantly kept at four or five per cent. Another proof of the vast growth of trade and commerce is to be found in the returns of the circulation of the Bank of France; in 1800 it was 12 millions of francs, in ten years it had grown to 100 millions; from 1824 to 1846 it ranged between 200 and 300 millions; in 1848 it was 373 millions; in 1860 it was 750 millions; and on the 26th January in the present year it was 808 millions. The notes in circulation in the whole of the United Kingdom, including those of private banks of issue, amount to about 900 millions of francs; but M. Coullet explains that, in consequence of the completeness of the deposit and cheque system in England, an immense majority of transactions escape the necessity for employing bank-notes. M. Coullet compares the condition of the Banks of France and England at the commencement of the present year, and explains clearly the causes of some of the peculiarities which mark the respective systems of the two establishments; and it would be well for those who may have to take part in legislative discussions on the subject to read what is here written by a practical Frenchman, thoroughly informed on the systems of the two countries. It may be added that M. Coullet is not a partisan of what is sometimes called free trade in banking, and that he is favourable to the issue of notes of small value, as low, in the case of France, as twenty francs. Fifty-franc notes, it may here be observed, have been in circulation for some time.

In an appendix M. Coullet gives some carefully arranged tables and documents illustrating his arguments respecting banking and commerce, and they contain much excellent matter. In the first place, we have tables of the condition both of the Banks of France and England, showing the amount of bullion, its proportion to the liabilities; rates of discount, discount accounts, advances and deposits—on the one hand; and notes in circulation, and liabilities of every kind, on the other hand, given for every quarter of the year from 1843 to 1856, at different periods of 1857, when the rates of discount were unusually high; for each month of 1863 and 1864, and for each week of the present year.

There is no part of the work, however, of more interest at the present moment than that which exhibits the comparative progress of commerce in England and France, about which so many strangely erroneous ideas are afloat in the public mind. France has certainly made immense progress in material matters during the last few years, and there are not wanting persons who see in every step in advance made by our neighbours an injury to ourselves, while even others who are not jealously disposed seem to have arrived at the conclusion that the commercial ascendancy of England has ceased, and perhaps even that we must be content to glide gradually into a secondary position. Let us see how much support M. Coullet's facts and comparisons give to any such doubts and fears. Previous to 1826 the accounts of the French *douane* do not furnish details of the commerce of the country, and therefore the estimates for the first quarter of the century can only be looked upon as approximative. M. Coullet gives them, as follows, for what they are worth. The figures represent millions of francs, but for comparison one denomination is as good as another:—

Average of	Import.	Export.	Total.
FRANCE.			
1801—1810 ..	405½ ..	35 ½ ..	764¼
1811—1820 ..	333 ..	462 ..	795
1821—1826 ..	653 ..	597 ..	1,250
ENGLAND.			
1801—1810 ..	740¼ ..	1,245½ ..	1,986
1811—1820 ..	772 ..	1,331½ ..	2,103¼
1821—1826 ..	902 ..	1,149¼ ..	2,051¼

Since the year 1826 the general imports of France grew from 667 millions of francs to 3,236 millions, and the exports from 698 millions to

Digitized by Google

3,526 millions. But there are two tables in the appendix alluded to which give at a glance the state of the case as regards the two countries, both with respect to the actual amounts of business done with the rest of the world, and the relation of that amount with the number of the inhabitants in the two countries. Taking the column of general exports as the most convenient in every way, we obtain the following from a comparison of the average for the period between 1827 and 1836 with the year 1863:—

EXPORTS.

			Millions of francs.	Excess in favour of England.
1827 to 1836	England	..	1,277 8-10ths	579½
.. „	France..	..	698 3-10	
1863 ..	England	..	4.899	1,373
„ ..	France	..	3,526	

Showing that the excess in amount of English general exports over those of France has considerably more than doubled during the period in question.

Turning to the column of Special Exports, in another table, for the past four years we find, however, a somewhat different result, the figures being as follows:—

			Difference in favour of England.
1861 ..	England ..	3,127 8-10ths	1,201½
.. ..	France ..	1,926 3-10	
1862 ..	England ..	3,103 5-10	860 8-10
.. ..	France ..	2,242 7-10	
1863 ..	England ..	3,662 3-10	1,019 7-10
.. ..	France ..	2,642 6-10	
1864 ..	England ..	4,010 9-10	1,101 4-10
„ ..	France ..	2,909 5-10	

So that the excess of the Special Exports of England as compared with those of France is almost as great as ever, and amount to more than 25 per cent. of our own total and to about 35 on that of France.

But a comparison of totals only tells a portion of the tale, and M. Coullet has very properly given comparative tables of the proportion which the commerce of each country bears to its population. In 1827-1836 the exports of England amounted to 52½ francs per head per annum, while those of France reached but 21¼ francs—showing an excess in favour of the former of 31 francs and upwards per head. In 1863 the exports of the former were 166 francs, and of the latter 93 francs per head; so that, in spite of the rate having been more than quadrupled in France, the excess on the side of England has increased to 73 francs, or more than twice what it was in 1836. When we consider how far ahead England was at the former period, and consequently how much more margin for improvement existed in France, it is really marvellous that the latter should have maintained, and, still more, doubled that excess.

If there be people existing who imagine that the progress of France in commercial matters can injure England even while her own trade grows so rapidly, they must be beyond the reach of facts and arguments; and those who only look at the changes that have taken place with respect to these two countries, taken apart from their dealings with other parts of the world, they should learn to regard the commerce of the universe as a total, as M. Coullet does, and cease to dwell upon isolated facts and draw false conclusions from incomplete data. It is good for all that the productiveness of each nation should increase, and it is especially good for England, who has relations everywhere, and who consequently profits, instead of losing, by the growing prosperity of France and of all other countries. This is a truism, though all the world does not recognise it.

Correspondence.

SILKWORMS AND MOTHS.

(To the Editor of the *London and China Telegraph.*)

SIR,—The enclosed extract from Sir J. Emerson Tennent's "Ceylon," Vol. I., chap. VI., page 265, will show you that this gifted author has been somewhat in advance of even the French savans, &c., in having early pointed out to commerce the probable hidden value of certain races of wild silkworms and moths—notably those which had attracted his attention in the island of Ceylon. It appears that about two hundred years ago the Dutch (who were then in possession) made an attempt to introduce the culture of the "Bombyx Mori"—the true silkworm—but that after the island fell into the hands of the English, little more was heard on the subject. In point of fact, there is scarcely room for wonder that our countrymen attempted nothing further, seeing that the well-directed and skilful efforts so successful in perfecting the ruling of Surdah silk in the neighbouring continent of India, for very many years, met with no encouragement save at the hands of the home silk trade. Up to as late as the year 1840 all attempts to introduce the beautifully-reeled Surdah raw silk to the notice of continental manufacturers were fruitless. Secure in the possession of excellent silk crops at home, anything which the English were introducing from Asia was not then worth consideration. The raw silks for which to-day the French, Germans, and Swiss are scrambling all over the East, only twenty short years ago they would scarcely deign to look at! The writer hereof tested them thoroughly as far back as 1845 and 1846. Feeling assured that China and Bengal silks were well adapted for some of the goods made at Lyons, Elberfeldt, and Basle, he waited upon the chief manufacturers of those opulent seats of silk manufacture, and pointed out the advantage in comparative cheapness enjoyed by Asiatic over European silk. These efforts were entirely thrown away upon them, and in many instances the narrator was listened to with an impatience and an indifference mortifying in the extreme. How different is the case now! It is almost ludicrous to see the vast change which has been forced upon those incredulous men, when I along with other Englishmen established in the Far East seem almost in danger of being jostled out of the trade by the agents of the very men who only a few years ago would have nothing to do with either us or our silk! Their own silk crops being almost annihilated, the English merchants who have hitherto conducted the silk trade of India, China, and Japan are coolly told by these people (only arrived as it were yesterday) that they must get out of their way now that France, the Zollverein, and Switzerland want the silk. However unpleasant this may be, still it is the new order of things, which for the time being has to be submitted to at Calcutta, Shanghai, and Yokohama.—I remain, Sir, yours faithfully,

KIOTO.

Macclesfield, Nov. 23, 1865.

EXTRACTED FROM TENNENT'S "CEYLON," VOLUME I., CHAP. VI., PAGE 265.

Moths.—Among the strictly nocturnal "Lepidoptera" are some gigantic species. Of these the cinnamon-eating "Atlas" often attains the dimensions of nearly a foot in the stretch of its superior wings. It is common in the gardens about Colombo, and its size, and the transparent talc-like spots in its wings cannot fail to strike even the most careless saunterer. But little inferior to it in size is the famed "Tusseh Silk Moth" (Antheræa mylitta), which feeds on the country almond (Terminalia catappa), and the Palma Christi, or castor-oil plant: it is easily distinguishable from the Atlas, which has a triangular wing, whilst it is falcated, and the transparent spots are covered with a curious thread-like division drawn across them. Towards the northern portion of the island this valuable species entirely displaces the other, owing to the fact that the almond and "Palma Christi" abound there. The latter plant springs up spontaneously in every manure heap or neglected spot of ground; and might be cultivated, as in India, with great advantage, the leaf to be used as food for the caterpillar, the stalk as fodder for cattle, and the seed for the expression of castor-oil. The Dutch took advantage of this facility, and gave every encouragement to the cultivation of silk at Jaffna. (*Note.* The Portuguese had made the attempt prior to the arrival of the Dutch, and a strip of land on the banks of the Kalany river, near Colombo, still bears the name of "Orta Seda," the Silk Garden.) The attempt of the Dutch to introduce the true silkworm, the "Bombyx Mori," took place under the governorship of Ryklof van Goens, who on handing over the administration to his successor in 1663 A.D., thus apprises him of the initiation of the experiment:—"At Jaffna Palace a trial has been undertaken to feed silkworms, and to ascertain whether silk may be reared at that station. I have planted a quantity of mulberry trees, which grow well there, and they ought to be planted in other directions.—Valentyn, Chap. XIII." The growth of mulberry trees is noticed the year after in a report to the Governor-General of India (but the subject afterwards ceased to be attended to), but it never attained such a development as to become an article of commercial importance. Ceylon now cultivates no silkworm whatever, notwithstanding this abundance of the favourite food of one species; and the rich silken robes sometimes worn by the Buddhist priesthood are still imported from China and the continent of India. In addition to the "Atlas" moth and the "Mylitta," there are many other "Bombycidæ" in Ceylon; and though the silk of some of them, was it susceptible of being unwound from the cocoon, would not bear a comparison with that of the "Bombyx Mori," or even of the "Tusseh Moth," it might still prove to be valuable when carded and spun. If the European residents in the colony would rear the larvæ of these "Lepidoptera," and make drawings of their various changes, they would render a possible service to commerce, and a certain one to entomological knowledge.—*A true Extract, by Edward Clarke.*

PIRATES IN THE CHINA WATERS.

(To the Editor of the *London and China Telegraph.*)

Sir,—Allow me to suggest, through your columns, that a meeting of the London houses interested in the China trade be convened, for the purpose of endorsing the protest that has gone forth from merchants in China as to the inadequacy of protection to the Merchant Navy in the China Seas. Such a meeting would have its influence with the Government, and do much to conciliate public opinion in England in favour of the measure. I fully concur with the opinion you have so often expressed, that the Chinese Government should be called upon to contribute a portion of the outlay to be thus incurred; that it is not properly our business to establish a sea and river police for a government bound by specific articles of treaty no less than by international law, to afford efficient protection to foreign trade. But allowing for the exceptional circumstances in which China is placed, and taking into account our own large trading interests, a compromise should be entered into by which the Peking Government should furnish a given annual sum towards the equipment and maintenance of gunboats, say one half; the other half to be divided over England, the United States, France, Prussia, and other maritime Powers who have commercial interests in the Far East.—Yours faithfully,

ANGLO-CHINESE.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and ten months ended the 31st October again present very favourable results, and indicate a steady improvement in trade in nearly all branches. The total declared value of exports for the tenth month of the present year was £15,547,225, against £12,871,491 in 1864, and £15,082,332 in 1863, exhibiting an increase as compared with the former period of £2,675,734, and with the latter of £464,893. For the ten months of the present year the total was £135,264,602, for 1864 it was £136,275,652, and for 1863, £119,377,045, which shows a decrease of £1,011,050 when contrasted with 1864, but an increase of no less than £15,887,557 compared with 1863. All our great staples have participated in this movement of activity; save that in the export of silk manufactures there has been a decrease of about 10 per cent. Looking at the document as a whole, a decided probability exists that when the figures for the entire year can be made up the twelve months of 1865 will show the largest amount of trade ever yet attained by the United Kingdom; so far as distinctively specified in these returns, our commerce with the Far East is represented by the following figures:—

EXPORTS TO CHINA AND HONG KONG.

	1863.	1864.	1865.
For the Month ended 31st October.			
Cotton yarn	218,020	40,000	4,000 lbs.
Cotton manufactures	5,624,602	2,504,781	11,035,749 yds.
Worsted stuffs	1,003,000	599,225	1,125,570 ,,
Woollen and worsted cloths	61,570	109,565	71,571 ,,
Lead	651	391	161 tons.
For the Ten Months ended 31st October.			
Cotton yarn	1,624,710	1,762 893	921,178 lbs.
Cotton manufactures	39,849,042	57,626,503	98,354,228 yds.
Worsted stuffs	7,401,161	11,883,246	13,522,332 ,,
Woollen and worsted cloths	1,428,325	1,505,488	1,382,802 ,,
Lead	12,007	6,639	1,702 tons.
Value for the Ten Months ended 31st October.			
Cotton yarn	£170,075	£218,660	£87,966
Cotton manufactures	969,071	1,626,207	2,142,340
Worsted stuffs	523,613	786,701	1,004,020
Woollen and worsted cloths	268,350	260,291	229,700
Lead	256,933	145,340	36,182

The Cotton Manufactures exported to other ports and countries of the Far East were, in quantity for the month, and in value for the ten months, as follows:—

	1863.	1864.	1865.
Quantity for the Month ended 31st October.			
Ceylon	2,661,282	1,068,919	2,343,715 yds.
Singapore	1,019,825	463,145	2,736,803 ,,
Java	1,873,415	957,833	2,769,518 ,,
Philippine Islands	1,959,891	3,126,223	3,188,519 ,,
Value for the Ten Months ended 31st October.			
Ceylon	£348.627	£371,983	£286,437
Singapore	502,515	558,331	769,403
Java	299,790	484,882	554,234
Philippine Islands	317,204	546,257	618,162

Of Cotton Yarn, the quantity forwarded to Singapore during the month of October was 47,100 lbs., and 1,074.400 lbs. during the ten months; the value for that period being £100,864, against £92,167 in the ten months of 1864, and £183,274 in the preceding year. To Ceylon 37,700 lbs. of cotton yarn were exported in October, and 267,200 lbs. in the ten months; the value being £23,451, against £26,081 in the ten months of 1864, and £53,619 in 1863.

IMPORTS.

Raw Cotton exhibits a decline as regards British India and China, more especially if we look to the more distant region of the two:—

	1863.	1864.	1865.
Quantity for the Month ended 31st October.			
British India	446,833	675,607	544,496 cwts.
China	2,696	37,804	7,506 ,,
All parts	555,519	823,585	855,495 ,,
Quantity for the Ten Months ended 31st October			
British India	2,611,985	3,355,747	3,125,905 cwts.
China	211,562	609,136	309,031 ,,
All parts	4,226,127	6,146,796	6,315,565 ,,
Value for the Nine Months ended 30th September.			
British India	£17,358,230	£24,862,133	£14,181,006
China	1,520,670	4,945.209	1,149,687
All parts	31,662,331	56,334,266	36,187,355

Of Unrefined Sugar there appears to have been no importation from Java and the Philippine Islands during the month of October, while in the same month of 1864 the import was 27,350 cwt. The quantity for the ten months and the value for the nine months is given as follows:—

	1863.	1864.	1865.
Quantity for the Ten Months ended 31st October.			
Of all qualities (cwts.)	692,753	210,617	528,367
Value for the Nine Months ended 30th September.			
Of all qualities	£625,923	£231,257	£521,793

Of Hemp the import from the Philippine Islands during the month of October was 13,931 cwt., while the total for the whole year is represented by the following figures:—

	1863.	1864.	1865.
Quantity to 31st Oct. (cwts.)	245,383	134,002	179,688
Value to 30th Sept.	£311,405	£215,928	£249,639

Of Raw Coffee the quantity delivered from Ceylon during the month of October was 5,186,283 lbs., and the total deliveries in this and the two preceding years have been thus:—

	1863.	1864.	1865.
Quantity to 31st Oct. (lbs.)	61,204,868	59,511,661	67,956,617
Value to 30th Sept.	£1,917,565	£1,919,621	£2,158,944

The present Returns furnish the Declared Value both of the exports and imports from and to the United Kingdom during the three quarters ending the 30th September. The exports, it must be recollected, refer only to British and Irish Produce and Manufactures, and do not comprise the value of foreign produce re-exported. The portions of these returns relating to the ports and countries of the Far East exhibit the figures annexed:—

To	1863.	1864.	1865.
Exports for the Nine Months ended 30th Sept.			
China (exclusive of Hong Kong)	£1,771,873	£2,308,522	£2,572,302
Hong Kong	1,041,046	1,347,773	1,168,639
Singapore and Eastern Straits	1,034,379	970.756	1,103,897
Ceylon	654,677	627,288	449,467
Netherlands India (Java, &c.)	412.541	640,055	639,219
Philippine Islands	436,312	616.739	741,155
Siam	11,958	15,129	22,365
Japan	73,526	431,821	986,107
From			
Imports for the Nine Months ended 30th Sept			
China (exclusive of Hong Kong)	£9,163,528	£8,235,986	£6,186,809
Hong Kong	816,729	2,366,519	569,926
Singapore and Eastern Straits	1,137,275	1,340,577	1,322,281
Ceylon	2,511,920	2,399,851	2,494,917
Netherlands India (Java, &c.)	12.591	16,736	—

WILLIAM AND CLARA, for Batavia, Oct. 14, 5 S., 27 W.

FREIGHTS AND CHARTERS.

A marked improvement is noticeable in outward freights, all ships recently arrived having been well placed for the outward voyage, and rates for Shanghai and Hong Kong may be quoted fully 5s. per ton higher than those given in our last quotations. Coal freights continue firm, and for Shanghai show an upward tendency.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £30. For Hong Kong: £42. For Galle: £27. For Singapore, £32. For Shanghai: £52. From Newport, Cardiff or Swansea per ton. For Batavia: £1. 7s. For Hong Kong: £2. For Manila: £1. 12s. to £1. 15s. For Galle: £1. 6s. For Singapore: £1. 9s. For Shanghai, £2. 7s.

The Admiralty have invited tenders for the conveyance of 3 tons medical stores from the river Thames to Colombo.

Messrs. Stringer, Pembroke, and Co.'s Circular states:—There has been considerable animation the last fortnight in coal freights to the East, and a good deal of business has been done. There is now a little slackness in the inquiry, but we can still place tonnage at our quotations, which, it will be seen, show much improvement. Berth freights to India from hence have not advanced in proportion, but ships are in good request. We can place a high-classed vessel for Australia, with quick dispatch in loading, at 65s. per register ton. Homeward business is quiet; the rice charterers have about filled their requirements, and we cannot now do better than 67s. 6d. to United Kingdom or Continent. We can place a vessel from Manila at 60s. sugar, 65s. hemp, in connection with 30s. to 31s. per ton coal out from Cardiff.

CASUALTIES.

The Amber Witch, Langlois, from Cardiff for Hong Kong, put into Falmouth, Nov. 27, with loss of gear of foresail-yard, and making a little water.

The Sophia Kon d. Nederlanden, Klein, from Batavia, arrived at Portsmouth, Nov. 28, with loss of sails.

The Crouch Brothers, from London for Colombo, arrived off Gibraltar, Nov. 28, with loss of three topmasts, jib-boom, mainmast head, yards, and sails.

The Eclipse, Chevalier, from Liverpool for Yokohama, which was assisted into Cardiff, Nov. 27, for repairs, reports that, during the gales on Nov. 21, she started her mast coats fore and aft, foretopmast stays, &c., carried away her bulwarks, and commenced making much water. On the 22nd a heavy sea carried away her wheel, steering apparatus, stanchions, &c., and on the following day a leak was discovered under her stern. On the 24th she anchored in Penarth Roads, but, finding she was drifting on shore and among the shipping, she signalled a tug, and was taken in tow. She has since discharged part of her cargo.

The Quinten Matsys, Claeys, from Shields for Ceylon, put into Rio Janeiro, Oct. 26, with her master ill, and sailed for her destination on the 6th November.

The Mauritius, Holst, from Hamburg for Singapore, put into Cowes, Dec. 2, with cargo shifted.

MISCELLANEOUS.

Off ST. HELENA.—Oct. 15, from Hong Kong, Maria, for London.

The steamer Annette, which has twice landed tea in China, and accomplished the voyage in a longer time than sailing vessels, has been sold for £7,500.

LAUNCHES, &c.

THE STEAMER "DOUGLAS."—On the 30th Nov. Messrs. Hull, Russell, and Co. launched from their yard, at Aberdeen, the screw steamer Douglas. The ceremony of christening was performed by Miss Baker. The description of the Douglas is as follows:—Barque rigged, and fitted with engines of 160 horse-power, nominal; length, 250 ft.; beam, 29 ft. 6 in., and 21 ft. 6 in. depth; register tonnage, 873 tons, and 900 builders'. The launch was very successfully accomplished, and the appearance of the Douglas in the water, with her beautiful lines, is very fine. She has been built to the order of Messrs. James Morrison, and Co., London, and is owned by Douglas Lapraik, Esq., and others. The Douglas will be commanded by Captain Baker, who has had great experience on the coast of China, where the vessel is intended to be employed. The fitting up of the vessel is very superior; the cabin accommodation ample, and the furnishing all in the most tasteful and elegant style. In the construction of both ship and machinery, all the most modern improvements have been included. Several gentlemen from China were present at the launch, and expressed themselves very favourably as to her capabilities and adaptation to the China trade. The launch of the Douglas is an event of unusual interest, as being the first launch of an iron vessel at Aberdeen for fully twenty years.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

WARWICK-LANE, NEWGATE-STREET, LONDON.

T. & H. SMITH'S

CORDEIA LOZENGES.

THESE Lozenges have a remarkable effect in allaying Cough and Irritation of the Throat and Chest.

Prepared only by T. and H. SMITH and Co., 21, DUKE-STREET, EDINBURGH, and 69, COLEMAN-STREET, LONDON. In boxes at 1s. 1½d. and 2s. 9d. each.

Soda, Potash, Seltzer, Carrara, Lithia, Magnesia, and Tonic Waters, &c.

Lemonade, Ginger Beer, Orangeade, Gingerade, Nectar, and Champagne Cider.

It was on the success of the SODA WATER MACHINE supplied to the 7th Dragoon Guards that Sir Hugh Rose based his recommendation that these Machines should be established in every Regiment. This Machine was made by SAMSON BARNETT, expressly for that Regiment.

Full Directions for preparing ALL the above Drinks are sent with each Machine.

SAMSON BARNETT, 23, Forston-street, Hoxton, London,

Above Twenty Years Foreman to Messrs. TYLOR,

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery, and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B., being so well aware of all the requirements of persons using Machinery where MECHANICAL ASSISTANCE CANNOT BE OBTAINED, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Franjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao J. D. Freati.

R. L. SOUTHERN AND Co.

MERCHANTS AND AGENTS,

6, MINCING-LANE, LONDON, E.C.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

COWASJEE DINSHAW,

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—There is no question whatever that rheumatism, neuralgia, and such like painful maladies, are more rife this season than for some years past. The number of testimonials of cures effected by Holloway's remedies is unprecedented and should be enforced on the attention of all sufferers from these complaints. The parts in pain should be fomented for some minutes with warm brine, dried, and immediately well rubbed with the Ointment. It will pass into the pores of the skin and give the greatest relief. Many valuable lives are annually lost which might be saved, if early recourse in illness were made to these remarkable remedies, which must necessarily prove beneficial and cannot do harm.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states o the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length	300 feet.
(To be extended.)	
Breadth	100 ,,
Depth of water	15 ,,

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

Telegrams from Hong Kong to Nov. 15 have been received via Galle, as follows:—"The gunboats have successfully attacked the pirates in the neighbourhood of Amoy. Advices from Japan state that the foreign ministers had gone on an expedition to open Osseolivywn (not to be deciphered) to foreign trade. The other murderers of Major Baldwin and Lieutenant Bird have been arrested at Yedo. They confessed their crime, and were executed."

List of Passengers.

PASSENGERS INWARD.

By this mail per P. and O. Company's steamer Tanjore, arrived at Marseilles Dec 15.—From Yokohama: Mr. and Mrs. Wilgoss, infant, and native female servant, Mr. J Berlander, Mr. V. Amonin, Mr. T. H. Lascher. From Shanghai: One second-class passenger. From Hong Kong: Mr. R. T. Brand, Colonel Sankey, Mr. R. Thomas. From Singapore: Mr. H. Frollick, Mr. Silverlock, Mr. and Mrs. Cramer, and European female servant.

Per Massilia, expected to arrive at Southampton Dec. 22.—From Hong Kong: Mr. Robinson, Lieutenant Hunt, R.N., Mr. Gandell, Mr. Moore, Mr. Lyon, four second-class and one deck passenger.

Per French mail steamer Said, arrived at Marseilles Dec. 5—From Yokohama: Mr. Kunzi. From Shanghai: Mr. W. Whillon. From Hong Kong: Mr. W. Kemptner, Mrs. Mawbry. From Singapore: Mr. and Mrs. Mantel.

PASSENGERS OUTWARD.

Per French mail steamer Said, from Marseilles, Dec. 19.—To Shanghai: Mr. A. J. Little, Mr. Remi de Montigny.

Per P. and O. steamer Nyanza, from Southampton, Dec. 20.—To Shanghai: Mr. and Mrs. J. H. Evans and infant. To Hong Kong: Major Peebles, Mr. W. R. Browne. To Ceylon: Mr. Macan, Lieut. B. S. and Mrs. du Jardin, and Miss Hugo, Mr. Harper, Mr. C. Murray, Mr. and Mrs. Trotter and five children.

From Marseilles, Dec. 28.—To Hong Kong: Mrs. Hunter, two Misses Hunter, Miss Hutton, Capt. J. L. Phelps.

Per P. and O. steamer from Marseilles, Jan. 4, 1866.—To Shanghai via Bombay: Mr. W. H. Carter.

Per P. and O. steamer, from Southampton, Jan. 4, 1866.—To Singapore: Rev. C. A. Kock, Mr. H. C. Prinsep. To Ceylon: Surgeon W. S. Roche, R.N. To Hong Kong: Lieut. Stewart, A.D.C. to the Governor of Hong Kong, Dr. A. Cochrane. To Shanghai: Mr. E. McKean, Mr. A. Harvey, Mr. F. R. Porter, Mr. Steel, Mr. Jerdein, Mr. Cunningham.

From Suez, Jan. 19.—To Hong Kong: Sir Richard and Lady MacDonnell.

JAPAN.

YOKOHAMA.

From Yokohama we have files of the *Japan Herald* to the 17th of October. The London mails of 26th July and 11th August arrived together on the 4th October, and the French mail of the 17th August on the 15th October. There was a dearth of political news, the British Minister having departed for Hakodadi in H.M.S. *Princess Royal*.

A controversy was going on in the local papers regarding the condition of the troops recently landed from the *Adventure*. Major-General Guy, C.B., commanding Her Majesty's forces in China and Japan had departed for Hong Kong, after thoroughly inspecting the garrison.

Robberies seem to increase in the settlement, rather than the reverse. The house of Mr. Eusden, a Secretary of Legation, was attempted, but owing to the pluck and activity of Mr. Von Siebold, a gentleman connected with the Legation as Student Interpreter, the actual robbery was prevented, and it is believed, all the thieves were caught. Mr. Von Siebold had been left in charge of the house, whilst Mr. Eusden paid an official visit to Yedo.

A rifle match, under the auspices of the Swiss Rifle Club, took place on the 9th October, and proved highly successful.

(FROM A CORRESPONDENT.)

There is still a lack of excitement here, and were it not for an occasional passage of arms between our rival editors and the usual quarrels peculiar to a Yokohama community, we should have quite an epidemic of *ennui*. The *Japan Times* is a late addition to our local literature, and so far promises well. The editor was formerly connected with the Bombay *Saturday Review*, and is a terse, clear writer—perhaps a little too much given to the forging of thunderbolts which hit people hard in a small community; but, after all, in the Far East we require something more *piquant* than the plain mutton of the *Morning Chronicle* or the roast beef of *The Times*. Our animal and literary digestions both get impaired, and we must have curries and incentives of some sort to stimulate both the one and the other.

Our trade still suffers from a plethora of imports, Japan being still made use of as the chief vent to relieve the overstocked markets of China; and this year, owing to many heavy failures, we have had large quantities of goods thrown on the market that must be sold. Metals, at the present moment, can be bought at lower prices than in England, and there are very few manufactured goods that are paying the importer anything. The native dealers have it all their own way with imports, and to a great extent also with exports. The competition among foreign buyers of silk is unprecedented, or rather has been, for the dizzy height that prices have now attained is sufficient to make the boldest speculators a little cautious. These children of the rising sun have quickly learnt the value of combination in trade as opposed to competition, and avail themselves of its advantages to the full. Our stocks of silk are kept within moderate limits; as purchases are made, so the market is fed. It is a curious fact that many parcels of the coarser grades have been returned to the interior for native consumption, the Japanese looms being capable of working up the coarse silk to a wonderful degree of excellence, and thus common qualities always bear a much higher relative value in this country than in Europe.

Digitized by Google

It is at present impossible to say what will be the yield of Japan silk this season, but from all appearances it is not likely to exceed last year's export.

The *furor* for silkworms' eggs seems to have ceased for the present, and the native merchants are at length finding out to their cost that a foreign demand *can* be satisfied. The green eggs, however, are still sought after, the worms of this species spinning only once a year, and consequently producing a fuller cocoon, besides being more hardy. The supply of these being comparatively small, Japanese ingenuity suggested an expedient to satisfy the demand, and a quantity of cards were soon offered surfaced with eggs of various shades of green, from rich dark olive to bright emerald. A few greenhorns were at first victimised by the spurious seed, but the knavery was soon discovered and exposed. The present P. and O. mail steamer takes some 500,000 sheets of seed, all originally intended for the Messageries Imperiales, but, owing to the steamer *Dupleix* not arriving true to her time, the French company lose the whole of this rich freight—say, $50,000. Shippers of eggs have generally a preference for the French steamers; firstly, because they are mostly conected with French houses; secondly, because the French steamers are better adapted for the stowage of such cargo; and, thirdly, because they have special support from the Imperial Government—orders having been given that, should they meet with any accident, the French ships of war are to assist in conveying the precious cargo to its destination. At present the two companies work in harmony; but the P. and O. Company must look to it, or they will soon find their French competitors dangerous rivals. They have had all their own way for a long time, and have sometimes been too ready to make the public feel their power; and they need not now be surprised if the said public takes advantage of the existing competition to reassert its independence.

Our Municipal Council, after breaking its shins a good deal over the rough road of nationalities, has at length struggled into something like permanent existence. Each nationality is represented in proportion to the quantity of ground it holds. One of the chief difficulties is of course to define where the orders of the Council clash with the authority of the Consuls; but as the latter evince a general desire to smooth the way and make their yoke as lightly felt as possible, there is a fair prospect of our having a cohesive and permanent governing body. At present the workings of the Council have been chiefly directed to the muzzling of rabid dogs, the creation of a police force, and the suppression of a few crying nuisances. But at all events municipalities, like other mundane institutions, must have a beginning; one of the great evils, however, that exists, and must always exist in an international municipality, is that its very existence depends on the concurrence and unanimity of the several Consuls from whom its powers are in great measure derived.

NAGASAKI.

The *Bogatyr* and other Russian men-of-war were leaving Nagasaki. Six Japanese officers leave for Russia in the *Bogatyr*. The Dutch barque, *W. Kemptner*, has been wrecked off Cape Gotto. She was lost during the severe gale on the 9th September, and out of the whole crew only one man was saved. He contrived to take hold of a piece of timber, by the aid of which he was enabled to reach the land. He subsequently arrived at Nagasaki in H.M. gunboat *Bustard*. The bodies of captain, mate and two men were washed ashore, and buried by Captain Adams, of the *Bustard*. When the news of the sad occurrence reached Nagasaki, Mr. Bauduin, Netherlands Consul, immediately raised a subscription for the relief of the relations of those who were drowned, most of whom had wives and families. A large sum was subscribed by the foreign residents and masters of vessels in harbour, and Mr. Bauduin himself headed the list with a handsome donation.

In the action against Messrs. Alt and Co., referred to in our last issue, the plaintiff was Mr. J. H. Saunders, formerly bookkeeper to that firm. The case was tried before Mr. Consul Gower, and judgment given for the defendants, with costs. The plaintiff has appealed to the Supreme Court.

The present mail brings further particulars of the affray between foreigners and natives noticed in our last issue. On 16th October, Lieut. Douglas and two other officers of H.M.S. *Rattler* were walking through the town, followed accidentally, but most fortunately, by Mr. A. D. W. French. A two-sworded man made a blow at one of the officers, but missed him. Mr. French seeing the assault hurried up and was received by the Japanese with a cut, which he was lucky enough to escape. Mr. French immediately fired his revolver at his assailant, who, although wounded, made a second lunge, which proved also without effect. Mr. French then fired a second shot, and brought the ruffian down. The Japanese received one ball in his abdomen and the other in his lower jaw, and will no doubt die. The native officials have made a disturbance about the case, asserting that the assailant was not to blame. Had he, however, wounded or killed one of the unoffending men whom he attacked, and subsequently made his escape, the officials would have denied all knowledge of the affair, and would have taken no steps to bring the offender to justice. Mr. Mangum, United States Consul, is about to investigate the circumstances, and it is to be hoped that he will insist on the right of foreiners to defend themselves in cases of emergency. A series of races and athletic games was held on the 14th October and created much interest. Messrs. Glover and Co.'s verandah was formed into a temporary grand stand, and upon it the ladies of the settlement congregated. During the intervals between the races several trials of strength and agility were got up for the blue-jackets and the soldiers of the 20th Regiment, who had arrived in the *Perseus*.

CHINA.

SHANGHAI.

The mail of August 26 arrived out on October 14. The dates are now down to tke morning of the 26th.

It is stated that the French Government have obtained a concession in the tonnage dues of vessels trading to Japan and Saigon, which are to be considered on a par with coasting voyages. Of course English trade will have the same privilege accorded.

The following on Burgevine is from the *North China Herald*:—"As to the reports about the United States being revenged on the Chinese authorities, we do not believe any such action will be directed from Washington, seeing that Burgevine was a Southerner of rebel doctrines. We trust this notice will be the last of Burgevine.

The officers appointed to visit Lan-chi-hsien for the purpose of investigating the circumstances which attended the death of Burgevine, have returned to Shanghai. So far as we can learn, the result of their inquiries is as follows:—Mr. Lewis, U.S. Deputy Consul-General, Mr. Allen, who acted as interpreter, and Chen, magistrate of the mixed court in Shanghai, having started from Ningpo, arrived safely at Lan-chi-hsien a town of the third order, situated on the borders of the Kiangse, and Chekiang provinces, and about 300 miles distant from Ningpo. Here they were received courteously by the chief magistrate, who sent to assist in their inquiries a Wei-yuan attached to the Futai's yamen in Hangchow, the deputy magistrate of Lan-chi, and a man who, it was asserted, had been in the boat at the time of the accident. While at Lan-chi and while visiting the country round every opportunity was seized of testing the truth of the statements made relative to the height of the water in the creeks and rivers at the period in question. All the evidence derived from the appearance of the outside of houses, the interior of temples and other public buildings, and the injuries sustained by idols which had been standing on or near the floor in joss-houses, went clearly to prove that at some time within the last few weeks the water had stood at least fifty feet higher than it stands at present. The coffins, six in number, were found under a mat shed of apparently recent erection, on the further side of, but close to the most outside the North gate of Lan-chi. They were arranged as follows:—Burgevine, with his feet towards the north; on the east of his coffin two coffins said to contain the bodies of Chinese; on the west a coffin said to contain the body of a Portuguese, and two coffins also said to contain Chinese. The coffins were arranged parallel one to the other, lying as nearly as could be ascertained due north and south. The seventh body recovered was that of Green, which was, as we have before stated, forwarded to Ningpo for medical examination. None of the coffins were opened, as nothing was likely to be gained by exposing the contents. The Portuguese (?) was a Manila-man employed by Burgevine as a servant. The Chinese corpses were contained in ordinary Chinese coffins, but that of Burgevine had been placed in an exceedingly large and handsome double coffin richly lacquered and ornamented with gold. At the head were the five characters—*Yang jen Pi chi wen*, "The foreigner Burgevine." The coffin of the so-called Portuguese was of smaller dimensions, but double, and covered with varni-h. We understand that Mr. Lewis obtained a document written in Chinese, purporting to be a full record of all the occurrences, which now awaits translation and minute examination. Assuming the truth of the statements made by the man who professed to have been on board at the time of the overset, it would appear that the boat with the three foreigners and their guard had arrived at a part of the river where navigation is impeded by shoals and rapids, and where it was than rendered most dangerous by the enormous quantity of water pouring down from the mountains. From these rapids a strong current sets to a rock about fifty feet in height, which stands on the high bank. Washing the base of this rock, the current crosses the stream again, and meets a mountain torrent rushing into the main river on the opposite bank. At the point of junction there is always an eddy, and at the time of the occurrence, this had probably become a whirlpool. The boat, caught by the current, was borne on to the rock, and having barely escaped collision with it, the sailors lost com-

Digitized by Google

mand of the yulos, and allowed themselves to drift into the midst of the whirlpool. Here, at a point about twenty-five *li* below Lan-chi, and between that town and Ningpo, the boat was wrecked, and nine only out of an entire crew of twenty-two were saved. About a mile and a half nearer to Lan-chi a number of shallows block up the course of the stream, and there the bodies were subsequently found. The boat was capsized on the fourth day of the intercalary fifth moon (June 26th); on the fifth day (June 27th) the bodies of Green and the Portuguese were found, and on the sixth day (June 28th) Burgevine was picked up on almost the same spot. His coffin has since been brought to Shanghai and opened. The body has been fully identified, but the official report of the examination has not yet been published.

Two men named Stevens and Gerard have been found guilty of the wilful murder of one McDonald, late keeper of the International Hotel at Hankow. McDonald was found lying dead on the bund, his body being covered with wounds. The hotel, of which up to a short time before his death he had been proprietor, was a well known resort of the rowdy captains of junks and lorchas, and to this class it is supposed the ruffians who murdered the deceased belong. The prisoners will be sent to Shanghai for trial before the Supreme Court.

(FROM A CORRESPONDENT.)

Since the departure of the last mail an excellent opportunity has been afforded foreigners for witnessing the peculiar forms and ceremony of a Chinese lying-in-state and grand funeral obsequies, by the death of the wealthy mandarin banker, Takee, with whose name many of your readers may probably be familiar. On the evening of the second day of what might be termed the lying-in-state, accompanied by a couple of friends, I went to Takee's house. On arrival there we found a large number of Celestials crowding and staring round the entrance, which was illuminated by lanterns, and over which a curious lofty structure had been reared, composed of small panes of window-glass set in a framing of white cotton cloth, puckered and arranged by bows, rosettes, &c., into a regular pattern and panels. A number of candles and lamps were placed behind the panels of window-glass, on which figures of flowers and leaves had been roughly painted, the whole forming a light and rather elegant screen for a native orchestra, but who, no doubt, tired with their day's exertions, did not mar the pleasure of our sight-seeing by making the night hideous with their music.

Pushing our way through the good-tempered but odorous crowd we came face to face with a Municipal Council policeman, stationed at the wide-opened doors, whose business was to allow all foreigners to enter, but only such natives as bore tickets of admission or were friends of the deceased. Passing this amiable though stern-looking Cerberus and along a short passage or hall, in which we noticed a scarlet umbrella and several red wooden tablets, marks of the dead man's rank, we entered a suite of rooms brilliantly lighted by hanging glass lanterns and some overgrown candles. The rooms were divided from each other by screens or walls of open lattice-work, cleverly and very neatly contrived by curious twillings and puckerings of white cotton cloth; the knowing ones said, "white shirtings." On two of these screens, forming a central room, we noticed two eight-sided medallions with grotesque representations of a deer and a crane, which must have required no small ingenuity to compose, considering the nature and extraordinary puckered form of the material employed.

From the ceiling of this room was hanging a large mysterious-looking ornament fashioned from the same stuff, adorned with tassels and streamers, whose use or object it was impossible to divine. On the walls of the rooms, and on the screens separating the rooms from each other,—or what seemed to me dividing a very large room indeed into several smaller ones—hung strips of variously-coloured satin, inscribed with quotations from the Chinese classics in gilt and silvered lettering—votive tablets from the deceased's friends. These tablets were about twelve or eighteen inches in breadth and some six or eight feet high or long. Their more general hue was a rich dark blue or white; the former with gilt letters, the latter with silvered or gilt, but there were some of very delicate tints of other colours—pink, lavender, lemon, &c. From the top of each on either side hung a long thin silken tassel, probably for securing the tablet when rolled up into a scroll. The effect was really very elegant. These rooms were furnished with mirrors, tables and chairs, many of the latter being covered with richly-embroidered pieces of blue silk or satin. Several cheval-glasses presented an odd dressing-roomish appearance, and with some French gilt clocks, which did not go, looked quaintly out of place with their surroundings. When we arrived these rooms were filled with numbers of Chinese, either seated round the tables closely engaged with piled up dishes of their mysterious eatables, resolutely determined on the enjoyment of no ordinary chow-chow, or by others gently walking about, smoking an occasional whiff, or in the arms of a comfortable chair, taking their ease with the beaming, cordial smile and loving look of well-filled, appreciative stomachs.

The rattling of cups and dishes, the hurrying to and fro of food-laden attendants and pipe-bearers, the fumes of the viands, the smoke of tobacco, the bustle, merriment, and chatter, the brilliantly lighted and decorated rooms, the cheerful glow and jovial gaiety of all, betokened a state of festivity rather than the presence of death. At the end of the central room, however, and in view of all, was a white lattice-screened portal, on the white doors of which was written, in large blue characters, "Ling Mung"—"Gate of the Soul."

Admitted through this portal we found ourselves in a sort of chapel. Along the walls hung votive tablets on blue and white satin strips, as in the rooms we had just left, and along the sides were ranged chairs, in which the female servants of the deceased were sitting as mourners. At the head of this chamber there was a kind of altar, with sacred vessels and Gargantuan candles burning, behind which stood a raised board covered with a number of dishes, heaped up with all kinds of sweetmeats, fruit, and strange confectionery. Hanging lamps shed a brilliant light here also. Lifting a narrow white curtain on either side of this chow-chow laden board, we saw a second table on a level with it crowded with more dishes or bowls of meat, fish, fowl, and vegetables, above which rested, somewhat after the fashion of an altar-piece, a portrait of Takee, and at his feet, placed on a miniature chair, rested the Sacred Book of his belief—the "Tau-tih-King," or "Bible of the Taouists."

On one side below the picture, and with his back to it, a figure of a Chinaman, about three feet high, standing on a tea-chest, offered a pipe with one hand, and invited with the other to the good things laid out on the table before him; on the other side stood a second inviting figure, handing a cup of tea. From rude unpainted wooden racks on each wall funereal garments of some coarse fabric, ill-made and rough, were suspended—fitting vestments for mourners in "sackcloth and ashes." The coffin of Takee was deposited immediately behind this portrait, in a small, dim, bare chamber. It was richly lacquered, about seven feet in length, two wide, and about three feet high, covered with a closely-fitting crimson-wadded quilt or pall, and was placed on a slightly-raised bier; a coarse mourning robe and cap were carelessly thrown on it, for the use of his adopted son at the funeral ceremony. In answer to a stranger's inquiry as to what it was—namely, the strange-looking cap—I heard an intensely practical, I will not say irreverent, foreigner reply, "Spanish stripes," by which I infer he alluded to the material of the quilted pall. No priests were officiating on the first night of our visit, though we saw several in their white robes and skull caps moving about. Returning two evenings after, we were greeted by three loud explosions outside the entrance door, which we discovered were produced by a servant firing some gunpowder, as the signal of the commencement of a kind of mass or prayer, and during our stay this firing was repeated as often as the priests resumed prayers, after a break in them.

We entered with as little difficulty as on the previous visit. The rooms were as full and as brilliantly lighted as before, but there was no chow-chowing, and, as a consequence, I suppose, the Chinamen looked rather bored and tired with the thing than otherwise. Though they seemed pleased with the visits of foreigners, and flattered with the curiosity displayed by them, taking every opportunity to enlighten the "barbarians'" ignorance.

Passing through the portal of the "Gate of the Soul," we added to the large number of strangers who were collected in the inner chamber, or chapel, witnessing the Taouist ceremonial that was proceeding. There were nearly a dozen white-vestured and capped priests officiating. One read slowly aloud a sentence, at each word of which six or seven others, who were kneeling, bowed their foreheads to the ground. Then the chief priest, standing before the shrine or altar, and facing the portrait of Takee, receiving from a kneeling bonze on his right hand a small cup or bowl of food, sweetmeat, or confectionery, and after repeating the word of the first priest, elevated and lowered the dish of food; he then handed it to a kneeling bonze on his left, by whom it was also elevated and lowered, and delivered to a third to be carried away. The number of dishes seemed interminable, and the same proceeding appeared to me to be pursued with them throughout. At length the last dish was disposed of for that "go." The chief priest then read a paper, which I was given to understand was laudatory of the deceased's

Digitized by Google

virtues, and having placed it on a brazier of burning charcoal, and thrown a handful of silver-paper imitation sycee on it, one of the Takee's wives or widows, of whom I hear he has left a goodly number, rushed in holding the adopted son, a child, by the hand. The paper and imitation sycee flamed up and were destroyed, to the howling, banging, musical uproar, which introduces the gnome fiends and monstrous devils of a Christmas pantomime; the wife, or widow, and son rushed off as hastily as they had rushed on, and the service for a time ended. Refreshment in the form of tea and substantial "board and lodging" soup was brought in to the smiling merry-looking priests, who seemed to have arrived at the end of a service that had restrained them to a serious comportment, with immense relief, and to hail the advent of the "prog" with unbounded satisfaction and many a lively joke.

Takee having been at the head of the Ningpo Guild in Shanghai, and a Ningpo man, was taken to that port for burial after lying in state five days. The steamer *Kiangse's* cabin was entirely appropriated for conveying his body at a cost of a thousand taels (more than £300), and a funeral cortege of extraordinary munificence and extent left his house on the morning of the 16th inst. to carry the coffin down to the steamer, on which it was placed amidst the firing of many big guns. Owing to a misconception as to the time of the departure of the procession, I was, unfortunately, prevented attending it, and take the following description from the columns of the *Shanghai Recorder*:—

As an out-door spectacle, it is reported to have been superior in splendour to any in the recollection of the oldest resident. Its commencement is stated to have been paltry. A paper figure, like an elaborate scarecrow of a Guy Fawkes, called the "Kan-loo," or Road Spirit, also the "Devil Seer," preceded the procession as herald of the dead. Next came a trophy of great value—the "Tsing," or plumed standard, granted Takee by the Emperor; then a crowd, scattering imitation sycee with lavish hand to divert the malignity of evil spirits by exciting and then disappointing their cupidity. The municipal police band followed; then a long line of ancestral tablets and the Taoutai's retinue; next, borne by four men, the "Tsi-ty-yung," or Imperial Scales—another token of the favour of the Court of Peking. Then came the "splendid" portion of the spectacle. Taouist priests by twos, gorgeously robed in amber satin vestments, stiff with brocade and gold embroidery; to glean some idea of whose "shape and sheen," says the *Recorder*, you must examine the pall of Ambroise of Milan, in Vandyke's well-known picture.

After this glittering group a scarcely less gorgeous band of Bhuddist priests came, clad in scarlet, then a troup of by no means clean children—rather dirty little beggars, in fact. After whom, in the deceased's chair, veiled in red crape, the Shin-tsu-Ba, a mysterious tablet considered the seat of the human soul, now in happiness, and closely veiled lest it be perturbed by beholding the sorrow of those he loved. More Bhuddist priests of second rank followed in profusely embroidered green robes; then a closely clustered mass of tall narrow silk and satin banners inscribed with sentences recommending the soul of the departed to the genii, and recording his good acts in this life to insure him a kind reception in the next. Then another instance of Chinese contradiction—the "Djur Lan," or mourning lantern, hung before the dead man's face to enable him to recognise his friends in the next world.

The friends of the deceased then followed with his adopted son, clad in the coarse grass-cloth garments I have before mentioned; the coffin from Lintin, now covered with green instead of crimson, and surmounted by a paper representation of the "Seen-Hok," or Fairy Stork. This long cortege was closed by thirty-nine chairs, containing the wives in mourning garments, and their friends crowned with chaplets of white china-asters. With such pomp and circumstance (writes the *Recorder*) was Takee borne to the Joss-house near the Maloo, then through the streets to the river side, where, amidst salvoes of cannon, his body was placed on board the steamer *Kiangse*, which was to convey it to the last resting-place at Ningpo.

Takee's wealth is reputed to be one million taels (about a third of a million sterling), and we were told by a mandarin, at the lying-in-state, that the cost of it—the chow-chowing, priests, pageant, and other outlay, till the coffin was deposited in the grave at Ningpo, would amount to 50,000 taels (fifty thousand taels), which statement we took *cum grano salis*, but we were more inclined to believe this buttoned grandee when he said that four hundred candles were nightly consumed in lighting the house.

Takee's death brings me to that of Burgevine, with whom he once had a serious quarrel here. You will have heard before this all about his capture and fate, and that his life was reported by the Chinese authorities to have been accidentally lost by the wreck of the vessel that was conveying him to Ningpo, in consequence of the swollen and dangerous state of the river. From investigations that have since been made, there appears reason to believe this statement is true. His body, placed by the Chinese in a handsomely lacquered double coffin, inscribed "Yang-jen Pi-chi-wen," the foreigner Burgevine, was brought up here on the 11th instant by the steamer *Kiangse*, from Ningpo.

An important question affecting river frontage property has been decided by Sir Edmund Hornby, in the new Supreme Court. The Queen, on behalf of the Emperor of China, and E. A. Reynolds and A. Holtz for committing a nuisance by building a jetty at Pootung Point on land they had reclaimed from the river Wangpoo, thereby obstructing its navigation. The prosecution, conducted by Mr. Myburgh, pointed out that the original title deeds were for 40 mow of land, that by placing casks in the mud along low water mark the alluvial deposit has been increased, and a large recovery, to the extent of 35 mow of land from the river been made; that the building of a jetty would cause further deposit and encroachment on the river; that its stream was narrowed, and its eddies and chow-chow water greatly increased and endangering navigation; denying Messrs. Reynolds and Holtz's right to the redeemed land, the property of the Emperor of China, and urging that the building of the jetty should be stayed and the mole removed.

The trial lasted several days; a large number of witnesses were called both for the prosecution and for the defendants, for whom Mr Robinson pleaded *bonâ fide* belief of right to the land reclaimed; that the prosecution was bad as the Queen *v.* his clients, and other points of law; that the jetty was no impediment; that the growth of the land was from natural causes; that no one's rights or privileges were infringed by the acts of the defendants; and that other reclaimed property of this kind had not been interfered with by the Chinese authorities. The evidence was of a very contradictory nature as regards the obstruction to the river—some witnesses stating that the eddies and chow-chow water were produced by the Pootung Point and stream from the Soochow Creek; others declaring that the eddies and chow-chow waters were the causes which influenced the growth of the Point itself; some showing that the eddies had increased of late years; others again that they had grown less. In delivering judgment, Sir Edmund Hornby distinctly enunciated the law, that land between low and high water mark, unless held by special tenure, was here, as in England and elsewhere, a Crown right; that it would be absurd to suppose that the Emperor of China was to be brought as a suitor into a foreign Court sitting in his own Empire, and that the prosecution, as the Queen *v.* Defendants, was good; Sir Edmund having decided that the obstruction complained of was sufficient to be considered legally a nuisance, gave a verdict against Messrs. Reynolds and Holtz; the question of removal of the mole to remain in suspense to allow an arrangement being made with the Chinese authorities; and the works to be stopped till permission be obtained from the Taoutai to continue them; but leaving it open to the authorities to apply for an injunction on the defendants to remove the mole on evidence of a more complete and satisfactory character that it caused a real practical impediment to the navigation of the river.

Apropos of reclaiming mud flats, that in front of the British Consulate is to be forthwith converted into the long-proposed recreation ground; there is to be no bunding, but the frontage to the river will be protected by metalling in the same manner as in the Nanking Road Jetty. On the roads and public works of this settlement gangs of Chinese prisoners are now being employed as in Hong Kong.

The Gas Company have been supplying a kind of gas to a few outlying houses, but the heart of the settlement is as yet not so favoured, and many, grown weary with "hope-deferred," doubt if ever it will be. One or two native shops in the Maloo have had a sickly jet or two burning for some evenings past. It was reported that ten candles were required to make the jets perceivable; the wonder of the Chinese was strongly roused, and sundry hints were thrown out that the blue, queer-looking, small flickering flame was an infernal production—the "Devil'

Digitized by Google

ight," in fact. A few sanguine foreigners have the boldness to prophecy that we shall soon be blessed with this illuminating element. I mean gas, not Devil's light. At a late auction about twenty shares in the gas company sold at from 60 to 65 tls. each. A few ditto in the Shanghai Brick and Saw Mill Company for 25 tls. each; and some land near the old hospital, past the Ningpo joss-house, measuring 15 mow, at 65 tls. per mow.

The Autumn Regatta came off on the 19th and 20th inst. It was looked forward to with unusual interest, as two English eighths were entered for the first time in Shanghai. The opposing crews were from the residents north of Haugchow-road against those south, and were fairly matched. The race was a mile and a half one; from half-a-mile above Mr. Markham's farm to the club boat-house, by the stone bridge. It was well contested, but Mr. Stout's crew, putting on a magnificent spurt when within a quarter of a mile of home, took the south's water and came in easy winners. Owing to several fouls, which were acknowledged, after a very lively discussion, by both crews, the race is to be pulled over again. The regatta afforded good sport, several of the races being very exciting and close ones; the double sculls being won by W. Stout and H. Dent from Major and R. Dent by half a length; and the senior sculls by W. Stout by a short length, after a gallant struggle with Major.

The Autumn Races commence on the 2nd November. The weather has been for a long period warm and dry, but during the past two or three days rain has come down, and if it lasts only a day or so longer the course will be in excellent order. The betting is far from as spirited as of yore, and the "books," I should say, of very moderate proportions. The lotteries commenced a few nights since; the highest price given was $110 for "Early Purl" in the Oriental Cup, and $85 for "Sir William" in the Cosmopolitan. In pony races $60 for "Bog Trotter" in the Maloo Plate, and the same price for "Ozone" in the Celestial. The well-known "Loafer" is dead, from inflammation produced by forcing a medicine ball down his throat with a bamboo.

A new club, to be styled the "Concordia," is being organised and established here by the Teutonic dollar-grinders, its members being almost solely composed of German, Danes, &c. Its object is social and recreative.

Ting Taoutai has been appointed Acting Salt Commissioner at the departmental city of Yang-chow, on the Grand Canal. Yung will act here in Ting's absence.

HONG KONG.

The mail of 11th September arrived out on the 25th October, and the mail of 16th September on the 31st October. The dates are now down to the 1st November.

The following article on Sir Richard MacDonnell is from the *China Mail*:—

"It will be matter of some interest among our readers to ascertain the line of policy about to be pursued by our new Governor, Sir Richard Graves MacDonnell. He comes to govern a colony which has just been registered as one of Her Majesty's first-class settlements. The chief burden of his administration will be to dispose of a very handsome revenue in the most effective way possible; and it must be admitted that the amount of money raised in Hong Kong by taxation, and of course for public purposes, is really considerable. Beyond exercising a care over the public funds, we are not aware that any governor of Hong Kong has much more to do. For mere form sake, and to comply with the fashion of the age, he may give fancy balls from time to time, but his real business is to economise the revenue, either by saving expenditure, or by seeing that all money laid out is properly applied. The people of Hong Kong are all of a thoroughly practical sort, and are very apt to fret when they see public funds frittered away.

"We believe that Sir Richard will arrive here between this and Christmas; and, as we have no desire to lecture him upon the nature of his prospective duties, we simply take this opportunity of pointing out what those simple duties really are. It is worthy of observation that the public expenditure of this colony has risen enormously of late; and it is also equally true that there is very little to show for it. Suppose we take the roads, bridges (by the way, where are there any bridges?), and streets—what do we find? Nothing more than a miserable specimen of engineering talent, which by no means represents in any adequate degree the amount of money which has been voted in the annual estimates. Any visitor to Macao can notice wihhout the least effort the admirable condition of the public roads in that ancient Portuguese city. We cannot say what expenses are incurred in the matter of public works at Macao; but we should fancy that a place where a colonel's salary is set down at sixty-five dollars a month would not be liable to very heavy expenditure in the making of roads, streets or bridges.

"It is therefore to be hoped that Sir R. G. MacDonnell will exercise a tender care over the revenue and expenditure of the colony he comes out to govern, as well as an effective supervision in all matters connected with the public works. He will also find his hands perfectly full in looking after the Police Department, which has never been anything like efficient since the days of those two competent officers—Messrs. May and Caldwell. We do not blame the present superintendents of police, for we cannot forget that their duties are much harder than those of any other public officers in this island; but the intelligence of Mr. May, coupled with the expertness of Mr. Caldwell, produced results which we do not see at the present time—though some symptoms of revival seem to appear. We are rather afraid the new Governor's mind will be a little taxed in regard to the Mint affair. We have consulted numerous good arithmeticians—we may also add several algebraists—and none of them can succeed in proving that the Mint will be a profitable concern."

The following items are from the *Daily Press*:—

"Sir Rutherford Alcock, the newly appointed British Minister to the Court of Peking, passed this colony a few days ago *en route* to his post. A deputation of merchants waited on him here, and called his attention to the subject of railways. His Excellency expressed himself fully alive to the desirability of such works, but he feared that the Chinese Government had not made that progress in enlightenment which would induce the required concessions and encouragement.

"There is likely to be a little trouble between the Manderins and the United States authorities relative to the death of the filibuster Burgevine.

"The mortality of the 2nd battalion of the 11th Regiment has continued to provoke much discussion during the fortnight, the military authorities being universally blamed. When the battalion arrived in Hong Kong it was about 500 strong. About 50 have died, and about 350 invalided. Two officers died, and two were sent home invalided. There is a great responsibility resting somewhere.

"The sad evil of piracy is still on the increase. It never was half so bad as it is now, as far as square-rigged vessels are concerned. The port of Amoy is almost blockaded by pirates. The stationary senior naval officer in Hong Kong does his best to suppress the evil, and does indeed good service. But his gunboats are rotten and unseaworthy, and he seems put to some shift to make one of these craft fit to keep the sea for a week.

The following items are from the *China Mail*:—

"Clearer, cooler, and more bracing weather than we have expe-perienced for some time, the only thing which could be reasonably wished is that the thermometer might be just a little lower at midday. The former sickliness in garrison and in harbour may be said to be at an end; and the hospital accommodation, which we observe now advertised for, will arrive all too late for the preservation of the many gallant fellows who now crowd the Happy Valley.—A meeting of the subscribers and donors to the new City Hall has been held, at which a committee was appointed to decide the competition for designs, and a very satisfactory statement was made regarding the progress of the scheme. As the new Harbour Master's office is rapidly approaching completion, the building of the hall may be commenced early next year.—The establishment of the Canton and Macao Steamboat Company, and the proposed formation of a Public and Family Hotel Company speak well for the healthy enterprise existing in the colony.

A curious accident occurred in Macao a few days ago. Two or three guns in one of the forts, used to fire a salute, were found to have been loaded with ball. Some damage was done to several buildings, but fortunately no lives were lost. Several arrests have been made amongst the soldiers of the fort. A much more pleasant item of news is that which informs us of the Governor of Macao's resolve to inquire into and entirely suppress the iniquitous coolie trade, which we have so repeatedly denounced in these columns.

SIAM.

BANGKOK.

Our latest dates are to 26th Oct. The weather was favourable for the rice crops, and exporting was expected to begin about the middle of December.

JAVA.

BATAVIA.

Two heavy shocks of earthquake have again been felt at Salatiga and Ambarawa. On the 24th Oct. an eruption of the Merapi (Java) took place; stones were thrown out and a slight rain of ashes fell.

A tremendous fire has broken out at Sumbawa, destroying

Digitized by Google

2,500 houses, the palace of the Sultan, all the property of the inhabitants, the entire crop of paddy just gathered, all the poultry, &c., nothing has been saved. The heat was so intense that the metal cannons, standing before the Sultan's palace, melted. The fire took place during the day, so that only two lives were lost.

On 12th October, the barque *Roland* (from Bremen), Wieg-,commander, was wrecked on the rocks between the islands Raas and Toendo (east of Madura). Crew and inventory were saved. The ship had a valuable cargo, consisting of sugar, tin, rattans, hides and arrack, for Amsterdam.

The cultivation of cotton in Soekadana (Borneo) promises to turn out very well; the pods are now being gathered.

The war-steamers *Djambi*, *Ardjoeno*, and *Amsterdam* h ve returned to Batavia from the expedition to Assahan. A small garrison has been left at Assahan.

A revolt has broken out at Ceram. The Governor of the of the Molukkos had gone to Kaybobo, the capital of Ceram, on board the war-steamer *Metalen Kruis*, when, on the 9th, the commander going on shore unarmed, was treacherously attacked, but happily only slightly wounded. The *Metalen Kruis* immediately cannonaded the place, and on the 12th an expedition was to leave, under the orders of the commander of the land forces in the Molukkos.

MALACCA STRAITS.

SINGAPORE.

The mail of Sept. 26 arrived out on the 2nd Nov. Dates are down to the 9th. The *Straits Times* says :—

No public events of importance have transpired during the fortnight, and the public journals are principally occupied with the discussions arising out of the late proceedings of the Dutch in Sumatra, and of the local reform recommended in the last presentment of the Grand Jury, namely, the re-introduction of a gambling farm. With regard to the first of these questions,—that relating to the spread of Dutch influence and territory on the North-East Coast of Sumatra,—it is difficult not to sympathise with the outcry raised at Penang, and which is to a great extent echoed here. If we are to have honest sympathy at all, it must be with the people of those provinces, who have their institutions and government changed against their will, and not with any body of foreign merchants whose pockets only are affected. On the other hand, too, if we can justify our own policy throughout the East, and admit the advantages of civilized government, it would be difficult, on philanthropic grounds, reasonably to object to the extension of Dutch influence in Sumatra. We have found in our own experience that a people, careless and indolent under native misrule, gradually become ambitious and enterprising when they have the justice and security extended to them which a European government affords. What the English merchants in the Straits should aim to secure is, not the arrest of Dutch progress in Sumatra but a full and equable participation in all the commercial privileges which the Netherlands Government may obtain for their own subjects in their newly acquired territories. To this they are entitled to by the same treaty (that of 1824) which, in our reading, precludes any effective interference with whatever extension of territory the Dutch may, upon any reasonable pretext, seek to establish in Sumatra.

The past fortnight has been rendered somewhat gay by the Autumn Races, which were held on the 31st October and the 2nd and 4th November. To-morrow will be observed as a public holiday by all the banks and merchants, in celebration of the Prince of Wales' birthday, which, owing to the departure of the mail, could not be held to-day. The weather has been cool and pleasant during the fortnight; in fact, we are about entering the only season which may here be said to be cool.

It is announced that an American, said to be a commissioner from the United States, has obtained a concession from the Sultan of Bruni to monopolise the trade of his dominions for $10,000 per annum.

H.M.S. *Conqueror* arrived at Singapore from Hong Kong with Marines, &c., *en route* to England.

PENANG.

We have a copy of the *Penang Gazette* of 28th Oct., but there is nothing of interest to extract. The later issues will turn up *via* Southampton. we suppose. Dates are down to the 11th or 12th Nov.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANGIER—On the 10th Dec., at China-lodge, Forest-hill, the wife of F. J. Angier, of the "London and China Telegraph," of a son.

COHEN—On the 30th Nov., at Sunnyside, Edgbaston, the wife of Philip Cohen, Esq., of a son.

DENT—On the 21st Nov., at Great Yarmouth, the wife of Captain Charles Dent, R.N., of a daughter.

DICKINSON—On the 8th Dec., at Farleigh House, Kingston-on-Thames, the wife of Geo. F. Dickinson, Esq., of a son.

HOGAN—On the 16th Nov., at Edgecomb, Penang, Mrs. Jonathan Hogan, of a daughter

JENNER—On the 17th Oct., at Hong Kong, the wife of Colonel Jenner, 11th Regiment, of a daughter, stillborn.

MARTIN—On the 29th Oct., at Grange Bungalow, Singapore, the wife of Alexander M. Martin, Esq., of a son.

MOLLER—On the 30th Oct., at her father's house, Nottingham, the wife of Nils Moller, Esq., Shanghai, of a daughter.

PAGE—On the 8th inst., at Broxbourne, Herts, the wife of F.M. Page, of a son.

PERCIVAL—On the 11th Dec., at Temple House, county Sligo, the wife of Alexander Percival, Esq., of a son.

SWINHOE—On the 2nd Oct., at Takow, Formosa, the wife of Robert Swinhoe, H.M.'s Consul at Taiwan, of a son.

TARRANT—On the 29th Nov., at 9A, Westbourne-park, W., the wife of H. J. Tarrant, of the Middle Temple, barrister-at-law, of a daughter.

Telegrams from Shanghai, Nov. 9, quote exchange at 6s. 2⅛d.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—A large business has been transacted during the fortnight, and notwithstanding the restricted selection, rates have advanced.

CANTON.—Country Greens:—No sales, with the exception of 80 half-chests Hyson for Bombay, have taken place, and our stock remains as before. Canton Greens continue to be neglected, and only 100 boxes gunpowder at 18½ tls., and 500 half-chests Hyson at 20 to 22 tls. have been settled.

FOOCHOW.—The market for Congous remained dull until the arrival of the 26th August mail on the 15th Oct., bringing improved accounts from England. A large business has since been done at very full rates. Teas at 22 taels and upwards are probably worse value, but we do not quote any actual change in prices. Arrivals have come in freely, and our stock is still nearly 100,000 chests. Oolongs: There has not been so much doing in these teas; as the kinds at present on offer are not desirable, and the later fourth crop teas are expected to offer a better assortment for selection. Scented: A large business has been done in these kinds; at reasonable prices, if the export were not double last year's, and if the late period of the year had not caused a deficiency of aroma in the jasmine flowers with which they are scented.

SHANGHAI.—Black:—Considerable activity has prevailed in thi market during the past fortnight, and a large business has been daily transacted, settlements reaching a total of 66 chops. Prices have ruled irregularly, but our last lower quotations were current until the arrival of the 26th August mail, since when buyers have paid 1 to 1.5 tls. advance. Supplies arrive somewhat freely from Kiukiang, although slowly from Hankow; our stock, however, is still considerable. We quote second and third crop Opacks, 22.5 to 28 tls.; second and third crop Ningchows, 21 to 28.5 tls.; second and third crop Oonahms, 18 to 24 tls.; second and third crop Hohows, 17 to 18.5 tls. In greens there has also been an increasing business on American account, and prices for Moyune descriptions have advanced 2 tls. Pingsueys have attracted more attention, and 8 chops have been placed.

HANKOW.—Up to the arrival of the English mail of 26th August, the market had been quiet with a generally easier feeling, but the improved, advices at once encouraged holders to be firm. The majority of the teas in stock are under advances to the banks, and teamen, conscious, too, that the yield will be some 5,000,000 lbs. under last year's, are by no means anxious to realise. Settlements reached 35 chops, nearly all common teas. The St. Andrew's Castle had sailed for London, and there was no vessel on the berth. Quotations were, Oopacks and Oonams, common to fair, 12 to 20 tls.

KIUKIANG.—Black Teas: The quality of the teas offered was so low that very little had been done by buyers, though upwards of 11,000 packages had been shipped to Shanghai on active account. Prices might be quoted a little lower. The stock consisted of 6,900 packages, all common teas. Quotations were:—Ningchows, common to fair, 14 to 20 tls.; Hohows, common, 12 tls.

YOKOHAMA.—A fair amount of business has been transacted in Tea since the date of our last; purchases being still small for England: the principal shipments are to San Francisco and New York. Stocks are very much reduced, and in the absence of any large quantities coming forward from the interior, the Teamen have advanced 10 cents for medium qualities. Settlements for the fortnight are estimated at 4,200 piculs. Stocks are reduced to about 1,800 piculs. Quotations are:—Common, $17 to 19; good common, $21 to 22; medium, $23.50 to 24.50; good medium, $25.50 to 26.50; fine, $27 to 28; finest, none. Shipments for the season to Europe 1865-66 485,275 lbs. Same time, 1864-65 780,176 lbs.

RAW SILK.—The new feature in the trade is the export from Japan of Silkworm's eggs. The supply appears unlimited, and as the climate of Japan is pretty severe in the winter, the worm must be of a hardier nature than the sort hitherto bred in Europe. In this view of the case, this new feature in the silk export, may create an entirely new development of the trade, for there is no saying how far to the North of Europe it may extend. Of raw silk the French steamer took 735 bales—the present conveyance takes about 1,700 bales.

SHANGHAI.—There has been less activity in this market throughout the fortnight, caused by the extreme quotations now demanded by the dealers, the settlements having barely amounted to 1,000 bales, the bulk of which are Tsatlees. Prices show an advance of Tls. 15 to 25 per picul, and, although there are very few buyers, the Chinamen appear firm, influenced by the unprecedentedly high rates now ruling in the producing districts. The arrivals from the interior are estimated at 1,000 bales, and from Ningpo 29 bales, so that unsold stock shows no alteration. The transactions of the fortnight are estimated at 1,000 bales, against 3,000 do. corresponding fortnight last season, and 2,250 do. the season before. The total settlements this season to date amount to 26,500 bales, against 16,500 corresponding period last season, and 17,500 the season before. The present unsold stock is 2,000 bales, against 4,000 same time last year, and 11,000 the year before. Quotations:—Tsatlees, No. 1, Tls. 610 to 615 per picul; Taysaams, No. 1, Tls. 520 to 530 per picul.

YOKOHAMA.—Our market has advanced fully 30 dols. per picul with still an upward tendency. A few bales of good Maibash have been taken at 820 dols. per picul; which at present exchange we make to lay down in London at 33s. 6d. Regarding the expected yield for the season, no reliable information can be obtained, but it is now said that the total export is not likely to exceed 15,000 bales. Thus putting the total export from China at 55,000 to 60,000 bales (of which 42,000 has already gone forward) we shall have a total export from the East of 70,000 to 75,000 bales; not including Canton, Bengal, or Persian silk. The settlements of the fortnight amount to 583 bales, making the total settlements of the season to date 4,493 bales, against 2,749 corresponding period last season. The present unsold stock on the market is estimated at 1,700 bales. The present mail conveys about 2,000 boxes of silkworm's eggs. Eight French gentlemen are in charge of them.

CAMPHOR.—(Hong Kong.)—We are still without any arrivals, and consequently have no stock. Nominal quotation is $20 packed.

Digitized by Google

CHINA IMPORTS.

HONG KONG.—Cotton Yarn: Fully maintains the quotations given under date of last report, and the article is now in very small stock. The settlements of the past fortnight are estimated at 350 bales, more than one-half of which consists of re-sales effected on the part of Chinese speculators. Grey Shirtings: Prior to the arrival of the Benares the market for these goods in this colony was extremely dull, and somewhat lower prices than those current at the date of the departure of the last mail steamer would have been accepted; since, then, however, the advices of the rise in cotton manufactures in Manchester have materially strengthened the hands of holders, and an advance of fully 10 to 15 cents has been established. The sales comprise 11,000 pieces, together with 20,000 pieces reported as purchased "to arrive" by a foreign firm at $4.60 per piece for lbs. 8.4 goods. Two thousand pieces of damaged goods have also been moved off by auction. White Shirtings: The bulk of the business transacted in these goods during the fortnight consists of sales by Chinese; 1,600 pieces have been sold by importers, and 1,900 pieces have changed hands from second buyers. T-Cloths: Are in extremely small stock and the sales of the past fortnight are limited to 3,500 pieces from first hands. 5,000 pieces have been sold by Chinese. American Drills: The market continues bare of these manufactures. White Spotted Shirtings, Dyed do., Brocades White and Coloured: There are not any sales to report of these good. Damasks and Chintzes: 500 pieces of the latter have found buyers during the fortnight.

COALS.—Hong Kong: A paucity of supplies has again to be reported, only one arrival having taken place during the fortnight, consisting of a small cargo of Australian, which sold at $9.50 from alongside. Since then, however, sales of this description have taken place at $8 to arrive. No transactions are reported in English or Welsh, which are quoted $11.50 and 12.50 respectively. Shanghai: The market has been more quiet during the past fortnight in consequence of the advancing rate, for cargoes in godown and afloat, having prevented purchasers from buying so freely. English Steam Coals from godown, which have been selling at tls. 9 to 10 per ton, according to quality, are now at tls. 9.5 to 10.5 per ton; Cardiffs are at tls. 10.5 to 11 per ton. American coals have been sold at tls. 10.5 to 11 per ton from godown. Sydney coals are in fair stock afloat. The rate is for "Bulli" and "Osborne Wallsend," tls. 8 per ton, at which half the arrivals have been closed. "Warratah" coals to arrive were sold a fortnight ago at tls. 7.9 per ton.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 17, off the Start, from Singapore, Blue Jacket; at Deal, from China, Dunmail; at London, from Colombo, Princess; from Singapore, Caldew.

DEPARTURES.—Dec. —, from Amsterdam for Batavia, Sourabaya Packet; from Bremen for Hong Kong, Congress; 5, from Aberdeen for Hong Kong, Ada.

CASUALTIES.—The Ada (ship), Jones, from Aberdeen for Hong Kong, whilst getting out of harbour, took the ground on passing the lower jetty, but got off next tide, all well, and proceeded.

SPOKEN.—Shantung, from Penang, 32 N., 33 W.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From Shields, Oct. 23, Adeline; Oct. 24, Mathilda.

At YOKOHAMA.—From Liverpool: Oct. 8, Brilliant. From Amsterdam: Oct. 5, Cherpeon.

At SINGAPORE.—From Liverpool: Oct. 31, Bintang. From London: Nov. 7, May Queen. From Sunderland: Oct. 23. Jacoba Cornelis. From Cardiff: Oct. 25, President Plate. From Hamburg: Oct. 19, Charlot; Oct. 30th, Tek Li; Nov. 5, Fontenoy. From Rotterdam: Oct. 23, Nederland Vlag.

At PENANG.—Southern Cross (*via* Madras).

DEPARTURES.

From HONG KONG.—For London: Oct. 27, Chrysolite.

From HANKOW.—For London: Oct. 10, St. Andrew's Castle.

From SHANGHAI.—For London: Oct. 21, Glencairn and Lord Clyde; Oct. 24, Polmaise.

From YOKOHAMA.—For London: Oct. 10, Seringapatam. For Suez: Oct. 14, Shaftesbury.

From MANILA.—For Boston: Oct. 16, Cutwater.

From NAGASAKI.—For London: Sept. 13, Atlantic.

From BANGKOK.—For London: Oct. 19, Hampton Court.

From SINGAPORE.—For London: Nov. 1, Xantippe; 7, Maggie. For New York: Nov. 4, Azalia. For Bordeaux: Nov. 6, Maria.

From PENANG.—For London: Nov. 7, Balnaguith.

VESSELS LOADING.

At YOKOHAMA.—For London: Senior Hobley, Cleveland.

At SHANGHAI.—For London: Glencoe, Helen Nicholson, Wild Deer, City of Quebec, Ensign, Horsa, Prince Albert, Queen of the Ocean, Robin Hood, Invincible, Whitehall. For Liverpool: Patna. For New York: Finzel, George Becker, Podesta.

At FOOCHOW.—For London: Alexandrina, Esperanza, Banian (full), Lord Macaulay (full).

At KIUKIANG.—For London: Emperor.

At WHAMPOA.—For London: Annie Archbell, Arab Steed, Lanton, Stirling-hire, Spanker.

From UNITED STATES to CHINA, &c.—None.

From CHINA, &c., to ENGLAND and CONTINENT.—Oct. 11, Foochow, Shanghai to London, and Schwinge, Batavia for Rotterdam; 14, Ellen Roger, Shanghai to London, and Queen Bee, from Foochow for London; 15, Heville, Shanghai to London; 17, Allendale, Hong Kong for London, Dunkeld, Shanghai for London; 20, Etheldreda, Samarang for Falmouth; 21, Kelso, Shanghai for London; 24, Statesman, Shanghai for London; 25, Yeavering Bell, Foochow for Comes; Art Union, Shanghai for London; 26, Berwickshire, Foochow for London; 27 Veronica, Macao for Liverpool; 28, Fory, Foochow for London; Florence Nightingale, Amoy for London; Rowena, Singapore for London; Northern Crown, Nagasaki for London; 30, Caldbeck, Singapore for London.

From CHINA to NEW YORK, &c.—Oct. 20, Surprise, Yokohama for New York; 25, Panama, Canton for New York; 30, Glen Aros, Foochow for New York.—16, Kate Carnie, Hong Kong for Buenos Ayres.

BANKING IN FRANCE AND ENGLAND.

(FROM OUR PARIS CORRESPONDENT.)

In consequence of the great attention lately drawn to the various systems in operation in England, France, and elsewhere in connection with national banks, the Minister of Commerce has caused an inquiry to be set on foot in Paris on the subject, and several eminent financiers and bankers have been examined before the commission appointed for the purpose. The relation of M. Adolphe Fould to the able Minister of Finance, and the experience of the family to which both belong, give special interest to the opinions of that gentleman. M. Fould blames the directors of the Bank of France for having lost sight of the principle of national banking in giving too general a scope to the operations of that establishment, and especially, to quote his own words, for "having applied its circulation to matters which do not circulate, that is to say, to loans on shares." If the Bank had confined its operations to the discounting of commercial paper, M. Fould thinks, not that the variations in the rate of discount would have been avoided, but that they would have created less sensation in the country; he would confine the discount operations of national banks strictly to the cashing of commercial paper having at the utmost three months to run. As regards the security of the Bank itself, he is not of opinion that the rest should be used for discounting purposes; for although commercial paper is good security the public funds are better, and the amount realised would confer little benefit on commerce, and would in the case of a crisis be no more than a drop in the ocean. M. Fould is specially opposed to the discounting by the Bank of France of foreign paper; for, he says, in difficult times the Bank would have to go to London for gold, and that would cause the Bank of England immediately to raise its rate of discount, and this, reacting on France, would give rise to exchanges which would completely annul the value of the operations of the Paris Bank in foreign securities. He regards all speculative operations as utterly opposed to the object of a national bank, whose duty is to maintain a proper proportion between its metallic stock and its issues, which it can always do, he argues, without having recourse to dealing in the precious metals, or, in other words, without buying ingots as some persons recommend. With respect to the elevation of the rate of discount M. Fould puts his opinion in the plainest language, he says:—"It is better to raise the rate of discount than to refuse a certain quantity of paper. In cases in which credit and commercial honour are engaged, the merchant will always prefer paying a high rate to not having the money. A distinction may always be made with regard to the paper presented for discount; that which is created simply for the purposes of speculation with the money of the Bank should always be refused. Such distinction should be made not only in times of crises but also when the market is calm."

M. Fould thinks the mechanism of the Bank of England, which sets a fixed barrier around its circulation, inferior to that of the Bank of France, in which the matter is left to the prudence of its directors. In the latter the emission of notes may amount to a third of the metallic stock, and even more if the circulation is represented by good commercial paper of not more than three months' date. If, he adds, this circulation be represented by other securities, even the proportion of one-third may be a reasonable cause for uneasiness.

M. Henry Cernuschi, an economist, examined before the commission, placed the question of recent fluctuations in the following broad and true light:—"Crises become more frequent in proportion as commerce becomes more extended. There is also another cause which may augment the crises, namely, the refinements of banking systems. In England the use of economic modes of payment is largely developed. A colossal business is done there with a very restricted metallic stock. The stock,

Digitized by Google

when thus reduced, is more sensible than it would otherwise be to importations and exportations of the metals. The arrival of a ship charged with gold formerly, let us say, produced an abundance in the proportion of *one;* to-day the arrival of a like quantity may have an effect say to the extent of *two*. On the other hand, the export of a certain quantity of gold from England exercises now a days more than it did in times when it worked with metallic reserves relatively much larger and under a less perfect system of payments." The same witness adds, which no political ceonomist should require, but which contains a truism often overlooked :— "It is believed pretty generally in France that establishments may be founded to give things cheap, that is to say, at rates lower than their value. It is utterly impossible to create a fixed tariff for rates of interest. If you fix the value of money you must fix the price of all other commodities. All prices form an equation. You cannot change one of the terms without changing all the rest."

A telegram from Shanghai, dated 26th October, informs us that "Chief Justice Adams is dead." Considering that the death of Mr. Adams took place in this country between three and four months ago, the news is somewhat stale, and we shall not be surprised if a telegram shortly announces the demise of Queen Anne.

Trubner's American and Oriental Literary Record says :—Two new volumes of the Transactions of the Batavian Society of Arts and Sciences (Verhandelingen van Het Bataviaasch Genootschap van Kunsten en Wetenschapen—Vols. 30 and 31, 4to.; Batavia, 1863, 1864) have been received in Europe. The contents are (Vol. 30) 1. Verslaag omtrent et eiland Nias en deszelfs bewoners (Report on the island of Nias and its inhabitants), with plates and map. By T. T. Nieuwenhuisen and H. C. B. von Rosenberg. 2. Lajang Damar Woelan. Javanese. This is a Javanese prose translation (by Mr. J. L. A. Winter) of an epic poem in the same language on the exploits of the Princess Prabu Kenya, of Majapahit. 3. Geregtelijke Geneeskunda (medical jurisprudence), translated from the Chinese by C. F. M. de Grijs. The Constitutio Criminalis Carolino, published in 1553, ordains, among other things, that in cases of poisoning, child-murder, wounding, &c., where the judge may be in doubt, a regular physician should be called in; and this work must, therefore, be looked upon as the first European handbook of medical jurisprudence. It appears that similar regulations have existed from time immemorial in China, and that they were first printed in the work of which the above purports to be a translation, and which appeared first in China between 1241 and 1253, and which has since been printed in many editions, with annotations by native Chinese scholars. This translation, taken in conjunction with the interesting paper "On the Medicine and Medical Practice of the Chinese," by James Henderson, M.D. (Journal of the North China Branch of the Royal Asiatic Society, New Series, No. 1.) referred to in No. 6 of the *Record* (p. 112), throws much light on Chinese medical science, and will therefore be welcome to European savants.—(Vol. 31). 1. De Formveranderingen der Maleische Taal (the formative changes of the Malay language), by H. Von Dewall. This paper treats fully and ably the important question of Malay derivation, derivation being the whole pith and marrow of Malay grammar. 2. De Munten van Nederlandsch Indie (the coins of Dutch India) described and designed by E. Netscher and S. A. van der Chijs.

THE Chinese Government is said to have commissioned a French officer to establish a mint at Peking, at which Chinese coins are to be made after the model of those in France.

MORTALITY OF TROOPS AT HONG KONG.

(THE TIMES.)

At Hong Kong there was stationed, at the beginning of the present year, a force of Europeans, comprising, in the whole, 1,204 souls. The chief strength of this garrison consisted of the 2nd battalion of the 9th Regiment, but a detachment of the 11th Regiment was also quartered on the island, and a small contingent was likewise contributed by the Royal Artillery and Engineers. In the month of June the 2nd battalion of the 11th Regiment arrived from the Cape of Good Hope, and brought the total numbers of the garrison up to 2,079; but is must be understood that these figures include not only officers and men of all ranks, but women and children too. What we are now going to state will scarcely be believed, but it is the simple truth that, before eight months of the year were over, very nearly one-fourth of these men, women, and children were either dead or dying. The exact returns are as follow :— Of officers, four died and five were invalided; of men, 95 died and 202 were invalided; of women, 9 died and 38 were invalided. The poor little children furnish the worst tale of all. Of these helpless creatures there perished on the spot no fewer than 88, while 45 resisted long enough to be registered as "invalids." Altogether, in a little community of some 2,000, 196 died and 290 were invalided, not in a single year, but in two-thirds of that time. The returns of a whole year at the same rates of death and sickness would give 750 casualties. In less than three years the entire force would have disappeared.

This terrible report, though it might be matched by the returns from certain Indian stations in certain years, far surpasses even that alarming average of Indian mortality which so startled the public a short time ago. It is probable, too, that the mere records of "invaliding" will fail to convey any adequate idea of the facts expressed. The sick were at death's door. Sometimes they could not be moved to the hospital-ships waiting to carry them off; indeed, we gave a picture of the reality a few days since in the description of a certain scene in Japan. It was from Hong Kong and from this prostrate and perishing garrison that the "invalids" were brought who landed at Yokohama in the autumn. Those miserable men and women who dropped down helplessly on reaching the shore were the men and women who had not quite died at Hong Kong. Nor was the condition of those left behind much better. There must have been much sickness falling somewhat short of "invaliding," for the 11th Regiment, which had landed upwards of 700 strong, could only muster one hundred men actually fit for duty a few weeks after its arrival. Of course this sickness increased the severity of the duty, and so aggravated the evil. The few who could carry arms were called upon for excessive work, and were thus sent by fatigue and exposure to join their comrades in the hospital.

We hope these facts will not pass without immediate inquiry. It is fair to state that the season must have been unhealthy, for the mortality was great even among the families of civilians well quartered and provided for. But it must also be stated that in the opinion of those on the spot the fearful ravages of disease were mainly due to bad lodging defective accommodation, and general mismanagement. The 11th Regiment found nothing ready for its reception in China, and even less, if that were possible, in Japan. The troops arriving from the salubrious climate of the Cape were exposed without any protection to the malaria of their new station, and when, as was natural, they sickened by hundreds, there were none of the requisite appliances for treating or relieving them. The hospitals, indifferent enough in themselves, were soon overcrowded, and the men had to take their chance in their own wretched quarters. The medical staff, as we remarked the other day, was represented for a great part of the time by a single surgeon; and no misfortune, indeed, seems to have been wanting to complete the fatality of the visitation.

It is probable that Hong Kong could never be made a healthy station. It is but too likely that no other spot in the immediate vicinity would be much better than Hong Kong. But, if our troops are to be quartered in such places, we may at least mitigate the risk of the service by all the precautions available. At least, we may establish commodious barracks with all suitable accommodation, and take care that when troops are expected all due preparation shall have been made for their reception. There was nothing that we know of in our relations with China to create any sudden or extraordinary demand for a military force. As far as can be seen, the garrison at Hong Kong must have been upon its ordinary footing, and any detachment arriving there ought to have found either regular quarters or accommodation prepared. In the emergencies of war such privations as we have been describing enter into the risks and conditions of military service, but no such excuse can be given when, in time of peace and in the absence of pressure, our soldiers are exposed to such sufferings and perils as have now fallen upon the unfortunate garrison of Hong Kong.

Literature.

Mr. Murray, of Albemarle-street, has now published the *Chinese Miscellanies*, by Sir J. F. DAVIS, Bart., K.C.B., which we announced some time ago as nearly ready. Most of these "collectanea," as Sir John modestly styles the contents of the little volume, have already been laid before the public in the Quarterly Reviews or in the proceedings of various learned Societies. That being the case, the value of the book is precisely that stated in the motto—the convenience of having in one collection a number of things selected from sources not likely perhaps to be found together in an individual library. Altogether, the volume is a necessary one to all who take an interest in China. The writer is one of the highest European authorities on the subject, and his determination to reprint these papers is a sufficient proof of the value set on them by the public in their separate form, which will be much increased by the certainty that they have now been revised, and, if needful, corrected by the author. We trust, however, soon to see another original work on China from Sir John's pen.

Messrs. James Griffin and Co., of Portsea, have published a very fine steel engraving of Admiral Sir Michael Seymour Commander-in-Chief at Portsmouth. Sir Michael will shortly be relieved from his post, and it is a good proof of his popularity that a publisher has undertaken the expense of this portrait. We can answer for all old residents in China fully appreciating this feeling.

The *British Army and Navy Review* for December merits very high praise for the papers that form its contents, while the "Mess Room Companion" that accompanies it ought to ensure its being found at every such place of assemblage, whether in barracks or on board ship. The "Companion" is a handsomely and very clearly printed register of the distribution of the Army and Navy, so managed that it can be framed and hung up for the easier general reference.—The *Revue de l'Orient* (Paris, Duprat) for last quarter has among its pages some very interesting "Fragments of the General History of Japan, from 1598 to 1616," by M. Leon Pagès, principally in reference to the labours and martyrdom of the early Catholic missionaries.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, DEC. 7.

As I anticipated in my last, his Majesty accepted the resignation of Mr. G. H. Betz as Minister of the Financial Department, and Mr. Olivier, Minister of Justice, is appointed in his place *ad interim*. The resignation of Mr. Betz is generally regretted. During the four years that he was at the head of that important department he carried through many valuable measures,

Digitized by Google

such as the abolition of the taxes upon fuel, the commercial treaty with France, the treaty about the sugar duties with England, France and Belgium, the regulation of our excise upon sugar, the abolition of the commercial excise duties, the new tariff of customs duties, etc. The balance of the debit and credit of his acts as Minister is certainly much in his favour. Opposed to all these important laws and measures can only be reckoned a private letter, which was addressed to an incautious friend, who abused its tenor and compromised its author, and brought on him the charge of having used his influence upon the elections for the States General in Limburg. The letter in question—which was written in the spring of 1864—would never have been put to a party use if the Minister had not felt himself obliged to lay before the members of the States General a Bill for increasing the *impot foncier* in Limburg, which province had paid 300,000fl. per annum too little. The Opposition immediately took hold of this affair, hoping that not only Mr. Betz, but the whole Cabinet would be obliged to resign. The *comfreres* of the *Dagblad* said that not only had Mr. Betz written a letter, but that our Premier also, Mr. Thorbecke, wrote to his friends. Nothing, however, has been produced from his hands, and the Cabinet stands as firm as ever. I do not come to this conclusion because all the Budgets have been voted by a great majority; on the contrary—that for the colonies has not been debated, because the members reserve their forces and arguments for the discussion on the Culture Bill; and, secondly, the Budget of the Financial Department has not been discussed at all, as Mr. Olivier only asks a credit of the Chamber till the successor of Mr. Betz is appointed.

The strength of the Cabinet is proved rather by the fact that the motion of Count van Zuylen (from Arnhem) for an inquiry into the letter-writing and intrigues of the Cabinet, and which, if agreed to, would have been tantamount to a vote of want of confidence, was repudiated by the majority in the sections. I think now Mr. Van Zuylen will be wise enough to spare himself a further check, which he will certainly experience if he brings his motion forward for debate.

Another member of the Opposition brought forward a motion proposing to bring on discussion on the Bill for increasing the land-tax in Limburg. Mr. Olivier objected; but as the motion was backed by a majority—though a small one—the minister will be obliged to act according to its wishes. There exists no doubt that the Bill will be passed, which will be a great triumph for Mr. Betz.

Mr. van der Maesen de Sombreff, the unlucky friend of Mr. Betz, has resigned his seat, but is again a candidate for Maastricht, where the election will come off on the 12th July. The Bill about the cultures on Java is now to be examined in the sections, and will soon be debated. The reporters appointed are—Rochussen, Blusse, Myer, van Bosse, and van Huckelom. The party-fight will be a pitched battle, because the Colonial Question will be discussed in its entirety, and will, doubtless, be decided in a liberal sense.

Baron van Hall, ex-Minister of Finance, is seriously ill, and it is generally thought that he will not recover.

The First Chamber of the States General will meet on the 12th inst., for the discussion of the Budgets.

An election for a member of the Second Chamber of the States General took place at Leeuwarden on the 1st inst. Mr. J. Andrea—a Liberal, but not a Ministerialist—obtained the majority, having 820 votes.

Mr. Herman van Sonsbeck, ex-Minister of Foreign Affairs, died on the last day of November, 69 years old.

The rinderpest spreads itself more and more, notwithstanding the measures of the Government. Three provinces outside the *cordon sanitaire* have been attacked. Since the outbreak of the plague 9,950 p. of cattle have been attacked, of which number 3,006 p. died, 2,678 p. were slaughtered, and 2,791 recovered.

Prince Frederic left the Hague to-day for Berlin, to assist at the marriage of Princess Alexandrine, daughter of our Princess Marianne, divorced wife of Prince Albert of Prussia, with the Prince of Mecklenburg. The mother presents the bride with one million thalers and a seat in Silesia.

COMMERCIAL.

COFFEE.—The market remains in a firm condition, and there was a good inquiry from the out-ports. Not less than 95,000 bgs. were delivered during the month of November, against 89,983 bgs. in 1864, and 14,971 in 1863 in the same month. Stock of the Trading Company, 108,000 bgs; on warrants, 144,209 bgs.; and total stock in Holland, 287,000 bgs., against 441,800 bgs. in 1864.

SUGAR.—There is a fair inquiry, prices of the last auction being firmly maintained. Holders, however, decline to operate without an advance, so that the sales were restricted. The business includes 2,000 kranj. Java, floating. The unsold stock of the Trading Company consisted of 21,647 kranji. and 3,439 bs. Java, against 18,076 kr. in 1864. Stock on warrants, 72,202 kr., against 68,815 in 1864. Private stock, 31,690 kr.

TEA.—There has been an almost total cessation of demand since the last mail, and although rather more inquiry has appeared within the last days the sales are only small. For China Congou was paid 100 to 105c., and 93 to 95c. for Java.

RICE.—Uncleaned, without stock; for cleaned there is a fair inquiry, and very moderate supply, prices being firmly maintained.

SPICES.—There is no improvement in the demand, and the sales are restricted to those for consumption. Nutmegs, No. 1, are paid with 84c.; No. 2, 74c.; No. 3, 53 to 54c.; Mace, D, 90 to 91c.; E, 85 to 87c.; Cloves, No. 2, 27c.; No. 3, 26c.

TIN.—The market ruled firm last month, and a large amount of business has been done, though the high value of money has somewhat checked speculation. Banca tin was quiet in the beginning of the month of Nov. at 57¼f., but after the advance of £3 in English tin improved to 58f. A quieter feeling followed, and a decline took place to 57¼f. At this price, however, buyers came forward, and the reduction in the Bank rate of discount in London to 6 per. cent., and the new advance of £2 in English tin, gave great strength to our market, which gradually recovered, closing at 58f., with considerable business doing—about 6,000 slabs were sold. In Billeton Tin, small transactions have taken place at 57½f., stocks being very light. 500 piculs Straits, afloat from Penang, were sold at private terms, probably, 56½f. ex ship here. Stock on warrants, 109,459 slabs; Trading Company, 90,300 slabs.

HIDES.—On the 28th the following parcels were sold by inscription—206 p. dam. Sowrabaya Rinder 5¼ kilo., at 31c.; 90 p. Samarang, do., 3⅝ kilo., 38¼c.; stock, 8,973 p. E.I., 11,928 Buffalo, Nov. 1864, against 25,776 p. E.I., 6,466 p. Buffalo, on that date in 1865.

RAW SILK.—The 393 bls. which were offered in auction by the Trading Company were sold as follows:—165 bn. Japan, Maibash, 37f. to 44f.; 43 bn. Japan, Sinchiu, 39½f. to 45f.; 28 bn. Japan, Sodai, 31½f. to 37¾f.; 15 bn. Japan, Oshui, 34½f. to 39½f.; 8 bn. Japan, Koshue, 35f. to 38½f.; 21 bn. Japan, Mashtah, 30f. to 32¾f.; 30 bn. Japan, Hatchojee, 30½f. to 34¼f.; 57 bn. China, Tsatlee, 36f. to 41f.; 25 bn. China, Taysaam, 31f. to 34¾f. The 80 bales Japan silk offered privately were sold as follows:—15 bls., at 43f. to 45f.; 49 bls. Maibash, 40¾f. to 44½f.; 12 bls. Mashtah, 33¼f. The auction was, notwithstanding there were but a few buyers, very animated. The greater part was sold for English account The Hadchojee were sold at 6f. to 7f.

COTTON.—Notwithstanding the reports from Liverpool were favourable, our market remained dull, and no transactions took place, in consequence of the high demands of the holders. To-morrow will be sold at auction by the Trading Company 1,375 b. Tinnevelly fair, valuation, 92½c.; 298 b. Japan good fair, valuation, 95 to 97½c.; 270 do. middling fair do., 90c.; 1,179 b. Dhollerah fair do., 92½ to 95c.; 119 b. Broach middling do., 80c.; 66 b. do. fair, valuation, 92½c. Stock of E.I., 2,400 b., against 4,400 b. in 1864.

JAVA INDIGO.—A moderate private business doing by want of supply. The parcels arrived within the last month will, however, soon be brought into the market, in consequence of the firm condition which prevails. The 151 cer. Caracas, which were offered in auction, were all sold at advanced prices, viz., from 165 to 400c.

ARRACK.—The market is firm, but the business passing is only small. Only 67 casks and 40 ½ casks Alcohol Batavia ex Lammina Elizabeth were sold.

TOBACCO.—There was a good business doing during the last month. The stock of Java tobacco was almost sold, and for some fine qualities there was much demand, but no supply; for ordinary qualities the market is cheaper. Manila tobacco is dull; the sales are trifling in extent. The 289 b. Java offered in auction were sold in average at 30c.; 99 b. ditto, trade mark Solo, at 23c.; and 21 b. M. L. S. at 19c. Stock: 14,051 b. Java, 4,302 b. Manila.

DRUGS.—The following parcels were sold:—Gummi Elasticum, 2,200 kilo.; Java, 2a at 124f.; 1,350 kilo. Padang 2a at 111f.; 300 kilo. Getah Gitang at 66½f. per 50 kilo. Gutta percha, 104,000 kilo. Macassar were sold at 104c. to 198c. per ½ kilo.; 16,100 kilo. imported from Sumatra at 56c. to 88c. per ½ kilo.; 9,000 kilo. Gummi Damar, Batavia, at 28c. to 28½c. per ½ kilo.; 275 kilo. Java Cocoa Nut Soap, 1a 157c. per ½ kilo. 13,000 kilo. Cassia Vera, 33½c. to 40½c. kilo. All was sold.

SHIPPING.—ARRIVALS.—Nov. 26, at Brouwershaven, from Batavia, Jacoba; at Texel, from Tjilatjap, Constance; Dec. 1, at Brouwershaven, from Samarang, Maria Magdalena; 3, at Brouwershaven, from Samarang, Andromede; at Texel, from Batavia, Drie Gezusters, Australie, Maria Catharina.

DEPARTURES.—Nov. 30, from Texel for Batavia, H.M. ship Heldin; China for Japan, Dec. 1, from Brouwershaven for Batavia, Johannes Athnonius, Otto, St. Jan; from Texel for Batavia, Quartet; 3, from Brouwershaven for Japan, Macassar; from Zierikzee for Singapore, Catharina Maria; 6, from Brouwershaven for Batavia, Stad Delft; 7, from Brouwershaven for Batavia, van der Palm.

LOADING.—At Rotterdam, for Batavia and Sourabaya, Lammina Elizabeth, Maria Anna; for Batavia, Noord-Brabant, Catharine Maria; for Kanagawa, Duo Decima; for Padang, Heimath; for Samarang, Nagasaki; for Singapore and Hong Kong, Henriette Elizabeth Suzanne. At Amsterdam, for Kanagawa and Decima, Gloria; for Padang, Henrietta; for Macassar, Ystroom; for Batavia, Tagal, Waterloo, Goede Verwatching Ymuiden; for Samarang, Stad Assen; for Sourabaya, Passaroeang, Sindbad, Laura and Adèle, Alcyone.

PASSENGERS OUTWARD.

To JAVA.—Per Quartet: Mr. Cavalje and family, Mrs. J. Wolf, and A. Ernstma. Per Stad Delft: Messrs. Kam and family, Meysenheym, van der Leeuw, Hisgen, Tap, van Eik, Groudhout, Dirkx, Mrs. Harmsen and family, Mrs. van Been and family, Messrs. Gerretson, van Bergen, John, Caar, Belle, Mertens, and Passius.

PASSENGERS INWARD.

From JAVA.—Per Australie: Messrs. Spengler and family, Vermandel and family, Romsedaal and family, Engelbrecht, Betz, Rrien, and Sicet. Per Drie Gezusters: Mr. A. Muller and family, Mrs. C. Grashuis and family. Per Maria Catharina: Mr. Blod and family.

RUSSIA, GERMANY, &c.

HAMBURG, DECEMBER 7.

(FROM OUR CORRESPONDENT.)

Full particulars of the result of the late Nijni-Novgorod have now been officially published in the Russian journals, from which it appears that the total of goods sold amounted to 98,270,320 roubles (being 6,045,870 rbls. more than last year), and goods unsold, 13,186,680 rbls.; so that the total value of the goods brought to the fair was 118,782,000 rbls., being 1,334,400 rbls. more than in 1864. Of this quantity 83,130,350 rbls. were of Russian produce, 9,858,000 rbls. European and Colonial, 3,823,000 rbls. drugs and drysalteries, 7,255,000 rbls. Chinese, 2,312,000 rbls. Bokhara and Khiva, 2,280,700 rbls. Persian, and 2,788,550 rbls. Trans-Caucasian. To this must be added 1,325,000 rbls. spent in the hotels; also for the sale of bread and other provisions; at the theatre, for seeing sights, sale of photographs, agio on gold charged by the money-changers, and various other minor items making up the above sum. Many of the regular buyers who received goods on credit at the last year's fair, and ought to have paid for them at this, did not make their appearance at all, being sufferers from the numerous conflagrations this last summer in various parts of the empire, and unable to meet their engagements. There was, however, no scarcity of money, and bills at 12 months' date were readily discounted at 6½, 7, and 8 per cent., according to the supposed solvency of the parties and the credit they enjoy.

The Siamese Government has appointed a Consul at Berlin, in the person of Herr Adolph Markwald, who has just received his *Exequatur*. This appointment is made by right of Art. 2 of the Commercial Treaty between Prussia and Siam, bearing date February 7, 1862.

Preparations are making at Leipzig to celebrate with great festivities the Easter Fair there next year, it being the 400th anniversary of its foundation, the original charter having been granted by the Emperor Frederick the Third, in the year 1466.

The Emperor of Austria, on the recommendation of Baron Wullerstorf, the new Minister for Trade, has just published an Imperial decree introducing the penny postage system on the 1st January next.

A report has been circulated that a portion of the little island of Heligoland (the smallest jewel in the British Crown) had been swept into the sea. Such, however, is not the case.

COMMERCIAL.

COFFEE.—Partly in consequence of the favourable result of the Dutch sales the market has been very lively, and a good deal has been taken on speculation. Within the last few days, however, the market is calmer, though the values of all descriptions are fully supported. Sales since last mail, 34,000 bags.

SUGAR.—Both Raw and Refined are quiet, without any material alteration in prices.

RICE.—Cleaned grain continues to realise high quotations, but the demand has not been so active as it was. In Rough, 4,500 bags of Moulmein, and 5,000 bags of Rangoon have been sold by importers by private contract, as well as 2,000 bags of Bassein, and 1,000 bags of Rangoon by public auction for what they would fetch, being damaged by sea-water.

SPICES.—Sales confined to small parcels for consumption at previous rates. Among the latest arrivals are 2,440 chests of Cassia Lignea per Jacob Levy.

TEA.—Market generally steady. Ordinary to good ordinary Congou in demand as well as fine Kaisow, Pakling and Moning Congou, and full prices paid. Of green teas some speculative purchases have been made in Canton-made gunpowder, since which the prices have risen 1 to 2 Sch. Bco. per lb. No alteration in Souchong and Pecco. The Moyune green teas mentioned in last report as having arrived sold rapidly at remunerating prices.

SPELTER.—At first this article was tightly held, with every appearance of an improvement taking place; but since then the demand has ceased, and prices show a tendency to decline. At all events the market closes in a depressed condition.

Money is more abundant than it has been for some time, and discount has fallen to 5¼ per cent.

SHIPPING.—ARRIVED.—November 27, Undine, from Calcutta; Boreas, from Batavia; Jacob Levy, from China.

SAILED.—November 29 (from Cuxhaven), Kamtschatka, to Sitka; December 1 (from Hamburg), Margaretha, to Hong Kong; 5, Jan Peter, to Singapore.

LOADING AT HAMBURG.—Manila IL, for Shanghai; Jessen, for Nicolayefsk (Amoor).

Naval and Military.

Vice-Admiral Sir Sydney Colpoys Dacres, K.C.B., the late Commander-in-Chief of the Channel Fleet, is, it is reported, about to take a seat at the Board of Admiralty. Vice-Admiral J. E. Erskine was offered the vacancy at the Board, but he has declined the proffered honour for the present.

In the year 1861 the Admiralty, being desirous that the punishment of the men should not depend upon the arbitrary will of a captain, directed that two tabulated forms should be arranged, and distributed throughout the service. Table I. gives an index of offences suggesting the maximum summary punishment that should in each case be awarded; and Table II. indicates the description of summary punishments that may be awarded to persons of and below the grade of petty officer and non-commissioned officer, subject to the Naval Discipline Act of 1861. Mr. Hickman, who is officially charged with the compilation of annual returns on the subject, and has just published the second of the series, thinks that it would be invidious to name any particular ships where offences had been more numurous than in others of equal size and complement, owing, as he very properly and naturally infers, to the want of governing capacity on the part of captains or commanders. "We do not share in this amiable feeling (remarks the *Army and Navy Gazette*), and we distinctly say that an officer like the commander of the Ringdove, on the China station, who punished the whole ship's company for the loss of a gong, which might have been caused by an individual and without the knowledge of the rest of the crew, was acting against the first principles of justice, and we only regret that the punishment to which the three seamen—Say, Carsons and Davis,—were subjected for the conduct they pursued on the occasion was not altogether remitted instead of having only been mitigated by the Admiralty. The commander of the Ringdove has been placed on half-pay, and is not likely to be disturbed from the place he occupies."

Captain Roderick Dew, late in command of H.M.S. *Encounter* on the China Station, is likely to be appointed to the command of the iron-cased ship *Lord Clyde*, now being brought forward at Plymouth. Captain Dew distinguished himself very much in China, and was made a C.B. for his services in that country.

Captain Edward Augustus Inglefield, who was lately so fortunate as to obtain a good service pension, will, we understand, go as Flag-Captain to Lord Clarence Paget.

Her Majesty's 20-gun screw corvette Tartar, 1,296 tons, 250-horse power, recently paid off at Sheerness by Capt. John M. Hayes, from China, has been brought up to Woolwich to make good defects and be prepared for recommission.

The Dutch transport St. Jane, from Schiedam, with 100 soldiers for Batavia, put into Plymouth Sound on the 7th, with water casks started in consequence of the late stormy weather.

Her Majesty's 6-gun paddle-sloop Spiteful, recently commissioned at Woolwich by Commander Achibald D. W. Fletcher for service on the Brazilian coast, again returned to Woolwich from Portsmouth, having been found unfit for foreign service.

The Queen has been graciously pleased to give orders for the appointment of Douglas Galton, Esq., late Captain in the Royal Engineers, Assistant Under-Secretary of State for the War Department, to be an Ordinary Member of the Civil Division of the Third Class, or Companions of the Most Honourable Order of the Bath.

According to the rumours afloat at the clubs and at the outports we may look for numerous changes at the Admiralty either before, or immediately after, the meeting of Parliament. The health of Rear Admiral Robinson is in such an unsatisfactory condition that it is fully expected he will, on the completion of his five years' service as Controller of the Navy, on the 1st of February, resign his appointment. Sir Frederick Grey is, it is reported, now a candidate, with Sir William F. Martin, for the command at Portsmouth, *vice* Sir Michael Seymour, whose time expires on the 28th of February. Nothing definite, however, can be known on this point until the pleasure of Her Majesty the Queen is taken. Lord Clarence Paget will hoist his flag and proceed to the Mediterranean to relieve Sir Robert Smart, and when Rear-Admiral Drummond takes charge of the Channel fleet the Duke of Somerset will have almost an entirely new set of colleagues, as Rear-Admiral Fanshawe has only lately joined, and Mr. Childers' vacancy has not been filled up.

The sailing frigate Calypso, 18, attached to the reserve squadron in Chatham harbour, having been surveyed by the officials connected with the shipwright department, and condemned as unfit for further service, has been brought up to the dockyard, where the whole of her fittings have been removed, and she has been stripped of her dockyard stores. On Saturday she was taken in tow by the Otter, paddle-wheel steamer, Mr. W. J. Blakey, Queen's pilot, in charge, and removed round to the Thames for the purpose of being docked at the shipbreaking yard of Messrs. Castle and Beech, Charlton, where she will be broken up. The Calypso was built and launched at Chatham Dockyard about twenty years age. Since then she has been actively employed, and was one of the last of the sailing ships put out of commission at Chatham. She is generally sound and seaworthy, and the reason why the Admiralty have decided on having her broken up is the unsuitableness of the class of vessels to which she belongs for the present requirements of the navy.

The Terpsichore, 18, having temporarily made good the injuries which she sustained on the occasion of the torpedo experiments in Chatham harbour, will be floated out of No. 4 dock at Chatham, and afterwards removed to Charlton, where she will be broken up. Nearly the whole of the smaller sailing vessels which for some years past have been rotting at Chatham, and impeding the navigation of the Medway, have disappeared, the Admiralty having either disposed of them to private firms or directed them to be broken up. There are still several of the larger class of 50-gun sailing and steam frigates and old line-of-battle ships attached to the squadron in the Medway, lying in what is known as "Rotton-row." They are perfectly useless, so far as any future service they can be put to is concerned, and only await an order from the Admiralty to be similarly disposed of.

WAR-OFFICE, DEC. 1.—11th Foot: Ensign George Vincent Meredith, to be Lieutenant, without purchase, vice Morres Guard, deceased, Sept. 10; Ensign Thomas Albert Kemble, to be Lieutenant, by purchase, vice Meredith, whose promotion, by purchase, Oct. 10, has been cancelled; Gentleman Cadet James Herbert Yule, from the Royal Military College, to be Ensign, without purchase, vice Kemble; Staff-Assistant Surgeon John William Purefoy, M.D., to be Assistant Surgeon, vice Alexander Macintyre, M.D., deceased. 25th Foot: Gentleman Cadet David Stanley Cunninghame, from the Royal Military College, to be Ensign, without purchase, vice Alfred James, deceased.

THE TAIPINGS AND PIRATES.

THE most satisfactory news we have yet received regarding the Taiping rebellion—we may now almost say the late Taiping rebellion—is that contained in our Hong Kong correspondent's letter of the 13th October. The long series of reverses which dated from the expulsion of the Taipings from Nanking has culminated in the retreat of the last remnant of their once formidable host into a mountain fastness in the interior of Kwangtung, where, we are told, their chiefs are negotiating for a surrender; pardon being promised them on condition of giving up their leader, who is said to be the last survivor of the "Coolie Kings" of Nanking. The pacification of Southern China being thus nearly completed, the Government will be in a better position (as our correspondent justly remarks) to cope with the disorders still prevailing in the northern provinces. In this quarter, however, the difficulties they will have to contend with are small as compared with those attending the reconquest of the vast territories but lately held by the Taipings. The Nienfei have already retreated from the province of Shantung, and appear to be completely held in check by the Tartar forces; while we hear of no further successes on the part of the Mahometan rebels in the north-west. Thus far the moral support, as well as the material aid afforded to the existing Government by England, has been attended with the happiest results; and now that our *proteges* have their hands comparatively free, the question not unnaturally arises, are we not entitled to ask for some return for these services? It is true we reap the benefit of the extermination of the Taipings to a certain extent, in the increased security and remunerativeness of our trade with the Yangtsze ports; but these advantages are nearly if not quite neutralised by the enormous increase lately manifested in the depredations of the pirates on the coast. That there is a connecting link between the decadence of the rebellion and the increase of piracy no one can doubt. Beaten and dispersed on land, the Taipings have taken refuge on the sea; well knowing the coast to be rich in plunder and abounding in secure retreats from pursuit. The Chinese Government possesses no fleet; our own China squadron is wretchedly ill-adapted for the service chiefly required of it, some of the gunboats being rotten and unseaworthy; and so these vermin of the sea increase and prosper exceedingly, growing bolder and more cruel in their depredations, and, owing to the peculiar configuration of the coast, enjoying absolute immunity from pursuit. It is quite clear that no good can be done except by gunboats, of great speed and light draft of water; and a small squadron of these should be in constant readiness, and devoted exclusively to the service. If they belonged entirely to the colony of Hong Kong, and could act under the orders of the Governor, independently of the Admiral on the station, then we might expect some good results. A considerable portion of the yearly expense might be defrayed by devoting the £20,000 now exacted from the colony as a military tax to this purpose; and the remainder, or at all events one-half of the annual outlay required, might fairly be demanded from the Chinese Government. The marauders, from whom we have helped to free their territory, are now feeding upon our commerce; and we trust that one of Sir RUTHERFORD ALCOCK'S first acts will be to urge upon Prince KUNG the necessity of a contribution from the Imperial treasury towards the removal of this incubus on both foreign and native trade. Such a contribution can surely be afforded out of the splendid revenues derived from the Customs establishments at the treaty ports, collected through foreign interests and ability, to the extent of £3,000,000 per annum.

A telegram from Canton, dated 15th November, states that a successful attack had been made on some pirates at Amoy. A single isolated case of success is however of little use; indeed, the very same telegram informs us that "piracy is increasing to "an alarming extent." A vigorous crusade must be organised, and the work continued steadily for a year or two before we can look for any permanent result. We believe that on Sir RICHARD MACDONNELL'S arrival in Hong Kong he will have some satisfactory intelligence to communicate on this point, his Excellency having been occupied in endeavouring to arrange for the appropriation of either the whole or a portion of the military-tax above alluded to, to the maintenance of a separate force to be employed in the suppression of piracy.

JAPAN

A telegram has been received from Shanghai dated 9th November, informing us that "the foreign Ministers had gone on an expedition to open Osseo Livywn (Ossaco) to foreign trade. The other murderers of Lieutenant Bird and Major Baldwin have been arrested at Jeddo. They confessed their crime and were executed." Many of the telegrams which now reach us *via* Galle are unintelligible, and we are left to guess at their real meaning; in this case Osaca is suggested as the port indicated, but we rather incline to a contrary opinion. Osaca, or more properly speaking, Hiogo, is not to be opened to foreign trade until the beginning of 1868, and it would be a truly marvellous manifestation of Sir Harry Parkes's influence if he had already prevailed upon the Gorogio, in the Tycoon's absence, to take on themselves the responsibility of anticipating so important an event by two entire years. If any expedition such as that alluded to in the telegram has taken place at all, it is much more likely to be for the purpose of examining some other port which the Japanese Government propose, perhaps, to substitute for Ne-e-gata. This latter port should have been opened in 1860, but was found unsuitable for purposes of trade, and no choice has yet been made of one to serve in its stead.

The Tycoon's envoys, who have been so long travelling on the Continent, have lately arrived in London, and are staying at the Langham Hotel. The Satsuma party are still in Paris, but are also expected to return to this country in a few days.

HONG KONG.

THE cry is again heard from this wonderful little island of fevers, malaria, dysentery and death. For the past few years Hong Kong has enjoyed an exemption from epidemics, and in fact it has been Hong Kong "up" and Shanghai "down." This revolution in the respective places has now given way, and the sun-burnt town lying under the mountains ranging from 500 to 1,800 feet in height, has again assumed the features of 1843-46. At that time, however, there was no doubt that the upturning of the earth, which had been undisturbed previous to our occupation of the island, imparted a miasma fatal to the European constitution. This, added to the want of proper drainage existing at that time, generated a fever so peculiar and so virulent that the medical profession were baffled either to meet the disease or even to name it, hence it was designated the "Hong Kong fever." With the completion of the public works, however, the health of the island improved for all civilians, but for the naval and military forces but little improvement has been or ever can be effected. The habits of this class are sufficient to kill them. The well-known poisonous "samshoo" no doubt sets them mad before it makes them even drunk; and when some of them lie in gutters and call out, "Pour it over me—I likes the smell of it!" no astonishment is felt at fever and death succeeding. Another fruitful cause of sickness among the poor soldiers and sailors is the virulent contagions from the Chinese women. A suggestion has been made in a letter which we give below, that barracks should be erected on the Kowloong side, or the opposite side of the harbour of Hong Kong. We have constantly urged this, and the decision of the War-office not to incur this outlay is very lamentable but possibly insurmountable. On the annexation of Kowloong, we believe, the first thing was a quarrel between the naval, military, and civil authorities as to "sites" which resulted in a dead lock. Kowloong is open to the south-west monsoon, which prevails

Digitized by Google

during the summer, and is not immediately under the hills. In fact, during the summer the climate is quite endurable. To attempt to make Kowloong, however, a place of business. and to abandon Hong Kong, is simply absurd ; nor would it be proper to build the mint there, seeing that the specie would incur the risk of transit in boats across the harbour. The following is the letter alluded to :—

TO THE EDITOR OF "THE TIMES."

SIR,—As you have recently directed attention to the sickness and mortality among the English soldiers at Hong Kong, the following extract from the letter of a civilian officer of the Mint about to be established in that island may, perhaps, be suitable for your columns. The writer may be relied upon as an accurate and trustworthy observer : —

"Hong Kong, Oct. 13, 1865.

"I commenced a letter to you by the last mail, but could not finish it in time, as we have been in such a state almost ever since we landed, on the 20th of August, as to prevent our doing much in the way of letter-writing. The whole of Captain K——'s family have been down with sickness of one kind or other at the same time, except Miss K——. Captain A——, who came out with us, has had intermittent fever. The governess was knocked down by bilious fever, and Miss A. K—— died of fever on the 1st of October. This makes the third death among people connected with the Mint since June. The engineman and the wife of the engineer foreman died before our arrival. At the time of all this sickness in Captain K——'s family three of his servants were ill too. The Government have quartered us in a row of houses on Morrison-hill, one of the prettiest places here, 200 feet above the harbour level. We have a splendid view of Hong Kong, or rather Victoria, and from our position ought to enjoy good health. It is on a granite rock, very porous in places, from an advanced state of decomposition, the slopes being covered with trees, chiefly of a species of fir. In the verandahs at the back we overlook the racecourse, which has evidently been at no very remote period a small harbour surrounded by hills, except towards the sea. The grand-stand is immediately opposite the English cemetery—a good subject for a sermon ! It is called Happy Valley, and is certainly a very beautiful place. There is a good motto over the entrance to the Roman Catholic cemetery, '*Hodie mihi, cras tibi*,' which is more strikingly applicable here than, perhaps, in England. Almost every evening at six o'clock, since we have been quartered here, there have been echoed from hill to hill those dreadful three volleys. On one evening there were fifteen—that is, five funerals in the 11th Regiment, 2nd battalion, including the assistant-surgeon, M'Intyre. This regiment, which came here about four months since, I think 650 strong, has lost sixty men and two officers. They all look bleached, although they wear white uniforms, and yesterday some of them were sent on board ship as invalids for England. One poor fellow was carried on board, died, and was taken on shore to be buried."

The sickness prevalent at Hong Kong is obviously due to malaria, and it would be interesting to ascertain how far this condition may depend upon the disintegration of the granite. It is maintained by some persons intimately acquainted with Hong Kong, that the proper site for the permanent English settlement is on the adjacent mainland, Kowloong, which is a British possession. The following advantages are ascribed to it :—It is declared to be healthy; it is capable of being easily defended; there is ample space for military accommodation; it presents a secure harbour for shipping, which in certain winds is resorted to even by the shipping of Hong Kong; and it also affords good and sufficient ground for wharfage. It is further asserted that, as the land at present is only under cultivation, such as would be available for wharves might be purchased by the Government for a comparatively small sum, and resold to great advantage. If the foregoing statements be true, the Colonial Secretary would do well to reconsider the question of erecting such an establishment as the Mint, where Europeans must permanently reside day and night, in a locality exposed to deadly exhalations. The preservation of human lives in such a case should assuredly outweigh any argument founded either on mere expediency or economy in respect of money.—I am, Sir, your obedient servant, Y.

Dec. 11.

THE LEGATION AT PEKING.

A NATION is said to be fortunate if it possess no history. Should this dictum apply equally to an embassy, our temporary representative at Peking must be considered a very fortunate individual, and he and his subordinates ought to be very happy. For many months—in fact from the time Mr. WADE was left in charge of the Legation—not a sound has been emitted from it ; and we are left uncertain whether Mr. WADE has been sedulously employed in cultivating friendly relations with the Chinese Government, and paving the way towards a good understanding between the Imperial Court and our new Minister, Sir RUTHERFORD ALCOCK, or whether he has taken advantage of the lull in diplomatic affairs to amuse his leisure by translating TENNYSON'S last poem into the mellifluous tongue in which he is so accomplished a scholar. And yet, one would think that the stirring events of which the capital has been the scene—the Ministerial crisis, the threatened attack on Peking by the NIENFEI, and the change in the Board of Foreign Affairs, for instance—would have necessitated some action on the part of our Minister, to say nothing of another event which alone suffices to give a special interest to Mr. WADE'S *regime*, namely, the evacuation of the Taku Forts by the allied forces, described in our correspondent's letter. Although this has been effected in a quiet way, and has consequently not attracted much attention, it is nevertheless a noteworthy fact that the last hostage held by u for the due fulfilment of the Treaty of Tien-tsin has now passed from our hands. Sir RUTHERFORD ALCOCK enters upon his relations with the Chinese Government without any security whatever for their good behaviour, and, should any difficulties arise, will have to commence *de novo* whatever proceedings may be required to ensure due fulfilment of their treaty engagements. As long, however, as Prince KUNG has the management of foreign affairs there is good reason to anticipate a continuance of friendly relations.

THE MILITARY SCANDAL IN CHINA AND JAPAN.

(THE TIMES.)

A lamentable story of military mismanagement, if it be not of something worse, has reached us from Japan. It appears that about the middle of September last the troopship *Adventure* arrived at Yokohama from Hong Kong, having on board some detachments from the 11th and 12th Regiments, including officers, men, women, and children, to the number of about 300. The condition in which these troops were landed is described as pitiable in the extreme. Some of the men were so prostrated that upon landing they lay down on the ground, and several others, who attempted to march up to their barracks, fell out from sheer exhaustion, while every man among them appeared in a more or less weak and wasted condition. The women were, if possible, still more emaciated, and, burdened with their equally sick and helpless children, appeared wholly unable to reach their destination. Although the ship appears to have been in port for a day or two, and the condition of the troops might, therefore, have been communicated to the authorities on shore, no provision seems to have been made to assist them in reaching the barracks. Several of the women employed coolies to carry their children, and another was indebted to the kindness of a private person for a chair in which she and her four young children had to be carried up the hill.

The neglect, however, of proper provision for these sick persons on their arrival in Japan is the least part of the alleged complaint. It is a more important question to inquire what was the occasion of such serious and widespread sickness among a body of troops, and for an explanation on this point we are referred to the treatment of the regiments at the port from which they had been despatched. They had arrived, as we have said, from Hong Kong, an unhealthy station at all times, but which during the last summer has suffered under an unusual amount of sickness and mortality. The military hospitals have been quite full, the men have had to occupy the verandahs, many have even been treated in the barrack-rooms, and it has also been necessary to hire additional buildings to supply increased hospital accommodation. During the prevalence of this deadly malaria the 11th regt., which appears to have suffered the most severely, arrived at Hong Kong, and, so it is said, found that no arrangements had been made for its reception. At a moment when the healthiest situation and the greatest care in their encampment were vitally necessary, the troops were quartered on a piece of ground that had been a Chinese burial-place, the exhalations from which were most deadly. It was here that the sickness was contracted which brought them into the lamentable condition in which they arrived in Japan, and they may well have thought themselves doomed if, after being brought to the verge of destruction by the neglect of proper arrangements for their reception in one place, they found that no attempt had been made to provide some relief to their weakness on their arrival at the other.

It might well appear inexplicable how a regiment could be exposed to such gratuitous sufferings in the ordinary course of its movements in time of peace; but, if the remainder of the story be true, there is nothing in what we have described that will not readily be accounted for. It is further alleged that, in the midst of all this sickness, the medical staff at Hong Kong is wholly insufficient to perform the duties entailed upon it. The surgeon of the 2nd battalion of the 11th regiment had for three months not only performed his regimental duties, but had also to discharge those of the deputy inspector-general and principal medical officer of the garrison. At the time when this account was written he was actually without any assistant-surgeon, and it had only just been thought advisable to order one of the surgeons of another regiment to proceed to his assistance. It is said, indeed, that there are not enough medical officers in the whole China command to meet any emergency, but another statement is made in explanation of the deficiency which is far more unsatisfactory. We are told that during the prevalence of this sickness at Hong Kong nearly all the heads of departments have been absent from their posts, and have been enjoying the more congenial climate of Yokohama. Not only, in fact, was the General Commanding-in-Chief then present in Japan, but he was accompanied by the two senior medical officers in the China command, one of them being the principal medical and sanitary officer of Her Majesty's forces in China. Representations, it should be added, are made that these officers were at Yokohama in the ordinary course of duty; but the fact does not appear to be denied that in a period of extraordinary sickness one medical officer has been left without any assistance in his charge, and has ever been burdened with additional duties; nor does it seem to be disputed that, from whatever cause it may arise, some principal heads of departments were absent from Hong Kong during a season of great emergency.

We give these accounts as they have reached us, without making ourselves responsible for their accuracy. But it will, we think, be considered that they furnish ample grounds for a very careful inquiry. If they should be in the main authenticated, they would offer in some respects an aspect even worse than that of the notorious mismanagement at Mhow. That, at the worst, was a case of military blundering; this would bear the character of a gross neglect of duty. It is this, indeed, which will principally induce the public to withhold their judgment. Blundering, unhappily, is not uncommon in our army; but to leave the post of ordinary duty in a season of unusual danger is an offence almost unknown among our officers, whether medical or combatant. On the contrary, it has been a point of honour to hurry to such a post, even though the routine of duty might have furnished an occasion of absence. We hesitate, accordingly, before we can conclude that so unhappy an instance of the contrary conduct has at length occurred.

SILK IN FRANCE AND ITALY.

The amount of raw silk which passed through the hands of the officials whose business it is to ascertain the condition of the material with respect to dryness, at Lyons last week was over fifty-nine tons; being fourteen tons less than during the preceding week, and just one ton more than in the corresponding week of last year. The diminution arose simply from the extreme rarity of certain kinds of silk which formerly were scarcely ever asked for. The word *rarity*, says the *Moniteur des Soies*, is far from fully expressing the situation; certain kinds of Bengal, Chinese, and Japanese silks are absolutely wanting. Eastern silk begins to fail at Marseilles, which is the chief market for that article, and sells easily at prices favourable to the holders. The price of manufactured silk at Lyons is rising with the scarcity of the article, while at Alais, Auleenas, and Valence, although there is no increase, the old rates are well maintained.

Accounts from Italy are highly satisfactory for the manufacturer and merchant; at Bergamo, Brescia, Milan, and Udine, business is brisk, and only restrained by the shortness of the stocks both of the raw material and manufactured goods.

CHINA STEAMSHIP AND LABUAN COAL COMPANY (LIMITED).

The special report which the directors of the China Steamship and Labuan Coal Company (Limited) have put forth on the occasion of the return of their Secretary from China and India cannot be regarded otherwise than satisfactory. The conditions for a more extended and successful development of operations depends on matters of mercantile arrangement, to be brought about by ability and discretion. Mr. Price (who, since his return, has been appointed general manager) has succeeded in selling one of the steamers found to be unsuitable, and has very considerably reduced the expenses of the fleet. There is no question as to the abundant supply of coal available, whilst additional labour is in course of being supplied by the shipment of coolies from Hong Kong, besides which there is every reason to believe that the Secretary of State will accede to the application made by the company for the concession of lands and other privileges in connection with a rail route to Victoria, which will supersede the necessity of shipping off in an open roadstead, as at present. The marine superintendent recently appointed writes:—

"The prejudice hitherto existing against the coal is gradually wearing away, and our coal is now taking its stand on much the same level as English coal; and I trust we shall be enabled to obtain sufficient coal from the mines to meet the increasing demand."

In addition to that limitation of labour now about to be corrected, the two circumstances that have impeded operations—the delivery of the coal in sufficient quantities, and its deterioration by being stored under a tropical sun—together with an insufficiency of shipping arrangements, will be obviated by the construction of a tramway, 7½ miles, to Victoria harbour, the route for which is under survey. The excellence of the coal is demonstrated by the improved demand, quantities having been latterly disposed of, after trial, at very remunerative rates, at Hong Kong; also at Amoy, Swatow, and Foochow; whilst applications for cargoes are coming in from Shanghai, Bombay, Manila, Java, and Point de Galle. The company's transactions in all these directions must shortly assume the character of a regular trade, giving enlarged profits.

With the increased employment of steam in our Eastern waters, the introduction of gas at Singapore and Hong Kong, and a mint also, the supply of good steam coal is a first necessity. Much is being done in the way of organisation to supplement and turn to account the outlay incurred. In all industrial undertakings, under proper management, an enlargement of operations is accompanied with the decrease of outlay relatively to the actual work done. The present enterprise has confessedly reached a point at which returns, as compared with outlay, must be very considerably increased. In view of the wide and enlarging circle of business opened out, and the more efficient and more economical organisation effected, for labour, shipment, and delivery, the prospect is certainly most encouraging; and we can come to no other conclusion than that the shares of the company after allowing for the influence of an adverse money market on all descriptions of foreign industrial enterprise, have been unduly depressed. The capital of the company is fully represented in property, and expenses are materially reduced. The representation by such houses in China as Messrs. Gibb, Livingston and Co., and Messrs. Smith, Kennedy and Co., should be a proof that the operations of the company are of a *bona fide* nature.

With such gentlemen on the board as the following—

Hon. T. C. Bruce, Sir J. D. Elphinstone, Bart., M. P., Reuben David Sassoon, Esq., Harry Borradaile, Esq., H. B. Loch, Esq., C.B., Henry Alers Hankey, Esq., William Miller, Esq., M.P., Hon. Francis Drummond—

each holding a stake in the company, we believe that the coming year will show very different results, and that the days of no dividends and general dissatisfaction among the shareholders are now things of the past.

The following is the report alluded to:—

The steamers of the company are being actively employed, and the directors have now before them valuable suggestions for augmenting their fleet and securing additional openings for profitable employment of the vessels. Mr. Price was enabled to dispose of the screw steamer *Elgin* in Japan upon favourable terms, and the board are in negotiation for replacing her at once with a vessel of larger carrying powers, more suitable for their present requirements. The marine superintendent, since his arrival in China, in inquiring into the working expenses of the vessels, to which his attention was particularly directed by the board, has succeeded in making material reduction in several instances. Mr. Pitman has visited the ports of Hong Kong, Amoy, and Swatow, and disposed of several quantities of coal after trial at very remunerative rates, and received offers to contract for certain periods; the result of his experience, however, is better summed up in his own words:—"You will perceive by this that the prejudice hitherto existing against the coal is gradually wearing away, and our coal now is taking its stand on much the same level as English coal, and I trust we shall be able to obtain sufficient coal from the mines to meet the increasing demand." Independently of these ports, and of Singapore, at which a trade was formerly established, the board have received application from Shanghai and Foochow, Manila, Java, Point de Galle, and Bombay for cargoes. The directors are assured that, by the pits now in operation, more coal has been won than the company can raise for many years with the amount of labour hitherto at their command, and, when found necessary, other pits can be sunk immediately. The attention of the directors has been, therefore, turned to every means possible for procuring an increased supply of coolies. Their superintendent has met with encouragement from the authorities at Hong Kong, and under date the 26th of September, he advises that he expected to have about one hundred coolies ready for despatching by the steamer *Stirling* to Labuan. It is the aim, however, of the board to introduce a steady and permanent supply of labour as soon as possible. With this view they are in correspondence with the Secretary for the Colonies for a grant of land, to enable the company to make free grants to married Chinese, by which means they may become actual settlers in the colonies. The directors have every reason to believe that Mr. Secretary Cardwell will comply with their wishes in this respect, as it will obviously be beneficial to the whole island. The board have further to report, that some time back they despatched an engineer of experience in colonial works to Labuan to make a survey for the proposed tramway from the mines to Victoria Harbour, as originally contemplated.

Some samples of coal lately received have been found to contain a large quantity of oil, and if experiments now in progress should turn out favourably, the company will have come into an immense source of wealth.

THE SURRENDER OF THE MO-WANG.

SOME months since the surrender of the Mo-wang by Mr. MERCER, the Acting-Governor at Hong Kong, caused considerable dissatisfaction. It is a pity that some officials have the misfortune to be always in the wrong in the estimate of others. Now for our part we are inclined to hold the scales equitably. There are points on which we have differed with Mr. MERCER, but by no means do we agree with the condemnation which has been poured out on him in reference to this subject. We expect the greatest possible caution to be exercised on the surrender of any Chinese, but by Article XXI. of the Treaty of Tien-tsin, we are bound to deliver up criminals subjects of China, who shall take refuge in Hong Kong or on board of any British ship. It appears that Mr. MERCER did take the most minute pains in the examination of this so-called Mo-wang, and the Acting Chief Justice and Chief Magistrate did, after proper consideration, deem the man a pirate, and that no good grounds could be adduced for disregarding the said Article in the Treaty. In refusing compliance to this demand we could hardly expect mercy or justice in the case of any unfortunate Englishman who chanced to fall into Chinese hands. It is not often the Chinese Government trouble us for such surrenders, although we suspect there are plenty of fit subjects located in Hong Kong. We have heard it echoed in some quarters that the Chief Justice and Chief Magistrate, being both Roman Catholics, used the opportunity of convicting the unfortunate man as a small revenge on the supposed Protestantism of the rebels. We have a great horror of the Roman creed that "the end justifies the means," but we are not so uncharitable as to believe this version. It is only natural that the people at Hong Kong should be horrified at

Digitized by Google

the cruel fate in store at Canton for criminals surrendered, but we cannot expect compliance to our demands under the Treaty if we refuse those of the Chinese.

OWING to the increased price of provisions, the Messageries Imperiales have increased their rates of passage money to Calcutta £5, and to Madras £7.

ON the arrival of Sir Richard MacDonnell at Hong Kong Mr. Mercer will resume his post as Colonial Secretary, and not leave immediately for England.

WE understand that the post of Chief Justice at Hong Kong, vacant by the death of Mr. Adams, will be shortly filled up from the Bar here. The selection of a Bishop has not yet been finally decided on.

SIR RICHARD GRAVES MACDONNELL.

Sir R. G. MacDonnell, the newly-appointed Governor of Hong Kong, having completed his preparations for proceeding to the seat of his Government, intends taking a short tour on the Continent, reaching Suez in time to proceed to his destination, with Lady MacDonnell, by the first January mail. As any information regarding the previous career of the statesman now called on to preside over the destinies of Hong Kong must necessarily be of great interest to our subscribers, we append the following extracts from a sketch of his life, which appeared in the *Montreal Magazine* :—

Burke informs us that Sir Richard Graves MacDonnell, C.B., the present Lieut.-Governor of Nova Scotia, is the eldest surviving son of the Reverend Doctor MacDonnell, Provost of Trinity College, Dublin, by Jane, daughter of the Very Reverend Richard Graves, Dean of Ardagh, so well known to the Biblical student by his able and comprehensive commentary on the Pentateuch. Sir Richard's family, as his name suggests, was originally of Scottish origin. He is descended from the Antrim branch of that highland clan which acknowledges as its chieftain the "Lord of the Isles." His ancestors settled more than two centuries ago in the northern part of Ireland, where their descendants have continued to reside. His mother's family is descended from an ancient and still extant English stock, one of whose progenitors, a colonel in Cromwell's army, settled in Ireland in 1650. From this soldier of the Commonwealth have sprung numerous and distinguished ornaments of the Church, the army, and the learned professions.

Sir Richard was born at the close of 1815. In 1830 he entered Trinity College, Dublin, obtaining a high place at entrance. During his undergraduate course he won many honours, and in 1835 he became a Scholar of the House. In 1836 he received his B.A. degree, in 1838 his M.A. degree, and in 1844 the special honorary degree of LL.D. As a graduate, his Excellency distinguished himself not a little as a speaker in the University Historical Society, a society which has made itself famous from the crowd of illustrious orators, such as Grattan, Flood, Plunket, Burke and Burrowes, who there displayed the first evidence of their magical powers, and received the first training in that rare art, of which they afterwards became such perfect masters and such splendid examples. In 1839 he was called to the Irish bar, but having subsequently taken up his residence in London, he kept his stated Terms, or, more correctly, he ate the stated number of dinners, and was in 1841 admitted as a member of the Honorable Society of Lincoln's Inn.

The facts of Sir Richard's career are so richly veined with curious passages of experimental research in out-of-the-way places as to justify the supposition that his personal history must be crossed and recrossed with experiences alike startling and instructive. Indeed, there is a piece of unique adventure in his earlier life which will illustrate the point. A fete was to be celebrated in the neighbourhood of London, the profits of which were to be applied to some philanthropic or benevolent purpose. One of the attractions of the festival was a balloon ascension by the then celebrated æronaut, Mr. Green. The day fixed turned out to be unfavourable in the extreme. Wind and storm prevailed to such a degree that the balloon adventure was deemed to be hazardous. However, a large crowd had gathered, and Mr. Green possessed experience, and did not lack courage. He only stipulated for a companion. The subject of our sketch immediately answered the condition, and, having borrowed a great-coat from a spectator, took his seat in the car. That bit of experience, in one of the most violent wind storms on record, must have been noteworthy as well as exciting; that it was the former there can be no doubt, for the account of the adventure, written by the amateur æronaut, was so interesting and attractive that we believe we are not exaggerating when we say that it was translated and reproduced in every language of Europe.

In 1841, as we have stated, Sir Richard MacDonnell was admitted as a Barrister at Lincoln's Inn, and on the 1st April, 1843, he sailed for the West coast of Africa, having been appointed by the Queen Chief Justice of the British possessions at the Gambia. Why it was that Mr. MacDonnell was selected for this particular office we have no means of knowing. He had indeed during his sojourn in London made his mark on more than one page of life. As an accomplished gentleman of courage and address, he would necessarily and of course win his way in society. But beyond the attraction of a polished manner, he was known for his cultivated tastes and his literary talents. Contributions of marked ability had been made by him to several of the leading periodicals of the day, and these had attracted a more than usual share of notice. In this way, and in his capacity of Honorary Secretary of the Polish Association, where among other literary men he found in Thomas Campbell, the poet, an enthusiastic fellow-labourer and warm personal friend, he became acquainted with many of the leading statesman of England. Beyond the qualifications we have mentioned, Government probably recognised the presence of two recommendations, youth and capacity, the physical vitality necessary to encounter the climate, and the intellectual ability necessary to perform the work.

With a light heart and a strong constitution, a clear head on his shoulders, and the Royal Commission in his pocket, the new Chief Justice sailed to the scene of his allotted labour; and we are quite sure the determination of his mind was that the ebony subjects of the Crown in Africa should receive at his hands justice in colour the reverse of their complexions. It is probable that the duties of the new office were insufficient for the occupation of one who at the time, and ever since then, has been beset with an inordinate appetite for work. It was not enough for him to administer justice, for with characteristic earnestness he addressed himself to the task of consolidating the laws. Moreover, the duties of a Judge did not weaken his taste as a traveller, for we find him instructing himself while he benefited others by systematically pushing his way to the interior of Africa, to points and places theretofore deemed to be almost inaccessible to the white man. On one occasion, in the year 1845, the Chief Justice, attended only by a suite of native servants, penetrated as far as the dominions of the "Sultan of Bondou," to reach whom he had to ascend the Gambia 400 miles, and then to cross several provinces lying between that river and the Senegal. In the course of this adventurous trip, the Chief Justice encountered the common dangers from climate, and the not uncommon ones from banditti, but contrived to extricate himself from all, and to return alive—being one of the very few who had safely accomplished that perilous journey. One incident of travel may be mentioned; for, since the episode missed a fatal termination, it may be recalled as a somewhat amusing example of intellectual consciousness, accompanied by physical immobility. Death seems to have been kept at bay, apparently awed and intimidated by the strong and indomitable will of the man with whose body he grappled but by whose spirit he was foiled. During the journey the Chief Justice was seized with malignant tropical fever. Being his own physician, he met the assailant with the best remedies at his command. The attack, however, appeared to be too strong for the defence. The human citadel was apparently taken, for the Chief Justice was, to all appearance, dead. Preparations were made by his sable servants for his decent interment, and these preparations the Chief Justice was quite aware were being hurried forward with a haste which the climate might, but which he could not, excuse. Happily for his fame, and for our work, the proceedings were suspended by reason of an altercation on a knotty property question. Each member of the suite desired to constitute himself the residuary legatee of the deceased Chief Justice. The heated controversy acted like a cordial on the subject of it, and seemed to supply the physical animation which the case required. Unable to utter a syllable, the supposed corpse had strength to raise his hand. Unlike the sea captain, who, in answer to the dying sailor's objection to be thrown overboard before he was dead, angrily observed, "You need not be so jolly particular for a few minutes," the suite suspended their unseemly chattering. The silent hand sufficed to convince them that the white man was some sort of semi-divinity in whose presence speech should be hushed, and to whose person homage should be rendered. Partial recovery speedily took place, and the suite having naturally jumped to the conclusion that the the Chief Justice would return at once to the coast, were beyond measure surprised when on the very next day they were directed to go forward, being at the same time given to understand that as the journey was undertaken to see the "Sultan of Bondou," to that Potentate it was the intention of their master to go. Nor was the journey without material advantages, for a Treaty of Commerce was entered into with the Sultan which has proved to be highly beneficial to the nation.

Having accomplished at the Gambia even more than he had proposed to himself or than he was commissioned to perform, Mr. MacDonnell resigned his office and returned to his native country. While he held his appointment at the Gambia, Mr. MacDonnell availed himself of his leave of absence during the sickly season to make visits in two successive years to the British possessions in America, travelling through the Canadas, Nova Scotia, New Brunswick, and Prince Edward Island, as well as over a large part of the United States. Curious adventures, and adventures more uncomfortable than curious, seem to follow some men with most perplexing constancy. The subject of our sketch might perhaps be cited by way of example. On one of these North American excursions, Mr. MacDonnell, when attempting to reach the Island of Prince Edward from the main land of Nova Scotia, was obliged to embark in a small, ill found boat. This boat was wrecked in mid-channel near the island of Pictou, and our traveller, after buffeting with the waves as best he could, found himself on shore more dead than alive, but kindly cared for by the fishermen of the island. With the heartiness which characterises his proceedings, Mr. MacDonnell inquired into the manner of life of his humble hosts, and naturally desired to do something for the people who had saved his life. Thus it was he learned that proceeding at law were on foot to dispossess those people of their holdings, and that they were too poor and too weak to resist the authority which could pay the lawyers and employ the Sheriff. Fortunately for the poor fishermen, the "waif" which had been washed on their shores, or which they had fished out of the sea, was by profession a lawyer and by habit a man of generous instincts. He heard enough of their story to discover in the narrative a strong ingredient of hardship, and he therefore sent the facts of the case with the necessary retaining fee to a lawyer of Halifax, whom he requested to take up their cause, leaving to the constituted Tribunals the responsibility of determining whether the Islanders had or had not the claims they advanced. We may state that the fishermen were not disturbed in their holdings, and we may add further that they did not know their deliverer until, to their great amazement, he appeared recently among them as the Queen's Representative in Nova Scotia.

Having seen much and travelled far, Mr. MacDonnell in 1847 returned home, precisely determining to settle in London and practice at the English bar. This plan of life was not destined to be carried out. Earl Grey was made aware of Mr. MacDonnell's arrival in England. His lordship had formed a very favourable opinion of his capacity in the comparatively subordinate office which he had filled at the Gambia. The office of Go-

Digitized by Google

vernor of those settlements was then vacant, and it was offered to and accepted by the subject of our sketch. Thus it was that for the next three years Mr. MacDonnell found himself possessed of almost irresponsible power, and engaged in the duty of governing as a paternal despot about one million of people. The commercial policy he had sought to introduce in 1844-5 was the policy he endeavoured to foster and promote in 1847-8. The difficulty, however, was to check the marauding propensities of numerous warlike tribes, whose only idea of commerce seemed to be to possess themselves of other persons' gains. Thus it chanced that the cultivators of the soil, as well as the peaceful traders of the settlements, found themselves harassed and plundered by tribes to whom tillage and trading were alike distasteful. The new Governor, with instinctive courage, and in a summary way, determined, if possible, to put a stop to this state of things, and with this end in view he undertook to visit in person the "King of Keenung," who resided in a strongly fortified native town, and whose subjects had committed several robberies. This act of temerity very nearly cost the Governor his life, for he fell into an ambush treacherously laid for him, and with two friends by whom he was accompanied only just missed assassination; for his clothes were literally pierced and cut in a dozen places with spears and swords. Experience and an apt address on his part and the part of his friends, added to the gallantry of some local allies, saved him from being murdered. Should the natives, with their increased knowledge of manufactures, become acquainted with the qualities of Sheffield cutlery, it is probable that some future act of treachery will be less cheerfully remembered than the one under notice.

Such an affront to the Queen's Representative could not be borne. Retribution, sharp and peremptory, was at once decided on; and thus a new character came to be added to those already acquired by one who had successively been a Chief Justice, a Plenipotentiary and a Governor. The military was added to the civil character, or rather the latter was for the time merged in the former. His Excellency forthwith commenced warlike operations, and by great exertion, and with the cordial co-operation of the then commandant, Major Hill, of the 2nd West India Regiment, an efficient force was soon organised and ready for service. Government House under the circumstances was wholly foreign to the Governor's taste, for he had no disposition "to live at home at ease." Therefore it was his Excellency caused himself to be gazetted as captain of a company of volunteers to act under the orders of the Commandant. The fortified town of Barnbak lying directly in the route was besieged and taken, and afterwards the town of Keenung was assaulted. The fighting on both sides appears to have been creditable for gallantry and conspicuous for pluck. The King, however, was not satisfied with the state of affairs, for his comparatively-speaking large army, which had rushed confidently to the attack, was foiled and driven back by the small British force. Thereupon his Majesty added discretion to valour, and, having made restitution of all plunder, humbly sued for peace. This contest, which cost the British thirty soldiers in killed and wounded, resulted in measures of increased security to trade and commerce, and at the same time produced such a wholesome impression on the minds of the native chiefs with respect to the capacity of the new Governor, that no further disturbance arose in that part of the country during his Excellency's administration. We may mention that in his work on colonial policy Earl Grey has warmly eulogised the conduct of his Excellency for his rule at the Gambia. Before returning to England, Mr. MacDonnell determined to gratify afresh that relish for adventure which seemed to be inherent in his nature. He took two excursions into the interior of the Continent, in one of which we believe he penetrated further than any white traveller had previously accomplished, for he found himself in the region of those monstrous animal and vegetable productions for which equatorial Africa is famous. These explorations, while they yielded personal gratification to the explorer, were turned to beneficial account for the nation. The commerce of the Gambia was developed and so much increased that it recently employed inwards and outwards no less than seventy thousand tons of shipping. In 1851 Mr. MacDonnell returned to England on leave of absence, and in 1852 he was created a Companion of Bath. In the latter year, at the request of Government, he revisited the Gambia where he remained for a few months to perfect certain local arrangements and complete various commercial treaties with native chiefs.

While thus engaged he was gazetted to the Government of St. Lucia, and almost immediately afterwards to what in point of climate may be regarded as the more desirable one of St. Vincent. Disappointment met him on the threshold of his new Government, for St. Vincent, the most picturesque and ordinarily the most healthy of the West India Islands, was then ravaged with yellow fever, to which disease his predecessor in the Government, Sir John Campbell, had fallen a victim. In the second year of Mr. MacDonnell's administration the more terrible scourge of cholera, visited the island, and in a form so dreadful as to appal the stoutest hearts. The writer has in his possession a letter written by a gentleman, at that time a resident clergyman of St. Vincent, but now settled in Canada, which contains the maturely formed opinions of one thoroughly competent to judge of the qualities of the man who then represented the Queen at St. Vincent.

After administering the Government of St. Vincent for about two years, Mr. MacDonnell returned to England, when he received from Her Majesty the honour of knighthood. It so happened that he was in London, in the spring of the year, when, on the intervention of the House of Commons, the nomination of a gentleman to the Government of South Australia was revoked. The vacant office was, by the Queen's command, without any solicitation on his part, offered to Sir Richard MacDonnell, accompanied with the intimation that he would be invested with the superior title of "Captain-General and Governor in Chief." The offer was accepted and obeyed with such alacrity that, on the 7th of June following, we read of the arrival of Sir Richard and Lady MacDonnell at Adelaide, the seat of his new Government.

The colony seemed to have reached a critical point in its history. The questions of Parliamentary responsibility and local self-government were being discussed in the Australian as they had been in the British American possessions. The colonial policy of the empire favoured the popular views of the colonists, and it would seem that Sir Richard was instructed to carry out in Australia what Lord Sydenham had initiated in Canada, a system of popular Government based on ministerial responsibility. It might be instructive did our space permit, to note the political progress of that province from its state of tutelage to its condition of self-government, and compare it in its separate parts with the system which obtains in Canada. There are points of difference, not unworthy of note, with respect to which, the advantage may not altogether incline to the latter province.

The apparently irrepressible desire of Sir Richard MacDonnell to see everything and go everywhere, moved his Excellency to undertake long and frequent journeys to the interior and along the seaboard of his dominions. This practice was as fruitful in popularity as it was in personal gratification. The governed were brought into personal contact with the Governor, much to their mutual gratification, and perhaps to their mutual advantage. There were besides objects of natural curiosity as well as of local interest to examine which would attract one who, like Sir Richard, appears to be beset with an explorer's passion for adventure. His rule in Australia was marked with energy and originality, and his departure was accompanied with general regret.

On his return to England Sir Richard very earnestly addressed himself to the work of bringing under the notice of the Government the claims of Colonial Governors to retiring or superannuation allowances. The able enclosure which accompanied the following letter was, we have reason to believe, from the pen of Sir Richard himself. It must be satisfactory to him to know that his views have become embodied in the law of the land, and that a most meritorious and, at the same time, much slighted class of the public servants have reason to thank him for attracting attention to their claims, and for being instrumentally the means of securing for them substantial consideration. Many a high-minded representative of her Majesty will, by the passing of that Act, feel himself to be released from galling cares. His official career is now brightened with the prospect of a pension from Imperial funds, and cannot therefore be blemished with humiliating efforts to make a purse from colonial emoluments.

"To His Grace the Duke of Newcastle, K.G.

"London, March, 1863.

"MY LORD DUKE,—We, the undersigned, in common, we believe, with all others who have administered colonial government, as Her Majesty's representatives therein, have long felt the exceptional and peculiar hardship of being the only immediate servants of the Crown for whom no retiring allowances, under any circumstances, have hitherto been provided, whatever may be the merit or length of their services.

"We, therefore, respectfully solicit your Grace's attention to the enclosed printed statement, which, we believe, fairly illustrates the anomalous and painful position of governors of colonies in that respect, as compared with Her Majesty's other public servants.

"We request your Grace to consider favourably the arguments set forth in the enclosed paper; and trust that you may see fit to bring the subject under the consideration of Her Majesty's advisers, with a view to the introduction of some Parliamentary measure which may meet the case. The sketch of a Bill annexed to the within statement is intended only to illustrate our view of what such a measure might be.

"We are quite aware that it does not rest with us to suggest the proper means of carrying out the intentions of Her Majesty's Government, even though they may accord with our views.—We have, &c.,

(Signed) EDMUND HEAD.
C. H. DARLING,
RICHARD GRAVES MACDONNELL."

With his experience of the colonial service and his repute as a Governor, it was not probable that Sir Richard MacDonnell would remain long unemployed. On the succession of Earl Mulgrave to the title of his deceased father, the late Marquis of Normandy, a vacancy occurred in the office of Lieutenant-Governor of Nova Scotia. The post was immediately given to the subject of our sketch, and thus Sir Richard for the third time found himself in the North American possessions, but on this occasion as the representative of his Sovereign.

The habit of governing had not been forgotten by his Excellency when he became the Governor of Nova Scotia. Without doubt he found himself called upon to rule in conformity with a system which, though perhaps rather experimental than established, did not necessarily reduce the Governor to the condition of a cypher. At least such appeared to be the opinion of Sir Richard MacDonnell; and there can be little doubt the opinion has its root in truth and experience. The representative of the Sovereign, being also a statesman of approved wisdom, must necessarily be a power in the State, whose influence, however, should rather be felt, than articulated; seen in the acts of Government, rather than heard in the words of the Governor. Any departure from the law of silence should be resorted to only on grave occasions when the reason is so transparent as to commend itself on its merits. At the very outset of his government, Sir Richard MacDonnell appeared to think there were reasons why the exception should be the rule, and when in the interests of morality and good government he should not keep silence. In replying to a congratulatory address of the inhabitants of Pictou, his Excellency took the opportunity to contrast the American Republic with the British Monarchy, to compare the confusion of the former with the serenity of the latter; and, in doing so, to point, as Lord Brougham had done before him, to a particular virus which, with ulcer-like malignity, was spreading itself through every channel and artery of the American system.

Under the system of colonial government which now obtains, the Viceroy may be said to cease personally to rule, and to begin personally to reign. If this view be correct, it follows that the social duties of the Crown cannot be satisfactorily discharged without some sacrifice being made to the obligations which those duties entail. Selfish privacy and systematic exclusiveness form no part of the Royal instructions, and cannot, we venture to think, be practised with advantage to the Royal authority. His Excellency the Lieutenant-Governor and the inhabitants of Nova Scotia seem to have been impressed with these convictions; and hence the regrets which mingle themselves with his Excellency's approaching departure, regrets which take their rise in social causes, and cluster like pleasant memories about Government House, and those graceful and frequent hospitalities, to which the first lady of the province has by her condescension given a more than usual charm. "Lady MacDonnell," writes an enthusiastic local authority, "has endeared

Digitized by Google

herself to all;" and should any one have the temerity to question his statement, he adds amusingly, by way of challenge, "that the fact will be disputed by no person living." Having the advantage of some slight knowledge of our own, we unreservedly re-echo the sentiment of the chivalrous "Hallegonian," and add, by way of emphasis, that no dissentient therefrom will be discovered in Canada.

PENINSULAR AND ORIENTAL STEAM NAVIGATION.

The 25th annual general meeting of this company was held on the 5th instant at the offices, Leadenhall-street; A. ANDERSON, Esq., the chairman, presided.

Mr. HOWELL, the secretary, read the report, which stated that the total assets of the company in ships, in freehold and leasehold property in England and abroad, in stores, cash at bankers, investments, and debts due to the company, amounted to £3,706,987. The total capital received from the proprietors amounted to £2,200,000, and on debentures to £642,500, and the liabilities of the company in bills payable and otherwise to £405,836, making the total capital and liabilities £3,248,336, showing a surplus of £458,651. This surplus was represented by the balance at the credit of the general reserve fund. The gross revenue of the company from all sources amounted for the 12 months ending the 30th of September last to £2,136,076; and the expenditure including reserves for insurance, wear and tear, and depreciation for the same period, to £1,976,999—leaving a net profit of £159,077. From this was deducted the dividend of 3½ per cent. for the half-year ending the 31st of March last (£75,250), and the half-year's dividend of 3½ per cent. now recommended (£77,000), leaving a balance of £6,827. The proprietors' underwriting account showed that the annual premium of 5 per cent. on the estimated value of the floating property of the company amounted to £110,000; from which was deducted the value of the steamship *Corea*, lost in the China Seas in June last (less depreciation), £26,000; and damage to company's property at Calcutta by the cyclone in October, as far as ascertained, £17,075, leaving a balance of £66,924, out of which it was proposed to pay the proprietors £66,000, being at the rate of 3 per cent., leaving £924 to be carried to the general reserved fund, which would then amount to £458,651.

In the last half-yearly report the *Mongolia* and *Tanjore* stood under the head of ships building; both those vessels had been since completed, and had made very satisfactory voyages on the Southampton and Mediterranean lines. The *China* and *Nubia* were still under repair, the former in London and the latter in Bombay, but those two vessels would very shortly be ready for active service. The *Ceylon* was also undergoing a complete refit and receiving new engines in London. The *Vectis* and *Valetta* no longer appeared on the list, having been purchased by the Egyptian Government. Two new ships had been recently purchased—the *Niphon*, of 694 tons and 140-horse power, and the *Geelong*, of 1,500 tons and 250-horse power. The former was destined for the Japan service, and the latter for employment on the Australian or Indian and China lines, as might be required. The total number of persons on board the *Corea*, supposed to have foundered in a typhoon which visited the neighbourhood of Hong Kong during the night of the 29th of June, was 103. There were only three European passengers, and the European crew consisted of 17 persons, the remainder being natives and Chinese deck passengers. This unfortunate casualty had involved far greater sacrifice of life than had taken place during the 25 years the company had been at work. The directors, finding that the Mauritius line was being worked at a loss, notwithstanding the increase of £6,000 per annum in the subsidy, had exercised the right of giving 12 months' notice of their intention to terminate it. The receipts for the conveyance of specie alone for the 12 months ending the 30th of September, 1865, as compared with those for each of the two preceding years, exhibited a deficiency of about £100,000. It was satisfactory, on the other hand, to state that an increase had taken place in the passenger traffic, although in consequence of the present high price of provisions and the operation of the reduced fares adopted by the company, the balance of the profit and loss account had not yet been advantageously effected by that increase. The available balance, however, enabled the directors to recommend the usual dividend of 3½ per cent. for the past half-year, and 3 per cent. from the underwriting account, making together 6½ per cent. free of income-tax, payable on the 28th inst. The total number of ships employed by the company was 63, the Customs' measurement of them being in the aggregate 92,353 tons, and the horse-power 18,270.

The CHAIRMAN, in moving the adoption of the report, alluded to the extraordinary mortality that had taken place among some of their chief *employes* during the past year, and stated that it was far greater than in any previous similar period. They had lost four commanders, one superintendent, and two pursers, and four other officers, two clerks, seven junior engineers, three assistants and five stewards. This loss showed the advantage of the system of life assurance adopted by them, the company contributing a certain portion of the fund. The assurance-office had paid in claims the sum of £9,552 on that occasion, and the total claims paid by the assurance-office since its establishment amounted to £43,148. Those claims had not been paid out of the funds of the company, but had been provided for out of the provident and good-service fund established by the founders of the undertaking, and to which he need not further allude. The revenue of the company had been considerably diminished in consequence of the great cessation in specie shipments, owing to the stagnation in the cotton and silk trade in India and China, which also had operated injuriously on the return freights. There had been some deficiency in the receipts for passenger traffic on account of the company's fares being reduced in 1864. They had increased the number of passengers by 2,200 but without any benefit to the revenue, as there was a deficiency of £10,000 in the item of fares, and, on the other hand, they had incurred extra expense in the victualling department of £10,000 from the enhanced cost of stores. When they considered that the company had to fill 10,000 stomachs every day, any increase of price in provisions must tell upon the cost of stores. There had been an improvement in their receipts during the past two months, the specie freights had been considerably more, and he thought they might look forward to a revival of trade. Notwithstanding the deficiency in revenue, the result of the working showed how vigilantly the navigation of their ships had been superintended. With the loss of two ships, under circumstances beyond their control, they had been able to supplement the usual dividend by 3 per cent from the insurance fund. They had added considerably to the performances of their ships and had diminished the expenses. The navigation of their ships had been in the aggregate about 1,500,000 miles. The ordinary insurance against loss by sea risks would have been £5. 5s. per cent. at Lloyd's; but the actual loss incurred during the twenty years the proprietors had been their own underwriters was only 25s. per cent. (Hear, hear.) With regard to their expenses of navigation, the cost of coal and fuel had been £72,900 less than for the preceding year; this was partly effected in the quantity of coals consumed, and by the super-heating process adopted in their ships. Something had been said and written about the Australian postal service performed by the company, and there had latterly been loud complaints respecting delays both in Australia and here. In adverting to the history of that service he stated that the company had in the first instance lost £40,000 by it, and gave it up. The Government then gave the contract by public tender to another company, at a rate £45,000 higher than they paid their company, but they all knew, even with that addition to the subsidy, how ruinous that contract proved to the company who took it. The Peninsular and Oriental Company was again applied to on the subject, and they proposed that the Australian service should be worked as a branch from the Indian and China route from Point de Galle to Australia, and this was done at a cost of £60,000 less than before. He then explained how some irregularities would unavoidably arise in performing the branch service, notwithstanding the utmost efforts of thes company; and that the delays complained of would have been much greater had it not been for the large resources of the company. That service extended over 15,000 miles. There was at times rough weather in passing the Bay of Biscay, as well as other places in the route, and the coast of Australia was bad for navigation, and therefore delays would sometimes arise. A system of penalties had been adopted by the Postmaster-General for delays, and of premiums when the mails arrived before their specified time. The result of this arrangement was that in the course of the past five years their ships arrived 73 times within the time specified, and 26 times later than the time specified, so that on the whole he thought there was nothing very material to complain of in that respect.

Mr. HADOW (deputy-chairman) seconded the motion for the adoption of the report. After some observations by Mr. Gliddon on items in the accounts, and Mr. J. Jones in respect of facilitating the operations of shippers by the company adopting a system of insurance on goods.

The CHAIRMAN explained that the revenue of the company would be affected by the state of the trade. The French steamers had a subsidy of 2½. a mile for a monthly service, while their company had only a subsidy of 4s. 6d. a mile for a weekly service; and there could be no doubt they had their full share of the traffic to all the places served by the company. The report was unanimously adopted, the dividend of 3½ per cent. and the 3 per cent. from the insurance fund, making 6½ per cent., free of income-tax, was declared payable by warrant on the 28th inst. The retiring directors, Mr. P. D. Hadow and the Count de Torre Diaz, were unanimously re-elected; and also the retiring auditors, the Earl of Leven and Mr. Mackenzie.—Thanks were voted to the chairman and directors for their able and successful management of the company's affairs, and the proceedings terminated.

THE LABOUR QUESTION OF CEYLON, MAURITIUS, AND JAMAICA.

(EXAMINER.)

Every year the Legislature of Jamaica votes money for the importation of labour, because the negroes prefer to squat and live on cassava and yams to that continuous labour which would enable them to live in comfort. Some of the negroes have become proprietors themselves, and are well known, when in this capacity, often to employ the imported labourers, that is, the Indian coolies, in preference to the labourers iof their own blood. The island of Ceylon is greatly inferior to Jamaica n fertility, and is further away from the great market of the world. It has, in proportion to size, by 20 per cent. more inhabitants than Jamaica, but is in no starving or distressed condition—it is very flourishing. The wages of Ceylon labour are, moreover, lower than those of Jamaica, but Ceylon produces more of one of the staples of Jamaica—coffee, not only more, but also also better than all the British West Indies put together. We give one more example, but it is a very pertinent one. The little island of Mauritius, with an area of little more than 700 miles square, contains 310,000 inhabitants, or within 40,000 of those of Jamaica. It has, therefore, 437 inhabitants to every mile, which is better than fivefold the density of the population of Jamaica. But then the majority of the population is not negro, for no fewer than 230,000 are of Indian origin—imported Hindoos. Of the once renowned staple of Jamaica, sugar, the Mauritius produces not only more than does Jamaica, but within two-fifths of the produce of all the British West India Islands. The whole of this great quantity is the produce of imported Indian labour. The Indian labourers doing more and being far better paid than in their own country are consequently so satisfied that the majority become permanent settlers, and often landed proprietors. Not a hundredweight of their sugar is got by the labour of the emancipated negroes, who obstinately refuse to work in cane-fields or boiling-houses, and consequently are yearly declining in numbers. Philanthropy will never make black white, or change one race into another. The reader, however, may prefer having the facts stated in another form, and in more detail, and this we do from the Colonial Blue-books. In 1850, the value of the sugar exported from Jamaica was £585,096, of Barbados £596,551, and of the Mauritius £892,840. In 1861 the value of the Jamaica sugar was £595,084, or in twelve years' time it had increased by a good deal less than 2 per cent. The sugar exports in Barbados in 1861 were of the value of £751,170, or had increased by better than 25 per cent. The sugar export of the Mauritius in 1861 was of the value of £1,771,867, or had increased by better than 98 per cent. But this is not all. The returns for the two West Indian colonies come down only to 1861, while those of the Mauritius come to 1863, when the value of the sugar exported was £2,494,526, or above fourfold the value of the produce of Jamaica,

Digitized by Google

which is seven times its size. The distress of Jamaica is partially ascribed to two years of extraordinary drought. But Jamaica is a well-watered land, and if it has been injured by unusual droughts, that is a calamity from which other countries have suffered, and this even in a far higher degree—as, for example, Australia; yet those countries make no bemoaning poverty-stricken cry on this account, but go on flourishing in spite of such ephemeral calamities. The misfortunes of Jamaica, according to Dr. Underhill, are coeval with the American Civil War, the very event which has benefited other countries similarly circumstanced. During that war the price of cotton increased at least threefold, and, in consequence, millions of English capital were poured into India, Egypt and Brazil; but money would not go to Jamaica, because in that island there was no effective labour to till an exuberant and plentiful soil. Dr. Underhill, in his bill of indictment against the authorities of Jamaica, insists that the taxes are onerous, but his own facts do not prove this. The only example he gives does not prove this. It is a tax on the cottons with which the negroes are clothed. This, he says, is 38 per cent. on the value. If it were so, that would be a great deal too high, but not a starvation tax, for the people of the Southern States of the American Union paid their brethren of the North one of 12 per cent. higher, and did not on that account go naked, as Dr. Underhill says that the negroes of Jamaica often do. But this statement is a blunder. The tax is, just as it used to be, 12½ per cent., but the cotton famine produced by the American civil war so raised the price of goods that the *ad valorem* duty became, like the price, as 38 to 12½ upon the former cost of the article. All the world shared that trouble of dear cotton with Jamaica. As to Dr. Underhill's empirical notions of governmental help by precept and example, we must take leave to tell him that they are obsolete. The worthy doctor does not, in fact, understand the first rudiments of the science in which he hazards to give advice. The truth is, that the Baptist and other over-zealous friends of the negro are mortified and disappointed at the utter failure of their predictions. They are hoping against hope for better results than have yet come in the elevation of the negro race after 32 years of emancipation. The negroes of our West Indies, free for a generation, and the negroes of Hayti, not only free but their own masters for two generations, are still, in despite of generous hopes and vaticinations to the contrary, barbarians of Africa who have but changed their sky.

Monetary and Commercial.

—o—

At the meeting on the 5th of the Peninsular and Oriental Steam Company a dividend of 3½ per cent., and of 3 per cent. from the underwriting account, were declared, making a total of 10 per cent. for the year. A report of the meeting will be found in another column. Some comments having been made in a letter published by a contemporary as to the inefficiency of the staff of assistant managing directors, owing to the death of Mr. Olding and the illness of Mr. Ritchie, we are authorised to state that the managing directors have now made arrangements for the full efficiency of that department.

The half-yearly report of the Scinde, Punjab, and Delhi Bank Corporation states that the late losses sustained from bad debts, owing to the direct contravention of orders by their local agents, will amount to about £2 per share in addition to the whole of the reserve fund. Arrangements are in course of negotiation for a satisfactory amalgamation with another bank.

It has been announced in some papers that a company has been formed which is to enter into an agreement to run a monthly steamer between Batavia and Sydney, calling at Kopang, Timor, Cape York, and Brisbane; leaving Batavia on the arrival of the English mail there, should the Governments of Netherlands India, Queensland, and New South Wales be willing to subsidise them for the service to the extent of £38,400 per annum. For this concession it is proposed to run paddle-steamers of sufficient power to average 12 miles an hour, and capable of carrying 600 to 800 tons of merchandise, with cabin accommodation for 40 to 50 passengers of the first-class, and 60 to 100 second and third class. We believe this announcement to be premature. When the matter has been decided on by the Dutch Government tenders will be invited for the service.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta £223,300, to Madras £26,700, and to Bombay £100,000. The *minimum* price was as before, 1s. 11⅛d. on Calcutta and Madras, and 1s. 11⅜d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅛d. will receive about 18 per cent., and on Bombay at 2s. 0⅛d. about 8 per cent. Above these prices in full. These terms show a slight diminution of the demand for means of remittance to Calcutta, and a slight further increase in that for Bombay to pay for cotton.

The Chartered Mercantile Bank of India, London, and China has announced a dividend of 5 per cent. for the half-year ending the 31st instant, making, together with the dividend of 8½ per cent. paid on the 1st July last, 13½ per cent. for the year.

It is stated that the governor and directors of the Union Bank of London, taking into consideration the representations recently made to them of the increased cost of houses and provisions, have permanently increased the salaries of the clerks 10 per cent. all round. No doubt this good example will be followed by the majority of the other establishments.

A memorial has been published from the Bengal Chamber of Commerce, showing that the mildew in shirtings has been equal in some cases to 21¾ per cent.

Thomas Baring, Esq., is the gentleman recommended by the Court of Directors of the Bank of England to fill the vacancy in the direction caused by the retirement of the Right Hon. George Joachim Goschen.

We had occasion a short time ago to announce that Mr. J. Mackrill Smith had joined the board of the London Provincial Marine Insurance Company. The directors have now added to their number by the election of Mr. George Lyall, of Messrs. Lyall, Still and Co., Hong Kong.

The half-yearly meeting of the Ceylon Company (Limited) will take place on the 19th instant to declare an *ad interim* dividend for the six months. A meeting of the Netherlands India Steam Company will be held at the Hague early in the ensuing year.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 4th inst., was:—In gold, to Madras, £4,751. In silver, to Calcutta, £1,350; to Singapore, £10,000; to Hong Kong, £15,110. Total, in gold, £4,751; in silver, £26,460. About half a million in silver has gone to Bombay,

The following Tea statistics are derived from the Board of Trade returns:—

The quantity of Tea entered for home consumption during the ten months ending October 31st, is 7,942,099 lbs. in excess of the quantity for the corresponding period in 1864, and 10,514,048 lbs. more than in the same part of the year 1863. So considerable an increase as this can only to a slight extent be accounted for by the wants of our increasing population; it must be, in the main, attributed to other causes, equally powerful and equally obvious. Of these, the gradual increase of material prosperity amongst all classes is a prime cause; for notwithstanding the pretty general outcry about high prices, it is beyond dispute that luxuries are now very generally placed within the reach of the masses. Another reason that may be assigned, and this is really the most important of all, is the reduction in the duty, the beneficial effects of which, though not at the time immediately apparent, cannot fail to be recognised and appreciated. Continuing our comparison of the home consumption for the preceding years, we find that the amount in the ten months of the years 1860, 1861, 1862, was 64,733,205 lbs., 65,521,336 lbs., 65, 874,935 lbs. respectively; that is to say, the excess in 1865 over that of 1860 amounts to nearly 18,000,000 lbs. In the case of our exports, the increase in the ten months of 1864 over the corresponding period of 1863 was 3,026,832 lbs.; but in the present year, as compared with 1864, this amounts to 4,843,060 lbs., or nearly five millions. In the first ten months of the year 1860, our exports were 7,118,191 lbs.; during the same period of the present year they are given as 28,992,885 lbs., so that in this period of the last six years our exports are actually quadrupled. The successive decrease in our imports from 102,347,685 lbs. in 1863, 87,680,959 lbs. in 1864, to 83,908,179 lbs. in 1865, will not awake any apprehension in the minds of those who remember that the imports of the year 1863 were heavily in excess of demand.

On the silkworm disease a correspondent writes:—

The silkworm disease, which made its appearance in France and Italy in 1857, continued its ravages in 1858, 1859, and 1860, when it appeared to decrease. Silk-growers then hoped that it would disappear altogether on importing fresh seed and paying more attention to the rearing of the worms. They were, however, disappointed. Its virulence increased in 1863, and the present year is said to be one of the worst. The Chamber of Commerce of Turin, commiserating the sufferings of the population who occupy themselves with the cultivation of silk, have presented to the Government a report on the silk trade in Italy during the present year. It contains ample information on the mode of breeding worms in Italy, on the efforts made to renew and improve the breed, and the means employed to arrest the spread of the malady, which for the last two years has threatened to destroy one of the richest branches of industry in the kingdom. Unfortunately the results hitherto obtained are not satisfactory, as may be seen by the produce of the last crop. Ten years since there were silk markets established in at least 100 towns in the north of Italy—at present the number is reduced to one-half. The quantity of cocoons formerly offered for sale in these markets amounted to upwards of 650,000 myriagrammes, but it fell in 1864 to 525,000 and in the present year to 283,000. The sales, of course, decreased in a similar proportion. From £1,600,000 they fell in 1864 to £1,160,000 and during the present year to £800,000 This sudden diminution within two years was too serious not to attract the attention of all engaged in the trade, and they consequently set about devising means to remedy the evil which threatens them with ruin. One method strongly recommended is a succession of crops during the year. By this plan if one crop fail the next one may succeed, and the breeder thus recover the first loss. An important fact is noticed in the report. The silk-growers of Lombardy provided themselves with seed from Japan, and they were more successful than their neighbours, who supplied themselves from Greece. There are two distinct breeds of the silkworm in Japan. One produces white cocoons, and the other green. Italian breeders have found by experience that the produce of the green cocoons is greater than that of the white; but, on the other hand, the silkworms require much more attention in the rearing.

ARTICLES OF IMPORT.

TEA.—Our market during the past fortnight has been less active, the trade having bought very freely during the past two months, at the near approach of the close of the year have felt less inclination to add to their stocks, and thus the new arrivals have not been so eagerly competed for, and prices, both for Kaisows and Monings, show a decline of 1d. per lb. Old teas have, however, firmly maintained the late advance, owing to the much smaller quantities offering, and their still relative cheapness as compared with new teas. Broken-leaf and dusty kinds have sold readily, owing to their scarcity, at fully former prices. Fair to good common show no alteration. Fair to good flavory kinds of old import have been steady at previous rates. Further arrivals of medium to fine Kaisow, ex "Japanese," did not meet with so brisk a demand as previously, and prices must be quoted 1d. per lb. lower. Common to fair blackish-leaf kinds have been firmly held, and at public sale have sold rather higher. Medium sorts show no alteration. In new Monings and Wopaks sales have been more difficult to make, and prices have given way about 1d. per lb., especially for the medium sorts. New-make Cantons have been in request at fully previous rates. Oolongs have been eagerly taken at full prices for good to fine qualities. Souchongs of fair to good kind have sold 1d. per lb. higher; fine are firmly held for extreme rates. A few flowery Pekoes of new season's import have been sold at full prices; old remain without change. In the absence of further arrivals of scented tea of any moment, prices have been maintained, the demand having been somewhat better. Uncoloured Japans, in the absence of export orders, are only saleable at lower prices. In green teas business has been limited, the export orders have only been on a moderate scale, and prices in many cases must be again quoted in favour of buyers. Some coloured Japans have been realised at fair prices. Canton Gunpowders have been less active, but prices are firmly supported. The stock in the United Kingdom on the 30th ultimo was estimated at 77,000,000 lbs. against 91,000,000 lbs., last year, and the quantity afloat at 39,587,000 lbs. against 41,021,000 lbs. The quantity afloat and not included in stock is 42,513,967, against 44,638,116 in 1864. The quantity delivered to 31st Oct. by the Board of Trade returns was 111,089,307, against 98,304,147 in 1864.

SILK.—The deliveries for November are scarcely up to October. Still, so great is the confidence in the repeated reports of ultimate short export, that prices of Shanghai Silk have been further advanced—at one moment nearly 1s. per lb., but part of that has been again lost. As the season progresses there is a growing scarcity of the better qualities of almost all classes, the more unfortunate as consumers generally seem to have found, by experience, that at our present high range of prices it is especially desirable to pay increased attention to quality. In Japan Silk we have had little change of prices; some small parcels of best Silk have realised some little advance. In Canton Silk we have an increasing stock without any corresponding improvement in the deliveries—the more surprising as prices are considered comparatively moderate. During the last few days, however, buyers have paused, and at the moment there is little or nothing doing, but all holders are extremely firm, and quotations remain unaltered; it is very probable that the market will continue in this quiet state till the turn of the year. Piece Goods.—Transactions have been limited. Some arrivals have taken place, amongst others a parcel containing 300 pieces plain and 200 figured Pongee handkerchiefs, and 43 pieces crimson China damasks, baskets, and fine patterns; these last have been sold at full rates, but the Pongees have not yet found buyers.

COTTON.—Large transactions have taken place for arrival, as well as on and spot, the prices are pretty generally ½d. to 1d. per lb. above those of last week, although the market closes with a quieter feeling, and at a slight decline from the late highest point. During the first week referred to we have to record sales of 170 bales of Japan, fully fair, at 16½d. to 17d., and 690 bales Tinnivelly, at 14d. to 17d. middling to good fair; and in the week ending the 8th, 190 bales Japan, 17d. to 17½d. fair to fully fair; and 1,750 bales Tinnivelly, 16½d. to 18d. fair to good fair; with sales to arrive, 2,850 bales Tinnivelly, 15½d. to 17½d., December to August, guaranteed good fair, closing at 16½d. for November. The total stock in London on the 7th was 45,559 bales, against 117,718 bales last year; of which 2,096 is China and Japan, against 19,486 last year. There is no China and Japan afloat to Europe. Of Ceylon and Tuticorin we hear of 25,250 bales, against 22,505 on the 8th December last year. The stock in Liverpool on the 8th December was 339,240 bales, against 495,000 at same period of 1864. The demand for East India was very extensive in the Liverpool market during the week just ended, especially for the better qualities, and an advance of 1d. per lb. was generally obtained, though closing at a partial reduction of ½d. per lb. from the highest point. The common qualities are still difficult of sale, but are about ½d. per lb. dearer. China and Japan are very scarce, at an advance of about ½d. per lb. The following are the official quotations:—Fair Orleans, 23d.; middling, 21½d.; fair Mobile, 22½d.; middling, 21¼d.; fine Uplands, 22½d.; middling, 21¼d. Opinions incline to the belief that the quantity to be expected from the United States, inclusive of the new crop, has been much overrated. Mr. McCulloch, the Secretary of the United States Treasury, writing on Oct. 27, considers that at the capture of Savannah there was not more than a million of bales in a condition to be sent to market, and that the new crop would not add more than 300,000 to this quantity.

SUGAR.—The market has been dull since our last report, but had a firmer tone towards the close of business on the 8th, closing with prices rather stiffer. We note a sale during the week ending the 1st of 1,064 bags Penang good brown, 32s.; low to good middling yellow, 34s. 6d. to 38s.; and 6,500 bags of clayed Manila at 33s. cash. During the week ending the 8th, 8,000 bags clayed Manila went by private contract at 33s. 6d. to 33s. 9d., partly for cash.

COFFEE.—The demand for colonial descriptions is only moderate, but prices remain without alteration. At auction on the 8th 160 casks Plantation Ceylon went off steadily; and 192 casks, 1,620 bags native sold as follows—small 63s. 6d. to 65s., good ordinary 68s. 6d. to 69s. 6d., superior 71s. 6d. During the week ending the 1st 320 bags fine ordinary Manila were taken at 72s.

RICE.—The dulness noticed in our last continues to exist, and there are no sales worthy of notice to report.

CARDAMOMS.—Steady. Auctions confined to a bag of good plump Aleppy, sold at 5s. 4d. per lb., and 16 bags low lean Madras, sold at 1s. 6d. Nothing of interest done privately.

CAMPHOR.—Market firmer, and more active, and sales to some extent effected in China up to £5 per cwt., and in Japan up to £5. 2s. 6d., and an upward tendency maintained.

CASSIA LIGNEA.—Large arrivals have occasioned a reaction to the extent (at present) of fully 10s. per cwt.; fair 1st quality has been sold as low as 98s.; 179 chests at auction retired. Buds: Nothing of any moment doing.

CINNAMON (CEYLON).—We quote 1st sort, 2s. 2d. to 3s. per lb.; 2nd sort, 1s. 11d. to 2s. 10d.; 3rd sort, 1s. 10d. to 2s. 6d.; and 4th and Jungle, 1s. 5d. to 1s. 10d.; steady; and of 168 bales at auction, about half sold at about the last sales' rates.

DRUGS.—Cubebs: Very quiet: 16 bags at auction retired. Dragon's Blood: No auctions; limited business done privately upon former terms. Galangal Root: Nothing doing. Rhubarb: Cheaper; and a recent importation, 75 chests, at auction, sold irregularly at 8s. to 8s. 11d. per lb. for fair flat and round.

GUMS.—Benjamin: Not any business of importance doing. Damar: Scarce and firm, but quiet; 75 cases at auction all retired. Gamboge: Firm, but without transactions of interest.

GUTTA PERCHA.—Remains quiet, but firm; of 22 tons at auction three-fourths sold at 6½d. to 7½d. per lb. for ordinary reboiled; no transactions reported privately.

HEMP (MANILA).—This market was quiet up to very recently; but during the last day or two some quantity has been sold at £44 per ton for fair roping, and £42 for arrival.

HIDES AND HORNS.—The sales of East India Hides during the month of November have been 215,921 Hides. The quantity offering has been moderate, and met a fair demand for consumption, but only a limited export inquiry, and prices, except on the lower qualities, are generally ¼d. to ½d. per lb. under those current in October, the greatest reduction being on those of heavy average. Madras and Cochin Hides have met a ready sale at full prices. 11,417 Hides have been cleared. Cochin Best Light 9¾d. per lb; Seconds 8d. to 8¼d. per lb.; heavy 5d. to 5½d. per lb.; Thirds 6¼d. per lb. Batavia: 200 buffalo hides were offered in the last sales, but without find-

Digitized by Google

ing buyers. Singapore, &c.: The arrivals have been large, and prices have receded ¼d. to ⅜d. per lb. from the extreme quotations of October. 1,417 cow hides and 6,370 buffalo hides have been cleared. Ox and Cow light, 6½d. to 7½d. per lb.; heavy, 5d. to 5½d. per lb.; buffalo best, 5¾d. to 6½d. per lb.; seconds, 5½d. to 6d. per lb.; light, 4d. to 5d. per lb.; thirds, 4½d. to 4¾d. per lb. Horns, &c.: The sales are confined to 32 tons buffalo horns, which realised advanced prices. Siam, 46s. to 47s. per cwt.; Cochin, 28s. 6d. to 29s. per cwt.; and Madras, 28s. to 35s. 6d. per cwt. At the sales of East India hides, on the 7th, a large proportion of those offered found buyers at prices showing no material change from those of the last sales. Of the Java, Singapore, and Rangoon buffalo hides offered none sold.

JAPAN WAX.—Firm: of 470 boxes at auction, half sold at 76s. to 88s. 6d. per cwt. for ordinary to fine saucers; and 76s. 6d. good block.

OILS—Anniseed: Did fall since our last to 7s. 3d. per lb., but has latterly advanced to 7s. 8d., with sales, and remains very firm; same price obtained for arrival. Cassia: Flat, and very little business doing upon former terms. Cinnamon, Mace, and Nutmeg: Nothing doing in either of these Oils.

PEPPER.—Black: Steady: of 1,722 bags Singapore at auction, two-thirds sold at 3⅛d. to 3⅜d. per lb., and 761 bags Penang sold at 3⅛d. to 3⅛d.; very little business privately upon corresponding terms. White: Is again ⅛d. to ¼d. per lb. dearer, and 210 bags Singapore sold at auction at 5⅝d. to 5¾d., and fair business done privately.

SPICES.—Cloves: Steady for all descriptions, but quiet; 10 cases of Penang at auction retired; and of 314 bags of Zanzibar a small portion only sold at 3d. to 3⅛d. for middling dark. Mace: Quiet; 10 cases of Batavia only at auction, and those retired. Nutmegs: Quiet; and of 21 cases of Penang at auction only one-third sold at 11d. to 1s. 3d. per lb. for low to middling small.

SAGO.—Small Pearl dearer, and 1,623 boxes and bags at auction mostly sold at 19s. 6d. to 23s. 6d. per cwt. for middling to fine small, and 20s. to 23s. fair to good large. Flour: Good business done privately at advanced prices—up to 15s. 4½d. per cwt. for fine Borneo: 210 bags at auction retired.

TAPIOCA.—At auction 125 boxes Singapore slightly stained were taken at 2¾d. per lb., and 203 boxes good pearl realized 25s. 6d. to 26s. per cwt.

TERRA JAPONICA.—Cutch, Pegue: Good quality again dearer; of 2,582 bags and cases at auction half sold at 29s. to 30s. per cwt. for fine Pegue. Gambier: Rather dearer, and the demand continues active both for arrival and on the spot; large business done within our quotations; 1,445 bales at auction, all retired; Cubes firm at 26s. to 28s. per cwt.

TIN.—This market has again been animated, and further large transactions have taken place in Straits up to £98 per ton, three months prompt; £97 cash; and £98 for arrival.

TOBACCO.—Manila Cheroots and Segars: In first hands stock quite exhausted. Manila Leaf: At public sale on the 2nd November the 250 bales offered found buyers at rather better rates than those realised in October. Japan: The recent arrival of 380 bales is in course of sampling, and will be included in the sale on the 20th inst. Java: The bulk of the recent imports, of good quality, being generally held above the views of buyers, but little had been done. Quotations—Java, 5½d. to 13d. per lb.; Manila, 6d. to 3s.; Japan, 4½d. to 7½d.; Manila Cheroots, 7s. to 8s.

MISCELLANEOUS.—Blacklead: Quiet; 210 barrels at auction all retired Galls: China and Japan more inquired for, and we quote them 65s. to 70s. per cwt. for China, and 60s. to 65s. Japan. Musk: No auctions; small sales. privately at firm prices. Sapan Wood: Unsaleable at the moment; no auctions. Soy: Quiet; 25 casks at auction retired. Star Anniseeds: Very scarce; nothing doing. Sticklac (Siam): Quiet, and no business doing. Vermilion: Very scarce and dear.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg. £15. 10s.

COPPER.—Sheet and Sheathing, £109 to £121 per ton; yellow metal, 9½d. to 10d. per lb.

TIN.—102s. for block; 103s. for common bars. Tin plates, best charcoal, I.C. 32s. to 32s. 6d.

LEAD, &c.—English pig, W.B., £22 5s.; shot, patent, £24; sheet, £21. 15s.; spelter, £22. 15s. to £23; zinc, English sheet, £27. 10s.; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—Iron has been in good demand, but the prices have remained without alteration. In Scotch Pig iron the fluctuations have been inconsiderable. Copper: Owing to the news of the actual blockade of the Chilian ports, the Copper Smelters advanced their price on the 15th November £10 per ton, and a further advance on 16th £10 per ton; of course at this high rate they could not anticipate any orders of importance for the present, but it must be considered as a precautionary measure on their part to avoid taking large contracts, which the continuance of the blockade would prevent their fulfilling, except at very great loss. The great importance of the imports from Chili of copper in ore, regulus, and slab, equal to nearly 30,000 tons pure copper per annum, and the necessary great influence on prices which a stoppage of the production must exercise, is clear, when it is remembered that it represents about one half of the quantity required for our export trade and home consumption. The present prices are rather uncertain, as so many second-hand parcels are still offering by holders who bought before the great advance had taken place, and are anxious to realise their profit. Tin: English has been in steady inquiry; on the 28th ultimo an advance of 2s. per cwt. was declared; this, with the advance of 3s. per cwt. on the 3rd ultimo, making 5s. during the month. Foreign has been in active demand. Banca is firm at 97s. 6d. Straits, fine quality, 96s. 6d. to 97s., good merchantable quality only realising about 1s. per cwt. less. The quantity landed during the month is about 500 tons. The quantity of Straits Tin afloat for Europe is about 1,524 tons, against 864 tons in 1864, and 668 tons in 1863. Tin plates are firm, although the new orders are not so plentiful, but the makers' books are well filled. The quantity shipped to all parts for the past month was 95,000 boxes, against 58,000 in November, 1864. Lead continues to improve, and the price appears still on the advance; prompt delivery of special brands is difficult to obtain. Spelter also is higher; the stock is 6,300 tons, against 11,820 tons at the same period last year.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

But little change has taken place in outward freights since our last impression, the recent arrivals having been only just sufficient to meet present requirements. Coal freights are not so firm, and rates are a shade easier.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £30. For Hong Kong: £44. For Galle: £33 to £34. For Singapore: £32. For Shanghai: £52.—From Newport, Cardiff or Swansea, per ton. For Batavia: £1. 7s. For Hong Kong: £2. For Manila: £1. 11s. For Galle: £1. 7s. 6d. For Singapore: £1. 7s. 6d. For Shanghai: £2. 7s. 6d. to £2. 10s.

The Admiralty have invited tenders for the conveyance of 230 ton naval stores from the River Thames to Hong Kong.

MISCELLANEOUS.

At ST. HELENA.—Oct. 31, from Penang, Shantung, Webster, and sailed Nov. 1 for London; from Singapore, Lord Raglan, Law, and sailed for London; Nov. 1, from Foo-chow-Foo, Chaa-Sze, Shewan, and sailed 1st for London; from Batavia, J. C. Schotel, de Groot, and sailed 2 for Dordt; 2, from Penang, Edinburgh Castle, Inglis, and sailed for London; 3, from Batavia, Cornelia Mathilde, Wulp, and sailed for Schiedam; from Macao, &c., Boy Bendixen, Matthieson, and sailed 4th for Hamburg; 4, from Singapore, Else, Wesselhoet, and sailed 6th for Genoa; from Foo-chow-Foo, Bells, Turner, and sailed for London; from Batavia, Kron Prinsen, Bothen, and sailed 6th for Amsterdam; 5, from Tjilatjap, Dorothea Henrietta, Ortz, and sailed 6th for Rotterdam, from Batavia, Francina Willemina, v. Winkel, and sailed 6th for Rotterdam; from Colombo, Caldera, Johns, and sailed, 6, for London, from Foo-chow-foo; Whinfell, Whereat, and sailed, 7, for London; from Singapore, Hastings, Vincent, and sailed for London; from Sourabaya, Brandon, Jolly, and sailed, 7, for Amsterdam; from Batavia, Alletta Augusta, Tinholt, and sailed for Amsterdam; from Ceylon, Dreadnought, Henry, and sailed, 7, for London; 9, from Batavia, Neptunus, Lodewyk, and sailed for Rotterdam; 11, from Singapore, Ernst Merck, Muller, and sailed for London; 12, from Padang, Caduceus, Holton, and was detained in consequence of the illness of the master; 15, from Batavia, Dionysia Catharina, Sprinkel, and sailed, 16, for Amsterdam.

Off ST. HELENA.—Nov. 4, from Tjilatjap, Anna Maria Wilhelmina.

At SIMON'S BAY.—Oct. 30, from Batavia for Amsterdam, Maria Agnes (with damage).

At TABLE BAY.—Oct. 16, Cornelia Adolphina, Roever; sailed for Batavia.

The Henry Ellis arrived at Queenstown, Dec. 13, with 6,561 bags of cargo, ex Beejapore, from Rangoon.

At MADEIRA.—Nov. 15, from Plymouth, Sunda (s.), Bolck, and left 17, for Batavia.

At ST. HELENA.—Oct 25, from Batavia, Almelo, Tjebbes, and sailed 26, for Amsterdam; 27, Arrow, Hartley; 29, Adolfina, Blom.

At MAURITIUS.—Oct. 23, from Singapore, Olympia, Gardyne; 24, from Batavia, India, Eckdahl Nov. 4, from Singapore, Visir, Bregeon; 6, Ranger, Ovendon.

The Fire Queen, Captain Duggan, for Adelaide, and the Silver Eagle, Captain Ross, for Auckland, left London on the 3rd of December; from thence they proceed to Shanghai.

CASUALTIES.

The Maria Agnes, from Batavia, for Amsterdam, put into Simon's Bay, Oct. 30, with loss of fore main and mizen topmast.

The Haamstede, Marsch, from Batavia, which put into St. Helena, 22nd Oct., has been surveyed in consequence of having been in collision with the Devana (ship), of London. Parts of her stern planking, guard-board, poop covering board, &c., were found split and broken, and many of her seams requiring caulking.

Intelligence has been received at Lloyd's of the loss of the Helen Douglas, in the China seas, from Shanghai to Hong Kong.

The Peter Landberg (s.s.), Rawles, from Liverpool for Batavia, put into Whitehaven, Dec. 6, with loss of foretopmast.

THE "AGAMEMNON."—Messrs. Scott and Co., Greenock, have launched a large and handsome screw steamship, of 2,500 tons, for Alfred Holt, Esq., Liverpool. She was named the Agamemnon by Mrs. Holt, who cut away the daggers in man-of-war style. Her engines, which are of 300-horse power, are made by the Greenock Foundry Company. Messrs. Scott and Co. have two other steamers of 2,500 tons each building for Mr. Holt. It is announced that these vessels are intended for the direct China trade, but we believe it is quite doubtful as to their employment at present.

THE CAPE, INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

CAPE COLONIES, INDIA, CHINA, AND JAPAN.

Commission, 2½ per cent. on Orders over £50, and 5 per cent. on amounts under £50

Orders and remittances should be addressed to the MANAGER.

Office. 12, George-yard, Lombard-street, London, E.C.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 19, RUE RICHER, PARIS.

WALKER'S CRYSTAL CASE WATCHES.
PRIZE MEDAL, 1862.
JOHN WALKER,
CHRONOMETER, WATCH AND CLOCK MAKER
(BY APPOINTMENT), TO THE
English, Indian, Foreign, and Colonial Railways,
68, CORNHILL, AND 230, REGENT STREET, LONDON.

J. W. SOLICITS the attention of Military and Naval Officers and the Public of China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.

R. L. SOUTHERN AND Co.
MERCHANTS AND AGENTS,
6, MINCING-LANE, LONDON, E.C.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

COWASJEE DINSHAW,
Close to the Landing Place. Depot of
EUROPEAN, CHINA, AND INDIAN WORK.

WINE, BEER, CHAMPAGNE, and SPIRITS of the best quality. Bombay-made Soda Water and Lemonade. Perfumery, Confectionery, Oilman's Stores, and Stationery of every description. Sola Topees and Canvas Shoes, &c., &c., &c.

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.

THE "LONDON AND CHINA EXPRESS" ON SALE

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia, for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS AND OINTMENT.—A frequent cause of gout and rheumatism is the inflammatory state of the blood, attended with bad digestion and general debility. A few doses of these Pills, taken in time, are an effectual preventive against gout and rheumatism; but if anyone has an attack of either he should use Holloway's Ointment also, the powerful properties of which, combined with the effect of the Pills, must infallibly effect a cure. These Pills act directly on the blood, which they purify and improve. They also regulate the secretions and give tone to the stomach, and thus the whole system is invigorated and put into a condition which enables it to stop the approach of the disease or throw it off.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 "
Depth of water ... ... 15 "

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Bangkok, 19th Sept., 1865.

WIGGINS, TEAPE, AND CO.,

MANUFACTURERS AND EXPORT STATIONERS
10, ALDGATE, LONDON.

ALL kinds of Paper and Stationery supplied in quantities on the lowest terms. NEWSPAPER PROPRIETORS SUPPLIED WITH PAPER FOR THEIR JOURNALS. Samples forwarded on application. References to the Proprietors or Agents of this Journal.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states o the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

A GENTLEMAN OF ACTIVE BUSINESS habits, many years resident in the East, is desirous of engaging himself to an East India and China firm. Having previously held a responsible position abroad, and after long experience in the Tea Trades he feels well qualified for the post of Salesman, or confidential Manager of the Produce department. The highest references will be given.—Address "Oriental," 4, Lime-street-square, E.C.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally, that by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

Penang	Oct. 10	Nov. 9	

The P. and O. steamer Salsette met with heavy weather, and was 12 days from Singapore to Hong Kong. The P. and O. steamer Behar, with mail of 10th Oct., put into Penang with broken shaft. Telegrams to the 1st Dec., from Hong Kong, were received on the 25th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Company's steamer Pera, arrived at Marseilles, Dec. 25.—From Yokohama: Mr. Bon. From Shanghai: Mr. Haarbleicher. From Kong Kong: Messrs. Scholefield and Newman. From Singapore: Mr. Crane and two second-class passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Nyanza, from Southampton, Dec. 20.—To Shanghai: Mr. and Mrs. J. H. Evans, infant, and European servant. To Hong Kong: Major Peebles, Mr. W. R. Browne, Staff Assistant-Surgeon Thorpe. To Ceylon: Mr. Macan, Lieut. B. S. and Mrs. du Jardin, and Miss Hugo, Mr. Harper, Mr. C. Murray, Mr. and Mrs. Trotter and five children, and ayah, and four second-class passengers. To Calcutta: Mrs. T. J. Walker, infant, and European servant, Miss Hill, Mrs. C. F. Browne, Miss Nicholay, Mrs. Galbraith, Mrs. A. R. McMahon, two children, and European servant, Lieut. Warner, Major and Mrs. Cochrane, Miss MacDonald, Mrs. Stannus, Staff Asst.-Surgeons, Duhy, J. P. Foster, J. McCreery, and G. White, Mrs. Smith and two infants, Ensign Rimington, Mr. Kennedy, Captain Pearson and European male servant, Mr. and Mrs. Gavin Jones, Captain Browne Mr. Safford, and four second-class passengers. To Madras: Captain and Mrs. Dyer, Major and Mrs. Buck, Mrs. H. Irvine, Major C. W. and Mrs. Dun, Mrs Petley and child, and three second-class passengers. To Suez: Mr. Lyons and one second-class passenger. To Alexandria: Mr. J. Mitchell and one second-class passenger.

From Marseilles, Dec. 28.—To Hong Kong: Mrs. Hunter, two Misses Hunter, Miss Hutton and European servant, Capt. J. L. Phelps, Surgeon West, and one second-class passenger. To Calcutta: Captain Pemberton, Mr. and Mrs. R. Saunders and infant, Mr. E. Lawrence, Mrs. J Harrison, Mr. P. D. Nichol, Mr. Lapsley, Captain and Mrs. F. W. Stubbs, Lieut.-col. and Mrs. Carter and child, Miss Turner, Rev. J. E. Marks, Major Bonamy, Mr. H. du Smidt, Miss Umbers, Lieut. Cowper. To Madras: Captain T. G. Clarke, Lieut. R. T. Chapman, Mr. R. S. Ellis, Mr. W. Robertson.

From Suez.—To Calcutta: Mr and Mrs. J. Dennis, Major Harrison.

Per P. and O. steamer from Marseilles, Jan. 4, 1866.—To Shanghai via Bombay: Mr W. H. Carter.

Per P. and O. steamer, from Southampton, Jan. 4, 1866.—To Singapore: Rev. C. A. Kock, Mr. H. C. Prinsep. To Ceylon: Surgeon W. S. Roche, R.N. To Hong Kong: Lieut. Stewart, A.D.C. to the Governor of Hong Kong, Dr. A. Cochrane To Shanghai: Mr. E. McKean, Mr. A. Harvey, Mr. F. R. Porter, Mr. Steel, Mr. Jerdein, Mr. Cunangham.

From Marseilles, Jan. 12.—To Hong Kong: Rev. F. S. Turner, Mr. A. W. Glenie, Mr F. J. Greene, Mr. J. A. Sitwell. To Shanghai: Mr. and Mrs. Grant Gordon, Mr. R. S. Gundry, Mr. E. Pickwood, Mr. Brunst. To Singapore: Mr. E. L. Hedden, Mr. G. J. Buchanan To Ceylon: Mr. J. T. Mohson, Mr. McLachlan, Mr. A. Sinclair, Mr. Todd, Mr. and Miss Wall.

From Suez, Jan. 19.—To Hong Kong: Sir Richard and Lady MacDonnell.

Summary of News from the Far East.

JAPAN

YOKOHAMA.

From this port we have files of the *Japan Herald* to the 31st Oct., and private advices one day later. The London mails of 26th Aug. arrived out on the 23rd Oct. On the 22nd Oct. the *Princess Royal* returned from Hakodadi with Sir Harry Parkes on board.

The principal item of news is the departure on the 1st Nov. of a portion of the allied fleets for the Inland Sea, consisting of the following vessels:—H.B.M. S.S. *Princess Royal*, *Pelorus*, *Leopard*, *Argus*, and *Bouncer* (gun-boat), H.I.M.SS. *Gueirriere*, *Dupleix*, and *Kienchang* (gun-boat), and H.N.M.S. *Zoutman*. The British, French, and Netherlands Ministers accompanied the expedition. The precise object of the expedition had not been officially announced, but a rumour was current to the effect that the object is to endeavour to arrange for the opening of the port of Hiogo to foreign trade at an earlier period than was previously intended; and also to obtain the Mikado's sanction and ratification to the treaties. At all events (says the *Japan Herald*) the business that takes our Ministers up is of very considerable importance, and such as, in the absence of the Tycoon from Yedo, can best be accomplished by our Ministers paying a personal visit to Osaka. Too much importance can hardly be attached to the movement, as it will show to the Japanese rulers the determination of the Western Powers to insist on fulfilment of treaties entered into with the Tycoon; and if the Mikado confirm them, as there can be little doubt he will, a very large amount of opposition to foreigners will cease. It is expected that the fleet will be absent about a month.

Another of the murderers of Major Baldwin and Lieut. Bird had been taken in Yedo, had confessed his crime, and been executed. The name of this culprit is Mamiya Hajimei, and he is not the man who was taken on suspicion some time ago. He stated that he cut down the second officer; and when he was arrested he had on him the sword with which he committed the murder, some of the blood being still visible upon the blade. All the circumstances confessed by, and known of, the man, confirm the Japanese authorities in their conviction that he is the veritable murderer; in addition to which, he himself boastfully acknowledges not only that he is the man who actually cut down Lieut. Bird, but that he gave him numerous wounds when lying helpless on the ground.

The *Japan Herald* gives the following account of the execution, which took place on the same spot as that of the other assassin:—The murderer, who appeared to be only about 18 years of age, was brought up precisely at one o'clock. The Japanese officers were already there; but the British authorities, whose presence was necessary, did not arrive until fully half an hour after. The poor boy—for he was little more—had been drugged, and was quite, or apparently, unconscious. He was laid upon the ground, his legs covered with a mat, and his body supported in a half sitting half recumbent position by two gaolers, who between them held an umbrella over him to keep off the rain. Only twice did he open his eyes and raise his head, and then only to stare vacantly, and immediately relapse into unconsciousness. When at length all the officials arrived, and the time had come for his execution, he

Digitized by Google

was aroused sufficiently to walk, with support, to the spot where he was to kneel for decapitation, but he was too unconscious to know how or where to place himself; and when he was blindfolded, which in his case was left undone until he had been put in position, three men were obliged to support his body to prevent its falling, and one to hold his head until the very moment before the blow was struck. The work was done by the old and well-known executioner, who walked about whilst the criminal was being prepared, laughing, and appearing to exult over his work. His manner, and the unconscious helplessness of the victim, gave to this execution a repulsiveness far greater than that of Shimidzu—although the executioner on that occasion had to strike three times before the head fell, and this was severed in an instant. Immediately on the head falling, it was seized, put into a mat, and carried, accompanied by a mounted Yakonin, to the place on this side of Yoshida Bashi, where it is to be exhibited for three days. A board is in front of it with his crimes and sentence written upon it. And so ends this dreadful tragedy. We cannot hazard an opinion as to whether the youth who thus suffered is the real culprit or not. He declared he was, and gloried in the deed; and there we must leave it.

A most unjustifiable outrage on the person of a French subject was committed on the 20th October by a number of Japanese officials. The following particulars are given by the *Japan Herald*:—A gentleman, who was about leaving by the steamer *Dupleix*, arrived at the new Hatoba, accompanied by several friends. He had with him some deal boxes containing apparel, nailed up, as they would not be required on the voyage. The officials at the Custom-house were about to open them, when one of the friends told the Custom-house man that there was nothing but clothes, as he had himself witnessed, and as the opening, examining, and nailing up again would occupy some time, it might render them late for the steamer. Appealing to a higher official, leave was granted for immediate shipment without examination, and the gentleman who had acted as spokesman took the lesser official by the sleeve gently—to call attention to the orders of the higher—when the man indignantly pushed the gentleman violently away, and grasping the handle of his sword drew it a short way out of its sheath. The gentleman seeing this put his hand forward to prevent the sword being drawn, when the yakonin struck his hand violently upward, so that it came in contact with the yakonin's face. In a moment all the officials and Japanese coolies rushed upon the gentleman—and, throwing him down, beat him severely all over the body. When at length he succeeded in regaining his feet he was still held by the arms, and the man who had originally grasped his sword came forward and gave him several blows in the face with his fist. The higher official, who had given his assent to the boxes going on board without examination, stood in the doorway, and encouraged the aggressors, and another seized a coolie's bow, and was rushing in to deal a sweeping blow at the victim, but was met by the gentleman who was going by the steamer and prevented. The various Europeans present did what they could, but that was little against so many. The affair having been represented at the French Legation, an inquiry was made, but had been postponed for further evidence. Complaints of incivility and obstruction on the part of the Custom-house officials have lately been very numerous, and it is to be hoped the French authorities will insist on ample satisfaction for this gross case of misconduct.

A rumour had gained ground that several Ronins had left Yedo with the avowed purpose of attacking foreigners. It was stated that the Japanese had sent the foreign Consuls a notice to that effect, but at the time of the mails leaving it had been ascertained that there was no foundation for the report, which had probably been a ruse of the Japanese to frighten foreigners from the Tokaido, and keep them within the boundaries of the new road and the ordinary rides immediately in the neighbourhood.

The formation of a rifle club was progressing. There had been a meeting at the British Consular court-room on the subject, the result of which was favourable to its speedy accomplishment.

On the 26th October, H.M.'s ship *Perseus* arrived from Nagasaki. The same day H.M.'s gunboat *Bouncer* went up to Yedo to bring down Mr. and Mrs. Eusden. On her way she got aground on a bank near Yedo, and the *Kestrel* gunboat and the pinnace of the *Princess Royal* were sent, with plenty of men, to aid in getting her off.

NAGASAKI.

The correspondent of the *North China Herald*, writing on the 3rd instant, says that the Kinlin has been sold to the Prince of Satsuma for $56,000 in cash, and the steamer Sarah. The latter vessel was bought some time ago, but is so badly injured that the owners were glad to get rid of her. There is also a rumour that the Ayrshire Lass, Union, and Wild Wave have been sold. Business was at a standstill in consequence of the Japanese holidays, or Matzuri, which were observed from the 27th to the 30th ultimo. The Japanese who attacked the officers of H.M.S. Rattler, and was subsequently shot by Mr. French, as reported in our last, died three days after he was wounded. The authorities seem to have changed their tone, for they now express their satisfaction at the punishment inflicted on the offender, as it will deter others from drawing their swords on foreigners. The fellow who was guilty in this instance was not, as was at first supposed, a retainer of Satsuma's. He was a Nagasaki man employed at the time by Satsuma to purchase coals. He leaves a widow and two children. Just before his death he made a full confession, but said he was drunk at the time, and did not know what he was doing.

CHINA.

HANKOW.

A public meeting was held at Hankow on the 23rd Oct., for the purpose of confirming what had been agreed to at the meetings of the 4th and 21st September. The cash or short credit system may now be considered as virtually established, in spite of Chinese duplicity and obstructiveness. We hail this measure as the first step towards the dethronement of the tyrants who have for so many years held undisputed sway over the business transactions of merchants. A few years may see the compradores reduced to their proper position as servants and not masters.

KIUKIANG.

From this port we learn that the Englishman Mansfield, who, with Rohde, gave himself up to the Imperialists after the fall of Changchow and was subsequently imprisoned at Kanchowfu, in the Kiangse province, was handed over to H.B.M. Consul on the 31st. Oct. He was dressed in Chinese clothes when he was brought to the Consulate, and had evidently suffered severely. He reports that Rohde was drowned by the upsetting of a boat while crossing a river, but, so far as we know, there is no reason to believe that the occurrence was not purely accidental.

CHINKIANG.

The *North China Herald* writes:—From Chinkiang we are informed that the native troops which have been there for some time are all to be moved off to the Yellow River. A large portion have already departed, and the whole are said to be under orders to leave before the week is out. Their departure will greatly add to the security of the foreign merchants, as an end will be put to the disturbances which have so frequently occurred with the Imperial troops.

We hear that a missionary gentleman has arrived in Shanghai, who has penetrated into the Szechuen Province and to the frontiers of Thibet, some thousand miles further than Hankow, distributing Bibles on his track. It is stated that he met at some place with bad treatment from the natives; but as yet we have not been able to obtain full particulars.

SHANGHAI.

The English mail of the 11th Sept. arrived out on the 2nd Nov. The French mail of 17th on the 6th. The dates are now down to the morning of the 9th Nov.

(FROM A CORRESPONDENT.)

SHANGHAI, Nov. 8, 1865.

In my last letter I incorrectly wrote, "currente calami," the 2nd Nov. for the 1st, as the date on which the Autumn Race Meeting here was to be commenced. To the majority of the dwellers on this malignant mud flat it has formed the principal event of interest of the past fortnight, and has passed off quietly, with very enjoyable weather. I could not help remarking the absence of that eager bustling excitement and hot jovial rivalry which used to warm up former meetings, I remember, into such pleasant and animated pictures. The attendance was not as full as in previous years, and I was told that many had betaken themselves into the country on shooting excursions; but whether because of a pecuniary inability to enjoy the races with zest by giving them a betting flavour, and a dislike to take them without, or because of a preference to a chance (?) of knocking over a brace of pheasants, I was left, and so have

Digitized by Google

you, to conclude. Though the races were well contested, the betting was anything but brisk; however agreeable a reflection it might have been to regard this as the effect, or productive of a reformed and higher morality, the conviction forced itself that "bad times" and the changed condition of trade were the real causes.

Sir Rutherford Alcock, K.C.B., arrived by the mail steamer *Ganges* on the 2nd November, accompanied by Lady Alcock and her daughter, and left here on the 7th instant in H.M.S *Barossa*, for Tientsin, *en route* to Peking. It is expected that an improvement in our relations with the Chinese Government will be effected by his Excellency, whose appointment as Minister is very generally hailed with satisfaction, and from whom very much is hoped. There is little doubt that a strict and faithful observance of the treaty will be enforced on the Chinese, who have heretofore persistently disregarded it, and the stipulations of which it appears their fixed policy to evade.

During Sir R. Alcock's stay here a deputation from the Municipal Council submitted to him the necessity that exists for modifications in the present Code of Land Regulations, and requested his assistance to obtain the agreement and co-operation of the Chinese Government, and of the representatives at Peking of the other Treaty Powers concerned, to a new and uniform Code, better adapted to the wants and changed condition of the settlement. His Excellency has promised to use his influence to obtain and legalise this much-needed revision.

The Municipal Council have organised an office for the registration of Chinese servants. The present system of employing Chinese has long been felt to be full of danger, and has always been a fruitful source of trouble and annoyance. The fees are sufficiently low to enable Chinamen to register themselves, and with registration of name, previous employment, abode, &c., photographs will be received. It is to be hoped that foreigners will at once determine on availing of the advantages and protection which this new system must without doubt afford, and cease carelessly engaging the first Chinaman presenting himself, through butler or comprador, for employment. The lying, absenting, and "kleptomaniacal" propensities of the China boy will then be checked, as the carefully registered records of his misdoings, peculiarities and perversities of character, together with the incontrovertible *carte de visite*, will at once make him "lose facey," and render his finding re-employment at foreigners' hands rather "dubisome."

This model settlement has during the past few years of its existence grown most amazingly. In wealth, in importance, and in size, it has developed into a big city. It has its numerous banking establishments, its imposing buildings, its majestic bund, its workshops, factories, and docks, its Supreme Court of Justice, its energetic Municipal Council, and intelligent, active police; its lawyers, doctors, merchants, and brokers; its regattas, race-course, and Rotten-row; its cricket, rackets, and croquet. But it has now reached a further development. Not the least good thing it possesses is its hospital, with 80 beds, for which, with advice, medicine, attendance, and food, patients pay a small daily sum, according to the accommodation given them. It is self-supporting, and, during the past year, I understand, has proved a profitable investment to the shareholders. The object now desired is to open a free ward, of six or eight beds, for patients too poor to pay any one of the present scale of charges, and it is to collect funds for accomplishing this that Shanghai makes a new step in civilisation by the ladies holding a "Fancy Bazaar" on New Year's Day.

The British barque *Helen Douglas*, which left this port on the 16th Sept., bound to Singapore, was lost off Foochow on the 22nd inst., by the shifting of mud and shingle ballast during a severe gale. The vessel was thrown on her beam-ends, and, when she capsized, threw all hands into the sea. Several clung to floating bits of wreck and boats which had been smashed in lowering; and two of the crew, James Campbell, steward, and Charles Lamborn, A.B., after drifting about on a sort of raft for two nights and days were ultimately picked up by a Chinese boat, and, after receiving very kind treatment, reached Ningpo on the 31st October.

NINGPO.

Mr. Fittock, H.B.M. Consul, has issued a notification calling on British Renters of Land at that port to forward particulars of their lots for registration at the Consulate. These particulars are to include the date of renting, the person from whom rented, the quantity rented, the boundries of the lot, the portion surrendered to public use, and a plan. The object of this notification is to obtain the basis of legal title-deeds which will for the future be demanded from the Chinese Government. This is a step in the right direction, and if followed up will prove most beneficial to the land renters. It has long been discussed, but up to the present there has either been a lack of energy or a lack of opportunity to carry it out. Three years ago, when large quantities of land were changing hands, it would have proved highly valuable, but "better late than never," Mr. Fittock has initiated the movement, and will no doubt take care that it does not fail from lack of pushing.

We hear that Mr. Fittock went over to Shanghai to congratulate Sir R. Alcock, and at the same time to obtain leave of absence next spring.

SWATOW.

On the 1st Nov. Mr. Consul Caine paid an official visit to the Mandarins at the city of Chaochow. He found the authorities perfectly willing but unable to conform to the treaty; the people, however, were turbulent to a degree, and there is no chance of the matter being settled satisfactorily without an appeal to arms.

HONG KONG.

The mail of 26th Sept. had not arrived out, but the private steamer *Asia*, which left Singapore on the 2nd Nov., arrived on the 10th and took on a few letters and a copy of the *London and China Express* of 26th Sept. The *Salsette* (P. and O. str.) with the mail on board, was to leave Singapore on the 3rd Nov., and as she had not arrived on the 15th it was presumed that she had broken down in the China sea. [We have since ascertained that the steamer with the present mails met the *Salsette* going in on the 15th.]

The chief item of interest is the deputation of the Railway Committee to Sir R. Alcock, which we notice at length for future reference. Our report is taken from the *China Mail* The following members formed the deputation:—

Mr. Booth, Bourjau Hubener and Co.; Mr. Cheverton, Johnson and Co.; Mr. Forbes, Russell and Co.; Mr. Gibb, Gibb, Livingston and Co.; Mr. Kresser, Hong Kong and Shanghae Banking Company; the Rev. Mr. Lobscheid; Mr. Maclean, Lyall, Still and Co.; Mr. Nissen, Siemssen and Co.; Mr. Parry, Birley and Co.; Mr. Ryrie, Turner and Co.; Mr. Schutte, Margesson and Co.; Mr. Turing, Dent and Co.; Mr. Walker, Rob. S. Walker and Co.; Mr. Wood, The Borneo Company (Limited).

In the absence of the Chairman, Mr. W. Delano, jun., Mr. R. S. Walker, the hon. secretary, informed Sir Rutherford Alcock that the deputation had sought the interview in consequence of a resolution arrived at by the local committee of the China Railways Company (Limited) that all further action in regard to the objects of the company should be suspended till his Excellency's arrived at Hong Kong. The secretary informed Sir Rutherford that in February of last year Sir Macdonald Stephenson, as he might be aware, visited Hong Kong and Canton, and collected the views of the merchants and others, native and foreign, as to the advantages that would accrue to China from a system of railways. He also obtained much valuable information connected with the facilities for constructing railways in China, and published the result in a pamphlet, accompanied by a map, copies of which were freely distributed here and elsewhere. A company was formed in London, and it was thought advisable by the directors that a local committee should be constituted in Hong Kong to co-operate with the London board, this system having been found to work well on the first introduction of railways in India and elsewhere.

The line which the Board recommended to the special notice of the local committee was a short one of about 12 miles, from Canton to Fatshan, capable of being quickly and cheaply laid down, and likely to be remunerative. A committee was accordingly formed, who, at their first meeting, resolved that the views of the Viceroy of Canton should be, if possible, obtained unofficially in a private interview, for the purpose of ascertaining whether he would lend his countenance and co-operation towards effecting the objects of the company.

Mr. D. B. Robertson, H.B.M. Consul at Canton, was therefore consulted as to the feasibility of carrying out the committee's suggestion; but Mr. Robertson's reply was not favourable, as his Excellency would see from the report of the interview, from which he would now trouble him with an extract.

"Report of the proceedings at an interview between D. B. Robertson, Esq., H.B.M.'s Consul at Canton, and Messrs. W. Delano, Jun., and Robert S. Walker, Chairman and Honorary Secretary to the Local Committee of the China Railways Company (Limited), held on the 5th July, 1865.

Mr. Delano explained to Mr. Robertson that he and Mr. Walker had called upon him consequent upon the following resolution passed by the Committee of the China Railways Company (Limited):—

"Resolved that a sub-Committee be appointed to ascertain unofficially the views of the Governor-General of Canton as to the objects of the company. That the committee so appointed shall invite the Consuls of all nations to accompany them at the interview, and that a public meeting be convened to receive the report of the Committee, and to consult upon what further steps it may be desirable to take."

Mr. Delano then informed Mr. Robertson that the object of the visit was to make preliminary arrangements for carrying out the Committee's resolution.

Mr. Robertson here mentioned, for the information of the committee, that on receipt from Mr. Walker of certain papers relating to the subject

Digitized by Google

of railways in China and to the company which had been formed for carrying out the scheme, he had previous to his visiting Hong Kong taken an opportunity during an interview with his Excellency the Governor-General of the Two Qwang Provinces, of mentioning privately the subject of the introduction of railways into China, and that a meeting had been held in Hong Kong to discuss the question. During the conversation he did not fail to impress upon his Excellency the great and numerous benefits that would result to China from a system of railways. He found that the subject was by no means a new one to the Viceroy, and that his Excellency had heard and read a good deal on the matter; in fact, he was perfectly aware that the scheme was on foot.

His Excellency listened most attentively and courteously to all that he urged upon his notice, but commissioned him to inform the Committee that he had no power whatever to grant permission for the prosecution of any such object, as that proposed. As regarded the particular line suggested, viz., from Canton to Fatshan, H.E. reminded him that such a line must pass through a district inhabited by a most turbulent and independent people, the land in and surrounding which was owned by men most jealous of their territorial rights.

Mr. Robertson, upon being applied to by Mr. Delano as to what he would recommend to be done under circumstances, replied that he would with pleasure ask for an audience with the Viceroy, and he had no doubt that His Excellency would grant the interview; but with reference to that portion of the resolution of the local committee, which provided for the deputation being accompanied by the consuls of all nations, he must remind Mr. Delano that such a course would entirely deprive the meeting of that unofficial character which the committee considered it desirable to attach to it. In regard, however, to the utility of a nominally unofficial interview, he had the gravest doubt on his mind, as the committee might depend upon his Excellency's reply being unfavourable, and if so he (Mr. Robertson) did not clearly see what could be gained by it, more particularly as it would be impossible to divest from the minds of the Chinese present the fact of its being anything but an official visit. He was of opinion, therefore, that anything the Viceroy might say at the interview would be tantamount to an official refusal, and he (Mr. Robertson) thought that such was not a position in which it would be advisable at the very outset to place the committee.

As regarded the line of country through which it was proposed to carry the experimental line, he would beg to remark that a railway from Canton to Fatshan would traverse through a portion of what is termed the Ninety-six Villages, which everyone who has been long resident in Canton well knows to be inhabited by a people the most independent, and the most inimical to foreigners; and as he considered that everything depended upon the success attending the preliminary steps taken, he would strongly advise a very serious consideration of the circumstances he had mentioned.

Mr. Robertson concluded by stating that, in his opinion, the Governor-General had not the power to give the necessary authority for any undertaking of the kind; nor did he think, without an Imperial order from Peking, that any official in Canton would incur the risk of an *emeute* on the part of the people which the prosecution of such a scheme would in all probability involve. He, however, requested Mr. Delano and Mr. Walker to convey to the committee the assurance of his readiness to assist them to the very utmost of his power."

The committee thereupon held another meeting, at which, as already mentioned, it was determined to suspend all further proceedings till His Excellency's arrival, and it was resolved that a deputation should wait upon His Excellency during his stay at this port.

The secretary concluded by expressing a hope that Sir Rutherford would favour them with his best advice, and that he would extend to them his assistance in carrying out the object of the company, which was in the first instance to establish an experimental line intended to ultimately form part of a grand system of railways extending from Hankow N.E.S. and W., connecting that important and central city with Peking, Shanghai, Canton, and the confines of our Indian possessions.

His Excellency replied to the effect that there could be no doubt railways would be a great boon and blessing to the people of China, by tending to their civilisation and improvement and to the facilitating, by means of quicker communication, the Government of the country. It was clear, however, to his mind, and would be doubtless to the minds of those present and of all associated with China, that every measure which tended to remove and annihilate distance between the Central Seat of Government and the Provincial Governors, would be very unpopular with the latter, as it must necessarily diminish their authority and create a close supervision of their proceedings. Great opposition must therefore be naturally looked for from the Local Authorities. There would also be difficulties connected with the compulsory sale of land which was contrary to all the ideas of the Chinese. These difficulties, however, he did not look upon as so hard to overcome as the mandarin obstructiveness. As regarded the physical difficulties of the country he could conceive none that an engineer would not easily overcome. In reference to the particular line most suitable for an experimental one, he was inclined to agree with Mr. Robertson that the selection of that from Canton to Fatshan was an unfortunate one, owing to the objections described by Mr. Robertson, but without reference to these obstacles he thought that a line as near as possible to the Central seat of Government would be preferable, as coming more under the immediate notice of those whose attention it should be to draw to the desirability of railways. He must remind the deputation, however, of the mighty innovation which railways would be upon all the preconceived notions of the Chinese. He could scarcely, taking all the probable impediments into consideration, hold out much hope of a speedy realisation of their wishes; nevertheless, they might depend upon his support, and he would not fail to use his best influence with his colleagues in favour of the measure. The deputation then retired, after thanking his Excellency for the kind and courteous manner in which he had received them.

The *Daily Press*, in reference to the Mint, states that Mr Mercer, the acting Governor, being alarmed that the establishment would not pay, has notified that all the bullion sent in during the first three months will be coined free! We cannot believe this statement.

On the mortality in the garrison, the same paper states:—

We regret that from information we have received we have reason to believe that sickness is not on the decrease in the Military Hospital, notwithstanding the alteration in the temperature that we have lately enjoyed. As no doubt the culpability that has led to the annihilation of the 2nd Battalion of the 11th (as far as military purposes go), will be sought to be screened by ascribing the mortality and sickness solely to the deadly character of the climate of Hong Kong, we would mention as an item to be taken into consideration in forming an opinion upon the subject, that whilst over 50 men out of 600 have died in three to four months, in the 2nd of the 11th, at the Victoria Gaol, with an average of about 130 European prisoners there has only been one death during the past summer. Whilst the military have one half of a battalion invalided, the convicts have at present four men in hospital. It appears to us either that the gaol itself, the management of the convicts (or both) must possess an immense superiority over the treatment our poor soldiers are receiving in this colony. Another fact—out of 11,500 men stationed in North Western India (including cholera cases) there have been in the second quarter of the present year but 150 deaths.

The Postmaster has at last completed his arrangements for closing the mail for England at 9 A.M. on the day of departure, instead of 6 P.M. the previous day, as heretofore.

The following are the bank returns for the average amount of notes in circulation:—

Oriental Bank	$509,247
Mercantile Bank	456,611
Chartered Bank	455,486
Agra and Masterman's Bank	374 648
H.K. and S. Banking Company ..	612,656
	$2,406,648

With the exception of a destructive fire, attended with loss of life, we have nothing to report from Canton. Everything is quiet there, and nothing has been heard of the rebels. From Pok-lo and the Christian villages thereabout we have nothing further to communicate.

At Macao the Coolie trade is still rampant, with all its abominations. The enquiries instituted, or said to have been instituted, by Governor Amaral, have ended in smoke. Day after day, some additional iniquity comes to light in connection with this horrible traffic. Coolies kidnapped, imprisoned in barracoons, flogged to make them consent to sign the iniquitous contract that binds them to a life of slavery, marched with a strong guard to testify at the Government Offices to their signature as given voluntarily and freely, half-starved, exposed to blindness and disease on board ship in transit to the place of their exile tossed overboard or left on some barren isle to die, if loss of sight or sickness renders them useless to their masters. Such are the grand features of the Macao Coolie Trade, supported by the Governor in his official acts and in the semi-official paper he edits. Such are the horrors of a slave trade, worse than that of the poor African negro, which all nations ought to unite to put an end to.

The lighthouse, noticed in a former number as having been erected on the Guia Fort, has not been in use lately, having been injured by fire.

The *Mail* says:—The Imperial Maritime Customs, with its foreign inspectorate, seems to be working very smoothly and pleasantly just at present. We have heard no complaints of late, and the Chinese authorities at the open ports, acting under the advice of the heads of the Custom-house, and through them, have of late manifested some little energy in the matter of light-houses, harbour-lights, buoys, &c.

The delightful weather still continues, though slightly warmer than usual at this season of the year. One of the largest fires which has occurred for some years took place at West Point, whereby some thirty houses were burned down, and the great need of some organisation against a like emergency was clearly evidenced.

Piracy has at last received a check of some importance by the joint action of two or three of the gunboats of H.M.'s navy: some nine or ten piratical craft have been destroyed, and a lorcha taken, and it is supposed some evidence has been secured regarding the lorcha which lately committed the outrage upon the *Henry Darling*. Such services are very satisfactory—only they would require to be repeated every other week, in order effectually to clear the coast of these pests of the seas. It is gratifying that the vampires have had to give way once more before the pluck and daring of British sailors, still it would be even more pleasing to know that they had been effectually and permanently prepared for and checkmated by some able move on the part of our naval officers in these waters. The gunboats engaged were the *Cormorant*, *Opossum*, and *Leven*, Captain Knevitt, by whom the largest portion of

Digitized by Google

work was accomplished. This is the same officer who rendered such efficient service to the French mail steamer *Hydaspe*, for which he was presented with a gold watch by the French Government.

The Rev. Dr. Legge has returned from Japan, and given at the Union Chapel an interesting account of his visit, with which he has been much charmed. The scenery especially at the entrance of Nagasaki.

MALACCA STRAITS.

SINGAPORE.

The English mail of 10th Oct., per Peninsular and Oriental steamer *Behar*, broke down off Pulo Jara, and was towed back to Penang on the 11th Nov. Dates are down to the 22nd.

We (*Free Press*) believe the Government is about to appoint a committee, composed of the following gentlemen, viz., the Hon. the Resident Councillor, Mr. W. W. Willans, and Mr. W. H. Read, to inquire into the charges brought against certain members of the police force in the petition. The above names guarantee an impartial investigation. On the 13th Nov. the Marine Magistrate investigated the charge of mutinous conduct brought by Captain Thomson, of the barque *Thomas Drgden*, against three or four of his seamen, and sentenced Palmer, the man who, it will be remembered, was shot in the neck by the captain, to four months' imprisonment in the House of Correction, with hard labour, and the others to a fortnight's incarceration. The charge against the captain of shooting with intent of course falls to the ground, and he will be released from his bail.

A passenger for Suez by the steamer *Shaftesbury*, part owner of that vessel, got into a slight fracas with another passenger between China and this port, and in the heat of passion struck his opponent once or twice. It was a case that could have been easily disposed of by the police magistrate without causing any unnecessary delay to the defendant; but although the vessel lay in the harbour two days no steps were taken to prosecute the case at the police court; the plaintiff electing to bring an action of damages against the defendant in the Civil Court. A warrant was obtained accordingly, and the defendant was detained until the case could be disposed of. The latter admitted his fault and offered to pay $150 to the plaintiff as compensation, so that he might prosecute his voyage as he was in charge of a valuable cargo of silkworms' eggs, and did not like being left behind. The offer was indignantly refused, and an absurdly exorbitant sum demanded. The defendant refused to comply, and as he was anxious to proceed by the French mail to Galle to intercept the *Shaftesbury*, his honor the judge was moved to take the case as soon as possible, and he at once with his usual courtesy and kindness, heard it on Monday, and the result was, as was generally anticipated, the plaintiff got a farthing damages. The defendant left by the *Cambodge* for Galle.

On the Prince of Wales' birthday the flagstaffs were gaily decorated with flags, and the Royal standard hoisted at Fort Canning and Mount Faber, and at noon a salute of 17 guns was fired from Fort Canning.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BIELFELD—On the 12th Nov., at Hong Kong, the wife of Mr. Alexander Bielfeld, of a son.

BLAKISTON—On the 20th Dec., at 130, Marina, St. Leonard's-on-Sea, the wife of Commander Peyton Blakiston, R.N., of a son.

HELBLING—On the 13th Dec., at Caenwood House, Grove-road, Clapham-park, the wife of Frederick Helbling, Esq., of a daughter.

LESSLER—On the 4th Nov., at Bangkok, the wife of Paul Lessler, Esq., of a son.

PERCEVAL—On the 11th Dec., at Temple House, county Sligo, the wife of Alexander Perceval, Esq., of a son.

PROBST—On the 20th Dec., at 2, Victoria-road, Clapham-common, the wife of Peter E. Probst, Esq., of a son.

VACHER—On the 15th Dec., at Belmont House, Lee, the wife of W. H. Vacher, Esq., Agent Hong Kong and Shanghai Bank, of a son.

WEST—On the 25th Dec., at 15, Frampton Bark-villas, Hackney, the wife of James West, late of China, of a son.

WIESE—On the 19th Dec., at Berkely Lodge, Sydenham-hill, the wife of Ludwig Wiese, Esq., late of Hong Kong, of a daughter.

MARRIAGES.

BRENIER—MORTMORAND.—On the 28th Oct., at the French Catholic Church, Shanghai Monsieur Georges Brenier, Agent of the Messageries Imperiales Company, to Isabelle, daughter of Vicomte Brenier de Mortmorand, Consul-General for France.

MICHIE—ROBINSON.—On the 16th Dec., at St. Stephen's, Coleman-street, by the Rev. Josiah Pratt, vicar, Alexander Michie, Esq., of Shanghai, to Ann, daughter of C. M. Robinson, Esq. No cards.

MILLER—TOWNSEND:—On the 14th Dec., at Christ Church, Clifton, by the Rev. T. N. Irwin, rector of Charlynch, Somerset, assisted by the Rev. J. J. Irwin, D.D., of Hong Kong, and the Rev. M. Brock, incumbent of Christ Church, the Rev. Thomas Miller, Fellow and Lecturer, of Queen's College, Cambridge, second son of the late Rev. J. Miller, rector of Tamlaght O'Crilly, Londonderry, to Caroline Charlotte, fourth daughter of the late Rev. C. C. Townsend, of Derry, Ross Carbery, county Cork, and granddaughter of the late Major-General Oliver, Colonel Commandant of the Royal Artillery. No cards.

DEATHS.

COOK—On the 2nd Nov., at Hong Kong, of dysentery, John H. Cook, aged 24 years.

DUNLOP—On the 31st Oct., at 19, Hollywood-road, Hong Kong, Ludovic G. Dunlop, of the firm of Birley, Worthington, and Co., Shanghai, in his 33rd year.

GAILLARD—On the 5th Nov., at Canton, aged 8 years, Charles A., only son of the late Charles W Gaillard, Missionary of the Southern Baptist Convention.

GOEDE—On the 1st Nov., on board the Hamburg barque Sarah and Maria, Julius, eldest son of Captain Lorenz Goede, aged 6 years.

GOODBAN—On the 29th Oct., at Yokehama, Alfred Charles Goodban, Deputy Assistant Superintendent of Stores.

HOORN—On the 15th Nov., at Belvedere, Tanglin, Singapore, Hendrik Jacob Van Hoorn Esq., aged 46 years.

INGRAM—On the 27th Oct., at the General Hospital, John Ingram, late Chief Officer of the Lightship, Langshan Crossing.

KNOTT—On the 8th Oct., at Chinkiang, by drowning in the Yang-tsze, John D. S. Knott, aged 20 years, a native of London.

NIXON—On the 5th Oct., at Shanghai, suddenly, Captain Nixon, of the British barque Alice.

PENNEY—On the 29th Oct., at Shanghai, Captain J. F. Penney, Superintendent of the Shanghai Brick and Saw Mill Company, aged 46 years and four months. Deceased was a native of Long Island, N.Y., U.S.A.

PRESTON—On the 5th Nov., at Shanghai, Georgiana Cumming, the beloved wife of George Frederick Preston.

SAMSON—On the 6th Oct., at Shanghai, from dysentery, Robert Samson, a native of Dundee, Scotland, late Master of British barque Elizabeth.

SPROUL—On the 6th Nov., at the Seaman's Hospital, Hong Kong, W. Sproul, late Engineer S.S. Feloong.

THOMSON—On the 25th Oct., Capt. W. Thomson, of the Br. barque Seaton, aged 55 years. The deceased was a native of Workington, Cumberland.

Hong Kong and Shanghai Bank shares, 6 prem.; Gas Company, 30 prem.; Hong Kong and Whampoa Docks, 40 prem.

COMMERCIAL REPORT.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—A very material advance has been established in the value of this important article during the past fortnight, and we quote it from $25 to 45 per bale higher than under date of last circular; the transactions of the fortnight amount to about 550 bales, and there is now hardly any stock in first hands. Grey Shirtings: Since the departure of the last mail steamer the market for these goods has been extremely active, and large purchases have been made by both the native dealers and foreign speculators at an advance of from 40 to 50 cents per piece upon the prices current under date of last report. The market is now extremely bare of stocks, and there seems no immediate prospect of rates giving way. White Shirtings: Have also met with a fair amount of inquiry since the beginning of the month, but the extreme smallness of stocks has tended to restrict the actual business transacted. The prices now demanded by holders are very high, and the Chinese are unwilling to purchase largely at present. Sales for the fortnight, 11,000 pieces, which consist, in a great measure, of goods "to arrive." T-Cloths: The sales effected of these goods have been much restricted by the very short supplies now held by importers; prices show a material advance, and the dealers are willing buyers at the quotations. Settlements, 2,750 pieces. American Drills: The market continues quite bare of these manufactures. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: There have not been any sales of these goods reported. Damasks and Chintzes: 500 pieces of the latter have found buyers during the fortnight. Handkerchiefs: There are not any sales reported. Raw Cotton: The receipts of this staple upon the market have reached a moderate average during the past fortnight, and the settlements reported amount to about 11,000 bales of all kinds. Prices show an advance equal to $2.50 per picul upon Indian staple, and to $3 upon cotton of native growth. There are moderate supplies known to be on the way from India, but it is not probable that these will be continued with the high quotations which are obtainable on the home side, while the price of the staple in the north of China is now quite as high as with us. The settlements on the Canton market amount to 4,500 bales, principally Bengal cotton.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: The sales reported amount to about 950 pieces of the first named, which have been purchased at slightly higher prices than were obtainable last month. Long Ells: Are very firmly maintained in value, and have met with a fair amount of inquiry, the sales reported are 1,500 pieces. Camlets: 340 pieces have found buyers at previous rates. Lastings: Sales of 400 pieces are reported. Blankets: 500 pairs have found buyers.

METALS.—Iron Nail Rod, &c.: The quotations in this colony for the various qualities of iron imported show but little alteration when compared with those given under date of last report, while the large purchases then advised appear to have fully satisfied the immediate requirements of the dealers. Settlements, which are limited to nail rod, amount to 820 piculs. In the Canton market the value is slightly higher, and the settlements are put at 930 piculs. Lead: This article is slowly advancing in price, and sales of 1,200 piculs are reported from Canton. Tin: 1,500 slabs have found buyers during the fortnight. Tin Plates: 1,600 boxes have been sold. Steel: Nothing doing.

COALS.—HONG KONG.—One cargo only has arrived since the date of last report, but it has not been placed on the market. There are no transactions to report. Holders to arrive are firm, and the prospects for the next few cargoes that may come to market are decidedly favourable. Meanwhile the price of English may be called $12, Welsh $12.50, Australian $8 to $9. Shanghai: Since the 25th ultimo, the rates for coals have continued firm for all descriptions, and as purchasers have been more willing to accede to the prices demanded, there has been greater activity in the market than heretofore. English Steam Coals have been sold from ship at 9.7.5 tls. per ton, and Cardiffs at 10.7.5 tls. per ton; from godown the last current rates have been paid. American Coals have been in good request for Chinese account, and sales have been effected at 1.2.5 tls. to 13.5.0 tls. per ton from godown. Sydney Coals remain as per our last, all the stocks afloat having been cleared at 8 tls. per ton.

CHINA EXPORTS.

TEA.—CANTON.—There has been a quiet market during the past fortnight, and transactions have been limited owing to the scarcity of the finer sorts, which buyers seem rather inclined towards. Five chops of country Congous have been taken at full prices, leaving only two in stock, one of which arrived in the early part of the fortnight. Country Greens: Some 1,400 half-chests have been settled at about former rates, which closes the season with the exception of one chop for which the holder is asking an extreme price. Canton Greens: 1,000 boxes Imperial and 100 half-chests Hyson have been taken for the Continent at full prices. Canton-made Teas: A few parcels of Congou have been taken, and a moderate business done in Scented kinds, consisting principally of the common to medium grades at former prices.

AMOY.—During the early part of last month this market was tolerably quiet, and continued so with gradually drooping rates, but during the last few days the teamen have been firm for an advance, and purchases cannot now be made except at a rise of $1 to $2 from the lowest point of the market.

FOOCHOW.—Congou: For a few days after the last mail left, settlements continued to be made at last quotations; but on the receipt of the English mail, bringing more favourable news of the state of the home market, numerous buyers came forward, and a large business has since been done at higher prices: say 5 mace on dusty and common, and 1 to 2 taels on flavory kinds. Supplies are coming in freely, and are expected to be in excess of last season at least 50,000 chests. Souchong: The market has been nearly cleared of these; the commoner grades being taken for America, whilst a few chops of 1st crop teas held over by the teamen, have been settled for the Continent at prices showing an advance on opening rates. Oolongs are taken as soon as they arrive, and may be quoted 1 to 2 taels dearer. The fourth crop as anticipated, has offered a better selection, and a few chops extra fine have been secured at 26 to 30 taels.

SHANGHAI.—Black: During the fortnight there has been an active business in Black Tea, and prices have advanced from one to two taels since the date of our last. The advices from London are considered very satisfactory. Our stocks are now so much reduced as to show clearly that the season's supply is coming to an end, and our advices from Hankow and Kiukiang lead us to accept little more from these ports. Settlements have been as under:—7 chops third crop Oopack, at 22 to 27.50 taels; 30 chops third crop Ningchow, at 28 to 29 taels; 6 chops third crop Oonahm, at 20 to 24 taels; 3 chops third crop Hohow, at 16 to 18.5 taels. Green: A large business has again been doing in Country Teas, and there has been considerable competition for finest chops; on these classes we can report an advance of two taels. Sun sun-mow-kee has fetched 45 taels proportion, and other known chops 42 to 43 taels. Pingsueys are now becoming scarce, and command full rates, five chops are reported as settled at 32 to 37½ taels. Shanghai-packed kinds remain neglected, but are in small supply.

YOKOHAMA.—We have to report considerable activity in our tea market during the past fortnight, and every parcel of good quality has been bought up eagerly for the American market. Prices have continued to advance, and they now show a rise of fully $3 per picul on our quotations of the 15th inst.

NAGASAKI.—The article has continued in fair demand at a slight reduction on former rates; settlements for the month amount to about 3,500 piculs of good medium to fine kinds. Stocks of fine description are very light, and of finest only a few trifling parcels have as yet been received.

RAW SILK.—SHANGHAI.—This steamer takes 1,484 bales silk for Southampton, 291 do. for Marseilles, and 839 cases silkworms' eggs for Suez and Marseilles. During the past fortnight business has been on a reduced scale, and settlements are limited to 300 to 400 bales; buyers apparently finding little in the later European advices to encourage them in paying 1s. 6d. to 2s. per lb. in advance of last London qutations. Supplies from the interior, on the other hand, have been arriving pretty freely, giving us an unsold stock of at least 2,500 bales, representing nearly every description of silk. The settlements since the date of our last issue are estimated at only 2,700 bales, giving a total from the 1st June to date of 43,200 bales (viz.: 36,250 bales Chinas, and 6,950 bales Japans), against a total of 23,500 for the corresponding period of last season. Quotations:—Tsatlees, No. 1, nominal; No. 3, 550 to 570 tls.; No. 4, 515 to 535 tls.; No. 5, 460 to 505 tls.

YOKOHAMA.—After the departure of the last mail steamer from hence business in Silk remained quiet and prices without alteration until the arrival of the Singapore, with the 26th of August mail. The demand then became more active, and prices rose gradually up to $880, which was paid for a lot of fine Mybash. The market closes very firm indeed, and a further advance seems anything but improbable. The settlements for the fortnight amount to 250 bales, making a total for the season of 5,050 bales, against 4,400 bales at the same time last year.

DRUGS, &c.—CANTON.—In consequence of further extensive and high-rated settlements, amounting in all to 1,700 pls. at $17.50 per picul, and

Digitized by Google

leaving but a moderate stock of 1,500 pls. on the market, holders are firmer again in their demands, and the article must be quoted at fully $17.10 to 17.40 per picul. Cassia Buds: None of the new crop has been brought to market, though the port of Macao has been favoured with supplies. Judging from samples to hand, the quality of this season's yield is very fair—it is asserted that supplies will be scant. China Galls: No alteration in value of stock, and no sales for export reported. Vermilion: $37.50 per box of 50 catties—demand for export small. Galangal continues in heavy stock, and is offered at $2. Rhubarb: No supplies, and nothing doing. Musk: The high rates paid for native demand check settlements for export. Essential Oils: Nothing offering, and further supplies of Anniseed Oil not expected before the beginning of next year.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Oct. 19, Castleton; 17, from Shields, Manchester.

At SHANGHAI.—From Cardiff: Oct. 24, John Stanton, jun.

At HONG KONG and CANTON.—From London: Nov. 7, James Russell; from Cardiff, 11, Agincourt; from Rotterdam, 1, Nova Zembla.

At SINGAPORE.—From Glasgow: Nov. 13, Foam.

At PENANG.—None.

At BATAVIA.—From London: William Simpson, Zeenymph; from Glasgow, County of Lanark.

DEPARTURES.

From YOKOHAMA.—For London: Oct. 24, Simon Hobley.

From KIU-KIANG.—For London: Oct. 30, Emperor.

YOHOHAMA.—To London: Cotton and tea, £2. to £2. 10s. per ton; silk, £4 to £4. 10s.

SHANGHAI.—To London: £1. 5s. to £1. 10s. per ton, of 50 cubic feet. To New York: £1. 15s. to £2 per ton, of 40 cubic feet.

FOOCHOW.—To London: Rates have temporarily advanced to £2. 10s., owing to a scarcity of suitable vessels. To New York: $9.

HONG KONG AND CANTON.—The freight market maintains a slight improvement, though no fresh direct home charter has taken place. The following charters are from the circular of George Holmes:—Cambalu, 536; Foochow to London, at £2. 5s.; Bacchanter (716), do. at £1. 17s. 6d.; Jessie Beazley (457); Iloilo to Great Britain or Continent, £2. 10s. per ton; Condor (373), do. £1. 15s. to £2. There are several charters from rice ports to Great Britain, at £2. 12s. 6d.; Continent, £2. 15s., or if back to Hong Kong 50c. per picul. Estimated number and tonnage of disengaged vessels in Hong Kong, 106; 43,204 tons.

SINGAPORE.—To London: Dead weight, £1. 2s. 6d.; measurement, £1. 12s. 6d.

PENANG.—To United Kingdom: Dead weight, £1. 2s. 6d.; light freight, £1. 10s. per ton.

BATAVIA.—To London: Sugar, £2 per ton.

CASUALTIES.

SHANGHAI.

The Helen Douglas, on her voyage from Shanghai to Singapore, foundered in the vicinity of Foochow on the 22nd December; part of crew saved.

The Qualee went ashore in thick weather on the north side of the Shantung Promontory, and at once bilged. The master and crew, after spending twenty-four hours in their boats, were picked up by a junk and taken to Chefoo, whence they were brought to Shanghai per steamer.

FOOCHOW.

The British barque Shakespear, Captain Thomas, which left Hong Kong bound to Foochow, was totally lost off the White Dogs on the night of the 3rd November. She had made the island to the northward during the morning, and shaped a course for the White Dogs. The weather being very thick, the rocks to the northward and westward of Middle Dog were mistaken for the breakwater rocks, and the vessel being rounded to, she was on the reefs almost immediately. At high water she floated off, and was brought to anchor to the southward of Tongshan; but as she rapidly filled, the assistance of boats, &c., was requested of the Dumbarton, at anchor in the vicinity. The vessel was at once abandoned, nothing being saved but the personal effects of the crew and officers.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—None reported.

From CHINA, &c., to ENGLAND and CONTINENT.—November 2, Philip Nelson, Shanghai to London; 3, Eliza Thornton, Singapore to London; 3, Gresham, Hong Kong to London; 4, Douglas, —— to London; Peerless, Manila to Liverpool; V. de Paul, Saigon to Toulon; 5, Constance, Hong Kong to London; 5, Bengal to London, Aurora Australis, Foochow to London; 6, Melita, Manila to London; Herald, Macao to London; 8, Hydra, Foochow to Cowes; Iron Crown, Shanghai to London.

NOTICE TO MARINERS.

CHINA, SOUTH COAST—REVOLVING LIGHT AT FORT GUIA, MACAO.

Information has been received at the Admiralty that the Portuguese Government have established a light at Fort Guia, on the peninsular of Macao, South Coast of China. The light is a revolving white light, placed at an elevation of about 330 feet above the mean level of the sea, and, in clear weather, should be seen from a distance of 20 miles. The tower stands in about lat. 22 deg. 12 min. N., lon. 113 deg. 33 min. 30 sec. East of Greenwich.

This notice affects the following Admiralty charts:—China, general, No. 1262, sheets 1, 3, 4; Nos. 2212, 2660, 2661; Canton River sheet, 5, No. 1739; Macao, No. 1290; Hainan Island to Macao, No. 1246; Canton River and Western Branches, No. 2562; and China Sea Index, No. 1270.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec., from Hong Kong, Seawfell; at Liverpool, from Singapore, Vigil; 23, at London, from Penang, Shantung; from Colombo, Frances Banfield; from Singapore, Lord Raglan; 19, off Scilly, from Singapore, Unicorn; from Rangoon, Hindostan; 23, at Queenstown, from Maulmain, City of Quebec; 23, off Portland, from Sourabaya, Brandon; 26, at London, from Colombo, Acacia; 26, at Deal, from Singapore, Ernst Merck; at London, from China, Fychow; 25, at Deal, from Penang, Edinburgh Castle; at Queenstown, from Bassein, Star of the Teign; off Portland, from Sourabaya Brandon.

SPOKEN.—Huntress (ship), from Singapore Oct. 29, 31 S., 13 E.

LAID ON AT LIVERPOOL.—For Galle, Gabrielle Alice, Duc de Malakoff.

LAUNCHES, &c.

On the 19th inst. there was lauched from the shipbuilding yard at Ladyburn, belonging to the Marine Investment Company (Limited), the composite China clipper ship *John R. Worcester*, 844 tons register, but in consequence of some slight mishap on the ways the final floating of the ship is not yet accomplished. This clipper is the property of J. R. Worcester, Esq., of Messrs. Wilson, Worcester and Co., London, was designed by William Rennie, Esq., of London, the draughtsman of the famed *Fiery Cross*, and will proceed direct to China from the Clyde early in January. The dimensions of the *John R. Worcester* are:—Length 191·5 feet; breadth, 32·4 feet; depth, 19·9 feet. She is fitted with all the modern improvements, and has been built by Mr. James Paterson under contract with the Marine Investment Company (Limited).

A very handsome paddle-wheel steamer named the *Eagle* has been despatched to Nagasaki by Messrs. Thomas Walsh and E. M. de Bussche. She is commanded by Captain Lobnitz, who commanded the *Lotus* in China.

Her Majesty has been pleased to advance Sir Roderick Murchison, President Royal Geographical Society, to the dignity of a Baronet, "in recognition of distinguished merit and attainments."

MR. MARQUIS CHISHOLM AT GLASGOW.—On the 7th instant Mr. Marquis Chisholm gave an entertainment at the City-hall, Glasgow. The following is from the *Glasgow Morning Journal*:—"We venture to think that there are not many musical amateurs in our city but will have pleasant recollections of Mr. Marquis Chisholm, who enjoyed such a highly respectable reputation in Glasgow several years ago as an accomplished pianist. It is now a considerable time since he sailed for Australia along with Miss Edith Aitken, the renowned tragedienne and reader, and since his departure he has sojourned in many a distant and curious corner of the world, as well as undergone countless stirring adventures. Recently he has returned to his native country, and bids fair to regain his former well-won popularity. Yesterday evening he gave in the City-hall a literary and musical entertainment, which was well patronised by his old friends and admirers. He described his travels and experiences in a manner that afforded no little amusement, while it presented much interesting information concerning men and manners in Australia, Tasmania, China, Japan, and sundry other far lands. This portion of the entertainment was vocally illustrated in admirable style by Miss Matilda Dunsmore, Miss Jane Ray, Mr. Norman Kirby, and Mr. Stembridge Ray. It is well nigh needless to add that, with such assistance, the programme was rendered most enjoyable. Alike in a literary and musical point of view, the performances were excellent, and met with very general appreciation on the part of the audience, as was evinced by the frequent and warm applause. We should not omit to mention that the entertainments were further agreeably reinforced by the fine playing of the Glasgow Orchestra, conducted by Mr. Richard Adams. This efficient company of instrumentalists gave several pieces with much ability and taste. As notable among their selections we would name 'The Return Home,'

Digitized by Google

a Japanese symphony and valse by Mr. Chisholm. This only formed portion of quite a Japanese concert that was effectively given in the course of the evening."

CHINESE ELEGANCIES.—A valuable collection of Chinese works of art, including many rare and important examples of the porcelain and enamels so peculiar to the country, the whole selected with good judgment by a gentleman long resident in China, was disposed of by Mr. Phillips, at his great rooms in New Bond-street. Among the more interesting specimens the subjoined merit notice:—Lot 25. A large and fine white font, with raised flowers around the belt; 24in. diameter and 20in deep—25 guineas (Wareham). 64. A finely-formed porcelain vase, on delicate blue ground, with red flowers and gold pencilling—32 guineas (Nixon and Rhodes). 66. A pair of noble cisterns of fine old Nankin china, richly decorated outside with various fish and sea plants—70 guineas (Captain Watts). 67. Another pair, formed of enamel, on metal, beautifully decorated in brilliant colours—20 guineas (Mellier). 68. A pair of large Nankin flower vases, of sexagonal form, the sides decorated with figures and rich borders of flowers—27 guineas (Marks). 76. A superb incense suite, comprising an oblong centre vase, with cover and handles, a pair of vases, and a pair of candlesticks, decorated with purple and yellow emblematical clouds and gold dragons—20 guineas (Russell). 79. A pair of very elegant jars, the bells richly painted in a great variety of figures—20 guineas (Nixon and Rhodes). 85. A magnificent temple, in Cloisonné enamel, of every grand design and elaborate decoration, enriched with figures, birds, animals, &c.—54 guineas (ditto). 91. A very fine old Nankin font, decorated with landscapes and figures, 25in. diameter and 21in. deep—40 guineas (Mellior.) 92. Another font, nearly similar—70 guineas (ditto). 191. A small suite Cloissonné enamels, of very elegant forms, including a centre and two side vases and pair of candlesticks—20 guineas (Captain Watts). 194. A noble font of Nankin china, richly ornamented with flowers, &c., on the surface—35 guineas (Wilson). 195. Another font, nearly similar—20 guineas (ditto). 202. A very fine Nankin circular bottle of great size, decorated with blue devices, with lip, double handles and foot. A very fine specimen—20 guineas (Nixon and Rhodes). 209. An elegant turquoise bottle, of the richest colour and quality, on a corresponding stand—25 guineas (ditto). 212. A pair of enamelled garden seats, exquisitely pencilled with flowers, after nature, with open sides, 20in. high—20 guineas (Durlacher). 215. A noble font of Nankin china, curiously decorated with horses, &c., in relief. 25in. by 19in.—30 guineas (Wareham). 216. A pair of Cloissonné enamel flower stand with groups of flowers issuing therefrom, designed after nature in jade and other stones—40 guineas (Captain Watts). 217. A very fine Cloissouné enamel incense burner and cover, richly decorated, on four legs, on carved wood stand—35 guineas (Mellier). 219. A large font, with raised exterior and panels in blue, enriched with landscapes and borders in compartments, 19in. deep—25 guineas (Nixon and Rhodes). 221. A pair of magnificent vases and covers, of the rarest enamel work on elephants' heads, with deep open palisade, to receive the cover, surmounted by an enamelled kylin; unique specimens of Chinese art, and the gems of the collection—450 guineas (Durlacher). 228. A pair of tablets, in stone, with raised Cloissonné ornaments of buildings, figures, &c., and carved wood frames 40in. high—25 guineas (Wareham). 233-4. A noble Nankin cistern, decorated all over with blue flowers, 21in. high and 18in. deep; and a smaller one equally fine—45 guineas (Nixon and Rhodes). The whole realised upwards of £2,400.

FRENCH TRADE IN CHINA. The *Monit ur* has the following notice of the concession reported in our last in reference to vessels trading between Saigon and China:—"According to the terms of a convention recently concluded between the Chinese Government and M. Berthemy, the French plenipotentiary in China, the voyages of French trading vessels between China, Japan, and Cochin-China will hereafter be considered in respect of the payment of tonnage dues as simple coasting voyages. Consequently, all vessels bearing the French flag will be allowed to trade between the ports of those countries without being called upon to pay tonnage dues oftener than once in four months, whatever may have been the number of voyages they may have made. This measure is also applicable to French vessels trading between one Chinese port and another without touching at any foreign port, and also to junks and other vessels employed by French merchants in coasting operations, which hitherto have been exempt from all tonnage dues under the 22nd article of the treaty of Tien-tsin."

IRISH STEAMER LOST.—The screw steamer *Ibis* was totally lost on the 21st off Cork Harbour. She left London on Monday, and yesterday she broke the crank of her engine and lay at anchor off Ballicroneen during a tremendous gale last night. She was taken in tow by the *Sabrina*, but the tow rope broke, and the *Ibis* went on the rocks and broke up. Her crew numbered 26, passengers 15. The captain and one seaman known to be saved.

Continental Intelligence.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DEC. 13.

In the last number of the proceedings of the Russian Imperial Geographical Society are some interesting particulars concerning the Russian trade in the interior of China, communicated by Mr. N. Ivanoff, the agent of the corporation of merchants at Kiachta. That gentleman was sent in 1861 on a mercantile mission to the town of Hankow, on the banks of the Yang-tse-Kiang, and resided there four years, during which period he had full opportunities of studying the mode in which the Chinese gather the tea leaves and the way they cure and prepare them for the market. In conjunction with his associates, the merchants, J. J. Okuloff and I. F. Totmakoff, he established a commercial house at Hankow, and opened there a tea manufactory, which was subsequently increased to five, the operations being performed by the aid of Chinese workmen. They placed themselves in direct communication with the owners of the tea plantations in the vicinity, and bought from them all their tea leaves in the raw state. In this manner they manufactured, during the season of 1863, no less than 1,700 chests of black tea, 11,000 chests of brick, and 540 of flowery. They could afford to sell their produce cheaper than the Chinese, and the quality of their teas found great favour in Russia.

This Mr. Ivanoff, his associates, and other merchants of Kiachta, have since begun to trade with the Chinese in other articles of Russian merchandise, which they get partly by land from Kiachta, and import them partly by sea. The experience they have made in this branch of business has led to the conviction that cloth and other woollen manufactures imported into China from the West of Europe cannot compete with the same description of goods made in Russia. Thus he states that cases have come under his own observation where the same qualities of cloth manufactured in Belgium and England are deficient in weight of materials as compared to the Russian, and mentions an instance where a piece of European cloth, of 30 arschines in length, weighed only 23lb., where a piece of Russian, though only 25 arschines long, weighed 38lbs. For many years past European merchants are in the habit of importing into China, for sale to the natives, cheap woollen manufactures, such as long ells, Spanish stripes, and blankets, the annual sale of which amounts to more than five millions of roubles. In examining the samples of such goods, which have been forwarded to the manufacturers at Moscow, it has been ascertained that they are made of Russian wool, in consequence of which orders from Kiachta merchants have now been given to Moscow manufacturers for considerable quantities of long ells and other woollen goods at London prices.

The *Trieste Zeitung* states that Mr. R. Heinsen, partner in the house of Messrs. Siemssen and Co., of Shanghai, who was lately appointed to the post of Austrian Consul at that port, has not been recognised in that capacity by the Chinese Government, on the grounds that there is no treaty existing between Austria and China, and that only consuls appointed by Governments having commercial relations with the Celestial Empire receive the Imperial Exequatur. "It is fortunate," adds the above-named journal, "that the Prussian Consuls good-naturedly, and with great zeal, take under their protection the Austrian captains that are wandering about in the Chinese waters without any claim to assistance, and almost repudiated by their own Government." This is no doubt perfectly true, but it shows a culpable neglect on the part of Austria to subject their national flag to the indignity of having to seek aid and protection from the Consul of any other Power, instead of taking measures to secure the right by treaty of appointing recognised Consuls of their own in China.

COMMERCIAL.

COFFEE.—No alteration in values. The demand has been comparatively slack, and the sales of the week did not exceed 10,000 bags.

SUGAR.—Neither in Raw nor Refined has there been much done, but the prices of both are well supported.

RICE.—Cleaned grain attracts more attention, and considerable parcels have been taken for immediate shipment to the North of Europe. More business has also been done in rough, and 6,000 bags of Bassein ex Helvetia, and 6,200 bags of Rangoon ex Carl realised full prices.

SPICES.—Pepper is again in favour, and there has been a lively demand, prices ruling firm. The business in other descriptions was confined to the execution of small orders for local consumption and immediate shipment at previous rates.

SPELTER is neglected, purchasers affirming that prices are too high here as compared with other markets; and they therefore demand concessions which holders are by no means inclined to comply with. The only sales reported this week are 5,000 centners for spring delivery at 14.14 and 500 centners, CGH mark, ex warehouse at 14.11. The arrivals this year have amounted to 307,000 centners, against 496,000 at the corresponding period of 1864. The present stock here is 25,000 centners, against 50,000 centners last year.

DISCOUNT 5 per cent.

SHIPPING.—Sailed, Dec. 12 (from Cuxhaven), Patria, to Hong Kong.

HOLLAND.

(FROM OUR CORRESPONDENT.)

ROTTERDAM, DECEMBER 20.

The most important political incident since my last letter is the motion of Count van Zuylen, to inquire into the influence exercised by the Cabinet upon the elections in Limburg (by the letters of which you have before heard),

Digitized by Google

which was rejected by 53 votes to 18—the latter belonging to the regular Opposition.

The First Chamber is working in the sections, and will, within a few days, begin to discuss the budgets.

At the election in Limburg, Mr. Maesen de Sombreff was elected Member of the Second Chamber by 1,033 of the 1,6 1 votes. This is the member who was obliged to resign his seat ecause he had been the means of giving publicity to a private letter, addressed to him by Mr. Betz, through which fact the Minister was so compromised that he also was compelled to send in his resignation.

From the outbreak of the rinderpest in this country to the 26th November, 11,348 beasts have been attacked, of whom 3,343 died, 3,174 were slaughtered, and 3,205 recovered.

The supervision of the Culture Bill, in the sections of the Second Chamber, is finished. The report has not yet been printed.

Our eminent novelist, Mr. J. van Lennep, has just published a novel in five volumes—"Klaasje Zevenster." Mr. v. Lennep is now seventy years old, but he has not yet lost the youthful animation of the period when he wrote his "Ferdinand Huych," which has been translated into the English, French, and German languages.

The death of the King of the Belgians has caused but little sensation here. The press in general has spoken of him as he merited—as a good officer, who showed himself a skilful administrator in State affairs, an adroit diplomatist, and perhaps the most sagacious of constitutional sovereigns. Not one bitter word has been uttered regarding the events of 1830. Justice was done to his memory, and the past was forgotten. No one supposed here that the Duke of Brabant would meet with the slightest obstacle to his succession. The rumours that France would attempt to annex the kingdom, as well as the supposed plans of Count von Bismark, &c., were laughed at. The notion that we also were to become a part of Belgium is happily only a *canard* hatched by the *Siecle;* we certainly should decline to annex any part of that kingdom; we would rather abandon the rotten part of our own State, the province of Limburg, which is and always has been ill-disposed to our Government. Nothing is heard of any approaching agitation in Belgium. All parties seem to be vying with each other in expressions of loyalty. Perhaps it is the threatened loss of national independence which has induced them to forget party differences and to warn them that they must rally around the throne.

P.S.—The First Chamber is voting the Budget, and will have finished its business by the new year. The Second Chamber has adjourned for the Christmas recess, and will probably not re-assemble till the middle of February. It is thought there will be a majority of 25 in favour of the Culture Bill. The Order of the Netherlands Lion has been conferred upon Mr. J. des Amorie van der Hoeven, Consul in China. Markets:—Coffee: Unaltered, but firm. Sugar (Raw): About ¾fl. to 1fl. above the November prices. Tobacco (Java leaf): Very firm. Tin: Dear money has produced a decline, in Banca, from 58fl. to 57½fl.

COMMERCIAL.

COFFEE.—The market is firm, but the business passing is only small. 1,500 bags green Java ex Maria Magdalena were sold at 49¼. The 535 mats and bags Manila (dam.) were partly sold in auction at 20c. to 38c.

TEA.—The market continues very quiet, and the sales are very trifling in extent.

SUGAR.—The market is firm, and the sales include 3,000 kr. Java at November prices.

RICE.—Of cleaned sorts no supply. The nominal quotation is: Arracan 9¼f. to ¾f.; Bassein, 9f. to ½f.; *Voorloop*, 11½f. to 13f.; *Voorloop* Java and table 13f. to 19f.

SPICES.—Firm, with an increased inquiry for some sorts. Nutmegs: No. 1, 84c. to 85c.; No. 2, 74c. to 76c.; No. 3, 53c. to 56c.; No. 4, 34c. to 36c. Mace: D, 90c. to 92c., E, 85c. to 87c. Cloves: No. 2, 27c.; No. 3, 26c. Cinnamon: No. 3 and 4, without stock.

COTTON.—In the first days of the week there was an animated inquiry, but the market closed duller. The 3,307 bales offered in auction by the Trading Company were sold as follows:—1,375 bales Tinnevelly fair, 91c. to 93c.; 298 bales Japan good fair, 101½c. to 102½c.; 279 bales Japan middling fair, 98c. to 99c.; 1,179 bales Dhollerah fair, 94c. to 95½c.; 19 bales Broach middling, 78c. to 80¾c.; 66 bales broach fair, 91c. to 91¼c.

HIDES.—Without transactions by want of stock. The 1,900 parcels Java Rinder, imported for Noord-Brakant were sold by inscription at prices which did not transpire.

INDIGO.—The market is firm, but the business passing is only small, the sales being 70 chests Java, which were sold at firm prices.

SAPANWOOD.—1,000 piculs, floating per Veritas, were sold at very high prices.

BANCA TIN.—1,000 slabs were sold at 58f. The market is very firm.

ARRACK.—45 casks Batavia, ex Ocean Pearl, were sold at secret offer. The article is in good condition.

DRUGS.—Notwithstanding the transactions are unimportant, the market remains firm. Camphor: Via London, some lots were imported from Japan, but they are still unsold, because holders ask too high prices. Cassia Vera: High prices are offered for the parcels afloat; 500 piculs were sold at a firm quotation. Gum Damar: Prime cannot be bought under 30c. Gum Elasticum cannot be bought under 125f. Japan Wax: Scarce, and high in price.

TOBACCO.—In auction to-day were offered 85 b. Manila Cagayan, which were partly sold at 22½c. to 72½c., besides the following parcels Java tobacco:—

194	bales	Java	CPZ	Sold in average at	36¾c.
518	do	do	DBG	„ „	36⅞c.
333	do	do	EB	„ „	36¼c.

STOCK MARKET.—For the last few days there has been much depression, with a further fall in prices, and the tendency throughout was very unsettled. A partial recovery in values, however, took place after it was known that the Bank directors had only raised the discount for foreign stock, and a few purchases followed in home securities after this rise. Dutch Two-and-a-half per Cents., 60½; Three per Cents., 71⅛; Four per Cents., 95 5-16; Trading Company, 147½; Dutch-Rhenish Railway Company, 361f.; Dutch Cred. and Deposit Bank, 193½; Central Railway Company, 124; Rotterdam Bank, 98.

MONEY.—Bank rate: Discount for bills, 6 per cent.; acceptances, 6½; open market, 7 to 8.

CHANGE.—London: 3 months, f.11.67; 2 months, f.11.73; short, f.11.85; Paris: 3 months, f.46.70; 2 months, f.46.87½; short, f.47.30; Hambro': 3 months, 35f.; 2 months, f.35.15; short, f.35.45; St. Petersburg: 3 months, 148f.; short, —; Vienna: 2 months, f.107.50; Italy: 2 months, f.46.30.

SHIPPING.—DEPARTURES.—Dec. 11, from Texel, for Batavia, Aria and Betsy; for Sourabaya, Sourabaya Packet; 12, from Helvoet, for Padang, Heimath; from Texel, for Batavia, H.M.'s corvet Van Speyk.

PASSENGERS OUTWARD.—For Java: per Aria and Betsy, Messrs. van Dolder and family, C. Tjebbes, J. Argament and family, C. Rapart; per Sourabaya Packet, Messrs. K. Veenstra and family, Boudier, A. J. Voorhenl, G. Dumpel, Mrs. van Delden, Weineri and family.

RUSSIA, GERMANY, &c,

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DEC. 23.

With regard to the question of the free exportation of silkworms' eggs from Japan, the *Trieste Zeitung* contains the following remarks:—

"It is well known that the hopes of all the silk producers in those countries that have suffered for many years from the mortality among their own breed of silkworms are now concentrated on receiving their supplies of 'grains' from Japan. It is true that experience teaches us that even the Japan breed, that was at first supposed to be proof against the disease, when transported to other countries degenerates in quality and becomes liable in some degree to the disease and mortality after a few generations; but they are not so much affected as the breeds from China and other parts of Asia, which have all been tried in succession and found lamentably wanting. It is, therefore, no wonder the sale of silkworms' eggs should now have become an important branch of trade, not only at Yokohama but also at Hong Kong.

"Hitherto there was a prohibition against the exportation of these 'grains from Japan, the contravention of which was both difficult and dangerous, and thus purchasers had to take all that they could find—the good and the bad together—without any legal claim for compensation or redress; for there are some sorts in Japan that produce continuous generations *(polivoltini)* and others that only give one (the *annuali*). Only the green, the yellow, and the white of the latter sort can be depended on, and are successful when bred in other countries.

"In making purchases even in Japan no guarantee could be obtained for the genuineness of the goods, and the high premiums paid to smugglers gave rise to the most atrocious falsifications in China and even in Europe, cases having been detected where real Japan eggs have been detached from the original paper, and spurious ones substituted.

"Under these circumstances it is pleasant to know that the Government of Japan has abolished the prohibition and thrown open the export trade in silkworms' eggs to general competition, placing them on the same footing as the other articles of export permitted by the treaties. The obtaining this valuable commodity is thus greatly facilitated, and Italian, French, and Austrian experts may now be sent out as special agents to Yokohama to make purchases of silkworms' eggs, which is the more desirable as the Japanese are not acquainted with the mode of packing them for a long sea voyage, and the purchaser has to run the risk of their arriving in a spoiled or defective state.

Digitized by Google

"Austrians are recommended to apply in the first instance to Mr. Consul Overbeck, their energetic representative at Hong Kong, who will with pleasure advise them how to proceed, and the overland route is specially pointed out as the best and quickest, both for the conveyance of the persons and the silkworms' eggs which take up but little space and less weight. Those who go out in March may arrive in Japan *via* Hong Kong before the period of egg crop—which is from August to October—and may apply to Mr. Fraser, the managing partner of the Liverpool house of Messrs. Charles Saunders and Co. The English maintain, and this is important for those who have no special agent in Japan, that the silkworms' eggs can be obtained by way of Liverpool for half the price they would cost by the usual route to Marseilles or Genoa. It may here be mentioned that the Austrian Consuls at Liverpool and Hong Kong, as well as the one at Shanghai, have received special instructions from the Minister at Vienna to pay every attention to the execution of orders for silkworms' eggs, and give their best advice and assistance to Austrian subjects applying to them for information no the subject."

Another joint-stock company is in course of formation at Trieste, planned and projected by Mr. Revoltella, a large shipowner of that port. Its object is to build and sail vessels under the Austrian flag to China and the East. It is to be called the "Austrian Company of Shipowners," with their head-quarters at Trieste. The capital is nominally to be 3,000,000 florins, but for the present only one-third of that amount will be paid up, it being deemed more prudent to begin in a comparatively small way and extend their operations if successful. When the provisional committee applied to the new Minister for Trade to ask for his protection and support of the undertaking, that practical officer not only cheerfully promised it, but pointing out the great development that must accrue to the trade of Austria on the opening and completion of the Suez Canal, expressed his hope that the Company's ships would frequent it often. "But," added the Minister, "we must be prepared to meet the emergency when we see an extension of trade so near: the port of Trieste cannot contain more than 250 vessels, and has no accommodation even for them to load and discharge at quays." And then he concluded by promising that the long projected plan of improving and enlarging the harbour of Trieste should be commenced next spring, so as to be ready for increased traffic by the time the Suez Canal is opened.

A letter from Kiachta in the (Russian) *Moscow Gazette* states that a rich and extensive gold mine has been discovered in the mountains between Lake Baikal and the Chinese frontiers.

M. Alexis Kormazoff, Bachelor of the Imperial University of St. Petersburg, has been appointed Secretary and dragoman of the Russian Consulate at Ourga, in China.

COMMERCIAL.

COFFEE.—There has been a fair seasonable demand for this article, and prices are fully supported. Sales 10,000 bags, 4,000 of which for arrival were bought on speculation.

SUGAR.—The raw market is quiet, but refined has had an active sale, which would have been much greater if holders had been more willing to do business by somewhat relaxing their pretensions.

RICE.—But little has been done this week either in rough or cleaned grain, and there is no alteration in values. Market closes firm.

SPICES.—No change in Cassia Lignea. Of Flores: 123 chests lately to hand per Jacob Levy, sold at 24 Sch. Bco. by private contract. Vera is higher and scarce. Pepper maintains its position.

SPELTER.—No alteration in value for this metal on the spot, but it may be purchased for spring delivery at a rather cheaper rate. The only sales were 1,000 centners (special marks) at 14.11, and 1,000 centners (WH) at 14.13.

SHIPPING.—ARRIVED.—Dec. 19 (at Cuxhaven), Costa Rica, from Canton. SAILED.—Dec. 20 (from Cuxhaven), Jan Peter, to Singapore.

THE PRESIDENT'S MESSAGE.

The following is an extract:—

RELATIONS WITH RUSSIA AND CHINA.

I have dwelt thus fully on our domestic affairs because of their transcendent importance. Under any circumstances, our great extent of territory and variety of climate, producing almost everything that is necessary for the wants and even the comforts of man, make us singularly independent of the varying policy of foreign Powers, and protect us against every temptation to "entangling alliances," while at the present moment the re-establishment of harmony, and the strength that comes from harmony, will be our best security against "nations who feel power and forget rights." For myself, it has been and it will be my constant aim to promote peace and amity with all foreign nations and Powers; and I have every reason to believe that they all, without exception, are animated by the same disposition. Our relations with the Emperor of China, so recent in their origin, are most friendly. Our commerce with his dominions is receiving new developments; and it is very pleasant to find that the Government of that great empire manifests satisfaction with our policy, and reposes just confidence in the fairness which marks our intercourse. The unbroken harmony between the United States and the Emperor of Russia is receiving a new support from an enterprise designed to carry telegraphic lines across the continent of Asia, through his dominions, and so to connect us with all Europe by a new channel of intercourse. Our commerce with South America is about to receive encouragement by a direct line of mail steam ships to the rising empire of Brazil. The distinguished party of men of science who have recently left our country to make a scientific exploration of the natural history and rivers and mountain ranges of that region have received from the Emperor that generous welcome which was to have been expected from his constant friendship for the United States, and his well-known zeal in promoting the advancement of knowledge. A hope is entertained that our commerce with the rich and populous countries that border the Mediterranean sea may be largely increased. Nothing will be wanting on the part of this Government to extend the protection of our flag over the enterprise of our fellow-citizens. We receive from the Powers in that region assurances of goodwill; and it is worthy of note that a special envoy has brought us messages of condolence on the death of our late chief magistrate from the Bey of Tunis, whose rule includes the old dominions of Carthage, on the African coast.

MORTALITY OF TROOPS AT HONG KONG.

The following letters have been published in *The Times*:—

SIR,—With reference to your leading article of to-day on the subject of sickness in Hong Kong, it is only right your readers should know the reasons which led to the addition of a second European regiment to the garrison there at such a period of the season as June. Up to April, 1865, one European regiment and one Madras native regiment shared the duties of the garrison; the European regiment occupied the Murray Barracks, than which there are not finer in the East; the native regiment occupied mat sheds, neither wind-tight nor water-tight, the floorings of which were raised only a few feet from the common soil—a highly objectionable style of residence in a sanitary point of view, and quite unsuited for Europeans. From the motives of economy, to save "Indian allowances" granted to staff and regimental officers while they served in the same garrison with Indian troops, it was recommended from the War-office and ordered from home that the native regiment (22nd Madras) should be withdrawn and replaced by the 2nd battalion of the 11th Regiment, from the Cape.

This was done, and the results detailed by you have been unfortunately arrived at; a state of things which everyone on the spot predicted when it was known that Europeans had to live in such shed huts and would have all the duties to perform, many of the guard-rooms, designed for natives, being quite unfit from locality and construction for other use.

Urgent representations were made in April and May by the principal medical authority to have the 2nd battalion of the 11th Regiment stopped at Singapore, where capacious barracks existed unoccupied, and so prevent their arriving in Hong Kong till the winter, or until proper and suitable barrack accommodation was provided. Had this been attended to much life would have been spared; but, with three years' experience of Hong Kong, I think it only fair to say that European troops, setting aside the philanthropic or humane view of the case, are too costly materials to be put to all the drudgery of every duty in such a climate, and it will only be when native troops are again employed to save the Europeans from fatigue and exposure that we shall hear no more of the revived unhealthiness of Hong Kong, which island for years past up to the present has been earning for itself by its improved salubrity quite an opposite title.

To save about £3,000 a year in "Indian allowances" the country will have to pay £12,000 as expenses consequent on the mortality and sickness that have already taken place, which should be a severe lesson to the cutting-down policy of the present day, whereby life, as in this instance, has been recklessly sacrificed to bring about some paltry saving. The same parsimonious system also reduced the number of medical officers on the island, leaving no margin for increased work, sickness, or mortality among them.—I remain, your obedient servant, CHINENSIS.

Junior United Service Club, London, Dec. 18.

SIR,—I see it stated in the letter signed "Chinensis," in *The Times* of this morning, that the 2nd battalion of the 11th Regiment arrived at Hong Kong in the month of June. It is, indeed, astonishing that such an arrangement could have been made in the present day, experience having shown the danger of sending troops to commence their service there at an improper period of the year. I was for many years at Hong Kong, and have had much experience of the place. On the 17th of June of one of the years I passed in China a detachment arrived from England in perfect health. It consisted of 5 sergeants, 5 corporals, and 144 men. On the 22nd August following, of this detachment, there were effective only 4 sergeants, 4 corporals, and 77 men; 11 were dead. One sergeant and 13 men were in hospital ashore, and 1 corporal and 43 men were invalids on board ship, The 11th Regiment has exemplified the same mistake on a larger scale.

Your correspondent adds that the Murray Barracks are fine ones, and so they are, and ought to be from the amount they cost the country; but, unfortunately, they are placed in a locality where malaria abounds, some years to a more fatal extent than at others. The Murray Barracks consist of three parallel ranges of buildings; the first line, near the sea, is occupied by the officers, the second and third ranges by the soldiers. At one time the third range had to be abandoned, it was so fatally unhealthy to the men stationed in it; and it was unoccupied, except as stores, for a considerable period. There is a small swamp a short distance from the rear or third range of building which had the character of engendering the malaria.

The impropriety of the site chosen for the barracks was pointed out before they were built by one of much experience in eastern climates, but, unfortunately, his suggestions were unheeded, and much loss of valuable life and great suffering have been the result.

The first year I was at Hong Kong the garrison consisted of 45 commissioned officers, including staff, and 1,028 men of all other ranks. The deaths in that period amounted to 4 officers and 184 men. The admissions into hospital were 5,935 among the soldiers, and 114 among the officers. Thus, on the average, each man was nearly six times and each officer three times under medical treatment in the year.

Now that the question is before the public, it is to be hoped that the condition of the soldier may be improved in China. He should have as little night duty and guard mounting as possible. He might be employed at the Naval-yard, the Ordnance stores, in keeping roads in repair, &c., by which he would earn an addition to his pay, to be partly expended on a

Digitized by Google

superior style of messing, which the climate requires. No bad result would attend out-door occupation with proper covering for the head. The Sappers were the most healthy part of the force; their minds were employed, and their amount of pay enabled them to live better than the other soldiers, and they had not the wearisome duty of standing sentry night after night, in an unhealthy tropical climate over stores and other places that might have been made equally secure with good locks and a native policeman; and, above all, the men should not be kept more than two years on the island. CIVIS.

Dec. 19.

SIR,—You have lately exposed the terrible sickness of the troops at Hong Kong, and your correspondents have shown the cause of it—mistaken economy on the part of the authorities, who send Europeans to do duty in a climate which Orientals alone can stand. The Indian native troops have been removed because of the expense entailed by their being there, and Englishmen have taken their place, but I would beg to suggest that efficiency and economy might both be obtained by raising for service in Hong Kong and elsewhere a few regiments of the natives of China. I venture to assert, from having seen the Coolie Corps in 1857-8, that the natives of China are the makings of better soldiers than those of India. They are strong, hardy, willing—can stand heat and cold, and, having no religious prejudices, will eat anything they can get, from beef and plum-pudding, to rice and rats.

Ask Major Temple, who commanded the Coolie Corps, or ask Lieut.-Colonel C. Gordon, Royal Engineers, who have both had to do with Chinamen, of what sort they are, and whether under British officers they would not be very hard to beat.—Your obedient servant, D.

SIR,—The officers and soldiers of the English army cannot but feel grateful to *The Times* for the manner in which the losses sustained by the 11th Regiment at Hong Kong have been brought to the notice of the public.

Those who have served in the East, whether in India or China, will recognise the old story of bad accommodation combined with unhealthy sites. That the tropical climate of the East is unfavourable to European constitutions is undoubtedly true, but it is no less true that in most cases a judicious selection of stations for our troops, guided solely by strategical and sanitary considerations, would greatly mitigate the evils under which our army is suffering in China and in India. This I know to be the opinion of eminent military men who have had opportunities of judging for themselves, and it cannot but strike any one that radical reform in that direction is becoming absolutely necessary.

We have the startling fact before us that the English army is now 6,000 men below its strength, and such is the severe strain upon our army in the East that our infantry of the line contribute 4,600 men to the above number.

The 54 regiments and battalions of infantry in India are 3,000 men below their strength, leaving only 1,600 men wanting to complete the remaining 87 regiments and battalions of our service. It should be remembered that we are at peace, and that every exertion has been made to raise recruits; but the public will observe from these figures where the shoe pinches.

It appears usual at home to judge of the strain on our forces by the number of deaths which take place in India per 1,000 men in each year; but this hardly shows the true amount of suffering and loss to the service and to England.

I cannot say what China has contributed to the list of deaths and invalids in the years 1863 and 1864; but, as far as India is concerned, perhaps a little information may be useful to the public. It must be borne in mind that those two years were very healthy years in India. I shall first take the year 1863. The total strength of the English army in India was 67,525 men; there were 110,357 admissions to hospital; 1,446 men died, and 2,422 were invalided to England; of these invalids 150 died during the passage home, making up the deaths to 1,596, and 1,366 were discharged at home, as unfit for further service. This shows a loss from 67,525 men of 2,962, or, to make it plainer, about 44 men per 1,000. It will thus be seen that in estimating the drain on our army in the East, care should be taken to follow the effects of the tropical climate on our invalids, and to mark that the discharging of so many poor fellows cannot but have a bad effect on recruiting, when they mix in their helpless condition with the class whence they were drawn.

I cannot enter so fully into what took place in the year 1864, but the information, as far as it extends, may not be without interest. It appears that, notwithstanding the number of recruits sent out from home, the 67,525 men of the year before had declined to 66,175 in 1864, showing a difference of 1,350 men. The year, however, was very healthy, for out of the 66,175 men 1,232 died and 3,000 were invalided. How many of these invalids died during their passage home, and how many others were discharged as unfit for service, I cannot tell; but it will be observed that 4,292 men appears a great many to lose from 66,000 soldiers, and the total number who died and were invalided in those two healthy years deserves attention, and will prepare us for what may be expected when the returns for the unhealthy year of 1865 are laid before the public. Most of the regiments have been from six to eight years in the country, so that the invaliding, at least, will be very heavy, every year after six years' Indian service adding largely to the number of broken-down constitutions. Cholera has been busy this year, but the accounts from India, except from private sources, are, to say the least, misty; it has, however, been ascertained that a wing of the 45th Regiment, or about 400 men, have lost 60 men and 31 women and children from that disease at Neemuch; this, numbers considered, almost rivals the losses of the 11th Regiment at Hong Kong, and creates the desire to know if our army in the East is distributed on strategical and sanitary considerations. We have now three able generals at home who could give the necessary information. Have Sir Hugh Rose, Sir Hope Grant, and Sir Edward Lugard ever been consulted?—Your obedient servant, OBSERVER.

SIR,—The decimation by sickness of one whole regiment, and in a great measure that of another, during the past year in our colony of Hong Kong—viz., the 2nd Battalions of the 11th and 9th Regiments, gives rise to the question if British troops cannot be dispensed with, or, are they positively required there for the maintenance and support of our interests in China?

Those who are most interested on this point are, doubtless, the mercantile community, and yet they have given their opinion that there is no necessity whatever for a military establishment being kept up in China—nay more, they have protested against the burden and tax thus imposed upon them for no earthly use whatsoever. Our troops for some time past have been entirely removed from Shanghai, which in every way is a far more important and rising settlement, being situated at the mouth of the great Yangtze-Kiang River, which, throughout its immense long winding course, collects more than half the produce of the whole of China, and were double our English capital, interests, and shipping is concerned, and yet everything proceeds in perfect regularity, both life and property are in far greater security than in Hong Kong, where two English regiments, together with a considerable body of artillery, engineers, and a brilliant staff, consisting of a general, assistant, and deputy-assistant, adjutant and quartermaster-general, *et hoc genus omne*, are to be met with at every corner of the town. The great secret of all this is that the Chinese are daily becoming more and more convinced that it is to their interest to keep on good terms without the European element. Volunteer corps have been introduced everywhere with the greatest success, and now there only remains the establishment of a good police corps,—where Shanghai, again, most conspicuously shines out in opposition to its elder sister—and there is positively no further need of our sending out regiment after regiment of good and valuable British troops to be annihilated yearly from the pestiferous miasmas by night, and the equally dangerous effects of the sun by day. The faulty system and the want of proper barrack accommodation, together with the injudicious supplanting a black regiment by a white one, has no doubt caused part of the disaster; but the standing fact must always remain apparent to our military authorities, viz., that white troops are unable to bear up against the sun in China; nor are they better adapted for the duties of nightwork, during six months in the year at any rate. But "such vast interests as we possess in China cannot be left unprotected." It is true the political horizon looks calm enough; but our experience, dearly bought in that country, has taught us to put but little faith in John Chinaman. His paper is valueless, and so forth, many people will argue, with a considerable amount of plausibility on their side. "Very well, then, if troops be required, they shall always be forthcoming and ready for any work they are put to." We have two excellent stations within a week's easy steam of any part of the China coast—one in the north, Japan, where the climate is as bracing as in England; the other in the south, Singapore, it is true, with a highly tropical temperature, but equally salubrious, judging from the official returns hitherto transmitted to the War-office, and, being about equidistant between Calcutta and China, it would have the additional advantage of being always able to send troops in either direction, as they might be wanted. In addition to all this the local Government, a short time back, built a fine range of barracks, sufficient for the accommodation of two whole regiments; these hitherto remained unoccupied, but would be admirably adapted for the present circumstances. Hong Kong is valuable as a dockyard for our navy, and affords an excellent harbour for our mercantile shipping passing up and down the coast of China; but for no other possible purpose. When Canton was a place of trading importance, which it continues no longer to be, owing to the opening of so many better ports up the coast, and the great river mentioned above, and when the supremacy of British arms was not thoroughly recognised by the Chinese, it was considered advisable to have a large standing force to keep them in awe, and from time to time bring them to reason; but there is no further necessity for that now. Our occupation of Canton, and the march on to Peking settled the question for ever.

Why should the navy not look after its own property? We have a large fleet on the China station lying idle the greater part of the year, and ill adapted, on account of so many of its vessels being of such great draught of water, to cope with the ever-increasing piracy on the coast. Surely on the same principle as the French carry out in Japan, a sufficient number might be landed to watch over our dockyard, arsenal, and magazines, at any rate, assisted by the native watchmen, who have not only hitherto proved themselves to be more vigilant and sharp in every way than our British sentries, but are to be thoroughly depended upon on all occasions, and enjoy a perfect immunity from the evil effects of that treacherous climate; these can and have been kept up at a trifling expense to Government, which is exerting itself in reducing army expenditure in China, only unfortunately its latest experiment of substituting for the Indian scale a newly-hatched chimera of the War-office has resulted, as everybody knew beforehand, in a decided failure. Let us hope, then, that the authorities will set themselves to their task once more, and benefiting by past experience bring forward another scheme which will bear some good fruit in its result, instead of the present one, which is loathed by the soldier and ridiculed by the civilian.—Yours, &c., TELEMACHUS.

Hong Kong, Nov. 13.

Strength on arrival of the 2nd Battalion, 11th Regiment, 704. Average of men in hospital,—August, 156; September, 166; October, 143. Died, 50; invalided, 128; probabable future number soon, 50—60. Women—died, 3; invalided, about 17. Children—died, 26 here—Stanley, unknown, 15; invalided, about 30. A ship is being taken up again to sail about the first week in December with those the Medical Board have passed as unfit for further service. This will make the second vessel employed by Government for that purpose within the last four months. This does not include the Royal Artillery stationed in Hong Kong, nor the Engineers, who have also suffered considerably.

Strength of the 2nd Battalion, 9th Regiment.—Average number in hospital—August, 83·90; September, 107·73; October, 102·56. Number of deaths—August, 9; September, 4; October, 3; total, 16. Invalided—August, 4; October, 55; total, 59. Probable future number soon, about 30. Women—died, 6; invalided, 28. Children—invalided, 29. Total number of deaths (men) since arrival, 38; total number of children died since arrival, 27. Since receiving this return the average number in hospital for the 2nd Battalion, 9th Regiment, has risen to 130, and the amount to be invalided to 50. Several deaths have occurred since—viz., to November, 13.

The London & China Telegraph.

LONDON, WEDNESDAY, DEC. 27, 1865.

JAPAN.

IN our last issue we had occasion to comment on a partially unintelligible telegram received from Shanghai, which announced, or seemed to announce, that the Foreign Ministers had gone on an expedition to open Osaka to foreign trade. The obscureness of the message, and the apparently hopeless nature of such an expedition as that indicated, induced us for the moment to believe that a mistake had been made in the destination of the expedition, and that some other port was meant, perhaps one intended to serve as a substitute for Nee-e-gata. Our doubts are, however, now at an end, the mail just received having brought intelligence of the actual departure of the allied squadrons, with the British, French, and Dutch Ministers, for Hiogo. Although the objects of this movement were not officially announced, they were confidently believed to be, firstly, the opening of Hiogo at an early period, and, secondly, the MIKADO'S ratification to the treaties. The expedition sailed from Yokohama on the 1st November, and the result has been—if there be any truth in telegrams—a complete failure.

We have not been kept long in suspense, a message just received from Shanghai, dated 25th of November, stating that "The MIKADO had refused to open the ports. The "Foreign Ministers had referred the question to their "respective Governments. The fleets had returned to "Yokohama." And thus ingloriously ends the first attempt to bring foreign intercourse directly under the notice of the MIKADO. We fear the attempt has been made with somewhat injudicious haste. Energy and promptitude are certainly necessary in a high degree in dealing with such a Government as that of Japan, and we would be the last to undervalue such important qualifications. But has not this step been taken a little too suddenly? We think so. Diplomacy has often been likened to a game at chess; and, to adopt that simile, Sir HARRY PARKES is in the position of a player who is commencing a fresh game with a new adversary; and he has met with a serious check almost at the first move. A little more deliberation—a few preliminary moves of lesser importance, might have so strengthened his position as to have not only justified a vigorous attack, but materially increased its chance of success.

THE JAPANESE VISITORS.

MAJOR BRINE, Royal Engineers, has been appointed by the Earl of Clarendon to take charge of the Japanese party (ten), reported in our last as having arrived from France. Amongst other novelties in this country, they have visited the Woolwich Dockyard, Lloyd's, the Royal Exchange, the Mint, the Tower, *The Times'* office, Blakely ordnance factory, the London Docks, Royal Hospital Chelsea, and the Bank of England. On the 21st they started for an inspection of the dockyards, &c., at Portsmouth and Plymouth. They will give a banquet at the Langham Hotel on the 29th.

JAVA *VERSUS* CEYLON.

No one who regards the nature of those influences that conspire to colonial development can feel surprise that the Colonial Government of the Dutch Netherlands India, no less than the Home Government, should feel more than ever disposed to revise those conditions under which produce is raised in Java and the neighbouring islands. We had recently occasion to remark that no island has been the subject of so many experiments as Java, experiments directed to the utilising as much as possible that native labour on which production has heretofore relied. The terms of labour and the conditions of culture have been again and again revised, but always to the disappointment of official calculation. Even if the assessment of labour were more equitable, no sufficient allowance has been made for failing crops. In the proposed change of system the obligatory clauses as to extension of coffee and spice plants are more stringent than ever. So far, the Colonial Government, even though guaranteeing a given price on a forced delivery, has not succeeded in inducing the natives voluntarily to extend the area of cultivation. The principle which underlies any truly economic system of labour is, that the labourer whoever he may be, and however far he may be brought, shall receive an equitable renumeration for his services. The rich open valleys of Java now lying neglected testify that the motives to increased energy and the impulse to the exercise of intelligence are diminished and crippled by an oppressive system of rule. The natives are seized on as instruments to be handled and worked at pleasure; and we are not surprised that in the present, as in former schemes, peremptory and pre-determined acts of the Government are presented in the light of gratuitous indulgencies. What has to be taken into consideration is that Java, particularly in the article of coffee, does not exhibit that progressive rate of increase that might fairly have been calculated on; that the quality does not tend to improve; and, further, that the culture on the present system is not sufficiently remunerative. Individual enterprise on the Continent is probably in a state of just as great incipient activity as among ourselves, wanting only that encouragement which a free system of trade, accompanied with the absence of these restrictions which Government competition, whether in agriculture or trade, never fails to bring about. But even these restrictions cannot be tolerated in the face of increasing competition. In addition to the new solution of the long standing problem of how to turn Javanese labour to best advantage, there remains the proposal we recently noticed of certain private capitalists to take over and work the Crown coffee lands, and, to some extent, the Government rice plantations of Western Java.

Incited by the example of Ceylon, which, unable to avail herself to any great extent of native labour, and compelled to import Indian coolies, is yet advancing rapidly in the culture of coffee, and gaining year by year on the Java yield—these capitalists have proposed a scheme which, without setting Java labour free, would yet remove many drawbacks to successful culture, sweeping a host of Government agents from the field, who have hitherto found it their interest to compound with natives, relieving them of imposed obligations for deliveries to a given amount, or, looking to their percentages on the quantity raised, regarding this point rather than quality. Instead of Government agents intent only on securing their percentages on quantity with little reference to quality and driving their private bargains of exemption, there would be experienced the order and regularity of mercantile management, but combined with even greater avidity. Unquestionably, under this arrangement, which would clothe this body of capitalists with powers hitherto exercised by the Government in controlling or portioning out the labour of the natives, the latter will not be gainers; and the yield of coffee can hardly fail, under favouring seasons, to be considerably increased We are far, however, from being so sanguine as the promoters. A certain amount of additional activity will be available, but without any influence at work to stimulate intelligence. Government experience has hitherto been disappointing. The cardinal error of Holland has been in imposing terms disadvantageous to native progress, shown as well in the conditions of labour imposed, as in the restrictions thrown upon trade. In a spirit of monopoly, she seeks to extend her possessions in Sumatra, violating, as usual, individual rights; but the very act of appropriating an independent sovereignty for the purpose of securing the gains of trade, and establishing her rule of compelling colonists to sell cheap and buy dear, she

Digitized by Google

must find that, in seeking to divert the channel of existing trade, she will for years to come be financially the loser. Holland has little to be proud of in its colonial history; in the Dutch East India possessions capital has been repelled by the assumption of the taskmasters' vocation by the Government, and that progress which incites to reciprocity of interchange been seriously impeded. The Government balance-sheets, which even Java exhibits, are delusive, and the items, fairly distributed, would present a very different character from that usually assigned to the account of income and expenditure. At the same time, the value of Java to Holland is not, any more than in the case of our own colonies, to be estimated by direct returns. Java has aided in swelling many domestic channels of Dutch industry, presented an outlet for the employment of redundant capital, and given rise to many auxilliary branches of traffic, mistaken by political writers for a detached spirit of enterprise, but which sprang from circumstances, and were dependent solely on colonial progress. A system so artificial must prove essentially defective in facing free competition. Ceylon has little to apprehend from the movement, even if carried out. The supervision by agents of a private company, and the terms it will be authorised to impose, will not stimulate the Javans to superior skill, and it will be long before encouragement will exist for an extended importation of Indian coolies. Meanwhile, capital will flow into Ceylon, and the economic and efficient agency of organisation, with its special and characteristic advantages, will enable her to maintain that high vantage ground she is intent on reaching. Nor will freedom and security prove inimical to our putting hereafter the services of Ceylon natives to better account, for already, in many parts, they have been aroused from their accustomed apathy.

GROWTH OF TEA IN THE NEILGHERRIES.

IN *Travers' Circular* of the 16th inst., reference is made in detail to our remarks in the *London and China Telegraph* respecting the probable success of the tea plantations in the Neilgherries. The article states that a conclusion, based upon imperfect data, has been arrived at by us to the effect that the attempt to grow tea in some of the higher districts of the Himalayan range has been unsuccessful; so, too, a similar result would necessarily attend the project in the Neilgherry district. We confess that our information on this subject is both imperfect and limited; but with the knowledge before us that tea plantations commenced above a certain altitude have failed to realise the anticipations formed of them by those who have embarked capital in them, we do not consider our remarks the less important to the public, if they suggest caution in not too readily adopting the conclusion that because tea grows readily and flourishes at a considerable height above the sea, that it will do so sufficiently luxuriantly to prove remunerating to shareholders in tea-growing companies. This is all we say, having no doubt whatever respecting the success which has attended the rearing of the tea plant in the Neilgherries, so far as the experiment has been made. The objection which we take to altitude (limiting the same to 2,000 feet in the Himalayas) is met in the article in question by a reference to FORTUNE'S experience in China, where, at an elevation of between 2,000 and 3,000 feet he found the black tea district. This, we will only remark, tends rather to confirm than refute the view we take in abstaining from at once endorsing the highly favourable estimate formed of the ultimate commercial success of tea plantations, formed, probably, at from two to three times the altitude quoted by FORTUNE. In conclusion, we may observe, that the writer of the remarks under comment considers that the geographical position of Ootacamund (the portion of the Neilgherries where we presume the tea plantations are) will, from being so much nearer the Equator than the tea-growing districts in the lower Himalayas, counteract the influence of altitude. This opinion may prove quite correct, but until we see results similar to those now established in Assam, we are only erring on the side of prudence if we refrain from a too speedy adoption of a theory the correctness of which time has not yet admitted of being practically proved.

The following is the article alluded to:—

"A comparison between the Neilgherries and the Himalayas, considered in reference to their tea-producing capabilities, was recently made in the columns of the *London and China Telegraph*, and a conclusion, based upon imperfect data, was arrived at, that as the attempt to grow tea in some of the higher districts of the Himalayan range had been unsuccessful, so, too, a similar result would necessarily attend the project in the Neilgherry district. The writer of the article in question states, that, "to secure growth of commercially remunerative character, the formation of plantations must not be attempted at a greater height than from one to two thousand feet; and the success of the Neilgherry experiment must necessarily depend upon the possibility of adhering to this rule." Now tea, like all other necessaries of life, such as corn, potatoes, &c., is of an extremely hardy character, and grows readily in the open air in all latitudes, from the Equator to the 45th parallel. It is capable of being cultivated both in the lowlands and in the highlands; but so far from its range being limited to a distance of 1,000 or even 2,000 feet above the level of the sea, the fact is, that the places where its cultivation is most successfully carried on are considerably above that level. Readers of Mr. Fortune's interesting travels in China must have frequently noticed how extensively the cultivation of this plant is carried on in mountainous districts. "I have ascended hills," says Mr. Fortune ("The Tea-districts of China and India," vol. i., p. 224), "near the mouth of the Min, at least 3,000 feet above the level of the sea, which were under cultivation to the summit." And again, speaking of the tea districts, the same authority states: "Among these mountains, and at a height of 2,000 and 3,000 feet above the level of the sea, I found the black tea district" (vol. i. p. 291). One more quotation from the same work, and we have done:—"The whole of the land on these hills" (Mr. Fortune is here speaking of the Bohea range) "seems to belong to the priests; the tea-shrub is cultivated everywhere, and often in the most inaccessible situations, such as on the summits and ledges of precipitous rocks" (vol. ii. p. 199). Many similar passages might be quoted in confirmation of what we have stated above, but a reference to the geographical position of Assam and Ootacamund will perhaps set the matter in a still clearer light. The properties of Assam, as a tea-producing country, both in respect to quality and quantity, are established beyond a doubt, as is shown by the position held by Assam produce in our tea sales; but Ootacamund, which is celebrated for its temperate and salubrious climate, is fourteen degrees nearer to the Equator, so that whatever difference there might be in the respective altitudes of the tea-fields, this is more than made up for by its warmer latitude. Every geographical student is aware of the fact that, although temperature is affected by altitude above the sea level, latitude is a far more important agent in producing differences of climate. The snow line, which in the northern regions of Lapland is about 3,000 feet above the level of the sea, in the Alps reaches a limit of 8,000, and in the Himalayan range is found to be between 15,000 and 18,000 feet.

Whilst on the subject of India, it may not be out of place to call attention to a matter that has always appeared to us one of considerable moment—and that is, the want of all reliable information on the subject of Indian tea-fields and tea-crops. The ordinary trade circulars issued from the Chinese free ports give all particulars as to the nature of present, and estimates of future crops, besides statistics having reference to the supplies of former years, so that a complete body of information is at once available for all purposes of inquiry, prospective as well as retrospective. The importance of such statistics, considered in their bearing on commercial dealings, cannot be over-estimated, but from India the only facts to be gleaned on the subject of the crops are found scattered up and down the journals; no merchants seem to think it worth their time or expense to issue either reports or circulars to indicate the state of the trade. Had the positions been reversed, that is, had a deficiency of the requisite information been observable amongst the Chinese, the circumstance would not have been so surprising; since, self-debarred from all European intercourse, they might be presumed to be, to some extent, unaware of the relative importance of such matters for British commerce; but in the case of our own countrymen in India, such neglect is attended with as much injury to their own interests as inconvenience to us. From a recent number of the *Neilgherry Excelsior* we learn that measures have been taken by several of the planters in that district to form an associated body under the name of "The South of India Planters' Association." The object of this society is, of course, the protection of the landed planters' interests in this quarter, and from the unanimity with which this project was welcomed, there is no doubt of its becoming a permanent establishment. As soon as the society shall have been in existence long enough to get into working order, there will be no lack of topics requiring their attention: amongst these topics we beg to suggest the present deficiency of proper trade information, as ordinarily conveyed by circulars.

BANKING IN FRANCE AND ENGLAND.

(FROM OUR PARIS CORRESPONDENT.)

SECOND NOTICE.

M. Durand, banker, said in his examination, that previous to 1848 the Bank of France kept its rate of discount within certain limits, because industry and commerce were not developed as they are now; but that if, under present circumstances, a maximum were attempted to be imposed on the Bank, the directors would be forced to have recourse to expedients such as restrictions concerning the run of bills and the refusal of certain classes of paper—expedients far more injurious to commerce than the increasing of the rate of interest. As regards the value of bank-notes, M. Durand considers the new fifty-franc note to be rather a forced step. He attributes the recent elevation of the rate of discount to "certain anonymous societies which have undertaken too many affairs at the same time."

Baron James, the head of the Paris house of Rothschild, declared that there had really been no crisis during the last few years, and the monetary difficulties caused by the want of specie would, he argued, grow less as we advanced in commercial matters. He declared not only that the increase of the rate of discount was right and even necessary, but that such a rise was highly valuable as a warning to the commercial world not to go too far and thus run out of cash. Any attempt to fix the rate of discount in advance, he declared, would be a grave error. The baron's evidence respecting the comparative merits of the Banks of England and France is interesting, and we therefore extract the following passages entire:—

"The Bank of England is perfectly well organised for the country in which it operates, but any attempt to introduce the same system into France would be to try and realise an impossibility. We are in a different condition from England. We should take great precautions respecting everything which touches credit. Ten years ago one could not travel in France with bank-notes; no one would receive or change them. New habits must have time to develop and consolidate themselves."

Digitized by Google

"The adoption of the system of a plurality of banks of issue should be regarded as an evil. France is in a very good situation. There is no country in the world in which commerce is more firmly established, where the failures are less numerous, or business better."

Again:—"If the discovery of the mines of Australia and California had not occurred, we could not have accomplished what we have of late years. This discovery has happily substituted the gold of those countries for the silver which we have sent to China and Cochin-China, and which does not come back, or at any rate comes back slowly."

Respecting the question of foreign loans and other financial operations, the baron said that France could not and should not isolate herself; and in reply to those who lament the drain of her resources by such means, he says:—

"Moreover the operations of France with foreign countries are not all carried on in cash, but to a large extent by merchandise, and, it may be added also, that in a short space of time a large portion of certain foreign securities pass into the hands of the natives of the countries to which they refer. This was proved in the cases of the loans to the late Government of the Two Sicilies and to that of Spain; in a short time five-sixths of the stock of these loans had passed into the hands of Italians and Spaniards. There would be no inconvenience in allowing foreign securities of all kinds to be quoted on the Bourse. The greater the liberty allowed to capitalists the more business is facilitated. The *agents de change* should be forced to inscribe all securities which are dealt in, without exception, in the prices current."

M. Alphonse de Rothschild was also examined, and said, amongst other things, that the complaint made against the Bank of France by some persons of lending money on public securities was unfounded, and that if this were not done commerce would suffer and well founded complaints arise. Merchants, he said, often seek this kind of loan, many holding public securities for the special purpose of obtaining capital at moments of pressure; and the Bank of France, in order to check speculation, charged a rather higher rate on these securities than on commercial paper. The Bank, he added, never refuses the latter, so that the rise in the rate of discount cannot be attributed to the loans on public securities.

Literature.

Christmas time has brought out a large number of very elegant drawing-room and children's books. Messrs. Ward, Lock, and Tyler have produced one of the most handsome volumes—*Dalziel's Illustrated Arabian Nights*. This magnificent book contains no less than 200 illustrations, and the subjects cover some 800 pages. This edition gives a fresh zest to these well-known fables. The same firm also give us *A Book of Modern Ballads*, prettily illustrated, and including "The Village Blacksmith," "Rupert's March," "The Inchcape Rock," "The Vicar," &c.—Messrs. Jackson, Walford, and Hodder publish *Old Merry's Annual*, with a very suitable address to young people. The stories are well chosen, instructive, and amusing, and the volume, handsomely bound, runs to over 500 pages.—Mr. S. W. Partridge's best production is *Our Children's Pets*, including stories appealing to the minds of the young on behalf of birds, beasts, and fish.—Messrs. Sampson Low and Co. have utilised Dr. Watts's well-known hymns, by applying them to special cases for the benefit of children, accompanied with illustrations.—Messrs. Johnstone, Hunter, and Co., of Edinburgh, have added to the enjoyment of youth by a very neat and inexpensive volume, detailing the troubles and joys of a boy, entitled *Little Harry's Troubles*.

In works of a more standard character, intended for the library, we must notice the first volume of Sir James Fergusson's *History of Architecture*, to be completed in three volumes, which is no doubt destined to become the text-book on the subject it treats of. Mr. Charles Winsor has brought out a beautiful volume on a kindred subject, in his *Memoirs Illustrative of the Art of Glass Painting*, illustrated with engravings from the author's original drawings by Philip H. Delamotte. In History and Biography Mrs. Charles Tennant gives to the world her grandfather's (Sir George Collier's) notes on life in France on the eve of the Great Revolution; which, with Mr. Charles Knight's *Shadows of the Old Booksellers*; Mr. Carter's *Historical Record of the Forty-Fourth Regiment of Foot*; Major General Sir Thos. Seaton's narrative of a life of active service *from Cadet to Colonel*; and a similar narrative of military adventure, chiefly in Spain, Portugal, and India, entitled *The Soldier of Three Queens*, by R. Henderson—will leave the reader well contented with his supply of this class of literature for some time. Of books of mere amusement, just to while away a vacant half-hour, Barnum's *Humbugs of the World* will probably be the first picked out; but the stories are old and trivial, and possibly of all the author's tricks on the public the present book may be set down as the most deceptive humbug of the lot.—*Macmillan's Magazine* for December closes the series for the year in first rate style, and 1866 begins with the first portion of a new tale by the Hon. Mrs. Norton, called "Old Sir Douglas," which is a very first-class thing.

Memorials of Service in India, from the Correspondence of the late Major Samuel Charters Macpherson, C.B. Edited by his brother, WILLIAM MACPHERSON. John Murray, Albemarle-street.—The man whose official life is here recorded was distinguished for his civil and not for his military career; and in that capacity he will go down to fame as one of those few who have had it in their power to effect a moral and religious revolution which entitles their names to rank high in the list of benefactors to the human race. To Major Macpherson belongs the renown of having been the chief instrument in putting an end to human sacrifices among the Khonds—in extinguishing an immolation of our fellow-beings not perpetrated by the deaths of single victims, but sometimes by the slaughter of hecatombs at once. The narrative of how this was done is laid before us principally in extracts from the Major's own most interesting letters; and we see that, in the words of the editor, "it was effected not by accident, nor by knack, nor by hysterical humanity rushing in and seizing one victim, to be saved at the expense of another: 'Who overcomes by force hath overcome but half his foe.' The result was obtained by making the abolition a Khond movement; by sapping the religious conviction of the necessity of human sacrifice, and showing that all the material interests of the tribes, and those which had most weight with the best men, would be promoted by abolition." Nor, admirable as was the result already mentioned, was it the only triumph for humanity, in the widest sense of that word, achieved by Major Macpherson. The Khonds were divided in their ceremonial ritual by a remarkable distinction. One portion worshipped the God of Light, and abjured the practice of human sacrifice, but were guilty of female infanticide to an extent horrible to hear of; while the other portion rejoiced to offer up human victims, but did not adopt the other sanguinary custom. Having been successful in dealing with one iniquity, the Major attacked the other, and had the happiness to report in 1844 that "above 170 female infants had certainly been saved in the period of two years, through our influence." It is a curious fact, too, that he made use of the girls saved from sacrifice to effect the abolition of infanticide, by constituting them wards of Government, and giving them in marriage to the chiefs and men of influence in the infanticidal districts. He writes—"Our justice, producing order everywhere, and the influence derived from the invaluable device of wiving the chief men with the honoured daughters of the State—our rescued victim-girls—have given us complete mastery over these tribes, considered the most intractable division of the Khond population in this quarter." The Government, however, which had never supported him in the suppression of human sacrifice, though glad enough to take the credit of a success won in spite of their apathy, stepped in and ruined all that had been done. In the old spirit, a certain district he wished to have added to his jurisdiction so as to strengthen his hands in the task of saving infant life, was withheld from him. The consequence was, he tells us—"The people believe it will not be given; do not at all understand a 'to be, or not to be' authority; and have to a great extent broken loose from me, and taken to infanticide again." The last great service Major Macpherson performed prior to his death was as Political Agent at the Court of Scindia, during the great rebellion, when, assisted by that potentate's Prime Minister, he managed to retain him faithful to the British cause, though sorely tempted, and at times hard pressed by his mutinous contingent. We could wish that the extracts from the Major's letters of this period had been more abundant. One pithy sentence is worth reproducing at the present moment, when we have a "nigger" insurrection in another quarter to debate upon. He writes from Agra:—"India, ruled *here* by bayonet power, and *there* [at home] by platform and hustings power, will be a wretched work to have a hand in." We are sorry to say that a good deal of the volume is taken up in bickering with Major-General John Campbell, C.B., whose estimate of Major Macpherson's services differs from that entertained by his brother. Sorry, we repeat, that there should be any necessity for recriminations on such a subject as the benefits conferred by Major Macpherson on the Khond tribes, and on the value of his exertions in accomplishing them. The reader will, however, find his sympathies so entirely enlisted by the delightful straight-forward letters of the latter that he will be very much inclined to pay but cursory attention to all that refers to the Major-General. The book has sketch-maps which enable one thoroughly to follow the narrative, some very pleas-

Digitized by Google

ing wood-cut illustrations, and a capital portrait of its hero, and altogether is sure to find favour with every class, whether mere seekers for amusement, or thoughtful students of an immense change, speedily effected, in the religion and customs of a numerous race of the governed solely by the interference of the governors, without missionary intervention. Such an incident, happening in our own days, and by our own instrumentality, is not without a lesson as to those wholesale national conversions that we read of in the annals of the days of old.

The publication of the *Chinese and Japanese Repository*, lately conducted by Mr. Summers, has been given up. We understand that Mr. Summers is now engaged in publishing a paper in Chinese for English houses to advertise in that language.

Naval and Military.

SPEAKING of the sad fatality of the garrison at Hong Kong, the *Army and Navy Gazette* declares that no Government has a right to expose men's lives to such awful danger—worse tenfold than that of a battle. The remedy is a change of cantonment to a more healthy site, and the employment of native regiments to do the night work, guard-mounting, and similar duty during the hot weather. Sir Richard MacDonnell, who is on his way to the seat of his new government, is a man of energy and humanity, and will doubtless recommend such measures as may tend to diminish the dreadful mortality to which our poor fellows and their families have been subjected.

We have to record the death of Lieut.-Col. Alexander Murray, commanding the 8th (Royal Irish Fusileers) Regiment, quartered at Portsmouth, on the 24th inst., after a short illness. Col. Murray served in the 18th on the China Expedition (medal), and was present at Canton, Amoy, Chusan, Chinhae, Ningpo, Segoan, Chapoo (wounded), Shanghai Woosung, and Chin-Kiang-Foo. The deceased officer will be buried at Portsmouth, and the funeral, it is anticipated, will be conducted with military honours.

The Racoon, 22, screw steam corvette, under the temporary command of Commander H. M. Miller, arrived at Madeira on the 13th November, having left Portland on the 1st. On the 9th, after a few hours' lull, she met with a stormy adverse gale from the S. W., evidently a revolving storm. It tried the ship very much for eight or ten hours, and then passed over. She found the Basilisk at Madeira, from Plymouth *en route* to China via Teneriffe, Ascension, and the Cape. The Basilisk was in the same gale, and was making good defects. She was to sail on the 20th November. The Racoon reached Gibraltar on the 25th, where Count Gleichen and H.R.H. Prince Alfred were awaiting her.

The following flag promotions, dated the 2nd instant, have been made in consequence of the removal of the name of Admiral Henry Smith, C.B., from the Active to the Reserved Flag List, on his being granted a Service Pension:—Vice-Admiral Sir Stephen Lushington, K.C.B., on the Reserved List, to be Admiral on the same list. Vice-Admiral John Alexander Duntze to be Admiral in Her Majesty's Fleet. Rear-Admirals: Francis Decimus Hastings, George Hathorn, on the Reserved List, to be Vice-Admirals on the same list. Rear-Admiral Sir Lewis Tobias Jones, K.C.B., to be Vice-Admiral in Her Majesty's Fleet. Captains: James Crawford Caffin, C.B., and Robert Tryon, to be Rear-Admirals on the Reserved List. Captain Thomas Harvey to be Rear-Admiral in Her Majesty's Fleet. Retired Rear-Admiral Wm. Shepheard to be Retired Vice-Admiral. Retired Captains: William Clark, Thomas Lewis Gooch, George Anthony Halsted, Robert Sharpe, to be Retired Rear-Admirals, under the provisions of Her Majesty's Order in Council of 1851.

ROYAL MARINES.—Major-General John Tatton Brown to be Lieutenant-General, vice Philips, deceased; November 28, Colonel-Commandant Henry Carr Tate to be Major-General, vice Brown; November 28. Royal Marine Artillery.—Colonel Second Commandant George Gardiner Alexander, C.B., to be Colonel-Commandant, vice Tate; November 28. Lieutenant-Colonel George Augustus Schomberg to be Colonel Second Commandant, vice Alexander; November 28. Captain Henry Adair to be Lieutenant-Colonel, vice Schomberg; November 28. First Lieutenant Henry Brasnell Tuson, to be Captain, vice Adair; November 28.

Lieutenant-Colonel J. M. Grant, of the Royal Engineers, succeeds Major Ewart, of the same corps, as Assistant-Quartermaster-General at the Horse Guards. Major Ewart is to be a member of the Commission which is to proceed to Algeria to inquire into the sanitary condition of the French army. Captain J. S. Swann, 2nd battalion 22nd Regiment, and Brigade-Major at Malta, has been appointed Deputy-Assistant Quartermaster-General at Cork, Lieutenant Colonel Lane Fox, late Assistant-Quartermaster General, having rejoined his regiment, the Grenadier Guards.

Another addition has been made to the English iron-clad squadron by the floating out of dock of the *Royal Alfred*, a line-of-battle ship razed to her lower deck, and converted into an iron-clad frigate, piereed for 35 guns. The work has been completed in Portsmouth Dockyard, and there can be no question that, so far at least as outward appearances indicate, she does credit to the establishment. The *Royal Alfred* has been subjected to several alterations from the original designs, and we believe that it has not yet been determined exactly what her armament shall be; this question being dependent upon the result of experiments not yet completed. Her dimensions are as follows:—Extreme length, 273 feet; length of keel for tonnage, 232 feet 8½ inches; extreme breadth, 58 feet 7 inches; breadth for tonnage, 57 feet 4 inches; breadth moulded 56 feet 6 inches; depth in hold, 19 feet 10 inches; burthen in tons (o.m.), 4,067 59-94 tons. The event did not excite more than ordinary interest.

The following changes have taken place in the corps of Royal Engineers at Woolwich:—Lieutenant-Colonel and Brevet-Colonel Ord, from leave, appointed Governor of Bermuda; Lieutenants R. N. Buckle, at Gibraltar, ordered to China; A. G. Begbie, at Pembroke, ordered to the Mauritius.

CHAMBERS OF COMMERCE—THEIR RIGHTS.

(THE TIMES.)

A strong natural instinct prompts those who are acting in the same pursuit or for the same purpose to carry their co-operation beyond its original object. A natural instinct also induces them to make to themselves some sort of government, and to seek to gain strength by acting in some respects in their collective instead of in their individual capacity. We presume that the existence of Chambers of Commerce is due to some such instinct as that we have been describing—an instinct so far to be respected as it springs from that social element in human nature which distinguishes it most completely from the lower animals; but we have never been able yet exactly to learn what a Chamber of Commerce is, what is its constitution, what functions it exercises, what right it has to represent the trade and commerce of any particular district, and whence it derives whatever power it may possess. Chambers of Commerce are not, we believe, generally elective bodies, nor would it be very easy to create a suitable constituency for such an assembly. They have, as far as we are aware, no legal functions of any kind, and we believe it is not the habit of the mercantile public to call in their aid very extensively as arbiters of private disputes. They seem to be little more than voluntary meetings of gentlemen carrying on business in the same place, and therefore believed to be the depositaries of some amount of knowledge with respect to its business, and to be able to give a fair account of the opinions entertained there. Regarded from this point of view, there is no possible harm in a Chamber of Commerce, and there may sometimes be considerable advantage. But we confess that such experience as the public have had of these bodies has not tended to give any very lofty idea of their usefulness and efficiency. We live in an age when a great advance has been made in the theory as well as the practice of commerce, and when something, though by no means all that can be wished, has been effected towards the simplification of our law. We have failed to trace these improvements to the action of Chambers of Commerce; nay, we have not unfrequently found them enlisted on the side of prejudice and exclusiveness. We know not whether it may be from a fault in their constitution, or in the elements of which they are composed, but it has certainly always appeared to us that the public has not received from them the benefit upon which it might seem it had a right to count.

When, therefore, we found that Lord Stanley was to be entertained at dinner by the Liverpool Chamber of Commerce, we felt a natural anxiety to know what a man who never speaks on a subject of which he has not made himself wholly master would have to say of the achievements of these bodies, and what topics he would use in order suitably to acknowledge the compliment he was receiving. The Chairman, Mr. Rathbone, not very happily, we think, mentioned two subjects as requiring amendment—the present state of our railways, and the amount of pauperism that exists among us. Now, this is just a specimen of the point of view from which Chambers of Commerce are apt to consider national questions. They never seem to reflect how much evil there is in the world which is entirely without the province of legislation. It is hardly too much to say that Government can check very little evil except that which it has itself in the first instance created. If Government has interfered too far with the discretion of individuals, as in the instance of protective duties, Government can certainly do great good by retracing its faulty steps. But what can Government do in a case like pauperism which is not the result of any mistake on its own part, but of the inherent improvidence and folly of mankind? As long as people choose to marry without having the means of supporting a family, as long as they choose to expend their money to the enormous extent to which our revenue returns show it is expended in stimulants, how can Government prevent the natural consequence of improvidence and vice which manifests itself in the form of pauperism? Lord Stanley rejoices in the union of all classes in this country, and the explosion of that theory which represented trade, manufactures, and agriculture as having interests opposed to each other. So far he was on safe ground, but his position became a little more difficult when he came to propose the health of the Liverpool Chamber of Commerce. It is not in the nature of Lord Stanley to content himself with vague generalities. When he makes a statement he will at least endeavour to prove it, and his indefatigable industry may be fully relied on to collect all the facts which bear on the subject. Lord Stanley states that Chambers of Commerce have only lately been introduced into England—the Chamber of Commerce at Liverpool itself, it seems, is only 15 years old; that they are only about 48 in number, and that of these only a few have occupied a prominent position. He expresses a hope that the Liverpool Chamber of Commerce may be more actively supported than hitherto, and states the obtaining of such support as a principal object of the meeting. All this is something like an admission that hitherto our estimate of the utility of Chambers of Commerce has been a pretty correct one. Everyone must join with Lord Stanley in the hope that they may be made more useful for the future. What, he asks, are Chambers of Commerce intended to do? His answer is—to serve as authoritative exponents of commercial opinion. Their discussions serve to form local opinion. They can do many things which everybody in trade wants done, but which nobody likes to do in his individual capacity. Thus, Lord Stanley tells us that Chambers of Commerce have made complaints of railway management before the Commission now sitting in London—complaints which it might be invidious for any individual to make. He approves their forming in London every year a sort of Parliament of their own, and suggests their inviting the co-operation of similar bodies on the Continent. He notices the suggestion of the institution of Tribunals of Commerce, but declines to give an opinion how far Chambers of Commerce are adapted for the performance of that function, or how far such tribunals ought to be created.

Now, if Chambers of Commerce are to be authoritative exponents of local commercial opinion, it is quite necessary in the first instance that they should have some organisation which clothes them with that authority. The meeting together of a few gentlemen of old standing in trade or of great wealth does not invest them with the right to speak authoritatively in behalf of the trade of the place at which their business is carried on. If it is desirable to have such an exponent, it is desirable to adopt the machinery by which that exponent can alone be created, and that

Digitized by Google

machinery must be either popular election or selection by some one quite impartial, and yet possessing the means of information necessary to enable him to make a good choice. The advocacy of the commercial interests of a town seems to devolve, as far as public measures are concerned, on its representatives in Parliament, and, as far as local business affects them, on its municipal corporation. We fail to see the exact place which is left for such a body as a Chamber of Commerce. If Liverpool is ill-treated by the railways, for instance, in any matter over which Government has any control, she has her members to represent her case in the proper quarter, and her Town Council to remonstrate with the company and petition the Legislature. When this is done we fail to see what is left for the Chamber of Commerce. Lord Stanley does not claim for Chambers of Commerce that they are in a peculiar degree the depositaries of any local or general knowledge, and he has done wisely, for such a claim it would be found very difficult to substantiate by facts. It is certainly open to him to applaud the annual meeting of Chambers of Commerce in London, but those who took the trouble to read their debates could not, we think, fail to be struck with the very slight amount of information which was to be gleaned from them on the subjects which they discussed themselves, and in support of which they appeared before ministers. Lord Stanley does wisely to pause before recommending that these bodies should be intrusted with judicial functions. Their constitution must obviously be entirely altered before this could be done. We could not force men to carry their disputes for adjudication before a body fixed by no definite constitution, got together nobody knows how, and more capable, therefore, of being packed than any other that can be conceived. In order to make Chambers of Commerce judicial tribunals it would be necessary utterly to destroy their present nature. As optional tribunals, as arbitrators in commercial disputes, we certainly should have expected that they would be much resorted to and be of great service. But this, we apprehend, is not the case, and the cry for Tribunals of Commerce, inconsiderate as it seems to us to be, is still a proof that the existing bodies do not enjoy the confidence of the communities among which they have sprung up.

We are far from saying that it is not possible that there may at some time arise among us a sound and sensible commercial opinion different from the opinions of lawyers and from the opinions of statesmen—the two classes whose convictions have hitherto moulded our commercial laws. At present the popular view is to leave commerce alone, but this, like other general principles, may possibly be found to require exceptions in practice. When it shall become important to the commercial class that such an opinion should find expression in a duly organised body, we do not doubt that that body will be called into existence; but till then we must confess that we see little hope of any important benefit to be realised by the community from the establishment of Chambers of Commerce, which seem to have become naturalised in England rather from an imitation of foreign countries than to satisfy any clearly felt and generally expressed want. The first step to improvement is the consciousness of our defects, and nothing would be more fatal to the attainment of a really efficient representation of the commercial classes than their contentment with such representation as they have at present.

ROYAL ASIATIC SOCIETY.—At the last meeting of this society a large number of Indo-Chinese alphabets, both ancient and modern, collected by Dr. A. Bastian during his sojourn in Burmah, Siam, Kambodja, and other parts of Transgengetic India, was laid upon the table. In the paper eludicating the same, Dr. Bastian divided the languages of the Indo-Chinese nations into five main branches, viz. 1, *The Thai*, comprising the language of the different tribes called Shans by the Burmese, and Laos by the Siamese, and that of the Siamese themselves, who are only a subdivision of the Laos; 2, *The Myamma*, represented by the Burmese and Arracanese, which idioms are akin to those of the Singpho, the Kachars, the Manissurians and many other tribes that inhabit the countries extending to Bengal and North-Western India; 3, *The Tunquinese* and *Cochin Chinese*, including the rude dialects of the various mountain tribes designated by the general name of Kha in Siamese and of Prom in Kambodjan; 4, The language of *the Mons* or *Talains* who line the coast opposite to Kalinga or Telingana; and 5, that of *the Kambodjans*, also called Khem or Khmer. With the sole exception of the Cochin-Chinese or Annamites, who have conformed to the Chinese system of writing, the Indo-Chinese nations make use of alphabets received from India, which they have adapted to their several monosyllabic tongues, combining with them the tones or accents which, as in Chinese, gain prominence in the same proportion as vocalic quantity becomes indistinct. Most of these alphabets follow the same arrangement as the Devanagari, and bear a close family likeness to those of Southern India, especially the Singalhese. The Cambodjans claim for their alphabet great antiquity, and aspire, as do also the Arracanese, to the honour of having received it by direct importation from Ceylon through the famous Bhuddist apostle Bhuddaghosa (A.D. 420). Even at the present day the characters in use for writing the religious books in Siam and Laos are known by the name of *Nongsu Khom*, as having been introduced by the earliest missionaries who issued from the convents of Cambodja. A curious palæographical fact mentioned by Dr. Bastian is, that in the oldest Siamese stone inscription, that of Sukkhothay, all the vowels are written in a line with the consonants, instead of, at least some of them, being placed above or below them. The writer then entered into details concerning the nature and development of the Siamese tones, and the laws by which they are regulated, and he further explained the various methods of occult writing, by cipher or otherwise, in use among the Burmese and Siamese. In conclusion, he adverted to the important historical results which are likely to be obtained from a deciphering of the ancient inscriptions. The number of alphabets exhibited in addition to many fac-similes of inscriptions, &c., was twenty-five.

PRESENTATION TO CAPTAIN ENGLEDUE.—A beautiful silver dinner service, manufactured by Messrs. Emanuel and Sons, for presentation to Captain Engledue (late superintendent of the P. and O. Company), the result of a subscription of 400 guineas amongst the gentry and merchants of Southampton, in order to pay a lasting mark of respect to that gentleman on his leaving the town, was last week presented to him at his town residence by a deputation of the committee, who proceeded to London for that purpose. The deputation consisted of the Mayor, Mr. Deacon, town clerk, Dr. Bullar, Mr. G. N. Cooksey, and several other members of the committee, who were most hospitably entertained after the presentation. The plate consisted of a full dinner service for twenty persons, and on the soup tureen was engraved the following inscription, and the captain's crest, &c., and on every other article:—"This tureen, with a service of plate, was presented to J. R. Engledue, Esq., J.P., by the town of Southampton, in testimony of his valuable services to the port, and of the high esteem and respect entertained for him by all classes of the inhabitants. 1865." Peter Rolt, Esq., M.P., Captain Peacock, and other friends of the captain, were present, and joined the Southampton party at dinner.

OFFICIAL GOSSIP.—The *Observer* states:—Earl Cowley is to have the vacant Garter. The Hon. Julian Fane, now Secretary at Vienna, will succeed the Hon. W. Grey as Secretary of Embassy at Paris. Mr. George Brackenbury, Her Majesty's Consul at Manila, is appointed to the Consulate at Lisbon. Mr. Pennell, of the Colonial-office, is appointed to act as private secretary to Mr. Forster, Under-Secretary of State.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Oriental Bank Corporation, Threadneedle-street, C. J. F. Stuart, chief manager.

*** Companies omitted in the above list will be included if the particulars are forwarded.

Monetary and Commercial.

The biddings for 35,00,000 rupees in bills on India were allotted—To Calcutta, 22,58,000 rs.; to Madras, 2,42,000 rs.; and to Bombay, 10,00,000 rs. The minimum price was as before, viz., 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11½d. will receive about 62 per cent., and on Bombay at 2s. 0¼d. about 13 per cent.—above these prices in full. These results show little change as compared with the last biddings.

The half-yearly meeting of the Ceylon Company was held on the 19th instant, at the company's offices, 7, East India-avenue, Leadenhall-street, Mr. L. Acland in the chair. The following report was presented:—"The directors have the pleasure of informing the shareholders that profits resulting from the operations of the company during the half-year ended the 30th September are estimated at £13,551. 10s. 7d., which being

Digitized by Google

added to £3,905. 11s. 8d. brought forward from the last accounts, produces the sum of £17,457. 2s. 3d., out of which the directors recommend that an interim dividend at the rate of 10 per cent. per annum and a bonus of 2½ per cent. on the capital represented by the old shares, amounting together to 10s. 6d. per share, be declared and made payable, free from income-tax, on the 21st instant. This will absorb £13,125, and leave £4,332. 2s. 3d. to be carried forward." Mr. Acland observed that this dividend was at the rate of 15 per cent. per annum, which he hoped would be a satisfactory indication of the prosperity of the company. The valuable estates to which he had referred at the last meeting had since been purchased, and had been transferred to the company. He believed that those estates included some of the finest in Ceylon, and from what the directors heard of them they would no doubt prove a very profitable investment. In consequence of those purchases, it was proposed to call up £2 of the £3 yet outstanding on the old shares. The remaining pound per share might possibly be called for in July; certainly it would not be required before then. It might also be determined to make a call for £3 upon the new shares, but nothing on that subject had yet been decided upon. A formal resolution, declaring an *ad interim* dividend as recommended was then agreed to, and a vote of thanks to the chairman and directors concluded the business of the day.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton on the 20th inst., was in gold, to Alexandria, £52,000; to Madras, £1,071. In silver, to Hong Kong, £28,000; to Foo-chow-foo, £500; to Shanghai, £25,000; to Sydney, £1,000. Total, in gold, £53,071, in silver, £54,500.

ARTICLES OF IMPORT.

TEA.—We have had a fair amount of business transacted during the past fortnight. The arrivals of new teas have been to a fair extent, and the samples freely offered, and as importers have shown a disposition to make some concession in prices, a large proportion of the teas have been sold at a decline of 1d. per lb. on fine to finest, and 2d. to 3d. per lb. on the second-class fine, which until this time had commanded exceptionally high prices, quite out of proportion to the finer qualities. Old teas have continued quiet, and at the public sales this week some parcels were realised at a decline of ½d. to 1d. per lb. on previous current rates. Broken leaf and dusty kind of Congou continue in limited supply, and prices consequently have been firmly maintained. Fair to good common show no change, the quotation remaining 1s. 1d. to 1s. 1½d. per lb. Fair to good flavory kinds of old import have sold ½d. per lb. lower. Those of new import have been taken at a decline of about 3d. per lb. from the highest point of the market. Fine to finest, although less readily saleable, show a smaller reduction, owing to the firmness of importers. Common to fair blackish-leaf of old import have been sold without reserve ½d. to 1d. per lb. lower. in medium kinds but little has been done. In new import large sales have been made at a decline of about 3d. per lb. on good qualities, and 1d. to 2d. on fine; the finest chops, from their scarcity, are very firmly held, but at present are difficult of sale at former prices. Further supplies of new-make Congou from Canton have realised 1d. to 1½d. per lb. advance for the medium qualities. Oolongs have been readily taken at former prices. Fine Souchongs have been sold at very high rates, as much as 3s. 4d. per lb. having been paid for one chop; fair to good show no alteration. In Flowery Pekoes there is no new feature; a few of new season have been sold at full prices. Scented Teas have been sold at rather lower prices, both for Canton and Foo-chow kinds, especially those ranging over 2s. per lb., the commoner kinds being comparatively firm. Uncoloured Japans remain without inquiry. In Green Teas there has been a fair amount of business, the quantity now offering being moderate, the Trade having taken such kind as they require at fully previous prices; the commoner kinds are, however, neglected, and for these prices are somewhat nominal. Colored Japans remain much as before. Canton-made kinds have been quiet, but prices are unchanged. Messrs. Sillar and Bateman estimate the supply and demand as follows:—

SUPPLY.	
Vessels due by 31st January	lbs. 26,665,125
Do. 28th February .. .. } Including shipments advised by telegraph, Nov. 15 }	20,430,358
Total supply	lbs. 47,095,483
DEMAND.	
Six Weeks' Deliveries	18,000,000
Four Weeks' Deliveries	12,000,000
Total demand	lbs. 30,000,000

SILK.—We have had no alteration in the silk market since last mail; business has remained exceedingly quiet, and we cannot point to a single transaction of importance either in China or Japan silk. Prices on the whole have been well maintained, though occasional small parcels are offered in second hands at some reduction. As the accounts from the Continent are good, it is generally thought that we shall have a renewal of activity after the turn of the year. Deliveries from the 1st to the 22nd, inclusive—China, 2,121 bales; Japan, 675 do.: total, 2,796 bales. The quotations are—Tsatlee, No. 1, 32s. 6d. to 33s.; No. 2, 31s. 6d. to 32s.; No. 3, 30s. 6d. to 31s. Mibash and Sinchew, No. 1, 34s. 6d. to 36s.; No. 2, 33s. 6d. to 34s. 6d.: No. 3, 32s. 6d. to 33s. 6d.; No. 4, and inferior, 30s. to 31s. 6d.

COTTON.—The London market was quiet in tone throughout the business week ending the 22nd. Very firm prices prevailed, more especially for floating parcels. 1,060 bales of Tinnivelly sold at 16½d. to 18d. for mid fair to good fair. No sales of China or Japan. 1,000 bales Tinnivelly sold to arrive at 16⅝d. to 17½d., November to August, guaranteed good fair. The total stock in London on the 21st was 99,677 bales, against 115,704 last year. There is no China and Japan afloat to Europe, but there are 24,462 bales of Ceylon and Tuticorin, against 23,794 on the 21st December, 1864. The Jeddo and Evelyn Wood arrived in London from Tuticorin during the week, the former with 1,792 and the latter with 1,425 bales. The total stock of cotton in Liverpool on the 22nd December was 352,750 bales, against 466,160 bales at same date last year. The quantity of East India offering in that market has been rather limited, especially in the good qualities, which become every day scarcer; there is, however, only a very partial advance in price, while the lower grades barely support previous quotations. China and Japan are in fair demand at rather higher rates. The following are the official quotations for American:—Fair Orleans, 23d.; ditto, middling, 21½d.; fair Mobile, 22¾d.; ditto, middling, 21d.; fair Upland, 22½d.; ditto, middling, 21d.

SUGAR.—The total transactions effected have been of greater importance than for several weeks past, but the demand was freely met by holders. A former tone, however, prevailed at the close, and in some instances prices were rather higher than on the 15th. 300 bags Penang went at 33s. 6d. to 34s.; 6,800 bags Clayed Manila realised 34s. to 34s. 3d.; and privately, on the 22nd, 100 tons Clayed Manila went at 34s.

RUM.—A small quantity of Penang has been sold at 1s. 6d., which is rather dearer.

COFFEE.—The demand for colonial sorts is only moderately active, but prices remain without noticeable alteration. 950 casks 1,900 barrels and bags Plantation Ceylon, at public sale, went off with but little spirit at about the former value—fine ordinary to low middling, 76s. to 82s.; middling to good middling, 83s. to 85s. 6d. 90 casks 1,030 bags Native were mostly sold—good ordinary, 69s. to 70s.; superior, 72s. to 72s. 6d.

RICE.—At auction, on the 22nd, 1,364 bags White Bengal were all sold at and afterwards at rather stiffer prices—low middling at 13s. 9d. to 13s. 10½d. 682 bags Ballam were withdrawn above the value.

CARDAMOMS.—Had sold with irregularity, and on the average at lower prices; of 132 cases Malabar at auction, one-half sold at 4s. 7d. to 6s. 1d. per lb. for middling to good, and 3s. 6d. to 4s. 1d. inferior dark; and of 116 bags Madras, one-fourth sold at 4s. to 5s. 6d. for fair to fine Aleppy.

CAMPHOR.—Prices have further risen, considerable transactions on the spot and for arrival, accompanying the advance; and the market remains very firm.

CASSIA LIGNEA.—Rates have further given way 2s. to 3s., and of 4,349 boxes brought to auction one-third sold at 89s. to 97s. per cwt. for 3rd to 1st pile. Buds: Nothing of any moment doing.

CINNAMON (CEYLON).—We quote 1st sort, 2s. 2d. to 3s. per lb.; 2nd sort, 1s. 11d. to 2s. 10d.; 3rd sort, 1s. 10d. to 2s. 6d.; and 4th and Jungle, 1s. 5d. to 1s. 10d. Quiet; and of 220 bales at auction, half sold at about the previous rates.

COCOA-NUT OIL.—This market remains in much the same state as when we last wrote; quotations are nominally unchanged, but there is scarcely any demand at them, and the business doing is very restricted. 106 casks Cochin, and 96 casks Ceylon at auction, all retired.

DRUGS.—Cubebs, Dragon's Blood, Galangal Root: Nothing doing of any interest in any of these drugs. Rhubarb: Recent importations, 35 chests, at auction, partly sold at 6s. 7d. at 6s. 8d. per lb. for middling flat, and 5s. 10d. to 6s. 1d. round; of 25 chests old import, one-third sold at 8s. 5d. for fair flat.

GUMS.—Benjamin: Quiet; 50 cases Sumatra at auction retired. Damar: Steady; 91 cases at auction sold at 52s. 6d. per cwt. for fair. Gamboge: Scarce, and very firm, but without transactions.

GUTTA PERCHA.—Remains quiet; only 3 tons at auction retired.

HEMP (MANILA).—Market very firm, at £42 to £45 per ton; higher prices demanded, and business checked thereby.

HORNS (Buffalo) continue firm, and 22 tons Madras and 3 tons Siam at auction sold at 46s. to 46s. 6d. per cwt. for 4 lb. average, and 37s. to 38s. for 2¼ lb. average.

INDIA RUBBER.—Sales to a fair extent have been made of Java at 1s. 10d. per lb., and the market is very firm; 21 baskets middling Singapore sold at auction at 1s. 8½d. per lb.

JAPAN WAX.—Firm, but quiet; 50 boxes at auction all retired.

OILS.—Anniseed has been the subject of considerable speculation; numerous sales made, attended with constantly advancing prices, the latest rates being 8s. 4d. per lb. on the spot, and 8s. 8d. for arrival. Cajaputa: Nothing doing; twelve cases at auction retired. Cassia: Flat, and very little business doing; only five cases at auction, and those retired. Cinnamon, Mace, and Nutmegs: Nothing doing in either of these oils; two cases nutmeg paste sold at auction at ⅜d. per oz.

SAGO.—Quiet: of 549 boxes at auction, one-third sold at 22s. 6d. per cwt. for good small. Flour: Dearer: large business done privately up to 15s. 6d. per cwt. for fine: no auctions.

TAPIOCA.—132 bags middling Penang went at 3½d. per lb.

SPICES.—Cloves: Penang not in present demand, and 22 cases at auction were all retired; Zanzibar firm, and of 2,843 bags offered, two-thirds sold at 3d. to 3⅛d. per lb. for ordinary to fair. Mace: Quiet; nothing of any moment doing. Nutmegs: Good and fine qualities rather dearer; small, the turn cheaper; 65 cases Penang sold at auction at 2s. 9d. to 4s. 2d. per lb. for middling to fine bold, and 1s. to 2s. 1d. for ordinary small to fine medium.

PEPPER.—Black: Firm, but business not large; 2,460 bags Penang at auction, mostly sold at 3¼d. per lb. White: Is again ¼d. per lb. dearer, and 253 bags Penang and 154 bags Singapore sold at auction at 5⅜d. to 6⅛d. for middling to very good.

TERRA JAPONICA.—Cutch, Pegue: Good quality again rather dearer: of 863 bags at auction, three-fourths sold at 30s. to 30s. 6d. per cwt. for fine Pegue. Gambier: Has become much more quiet, with reduced business, and a slight yielding in value. 882 bales at auction, all retired.

Digitized by Google

TIN.—This market has lost much of its animation; limited business has been done in Straits at £96. 10s. cash, up to £98 with full prompt; but to effect sales now, 10s. per ton reduction would have to be submitted to.

MISCELLANEOUS.—Blacklead: Remains quiet, but 1,155 barrels at auction mostly sold at 15s. 6d. to 17s. per cwt. for fair to good lump; 13s. chips, and 9s. 9d. to 10s. 3d. dust, being rather cheaper. Galls: All descriptions flat, with little trade. We quote China 65s. to 70s. per cwt., and Japan 60s. to 65s. Ebony Wood: Firm; 27 tons Ceylon sold at auction at £7. 10s. to £10. 7s. 6d. per cwt. Musk: Rather cheaper; and of 38 caddies Tonquin at auction half sold at 35s. to 35s. 6d. per oz. for fine selected, 14s. to 15s. inferior, and 10s. pickings. 19 caddies of Cabardine retired. Of 16 tins grain one-fourth sold at 20s. for inferior. Fair sales made privately. Rattans: Cheaper; 2,577 bundles Singapore sold at auction at 2s. 10d. to 3s. 6d. per 100. Sapanwood: No auctions; small sales effected privately upon previous terms. Soy: Quiet; 50 casks at auction retired. Star Anniseeds: Remain very scarce; nothing doing. Sticklac (Siam); Quiet, and no business doing. Tortoise-shell: Of 7 cases Sydney at auction, four sold at 11s. to 14s. per lb., and 4 cases Penang sold at 11s. 6d. to 12s., being the previous value. Vermilion: Very scarce, and dear; 10 boxes at auction retired at 4s. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15. 10s. to £16. 10s.

COPPER.—Sheet and Sheathing, £111 per ton; yellow metal, 9¼d. to 10d. per lb.

TIN.—£102 for block; £103 for common bars. Tin plates, best charcoal, I.C. 32s. to 33s.

LEAD, &c.—English pig, W.B., £22. 5s. to £22s. 10s.; shot, patent, £24. 5s.; sheet, £22. 5s.; spelter, £22. 10s. to £23; zinc, English sheet, £27. 10s. to £28; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—In Iron, excepting an advance in Pig Iron warrants, there is no change to notice. Copper: The price continues to improve, and a large quantity has changed hands at higher rates; at our quotations the market is very firm. Tin maintains its price, 97s. is reported to have been paid for fine Straits, but some parcels are still to be bought at 96s. 6s. Lead is in active demand, and the quotation is from 5s. to 10s. per ton higher than a week since. £21 has been paid for soft Spanish. Spelter without alteration.

EXPORT OF BULLION TO CHINA, &c.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states o the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

Soda, Potash, Seltzer, Carrara, Litbia, Magnesia, and Tonic Waters, &c.

Lemonade, Ginger Beer, Orangeade, Gingerade, Nectar, and Champagne Cider.

It was on the success of the SODA WATER MACHINE supplied to the 7th Dragoon Guards that Sir Hugh Rose based his recommendation that these Machines should be established in every Regiment. This Machine was made by SAMSON BARNETT, expressly for that Regiment.

Full Directions for preparing ALL the above Drinks are sent with each Machine.

SAMSON BARNETT, 23, Forston-street, Hoxton, London,

Above Twenty Years Foreman to Messrs. TYLOR,

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery, and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B., being so well aware of all the requirements of persons using Machinery where MECHANICAL ASSISTANCE CANNOT BE OBTAINED, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

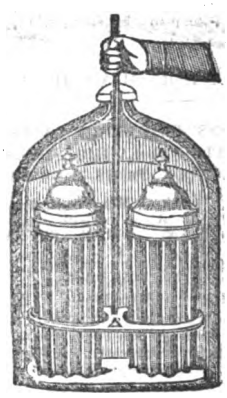
IMPORTANT

TO PERSONS RESIDING IN HOT CLIMATES.



ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Cooler

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

} When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

SOLE MANUFACTURER:

GEORGE SIMPSON, 315, OXFORD-STREET, LONDON.

Orders enclosing remittance can be sent direct, or through Messrs. H. FOGG & Co., Shanghai.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.
JOHN GOSNELL and Co.'s La Noblesse Pomade.
JOHN GOSNELL and Co.'s La Noblesse Soap.
JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—TIMELY WARNING.—The increasing number of deaths should not spread alarm, yet it should beget caution. With the falling leaf the aged and delicate are apt to succumb, unless the first faulty action be corrected, and the first failing functions be invigorated by some purifying and regulating medicine as Holloway's Pills. The prudent, for the security of themselves and their household, should resort to this fine alterative medicine when the digestion grows weak or the circulation becomes irregular, the former state being evinced by eructations, flatulency, and distension, the latter by giddiness, dimness, or drowsiness. These foretokens of impending peril will instantly urge the provident to dispel it by these Pills taken conformably to their accompanying instructions.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 „
Depth of water ... ... 15 „

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.
